The Hon'ble RAI BAHADUR P. ANANDA CHARLU said:—"I share the opinion of the Hon'ble Mr. Rees with reference to the hardship that at present the Native Christian in Southern India suffers. It occurred to me that this was not the proper occasion to go fully into that question. If my Hon'ble friend had not touched upon it, and if he having touched upon it there was none to oppose it, I should probably not trouble the Council with any observations; but fortunately for me it so happens that there is one who has practically exhausted the whole subject. Most of what I had to say to indicate the difficulty has already been said, and in that way it may be a relief to the Council; but I must point out that it is not a question of loyalty at all as the Hon'ble Mr. Smeaton has stated. It is rather a question of equality of taxation. If in the administration of a law a hardship is felt by a certain class, it would be a very curious interpretation of loyalty to say that those people are not to put forward their objections against the hardships that they are suffering. Nor does it follow that because the Burman Christians are so submissive as to shed their blood therefore they are to go on shedding their rupees where they are not bound to do. It is, I think, a method of defining loyalty which does not commend itself to me. That they have for a long time submitted to it—and unconsciously submitted to it—is no argument whatever. In every law that we change we find that that law has been submitted to for a number of years, and we change the law with the fact before us that the law has been submitted to for a number of years. Therefore, the question whether the law has been submitted to ungrudgingly for a number of years or not is utterly irrelevant. The question rather is whether the law is just or whether the law is productive of hardship. If the legislature finds that there is a hardship produced by a particular law, I would say it is their duty to remove the evil, although not a single person who suffers from the hardship has come forward to complain of that hardship."

The Hon'ble SIR JAMES WESTLAND said:—"There is one part of the speeches of my Hon'ble friends Sir Griffith Evans and Rai Bahadur Ananda Charlu with which I entirely agree, and that is the statement that the present occasion is not one in which the very wide subject on which they have spoken can be considered by the Council. The question before us is that of making more certain than it is at present the collection of certain duties which are prescribed by law. I hold that this is a mere question of procedure, and this is not the time to raise the question whether the duties themselves are such as ought to be imposed by Government. They already exist in the law as it at present stands. I am quite aware that there is a certain amount of inequality in the administration of the succession-duties. It is a subject which is, however,

surrounded with many difficulties, and these difficulties have been amply laid before the Council by my Hon'ble friend Sir Griffith Evans himself in March, 1889, but I rather think he took a different view then from what he takes now; for to quote from sentences he spoke then it would appear that his doctrine at that time was that the duties he now urges that the Native Christians should be exempted from should rather be extended to the Hindus and Muhammadans. He points out perfectly correctly that there is an inequality in the duties :—

"It has long been seen that it would be fair in principle to render the payment of such duties compulsory on all alike. But principle is one thing; practice is another."

"And then, talking of the possibility of making the whole of the inhabitants of India pay duties of the kind, he says :—

"What can be got out of them in the way of succession-duties without friction or injustice, it is, I take it, the duty of the Government to itself and to the class which pays these duties to get."

"And he finishes up by saying :—

"It is not unlikely that means will some day be devised for bringing property held under the Mitakshara law within the reach of a succession-duty. I do not think the difficulties will be insuperable."

"I am perfectly prepared to agree that there is an inequality between certain classes in India in respect to the succession-duties, but I am much more inclined to seek to remove them, not in the way which is at present indicated, namely, by exempting the Christians, but in the way in which Sir Griffith Evans himself indicated in 1889, namely, by extending the succession-duties to those classes who are at present, without intention, exempt from them. However, I will finish up by saying, as Sir Griffith Evans and Rai Bahadur Ananda Charlu have said before, that I agree that the present is not the occasion on which this rather difficult subject can be discussed by the Council. That may have to be done at some future time, but there is one remark which I would like to make, and that is that I think far too much prominence has been given in the discussion to one particular point.

"To hear the Hon'ble Mr. Rees speak of Madras, one would think that no persons but the Native Christians in that Presidency contributed to this tax. Now I have the figures before me here of the last three years, and I find that the whole presidency of Madras during that time contributed about Rs. 60,000 or Rs. 70,000 a year; Bombay and Sind, which contains about half the number of the population of the Presidency of Madras, contributed four times as much; Bengal, which contains half as many inhabitants again as the Madras Presidency, contributed from six to ten times as much as the Madras Presidency. It is obvious, therefore, that these probate-duties are not confined in any way to Native Christians generally, and still less to Native Christians in Madras: the principal contributors are at present the Hindus and Muhammadans of Bengal and Bombay.

"Another suggestion has been made in this matter by Sir Griffith Evans, and that is, that the whole subject is foreign to the duty of the Civil Courts. I can only say, looking at it from a purely financial point of view, that I would be perfectly willing to adopt on the whole question a procedure like that at home, that is, that the Civil Courts are only put in action after a certificate has been given by the revenue-authorities that the valuation of the estate is so much. We do not put upon the Civil Courts any duty in the way of collection; we simply say that they must do the same in respect to applications for probate and administration as they do in respect of all other proceedings before them and see that the applications to them are made on a properly stamped document. If we were to lay upon the Revenue-officers the necessity of certifying the duties in every case, the result would be that every person who wished to take out probate or administration would have first of all to go to the revenue-authorities and then have the investigation pursued as to the value of his property. Now the whole Bill as passed by the Select Committee is a Bill intended to allow the proceedings for probate and administration to proceed as far as possible without

any intervention of the part of the Revenue-officer. If the Revenue-officer finds occasion for intervention he has the power to intervene, but I fancy that in by far the majority of cases the Revenue-officer having the power to intervene will not make use of it unless an obvious intention to defraud the revenue was apparent. That is a procedure which from the point of view of the applicant for probate or administration is far more simple and far more easy than laying upon him the necessity of first making an application to the revenue-authorities and satisfying the revenue-authority regarding the sufficiency of his valuation.

"This leads me to another observation which the Hon'ble Mr. Rees made, that is to say, in regard to taking security. I do not think that the Civil Courts should have power to take security. It is not their business to collect the revenue for Government, and they will not, like the Revenue-officers, take the responsibility of seeing that the security is sufficient for purposes of revenue. If the whole matter is handed over to the Revenue-officers, then I have no objection whatever to giving the Revenue-officers within certain limits the power of taking security rather than insisting upon the money being paid down beforehand; but if the matter is to be left to the Civil Courts then I can only quote what the High Court of Calcutta and what the Hon'ble Sir Griffith Evans have said in the matter, that it is not the business of the Court to see that revenue is properly collected."

The motion was put and agreed to.

The Hon'ble SIR GRIFFITH EVANS moved that in the new section 19 H (6) of the Court-fees Act, 1870, proposed by clause 2 of the Bill, as amended, for the words "officer authorized" the words "person authorized by the Court" be substituted, and that to the same the following be added, namely:—

"The person authorized as aforesaid to hold the inquiry shall return to the Court the evidence taken by him and report the result of the inquiry, and such report and the evidence so taken shall be evidence in the proceeding, and the Court may record a finding in accordance with the report unless it is satisfied that it is erroneous."

He said:—"The object of this amendment is two-fold. One is to relieve the Court of the District Judge from having to hold the inquiry itself and enable him to depute somebody else to do so. The other object is to provide some machinery for the making of a report and provide a procedure.."

The Hon'ble MR. RIVAZ:—"I am quite willing to accept this amendment. I understand it is practically applying to these cases a somewhat similar procedure to that laid down in the Civil Procedure Code for local investigation by a Commissioner, and it is, I think, a desirable provision."

The motion was put and agreed to.

The Hon'ble SIR GRIFFITH EVANS moved that to the new section 19I of the Court-fees Act, 1870, proposed by clause 2 of the Bill, as amended, the words "on such valuation" be added, and that after the same the following sub-section be added, namely:—

"(2) The grant of probate or letters of administration shall not be delayed by reason of any motion made by the Collector under section 19H, sub-section (4)."

He said:—"The object of this amendment is, in the first place, to make it clear that the fee is to be paid on the valuation of the assets by the affidavit of the applicant in the first instance. The second part is intended to make it compulsory upon the Court to grant probate at once upon a proper affidavit of valuation being before it, reserving the question of the investigation that may be made by the revenue-authorities afterwards and not to delay the grant of probate because probates or letters of administration, where they are compulsory, are absolutely necessary for the administration of the estate, and if they are not granted quickly the delay may cause loss to the estate and therefore it is necessary to have these grants made at once. In order to make the position of my Hon'ble friend the Financial Member more easy, I have in a later portion

introduced an amendment which enables him directly to collect any excess which may be found on the inquiry at the instance of the Revenue-officers as an arrear of land-revenue; so that they will have the fullest opportunity of collecting it afterwards without delaying the probate."

The Hon'ble MR. RIVAZ:—"I am quite willing to accept this amendment also. The Select Committee in dealing with the Bill recognized that no delay ought to take place in granting probate while an enquiry was going on whether an estate was under-valued, and it is desirable to make the matter quite clear especially having in view my Hon'ble friend Sir Griffith Evans' next proposed amendment."

The Hon'ble SIR JAMES WESTLAND:—"I quite agree with my Hon'ble friend Mr. Rivaz. From my point of view I think we are amply protected by the power which is given to the Collector to intervene, and that power being given, I do not think there is any occasion to lay upon the Civil Court the necessity of postponing the actual grant of probate or letters of administration. The interests of the revenue are sufficiently protected in the power of the Collector to intervene, and I do not think it is necessary to protect them further by ordering or sanctioning any delay in the issue of probate or letters of administration."

The motion was put and agreed to.

The Hon'ble SIR GRIFFITH EVANS moved that in the new section 19J of the Court-fees Act, 1870, proposed by clause 2 of the Bill, as amended, between the words "Any" and "penalty" the words "excess fee found to be payable on an enquiry held under section 19H, sub-section (6), and any" be inserted. He said:—"The object of this amendment is closely connected with the next one, and I have to say a few words to explain it. When this duty was first introduced it was considered desirable, if I may say so, to veil the character of it as a succession-duty, and to treat it merely as an ordinary court-fee, and to depend upon the ordinary penalties attaching to people who pay in insufficient court-fees. The consequence was that many expedients were resorted to. First of all, the Revenue-officers had to depend on indirect pressure, as an improperly stamped document was not receivable in evidence, under one section, and under another section an improperly stamped document was invalid. Then they introduced various amendments which were unnecessary except for fiscal purposes into the Probate and Administration Act, and which will have to come out some day, and they trusted to this policy of side pressure in order to get the full court-fees. Now that that has failed they have asked for a direct power of enforcing the revenue through the intervention of the Revenue-authorities, and it has of course become unnecessary to keep up the other side checks and the side pressure which existed before. I have therefore by these words given to my Hon'ble friend the Finance Member what he had not got by the Bill as amended by the Select Committee. The Bill as amended by the Select Committee rendered it at least an open question in point of law as to whether the word 'penalty' would have covered the excess fee which was found upon an enquiry under this Act to be leviable. I have therefore put in a provision for the benefit of the revenue that if an excess is found to be due by an inquiry under this Act, it shall be leviable in the same way as a penalty under the Act and as if it were an arrear of land-revenue. That puts my Hon'ble friend the Financial Member in a sufficiently strong position not to need the other side pressures, and therefore when I come to the next amendment I will explain how I propose to take some of them away."

The Hon'ble MR. RIVAZ:—"When this point was considered by the Select Committee we were somewhat divided in opinion as to whether the Court or the Collector was the better agency to collect these excess fees. Personally I prefer the agency of the Collector, and now that I am fortified with my Hon'ble friend Sir Griffith Evans' opinion I am quite prepared to accept his amendment."

The Hon'ble SIR JAMES WESTLAND:—"I agree with my friend the Hon'ble Mr. Rivaz."

The motion was put and agreed to.

The Hon'ble SIR GRIFFITH EVANS moved that in clause 2 of the Bill, as amended, after the new section 19J of the Court-fees Act, 1870, proposed thereby, the following be added, namely:—

Sections 6 and 28 not to apply to probates or letters of administration.

"19K. Nothing in section 6 or section 28 shall apply to probates or letters of administration."

He said:—"Owing to this duty being levied as a court-fee on a grant of probate or letters of administration, the result was produced that although the probate had been stamped by the Court on payment of a duty, yet if the duty were insufficient the documents would be improperly stamped and an objection could be raised to its admissibility in evidence or even its validity. Now, inasmuch as probates and letters of administration are letters of authority to administer property, it was, of course, exceedingly inconvenient that they should be subjected to any invalidity of this kind. They stand on an entirely different footing from that of ordinary documents not properly stamped, and now that there is a power on the part of the Revenue-authorities to apply for the excess revenue and to collect it themselves, it is unnecessary to continue these side pressures at all. There are one or two others which ought to have been removed—notably the provisions for revoking probates because of untrue statements in inventories; but these matters were not before the Select Committee and, inasmuch as they are sections in the Probate and Administration Act, I doubted if I should be justified in proposing their removal now."

The Hon'ble MR. RIVAZ:—"I have no objection to this amendment either, but it is a matter that more concerns the Hon'ble Finance Member than myself."

The Hon'ble SIR JAMES WESTLAND:—"There is a provision in the Stamp Act that, when the amount of a stamp-duty has been adjudicated by the Revenue-officer, it shall not be called in question afterwards. I think this proposal of my Hon'ble friend Sir Griffith Evans follows exactly those lines, namely, that when the Revenue-officer has had his opportunity of intervening and has not intervened or through his intervention the proper duty has been adjudicated, no question may thereafter be raised from the point of view of the revenue as regards a sufficiency of the duty. I am perfectly prepared, therefore, to accept the amendment proposed."

The motion was put and agreed to.

The Hon'ble MR. RIVAZ moved that the Bill, as now amended, be passed. He said:—"In doing so I hope my Hon'ble friend Sir Griffith Evans will allow me to express my acknowledgments to him for his careful study of the Bill and for the improvements which have been effected by his amendments."

The Hon'ble SIR GRIFFITH EVANS:—"I do not desire to say anything on this motion except to remark that no real answer has been attempted to the grievance of the Native Christians. That they do not pay the bulk of the tax renders it easier and cheaper to relieve them. That I, when discussing the inequality of the tax in 1889, did not point out the special hardship to Native Christians, is not strange seeing that I am not a Native Christian myself, and had not had my attention at that time directed to their position. But that is no reason why I should not come to their aid when I see how they are fallen among tax-gatherers and are sore smitten. To me the time of the Council appears to have been properly spent, and I should not have felt justified in allowing this Bill to be passed without protest, as it increases the injustice under which the Native Christians are suffering."

The motion was put and agreed to.

CURRENCY-NOTES FORGERY BILL.

The Hon'ble SIR JAMES WESTLAND moved that the Report of the Select Committee on the Bill to amend the law relating to the forgery of currency-notes and bank-notes be taken into consideration. He said:—"I mentioned, when I presented the Report of the Select Committee, that the objections which had been taken on several sides to the Bill as originally framed were, so far as I understood, removed by the alterations which the Select Committee had made in the form of the Bill. I trust I may take the fact that no amendments have been proposed by any of the Hon'ble Members of Council as an indication that they have been sufficiently satisfied on this point."

The Hon'ble MR. CHALMERS said:—"Perhaps I may say one word as to the amendments made in Select Committee. For the most part, as Hon'ble Members are aware, those amendments were formal with the exception of two amendments in substance, and two only. The first is one to which, I think, everyone will agree. We have made it a substantive offence to counterfeit a currency-note or bank-note. The second amendment is to some extent a weakening of the law, but it is an amendment which was suggested to us from several sides and which we have seen our way to adopt. We have divided the original first section of the Bill into two parts. The first part punishes the offence of trafficking in forged and counterfeit notes. In that case it will be sufficient for the prosecution to prove that the person who traffics in the note or attempts to deal with it as a genuine thing, knew or had reason to believe the note to be forged. It is quite clear that a man commits an offence if he has a forged note in his possession which he has reason to believe to be forged and tries to pass it. Then comes the question of the next section; and here we have modified the original proposal of the Bill. We have gone back from the rule of English law, a law which has been in force for forty years, and we have put in, in deference to the representations received, an extra burden of proof on the prosecution. We have provided that wherever a person is found in possession of forged or counterfeit notes which he knows or has reason to believe are forged or counterfeit, that the prosecution must, in addition, prove that he intended them to be used as genuine. In English law it is sufficient if the notes are found in his possession and if he cannot prove that his intentions were lawful. We have reversed the proof and laid the burden on the prosecution of proving not only that the accused was in possession of the forged notes, but also that he intended these forged notes to be used for some fraudulent or wrongful purpose. I thought it right to make this explanation, because I see in many quarters that there were apprehensions as to what might be the effect in India of introducing the English law."

The Hon'ble MR. SMEATON said:—"I am glad, my Lord, that the Draconian severity of section 489A of the original Bill in respect of *possession* of forged notes has been softened by section 489C of the amended Bill. May I make a suggestion that, as the burden of proof of dishonest knowledge and intention has now been laid on the prosecution and as the punishment has been reduced from transportation for life to imprisonment for seven years, and as the offence has also been made bailable, arrest by a police-officer without a warrant may be disallowed. My reason for making this suggestion is this. I speak chiefly with reference to the province which I represent, in which I may mention for the information of the Council that the whole of the great export staple—rice—of the province is annually purchased with hard silver rupees. Last year the sum paid for the rice which was brought to the ports of Burma was eleven and one-third crores of rupees paid in hard silver. The Burmans have an aversion to the use of currency-notes. Efforts have been made for the last twelve years, as the Hon'ble Financial Member probably knows, to induce them to use currency-notes, but the efforts have been attended with very small success indeed, and any added terror—any addition to the distrust and suspicion with which Burmans look upon currency-notes—in the shape of arrest by a police-

officer without a warrant would, I take it, very likely postpone still further the realization of our object."

His Excellency THE PRESIDENT :—"I am sorry to interrupt the Hon'ble Member, but he seems to me to be proposing an amendment in the Bill without giving notice of any such amendment."

The Hon'ble MR. SMEATON :—"I am aware of this, Your Excellency, and must apologise for it, but I thought I might make a suggestion in case the Hon'ble Member in charge might have thought fit to make a slight alteration in the schedule and change the words 'arrest without warrant' to 'arrest with warrant of a Magistrate'."

The Hon'ble SIR JAMES WESTLAND :—"I think I can give the Council a very good reason why the Hon'ble Mr. Smeaton's proposal should not find acceptance. In the first place, I think he is not quite right in speaking of the aversion which the Burmans have to using currency-notes. What the Burmans do with these currency-notes is this—they have at the end of the rice season a very large amount of silver in their possession. This silver they desire to retain until the next rice reason comes round. They accordingly present their silver to the Currency Department and take out those very currency-notes of which, according to the Hon'ble Mr. Smeaton, they have such an abhorrence. They keep these notes in their possession until the next rice season comes round, and then they take them to the Currency Office, change them for silver, and use that silver for their rice transactions up-country. I am not afraid of ruin dropping upon the Currency Department by reason of the Burmans ceasing to use currency-notes. There are a very large number of people in India who are not Burmans, and I am perfectly satisfied with the amount and the security of our circulation. What I wish to point out with reference to the particular point raised by the Hon'ble Mr. Smeaton would be that his amendment would go to weaken the whole procedure of—"

His Excellency THE PRESIDENT :—"There is no amendment before the Council. The Hon'ble Mr. Smeaton has not moved any amendment and cannot at this stage move one."

The Hon'ble SIR JAMES WESTLAND :—"I shall say then that the proposal of the Hon'ble Mr. Smeaton would destroy the whole efficiency of the Bill. What would actually happen is what has happened in most cases, namely, that these counterfeit notes would be brought to the Currency Office, they would be there presented for payment, they would be found to have been forged, and the person who presented them would be handed over to the police for inquiry. If it was made part of the law that the police should not have this authority to arrest without warrant, then the man would simply go away, and the possibility of investigating the case would cease."

The motion was put and agreed to.

His Excellency THE PRESIDENT here explained that this was the stage in the Bill at which it was in the power of the Hon'ble Member to move an amendment if he wished to do so. Rules 28 and 29 of the Rules for the Conduct of Business provided that, on a Bill being taken into consideration by the Council, an Hon'ble Member might move an amendment without the usual notice if no Member of Council objected to his doing so. HIS EXCELLENCY gathered, however, that Mr. Smeaton did not wish to proceed further in the matter.

The Hon'ble MR. SMEATON said that he did not desire to proceed further.

The Hon'ble SIR JAMES WESTLAND moved that the Bill, as amended, be passed.

The motion was put and agreed to.

GLANDERS AND FARCY BILL.

The Hon'ble MR. RIVAZ presented the Report of the Select Committee on the Bill to consolidate and amend the law relating to Glanders and Farcy. He hoped, he said, at the next meeting of the Council to move that the Bill be passed.

INDIAN TARIFF ACT (1894) AMENDMENT BILL.

The Hon'ble SIR JAMES WESTLAND moved for leave to introduce a Bill to further amend the Indian Tariff Act, 1894. He said:—" I see that it is stated in the List of Business that my object is stated in the title of the Bill. With all deference to the Hon'ble Member who has charge of the Legislative Department, I think it would require a large amount of perspicacity for anyone to see my object stated in the title of the Bill. As a matter of fact, I am proposing to open an entirely new chapter in our fiscal history, and which I have already endeavoured to make plain, in language which is not legal and not legislative, but which, I fancy, has been understood, by statements made in the newspapers.

" I propose to ask the leave of the Council to introduce a Bill which will have the effect of conferring upon the Government a power to impose countervailing duties in the case of bounty-fed sugar imported from European countries. I shall not take up the Council's time by explaining the economic effect of bounties and of countervailing duties. I take it for granted that Hon'ble Members know these matters as well as I do myself, and, if I refer to them for a short time, it is only with the object of introducing to the Council the facts with regard to which I shall have to satisfy them in asking leave to introduce this Bill.

" It is well known that the effect of bounties is two-fold. It affects in two entirely opposite directions the interests of the consumer and the producer. So far as regards the consumer, it brings the article of consumption to the market at a cheaper price than would otherwise be available to him. In that respect he receives benefit. But the producer looks at it from a different point of view. It supplants in the market the produce which he would otherwise bring to it by a competitive produce which has attached to it an artificial advantage. England, of course, is, as regards sugar, a nation of consumers. No project for the imposition of countervailing duties has there been made; but India, on the other hand, is, to a very large extent, a nation of producers, and the productive interests of the country in respect of sugar are, as I hope to satisfy the Council, extremely important, and ought to be safeguarded by any measures that we can take. As regards the interests of the producer, I shall quote some official documents which have reference to them, and will show that sugar is a particularly important product in this country. Hon'ble Members will no doubt excuse my beginning my quotations by a reference to an old Financial Statement—that of 1877-78. Sir John Strachey in talking of sugar in that statement says:—

'It is one of the most important agricultural staples of those provinces, and it is important not only to the agriculturists and manufacturers and consumers, but directly to the Government, which looks greatly to sugar cultivation for its irrigation revenue.'

"Then again, when the Chamber of Commerce, Calcutta, made a representation about a year ago on the subject of sugar, they also drew attention to the extreme importance of the productive interests connected therewith. They enclosed a memorandum from the firms interested in the sugar industry in Calcutta, in which it was said:—

' The importance of cane cultivation in the agricultural scheme of almost every Province in India is perhaps hardly appreciated, except by those officials whose duties have brought them into association with the settlement of land-revenue. The remark may be found in many a settlement report that in such and such tracts the entire rent, and therefore the entire revenue, is paid from the cane-field. " The peasants say," writes the Settlement-officer of Bareilly, " that sugarcane is to other tillage as the elephant to other beasts." In almost every settlement report and district gazetteer of the Punjab, of the North-Western

Provinces and of Oudh, the extremely important position held by sugarcane in maintaining agricultural prosperity is prominently noticed, as the extracts quoted below sufficiently indicate;'

and then they proceed to make the extracts justifying the statement. Again, in a report from the Lieutenant-Governor of the North-Western Provinces received the other day, talking of the possibility of the reduction of cultivation of sugar in the North-West, he says:—

'The closing of refineries must lead to a contraction in the acreage under sugar. This reduction might, if the refining industry were destroyed, reach a maximum of 250,000 to 300,000 acres. Such a reduction in the acreage under a valuable and paying crop would cause far-reaching injury to landlords, tenants and the labouring population, and might affect the well-being of the rural classes to an extent that would produce serious discontent in the sugarcane-growing regions. The stability of the Government revenue would be affected, not indeed directly, because the land-revenue assessments are not ordinarily made on the special or crop rents that are in some places paid for land let out for a cane crop, but because the reduction of the profits of a valuable crop would impair the rent-paying capacity of the tenants, and thus cripple the resources of the landlords.'

"Perhaps these extracts will show the importance which is attached from the agricultural and economic point of view to the maintenance of sugar cultivation. With reference to the interests of the consumer, which I mentioned are entirely in the opposite direction, there is one very considerable discount to be reckoned in India, and that is, that the bounty-fed sugar is a refined sugar, and the sugar which is affected by it in this country is mostly the refined article. The common people of this country, that is, the poorer classes, do not, for the most part, consume refined sugar, although they are taking to it lately in larger quantities. The principal staple, however, of their consumption is unrefined sugar, and, so far as we can trace it at present, although the unrefined sugar has to a certain extent been affected by the large importation, to which I will presently allude, of bounty-fed sugar, still it is mostly in the direction of the cheapening of refined sugar that the effect of this bounty-fed import has been seen. Accordingly, although the consumer has benefited by the cheapness of the bounty-fed importations, yet the consumer who is so benefited is not the poorer classes but the classes who are comparatively well able to bear the burden of the removal of the cause cheapening their sugar. I find that the report made by the West Indian Commission expresses this view even with regard to England. They state:—

'It has, we believe, been argued that the reduction in the price of sugar which has resulted from the bounty system is such a source of gain to the British Empire as a whole that it would not be right for Your Majesty's Government to initiate any measures to bring about the abolition of that system. In that argument we do not concur. * * The benefit which the British Empire as a whole derives from any lowering of the price of sugar due to the operation of the bounty system is too dearly purchased by the injury which that system imposes on a limited class, namely, Your Majesty's West Indian and other subjects dependent on the sugar industry. * * We have, therefore, no hesitation in saying that the abolition of the bounty system is an object at which Your Majesty's Government should aim, if they should see their way to securing that result, and that the accomplishment of such an end is worth some sacrifice, provided always that such sacrifice would be really effective and would not involve evils out of all proportion to those which it is desired to remove.'

"Of course we are not, so far as this Legislative Council is concerned, considering the interests of the West Indian subjects of Her Majesty; but the very expressions here used might be adapted to India with a small variation, and we might say that the benefit which India as a whole derives from any lowering of the price of sugar due to the operation of the bounty system is too dearly purchased by the injury which that system imposes on one class, namely, the agricultural population which is dependent on the sugar industry of the country.

"I wish to bring before the Council the actual facts of importations into this country so as to show to what an extent in recent years the importation of bounty-fed sugar has increased. I have before me the statistics of importation for the last twenty years stated in thousands of hundredweights. The facts are that for the first ten years the importation of sugar was about one million hundredweight; towards the end of that period it had risen to one million and

a half hundredweight. By far the largest portion of this, almost the whole of it, was Mauritius sugar. European sugar hardly entered into the figures at all. In none of the first five years was there any European importation at all, and during the last five years there was an importation of 15,000, 10,000 and 11,000 hundredweight in three of the years concerned. After 1890, although the importation from Mauritius continued and rather increased, that is to say, moved up from about one million three hundred thousand to one million six or seven hundred, yet the importation from Austria and Germany vastly and suddenly increased. The year 1890-91 was almost the first year in which German sugar was imported, and in that one year 709,000 hundredweight were imported. The figures then fell off for a short time, but during the last three years, 1896-97-98, the amount which has been imported from Austria and Germany combined has been 874,000 hundredweight; then the year after that more than two million hundredweight, and in the ten months of this year more than a million hundredweight has been received. This is a very large and a very sudden increase, and I will mention the facts to which it is due. In 1897 the Government of the United States passed an Act, upon which the Bill now before the Council is framed, by which they imposed countervailing duties upon sugar. The effect of that Act was to cut out the bounty-fed sugar of Europe from the markets of the United States. The consequence was that that bounty-fed sugar was driven to find its market in India, and it found its market very suddenly and very abundantly. Hon'ble Members are no doubt aware that a couple of years ago the attention of Her Majesty's Government was drawn to the critical condition of the sugar industry in the West India Islands. They sent out to inquire into the subject a Commission of which two members were my own distinguished predecessor Sir David Barbour, and the Hon'ble Sir Edwin Collen's distinguished predecessor Sir Henry Norman. They made a report in which they showed that the sugar industry of the West India Islands, upon which the commercial prosperity and even the administrative possibilities of the West Indian Colonies depended, was in an extremely critical state, and they attributed it all to the existence of the bounty system. Thereupon Her Majesty's Government took what they considered the only means of having the bounty system revised, namely, they proposed to call a Conference of the various European Powers in order to consider the whole question of bounties. At that time the Government of Belgium had had its attention drawn to the subject, and they met the invitation to Conference issued by Her Majesty's Government by stating that they had already taken measures to have a Conference of the Powers. This Conference took place in Brussels in the summer of 1898. It was a Conference which came to no practical conclusion. The proposals regarding the dropping of the bounty system were opposed for various reasons, mainly by France and Russia, but no practical conclusion was come to. The Conference separated on the understanding that the Government of the King of the Belgians would continue by diplomatic action to pursue its object. At the instance of the Calcutta Chamber of Commerce we had taken measures to have India represented by a member at that Conference, and Mr. Ozanne, who was a recently retired Civil Servant of the Presidency of Bombay, was the Indian representative. After the Conference separated we received a letter from the Chamber of Commerce of Madras, and also from the Chamber of Commerce of Upper India, in which they recommended that now, as the proposals of the Brussels Conference proved ineffective, we should at once take measures to impose a countervailing duty. Madras is to some extent an exporting Province, and it grows a fair quantity of sugar; but Cawnpore, the seat of the Chamber of Upper India, is the centre of a most important sugar industry and is much more in touch with the subject and much more closely affected by it than any of the other Chambers. The Chamber of Commerce of Calcutta has also taken up the subject, and I find from their last annual report that they recommend the imposition of countervailing duties as the only alternative in the event of further negotiations regarding the abolition of bounties proving futile, and that a continuance of unrestricted importation will probably result in the closing of the remaining sugar refineries in the district of Jessore, a large number of which have already ceased to work.

"But I am a little in advance of the subject when I refer to the closing of

the sugar refineries. I wish to show that it is not merely a matter of theory, but an ascertained fact that the sugar industry of this country has been very adversely affected.

"In India altogether about 3,000,000 acres are under sugarcane cultivation. Of this, 1,300,000 are in the North-Western Provinces and Oudh, 1,000,000 are in Bengal, and the remaining 700,000 are scattered over the other Provinces of India. It is obvious, therefore, that by far the most important Province from the sugar-producing point of view is that of the North-Western Provinces and Oudh. Now, we have obtained very full particulars of the recent condition of the sugar cultivation and of the sugar-refining industry in the North-Western Provinces, and I may at once say that the immediate effect upon cultivation has not been very great. Apparently the production has diminished, taking the whole of India, from about 3,000,000 to about 2,600,000, that is to say, a drop of about 13 per cent.; but there are many reasons why cultivation should not be immediately affected. In the first place, the natives of this country are extremely conservative in their habits and customs. It is very difficult to move them from the existing cultivation, and they will for a long time sustain loss in that cultivation before absolutely giving it up. Moreover, agriculture is largely carried on under advances for delivery of actual produce, and these obligations are obviously obligations which can only be carried out by continuing cultivation, so that the mere depression in the price of sugar does not make itself immediately seen in the reduction of cultivation. It will do so ultimately beyond a doubt. As regards refineries, however, we have strong evidence that the importation of bounty-fed sugar is causing very serious disaster. In a letter from His Honour the Lieutenant-Governor of the North-Western Provinces he tells us:—

"There has been a substantial decrease in the acreage under cane in those parts of the Province where the margin of profit on the cultivation is least, this decrease being probably due to the competition of bounty-fed sugar. Further experience is, however, required to arrive at certain conclusions in this respect.

'Foreign sugar does not as yet compete with *gur*, but it is now competing with refined sugar for home consumption, of which article it has seriously reduced the exports. It has also already caused the closure of numerous refineries, while it has seriously endangered the stability of others. The Director gives statistics showing that 120 refineries have stopped working, but his figures on this point are incomplete. He has since informed the Lieutenant-Governor that no less than sixty have been closed in a part of the district of Azamgarh alone, of which no account is taken in his memorandum.

'The price of refined sugar has been reduced about 12 per cent. in five years, and this decline has had a general lowering effect on all sugar prices.'

"He goes on to report also that—

'The information available points to the probability of the further cheapening of the production of bounty-fed sugar in the future, to its importation in increasing quantities, and to the further under-selling of the native refiners.

'It is of much more importance to these Provinces to preserve their sugar industry on the basis of present arrangements than to have a cheap foreign sugar supplied to the consumers of the refined article.

'There is no prospect of native processes being so improved that refineries could hold their own against the foreign competition assisted by bounties."

"I may mention that in the description of the condition of things in the North-Western Provinces we are not dependent upon the reports of the North-Western Provinces alone. For example, in reply to our enquiries, which we issued last September, we have a report from the Resident of Hyderabad regarding the sugar consumption in Berar. He says:—

'In 1893-94 the imports of refined sugar from the North-West Provinces were 27,702 maunds; in each subsequent year there has been a steady decline till in 1897-98 the quantity imported amounted to only 11,638 maunds, or considerably less than half the former quantity. A more than corresponding rise is to be observed in the imports of refined sugar from Bombay port; commencing at 50,158 maunds in 1893-94, the figure has now risen to 1,27,625 maunds, or more than 2½ times the former import.'

"So that, whether this sugar which had been imported in Bombay and Berar is bounty-fed or not, it is obvious that the conditions of the trade are at present

such that a Province, which had formerly a large supply from the North-Western Provinces, has ceased to derive its sugar from there. The same is the case as regards the Punjab. The Government of the Punjab have not as yet sent us their report but they have sent us in anticipation of the report a telegram which I shall read. They say :—

'Imported sugar almost entirely superseding Indian refined sugar in towns. Consequently great falling off in imports of refined sugar from North-Western Provinces, previously the chief source of supply. Native sugar refineries are also gradually being closed. In the Punjab, cultivation, though not extending, has not fallen off, as the demand of the agricultural population, which is chiefly for unrefined sugar, is still sufficient to maintain prices at a level which renders cultivation profitable.'

"It will be seen, therefore, that the information which we have received as to the condition of the North-Western Provinces in respect of their sugar industry, whether we look at what has been said by the Government of the North-Western Provinces itself, or by the effect as observed from the outside by the Government of the Punjab and the Resident of Hyderabad who represents the Berars, is the same, namely, that the prospects of the industry in the North-Western Provinces are very much like the prospects which have been described by the Commissioners who were sent to investigate the matter in the West India Islands. As regards Calcutta it may be sufficient for me to refer to the statement of the Chamber of Commerce in their last annual report—a statement which I have already quoted—

'In any case a continuance of the unrestricted importation of bounty-fed sugar would probably result in the closing of the remaining sugar refineries in the district of Jessore, a large number of which had already ceased to work.'

"I have some further information which I might lay before the Council regarding the falling off in the price of sugar which, of course, is the direct effect of the importation of the bounty-fed sugar and through which those deleterious effects I have been describing have been operating. The general falling off in prices during the last three years has been (at Cawnpore) a falling off of about one and a half rupees out of a price of about 11, 12 and 13 rupees per maund—a sufficiently serious falling off to necessitate the closing of the refineries, and, when the refineries are closed, there must, no doubt, follow a falling off in the cultivation. I think therefore the Council may take it as proved that we are in the presence of a real danger to an important industry ; and I trust they are sufficiently convinced that the time has come when, if we are to protect our sugar industry in this country, which is extremely important, it is necessary for us to take measures against bounty-fed importations. Of course we might wait a little longer; we might wait till our refineries are still further closed, and till the raiyats are so impoverished as to give up cultivation altogether ; but it is better in these matters, I think, to take protective measures beforehand, because it is far more easy to revive and encourage an existing industry than to restore one which has been by adverse circumstances extinguished.

"It is hardly necessary for me to touch upon the extent of bounties, or on their effect upon the trade of foreign countries. We are legislating only as regards India. But I would like to point out that the measure we are taking, or which I am asking the Council to take, is not necessarily a measure that condemns the action of foreign countries in putting bounties upon their sugar. We have only regard to our own internal concerns, and it may be perfectly possible for us even to approve the action of foreign Governments in putting a bounty upon their sugar and at the same time to take measures to prevent their having an injurious effect upon our own cultivation. I observe that the argument which the representative of France laid before the Brussels Conference as justifying the granting of sugar bounties in France was this. He said it is all very well for England to denounce sugar bounties. England is the mistress of the seas; she can look forward with confidence even to a state of isolation arising out of war ; foreign ports will still be open to her and her ports will be open to importation from foreign countries ; but in the case of France it is exactly the opposite. If France is isolated and an enemy of France has

command of the seas, then the result might be a very serious national disaster. It is the duty of the Government of France, as a mere question of national preservation, to take care that France shall be independent of foreign countries in the matter of her provisionment. If a certain quantity of sugar is absolutely necessary for the inhabitants of France, then the Government of France must take care that that amount of sugar shall be forthcoming within an area that is under her own command, and, if the cultivation under normal circumstances is not sufficient to produce it, it is legitimate for the Government, by the operation of bounties, to give sufficient encouragement to the internal cultivation of sugar. It is therefore a matter of internal administration. What I point out with regard to this is that we may quite agree with them. We are not bound in any way to denounce the system of bounties as a matter of internal administration of any foreign country. We only wish to protect our own industry, and we claim the same right to preserve our industry in this country as foreign nations no doubt claim to preserve and encourage the sugar industry and sugar cultivation in their own territories."

The motion was put and agreed to.

The Hon'ble SIR JAMES WESTLAND introduced the Bill.

The Hon'ble SIR JAMES WESTLAND moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India and in the local official Gazettes in English. He said:—"The Bill, I may state, is in form a sufficiently simple one. It is copied in its wording from the Bill which is actually operative in the United States of America. We take power to impose, in addition to the ordinary tariff which is levied under the Tariff Act, a further duty equal to the amount of bounty which is granted by any foreign nation. The wording of the Act is in short the same as the wording of section 5 of the United States Act of the 24th July, 1897. In the United States they have a slightly different form of legislation from ours; that is to say, the Act itself imposes the duty, but lays down directions that the Executive shall prescribe rules for its assessment and regulations for the carrying out of the purposes of the Act. In this case we have slightly modified the procedure, and we give the Government power to impose the necessary duties as well as to lay down these rules and regulations. I hope that the Act will be considered sufficiently simple to pass without being referred to a Select Committee, and it is the intention of the Government to pass it if possible without its being examined by a Select Committee during the currency of the present session."

The Hon'ble MR. ALLAN ARTHUR said:—"I should like to say that I support this Bill. As the Hon'ble Sir James Westland has said, the Bengal Chamber of Commerce urged that legislation in this direction might be undertaken. It might be urged that if foreign Governments are generous enough to give us sugar under cost-price it would be rather foolish of us not to take the sugar on those low terms and grow something else on our sugar land. I think, as the Hon'ble Sir James Westland has pointed out, the interests of the producer in India are greater than the interests of the consumer, and as the unrestricted importation of beet sugar is likely to kill the sugar industry in India altogether, I think that legislation will be of great benefit to a great many people in India. With reference to the Hon'ble Sir James Westland's remarks with regard to the passing of the Bill this session, I should like to call his attention to one point, namely, that in putting the Bill into operation there may be cases of great individual hardship. I understood him to say that the probability was that the duty which would be imposed would be equivalent to the bounty that the foreign Governments give. I think it is highly improbable that the price of sugar will rise in India to the extent of the duty that will be imposed. I may say that there has been a very large quantity of beet sugar sold 'to arrive,' as it is called, in Calcutta, that is, shipment for months ahead, and if the price of sugar does not rise to the same extent as the amount of the duty, then I think the buyers of that sugar will probably be very heavy losers by this legislation, unless

provision is made to avoid this; and I hope the Hon'ble Sir James Westland, in making arrangements to bring the Bill into operation, will consult the mercantile community in the matter."

The Hon'ble SIR JAMES WESTLAND said: "The Hon'ble Mr. Arthur was good enough to mention this matter to me before the commencement of the proceedings in Council. There is a provision in the Tariff Act as it stands which alters the terms of contracts in which the conditions as regards the payment of customs-duty have been altered by new legislation. I do not know if that would go far enough in giving relief in the cases to which the Hon'ble Mr. Arthur refers; but in legislation like that which I have just been announcing it is always difficult to enter into the matters of detail to which the Hon'ble Mr. Arthur has referred before taking up the general question, because it is necessary to keep our intentions secret pending preliminary consideration, and it is impossible therefore to consult people in regard to details. However, I hope to be able to settle this matter in consultation with the Hon'ble Mr. Arthur, and possibly in consultation with the sugar merchants who represent the industry in Calcutta."

The Hon'ble RAI BAHADUR P. ANANDA CHARLU said:—"I very gladly welcome this Bill. I consider it to mark a very important epoch by way of a departure in the fiscal legislation of this country. The reasons for my considering so I shall reserve for a future occasion, as the Hon'ble Financial Member has stated that very probably this measure will be brought up for discussion and determination during this session. I will at present only make this observation that even from the point of view of the consumer it is quite easy to shew that this measure will be a welcome one."

The motion was put and agreed to.

The Council adjourned to Monday, the 20th March, 1899.

H. W. C. CARNDUFF,
Offg. Secy. to the Govt. of India,
Legislative Department.

CALCUTTA;
The 16th March, 1899.

SUPPLEMENT TO

The Gazette of India.

No. 11.   CALCUTTA, SATURDAY, MARCH 18, 1899.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

APPROPRIATION REPORT
ON
THE ACCOUNTS
OF
THE GOVERNMENT OF INDIA
FOR
1897-98.

BY

A. F. COX,

COMPTROLLER AND AUDITOR GENERAL.

CONTENTS.

APPROPRIATION REPORT ON THE ACCOUNTS OF 1897-98.

GENERAL REVIEW.

Throughout the report the figures are tens of rupees (Rs. 1 = R10), with the last two figures cut off for brevity, thus, 149,7 reads one hundred and forty-nine thousand seven hundred tens of rupees.

1. The Budget Estimate of 1897-98 anticipated a deficit of 2,464,0, notwithstanding that the rate of exchange, 14·46*d.*, taken in it, resulted in an improvement of 1,360,0 as compared with the Estimate of 1896-97. Owing to a continuation of the drought of 1896, the Estimate anticipated a loss of 1,337,8 under Land Revenue and Railway earnings, while it provided 3,641,2 for actual famine relief. The expenditure however exceeded even this large provision, owing mainly to the monsoon rains being late though ultimately very favourable. There was also a renewal of plague which necessitated expenditure on preventive measures in every Province, but especially in Bombay.

2. In addition to the calamities of famine and plague, the Government of India had to meet heavy charges in repairing the damage done to buildings and Railway works by the earthquake of the 12th June 1897, which affected the north-eastern parts of the country. The earthquake was followed by trouble on the North-West Frontier, which involved additional military expenditure of 3,848,0. The expenditure on Famine Relief exceeded the Budget provision by 1,684,4, chiefly in the Central Provinces and Madras. In the former, relief had to be continued later than had been expected, because a series of bad seasons before 1896-97 had greatly impoverished the people; while in Madras the extent of the distress was under-estimated. There were excesses too in Bombay and the North-Western Provinces, mainly due to the late arrival of the monsoon rains. Altogether the loss of Revenue and additional expenditure, due directly or indirectly to famine, amounted to some 8,920,8. To meet these unforeseen demands it was found necessary to reduce expenditure on Railway Construction; to postpone till January 1898 all other expenditure that could be postponed; to stop the sale of Council Bills for 14 weeks from September 8th to December 15th, and to obtain a remittance from the Secretary of State of one crore of rupees by means of Bank drafts. There was a large falling off under Opium Revenue, and Salt yielded a worse result owing to the postponement of actual payment to the following year on the security of Government Paper under rules in force in Madras. On the other hand, there was a considerable and unexpected improvement under Railways owing to the movement of grain into the famine districts and the conveyance of troops to take part in the Frontier Operations, while the special demand for canal water resulted in a large improvement in Irrigation Revenue. The greatest improvement was however due to the rise in the rate of exchange from 14·46*d.* to 15·35*d.*, which produced a saving (including exchange compensation) of 1,648,2. The net result of the year's accounts is a deficit of 5,359,2.

3. No changes in classification of Revenue and Expenditure requiring special notice were made during the year.

4. The following summary gives the Budget and Account figures of 1897-98, which are reviewed in this report. The details will be found in the statements on pages 584 to 596 :—

Receipts. Budget.	Receipts. Accounts.	Revenue and Expenditure.	Outgoings. Budget.	Outgoings. Accounts.
63,774,6	63,154,3	A Principal Heads of Revenue .	11,229,4	10,816,8
841,3	872,2	B Interest	3,550,0	3,472,3
2,982,8	3,370,6	C Post Office, Telegraph, and Mint	2,891,2	2,869,5
1,689,2	1,723,5	D Civil Departments . .	15,467,8	15,739,6
1,023,1	941,0	E Miscellaneous . . .	5,913,0	5,716,8

36,832,8	34,920,4	GRAND TOTAL .	36,832,8	34,920,4

Comparison with the year 1896-97.

5. The comparison in respect of revenues with the year 1896-97 is as follows :—

REVENUES.	1896-97.	1897-98.	Difference. 1897-98, greater (+) or less (—).
Principal Heads of Revenue	62,192,4	63,154,3	+961,9
Interest	1,082,6	872,2	—210,4
Post Office, Telegraph, and Mint	3,011,6	3,370,6	+359,0
Civil Departments	1,678,6	1,723,5	+44,9
Miscellaneous	1,066,6	941,0	—125,6
Railways	20,297,8	21,260,9	+963,1
Irrigation	3,150,7	3,569,8	+419,1
Buildings and Roads	696,2	667,8	—28,4
Army Services	953,3	881,9	—71,4
TOTAL	94,129,8	96,442,0	+2,312,2

6. The important variations under *Principal Heads of Revenue* are the following:—

Land Revenue	+1,709,2
Opium	—1,229,4
Salt	+172,5
Excise	—124,7
Provincial Rates	+186,4
Customs	+149,8
TOTAL	+863,8

7. The increase under *Land Revenue* occurred chiefly in the North-Western Provinces (615,3), Madras (291,7), Bombay (276,8), Burma (249,4), Punjab (176,4), and Bengal (101,3). It was due chiefly to excellent harvests and high prices having rendered it possible to collect arrears in these Provinces. The improvement under *Provincial Rates* was due to the same cause, but in both cases the comparative increase was the greater in consequence of the low collections and large remissions of the previous year. Under *Opium* there was a reduction of 859,4 under Bengal Opium owing to a large fall in price (from R1,243 to R1,023 per chest). There was also a falling off of 367,8 in Opium Pass Fees, due partly to a diminished demand in China, and partly to a reduction in the rate of duty (R600 to R500). Under *Salt* the increase was due partly to a revival of the trade after the famine disappeared, and partly to a larger proportion of cash transactions in Madras than in the previous year. The decrease under *Excise* was almost entirely due to the famine. Under *Customs* the improvement occurred chiefly in Import duties in Madras and Bombay, mainly in the duties on oils, silver bullion and coin, and articles of food and drink.

8. Under *Interest* the decrease was mainly caused by the fact that a premium was realized on loans issued both in India and in England in 1896-97, while the loan issued in 1897-98 was at a discount. There was an increase of 95,7 in *Post Office* Revenue, and of 237,8 in *Telegraph* Receipts, the latter being due to the large increase in message traffic owing to the Military Operations on the North-West Frontier, the famine, plague, and the earthquake of June 1897. There was an increase in *Mint* Receipts, due chiefly to a large dollar coinage for the Straits Settlements and a re-coinage of Kashmir and Bhopali rupees. Under *Civil Departments* the improvement occurred chiefly under Marine, and was due to larger recoveries on account of hire of vessels employed in conveying troops to the south coast of Africa, Mombassa, and Suez, and to and from the Cape and Mauritius. The decrease under *Miscellaneous* occurred chiefly under Gain by Exchange (100,2).

9. Under *Railway Revenue* the improvement was mainly due to the running of extra troop and mule trains and to the movement of food grains into the famine districts. The chief contributors to the improvement were the North-Western Railway (594,9), the Eastern Bengal Railway (477,8), and the East Indian Railway (433,6). Under *Irrigation* the improvement occurred mainly in the Direct Receipts from canals in the North-Western Provinces and Oudh (145,5), and the Punjab (120,4), owing to the drought, but partly also to the development of irrigation from the Chenab Canal. An improvement of 92,9 occurred under Indirect Receipts under the Godavari and Kistna Delta systems.

10. A comparison of the expenditure side is given below. The average rate of Exchange for the Secretary of State's drawings in 1897-98 was 15·3539*d*. against 14·4505*d*. in 1896-97. The decrease under the different heads in the exchange on the English expenditure is shown separately:—

	1896-97.	1897-98.	DIFFERENCE, 1897-98; GREATER + OR LESS — In the Exchange, on English expenditure.	Due to other causes.	TOTAL.
Direct Demands on the Revenues . . .	10,909,7	10,816,8	— 9,0	— 83,9	— 92,9
Interest	3,453,9	3,472,3	— 117,2	+ 135,6	+ 18,4
Post Office, Telegraph, and Mint	2,711,7	2,869,5	+ 13,1	+ 144,7	+ 157,8
Civil Departments . .	15,445,2	15,739,6	— 49,5	+ 343,9	+ 294,4
Miscellaneous . .	5,856,7	5,716,8	— 208,6	+ 68,7	— 139,9
Famine	2,126,4	5,363,1	— 4,5	+3,241,2	+3,236,7
Construction of Railways .	12,8	3,8	...	— 9,0	— 9,0
Railways . . .	22,957,8	22,693,5	— 536,9	+ 272,6	— 264,3
Irrigation . . .	3,251,0	3,144,1	— 4	— 106,5	— 106,9
Buildings and Roads .	5,783,3	5,418,9	+ 8,0	— 372,4	— 364,4
Army Services . .	24,255,3	26,996,8	— 392,9	+3,134,4	+2,741,5
Special Defence Works .	94,6	23,7	— 19,0	— 51,9	— 70,9
TOTAL . .	96,858,4	102,258,9	—1,316,9	+6,717,4	+5,400,5

11. To the decrease in the charges for Exchange, as shown above, should be added the saving (156,5) under Exchange Compensation.

12. Under *Direct Demands* there was a decrease of 97,6 under Opium expenditure due to the smaller crop; of 49,6 under Salt due to smaller expenditure on purchase of salt and on freight in Madras; and of 43,2 under Refunds and Drawbacks, the saving being largest in Madras and Bombay. On the other hand, there was an increase of 78,0 under Land Revenue, mainly through indirect famine charges, and of 27,6 under Excise, due to a change in the distribution of the establishment charges between Salt and Excise in Madras. Under *Interest* the excess was due to the payment of discount on the loans raised both in England (117,8) and India (50,6), and to no interest having been paid in the previous year to the Uncovenanted Service Family Pension Fund; this was partly counterbalanced by a saving arising from the transfer to Railway and Irrigation Accounts of a larger portion of interest charges in India in consequence of the increase in the capital expenditure. The increase under *Post Office* and *Telegraph* was the result of normal development, while that under *Mint* was mainly due to the large re-coinage of Kashmir and Bhopali rupees. Under *Civil Departments* there was an excess of 278,7 under Medical, caused chiefly by plague operations. The excesses under Police (77,3), Law and Justice—Jails (38,6), and Law and Justice—Courts of Law (38,2), were chiefly due to the high prices of food-grains and the consequent payment of grain compensation. Part of the increase under Police was however due to plague measures, and under Jails to an increase in Jail population. Against these increases there was a saving of 69,5 under Political owing to the subsidy of the Amir of Afghanistan not having been fully drawn, and to the payment in the previous year of arrears of his subsidy. There was also a saving under Marine mainly in Exchange Compensation and because of a special payment in 1896-97 to the Madras Harbour Trust Board, in satisfaction of its claim against the Madras Port Fund. Under *Miscellaneous* the increase occurred chiefly under Superannuation Allowances and Pensions both in India (42,7) and England (27,2).

13. Under *Famine* the expenditure was almost entirely for famine relief (5,325,6). There was besides a small charge (37,5) for construction of Protective Irrigation Works. The largest excesses occurred in the Central Provinces (1,042,5), Madras (849,0), Bengal (642,3) and Bombay (619,3). Under *Railways* there was an increase of 381,6 in the working expenses of State Railways due to heavier traffic, and of 259,2 in the charges for Interest in India and England, but against these there was a saving of 349,2 owing to smaller surplus profits earned by Guaranteed Railways. Under *Irrigation* the decrease was due to restriction of Minor Works and Navigation owing to famine. But this was partly counterbalanced by larger expenditure on Major Works (51,7), due to increased charges for Interest (30,8) and increased cost of maintenance (20,9). Under *Buildings and Roads* the saving was caused by the restriction of expenditure in consequence of famine, and this saving would have been larger but for the charges due to the earthquake in Assam and Bengal. The increase under *Army Services* was entirely due to the expenditure on the North-West Frontier, which involved a charge of 3,848,0. On the other hand there was a decrease of 746,7, of which 337,6 is accounted for by the mobilisation charges of the previous year and the balance by a more favourable rate for paying British Troops and Exchange Compensation. The head *Special Defence Works* was kept open for the record of expenditure in connection with armaments only, the accounts of which were closed in India on the 31st March 1897; and only English transactions appear in the accounts of 1897-98.

Comparison of Accounts with Budget Estimates of 1897-98.

14. The following figures exhibit the differences in the net accounts between the Budget and the Actuals, those due to the rise in the rate of Exchange being shown in a separate column. A comparison of the gross figures has been given before in paragraph 4:—

	Due to rise in exchange.	Better + Worse — Due to other causes.	Net.
Principal Heads of Revenue	+ 4,2	— 211,9	— 207,7
Interest	+ 276,9	— 168,3	+ 108,6
Post Office, Telegraph, and Mint	+ 28,1	+ 381,4	+ 409,5
Civil Departments	+ 52,5	— 290,0	— 237,5
Miscellaneous	+ 202,4	— 88,3	+ 114,1
Famine	+ 2	—1,697,1	—1,696,9
Construction of Railways	...	+ 3,5	+ 3,5
Railways	+ 565.7	+ 818,5	+1,384,2
Irrigation	+ 1	+ 414,8	+ 414,9
Buildings and Roads	+ 11,8	+ 337,6	+ 349,4
Army Services	+ 406,6	—3,207,3	—2,800,7
Special Defence Works	+ 1,7	— 6,0	— 4,3
COMBINED DEFICIT, IMPERIAL AND PROVINCIAL	+1,550,2	—3,713,1	—2,162,9

15. The improvements, due to a rise in the rate of Exchange, require no special explanation: it is necessary to explain only the differences arising from other causes. The worse result shown above may be ascribed to famine expenditure, and to the Military Operations on the North-West Frontier.

16. The total loss due to famine has again this year been brought together as was done last year. The following table is based on local estimates, and may be accepted as giving approximately the loss of revenue assignable to this cause:—

Estimated net Loss of Revenue due to Famine 1897-98. (In thousands of Rupees.)

	India.	Central Provinces	Burma.	Bengal.	North-Western Provinces and Oudh.	Punjab.	Madras.	Bombay.	TOTAL.
LOSS OF REVENUE.									
Land Revenue	1,2	220,6	41,8	40,0	343,7	13,1	75,0	9	736,3
Salt	...	...	...	70,3	...	...	...	4,0	74,3
Excise	2	98,4	...	65,0	120,0	5,0	70,0	30,3	388,9
Provincial Rates	...	27.5	...	...	37,0	2,0	10,4	...	76,9
Customs	...	1,4	120,0	166,2	...	...	...	13,0	300,6
Forests	...	14,6	...	6,5	8,6	5,3	15,0	30,3	80,3
Railways	785,6	—44.9	...	6,4	102,0	293,1	—1,4	—2,8	1,138,0
TOTAL	787,0	317,6	161,8	354,4	611,3	318,5	169,0	75,7	2,795,3
INCREASE OF REVENUE.									
Irrigation	...	...	—2,4	6.5	268,2	195,7	—14.5	—26,6	426,9
NET LOSS	787,0	317,6	164,2	347,9	343,1	122,8	183.5	102,3	2,368,4

17. The expenditure was chiefly upon actual relief of famine, but there were also increased charges under other heads which arose directly or indirectly out of the distress. The following table brings together the expenditure thus arising from famine, and shows that the total loss on this account may be taken as 6,552,4.

Statement of Excess Expenditure due to Famine (In Thousands of Rupees).

	India.	Central Provinces	Burma.	Bengal.	N.-W. P. and Oudh.	Punjab	Madras.	Bombay.	TOTAL.
Famine Relief, including Public Works Charges	7,5	1,345,8	62,8	886,5	1,070,7	99,3	905,3	945,0	5,322,9
Charges due to famine—									
Army	404,1	...	...	...	...	...	116,7	160,6	681,4
Public Works Department Buildings and Roads	4	5,9	1,0	3	3	1,3	6	12,6	22,4
Marine	5	...	...	...	...	...	...	...	5
Post Office	25,8	...	...	...	...	...	...	...	25,8
Telegraph	2,9	...	...	...	...	...	...	...	2,9
Land Revenue	2	27,8	2	6,5	21,7	1,8	14,8	23,8	101,8
Law and Justice—Courts of Law	1	6,3	2	16,6	8,5	1,7	1,0	4,8	39,2
Ditto —Jails	0,4	10,3	2	33,0	52,5	17,9	1	11,5	134,9
Police	1,5	12,4	1,1	37,6	11,3	7,9	4,1	33,6	109,8
Other heads	13,8	12,8	4	22,0	10,5	3,5	6,8	41,0	110,8
TOTAL	466,2	1,421,3	65,9	1,002,5	1,175,5	133,4	1,049,7	1,237,9	6,552,4

The total loss of revenue and increase of expenditure due to famine may therefore be put down at about 8,920,8.

18. The chief variations between the Budget figures and the Accounts apart from exchange are explained below. The causes are in most cases the same as those already given to account for the differences between the accounts of 1896-97 and 1897-98. Under *Principal Heads of Revenue* the largest falling off occurred under Opium (370,8), the revenue of which showed a decrease of 636,4 due to the expected price for Bengal Opium not having been realized, and to a diminished demand for Indian Opium in China; while the expenditure gave a saving of 265,6, as the crop was a short one. The next largest decrease occurred under Excise, where the revenue showed a fall of 189,6 owing to the impoverished condition of the agricultural classes, and the expenditure an increase of 29,1 due to the change in Madras referred to in paragraph 12. Under Salt there was a decrease of 139,8 in the revenue due to an increase in credit transactions in Madras on the Security of Government Paper, counterbalanced by a saving of 96,4 in expenditure owing to an over-estimate. On the other hand, there were improvements in the revenue under Provincial Rates (101,6,) and Customs (149,4) due to the causes mentioned in paragraph 7. There were smaller improvements under the Revenue heads of Assessed Taxes (45,2), Registration (45,6), attributed to the increased sales and mortgages of land in consequence of the famine; and under Land Revenue (37,5), due to arrear collections as stated in paragraph 7. Under *Interest* the cause of the excess is that stated in paragraph 12, to which may be added larger payments of interest in England on India Bills (60,1). On the other hand, there were reduced transfers to Railway Revenue Account (20,5), and smaller payment of interest on debt in India (109,1), besides less interest on Savings Bank Deposits (23,8). The excess under *Civil Departments* was due mainly to charges connected with the plague and famine, the largest of which occurred under Medical (278,6). There were excesses under Law and Justice—Jails (79,7), and Police (49,6), arising from the circumstances explained in paragraph 12. There were on the other hand savings under Education (45,1) spread over all the Provinces, and due chiefly to grants for special purposes not having been utilized. Political (49,8) also showed a saving owing to the subsidy of the Amir of Afghanistan not having been fully drawn. Under Marine the receipts showed an improvement of 60,4 for the reasons explained in paragraph 8. Under *Miscellaneous* the excess occurred chiefly under Superannuation both in India (22,5) and England (17,5) and under Stationery and Printing.

19. Under *Railway Revenue Account* the improvement was the net result of an increase in revenue of 578,5 and a decrease in expenditure of 240,0. The increase in revenue was due to the causes explained in paragraph 9. The increase was largest on the East Indian Railway (584,2), where it was partly due to pilgrim traffic. The other important increases were on the North-Western (482,8,), Indian Midland (83,6), Madras Railway (49,7), and on the Burma Railway (109,3), the last being due to the Estimate having been kept low, as it was not considered likely that the high earnings of the previous year would be maintained. These improvements were partly counterbalanced by a falling off on some lines, the principal of which were on the Rajputana-Malwa Railway (275,5), Bombay, Baroda and Central India Railway (198,2), and the Great Indian Peninsula Railway (176,9). Under expenditure the decrease occurred under Surplus Profits of Guaranteed Railways (176,8), Land for Subsidised Companies (122,4), Interest (50,8), and under Miscellaneous Railway Expenditure (43,8), partly counterbalanced by an increase under Working Expenses of State Railways. The decrease under Surplus Profits was due mainly to the Bombay, Baroda and Central India Railway having earned no surplus during the second half of 1897 (56,9), and to the provision for land for the Calicut-Cannanore Branch of the Madras Railway having been only partially utilized (98,8). The excess under Working Expenses of State Railways occurred principally on the East Indian Railway (153,2), the Burma Railway (72,3), and the Eastern Bengal Railway (58,4). Under *Irrigation* there was an improvement in the revenue of 447,3, due to the causes stated in paragraph 9. There was an excess in the expenditure of 32,4, owing chiefly to the increase in the cost of maintenance necessitated by increased irrigation. Under *Buildings and Roads* the improvement was mainly due to restriction of expenditure in consequence of famine, and would have been larger by about 94,0 but for expenditure in Assam due to earthquake damages. Under *Army Services* the large excess was due to the Military Operations, which involved an outlay of 3,848,0. Apart from this expenditure there was a saving of 563,5, of which 109,2 occurred in England, chiefly under Indian Troop Service, due to the engagement of fewer transports, and 133,1 under Special Services, for which the Budget provided 321,6. The saving was largest in the charges on account of Occupation of Chitral and its Communications (117,6), owing to the charges for a part of the year having been shown under Military Operations on the North-West Frontier. There was a saving of 321,2 in the ordinary charges, due chiefly to smaller payments of Exchange Compensation (61,8), short strength of the army, chiefly in the British army, which was short by two battalions for a part of the year (106,9), the saving in pay, stores, and clothing due to despatch of troops to Mombassa at the cost of the Home Government (10,4), deputations to the Civil Department for plague duty (17,1), smaller purchase of remounts and to the purchase of Australian horses at more favourable rates, and saving in feed of cattle and remounts (86,9), smaller consumption of malt liquor owing to the absence of British regiments on field service (56,8), fewer movements of troops and stores in consequence of the absence of troops on field service (53,3), larger recoveries for supplies to other departments (20,2), saving in cost of clothing (13,0), less horse allowance to Artillery and Cavalry officers (11,8), and favourable rates for food supplies in the Madras Command (42,9). These savings were partly counterbalanced by increased charges elsewhere than in Madras for food supplies owing to famine and field operations on the North-West Frontier (48,8), special money grants to troops on the occasion of the Diamond Jubilee (11,7), and by 180,9 for compensation to Native troops for dearness of provisions and forage.

20. The Budget estimated for an expenditure of 3,654,0 in excess of the revenue on the whole account, but 1,190,0 of this was payable out of accumulations of Provincial and Local Balances, so that there was a net deficit on Imperial Account of 2,464,0. The accounts closed with a deficit on Imperial account of 5,359,2 and on Provincial and Local account of 457,7. The net Imperial expenditure has therefore been worse than the Budget by 5,359,2 —2,464,0 = 2,895,2, and the net Provincial and Local expenditure better by 1,190,0 —457,7=732,3.

21. The details of these fluctuations are given below, the sign + meaning better, and — worse, than the estimate:—

	Revenue Side.			Expenditure Side.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Principal Heads of Revenue	— 1,149,2	+ 528,9	— 620,3	+ 376,9	+ 35,7	+ 412,6
Interest	+ 24,6	+ 6,3	+ 30,9	+ 82,8	— 5,1	+ 77,7
Post Office, Telegraph, and Mint	+ 386,7	+ 1,1	+ 387,8	+ 26,3	— 4,6	+ 21,7
Civil Departments	+ 33,5	+ 8	+ 34,3	+ 69,6	— 341,4	— 271,8
Miscellaneous	— 73,1	— 9,0	— 82,1	+ 204,8	— 8,6	+ 196,2
Famine	...	...	...	— 1,747,9	+ 51,0	— 1,696,9
Construction of Railways	...	...	...	...	+ 3,5	+ 3,5
Railways	+ 577,8	+ 7	+ 578,5	+ 811,9	— 6,2	+ 805,7
Irrigation	+ 207,6	+ 239,7	+ 447,3	— 31,9	— 5	— 32,4
Buildings and Roads	+ 3,0	— 14,8	— 11,8	+ 106,4	+ 254,8	+ 361,2
Army	+ 6	...	+ 6	— 2,801,3	...	— 2,801,3
Special Defence Works	...	...	...	— 4,3	...	— 4,3
Total	+ 11,5	+ 753,7	+ 765,2	— 2,906,7	— 21,4	— 2,928,1
Total Net	— 2,895,2	+ 732,3	— 2,162,9	...	...	...

22. The improvement in the Provincial and Local Section occurred chiefly in the Principal Heads of Revenue and in the Provincial share of Irrigation, and in the charges for Buildings and Roads.

23. The principal items making up the difference in the Imperial Section are indicated in the following table:—

Imperial.	Better.	Worse.
Improvement due to the rise in the rate of Exchange	1,550,2	...
Land Revenue net (excluding improvement due to the difference in the rate of Exchange)	...	409,9
Opium " " " " "	...	371,0
Excise " " " " "	...	151,0
Customs " " " " "	145,9	...

Buildings and Roads " " " "	97,6	...
Army " " " "	...	3,207,3
Minor Improvements under other heads " " " "	99,0	...
	3,277,4	6,172,6
Net Worse	2,895,2	

Appropriation Audit.

24. The Budget grants have been exceeded under several heads. The excesses, distinguishing those requiring sanction from those for which extra grants have already been made, have been noticed under each head of expenditure, and the detailed reasons for the excess have been also there stated. The following table brings together the excesses under each head still requiring sanction. The Bengal Government passed an order appropriating, to meet part of the excess in the Provincial column, the savings available under other heads; but as it made no specific appropriation to meet each particular excess, it is necessary to show the total excess as uncovered by grant.

Excess expenditure over Budget Estimate awaiting sanction of the Imperial Government.

Section A.—PRINCIPAL HEADS OF REVENUE.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
62,192,4	REVENUE	63,774,6	63,425,6	63,154,3

25. The revenue in this section fell short of the Budget Estimate by 620,3, but exceeded the actuals of the previous year by 951,9. Of the decrease as compared with the Budget Estimate, 636,4 occurred under Opium, due to a fall in price and to a diminished demand for Indian opium in China; 139,8 under Salt, due chiefly to a fall in the cash and rise in the credit transactions in Madras, owing to the low price of Government paper, but partly also to smaller sales of Government salt in Madras, and a decline in duty on imported salt in Bengal; and 189,6 under Excise, due chiefly to the distressed condition of the agricultural classes; there were smaller decreases under Forest and Tributes. These decreases were counterbalanced to the extent of 379,8 by improvements under the other heads, the most important being those of 101,6 under Provincial rates, due chiefly to collection of arrears; of 149,4 under Customs, due to larger imports of oils, bullion and coins and articles of food and drink, and larger exports of rice in Madras and Bombay; Assessed Taxes and Registration contributed 45,2 and 45,6, respectively to the increase, due, under the latter, chiefly to an increase in the number of sales and mortgages of land as an effect of the famine. There was an improvement of 37,5 under Land Revenue, due to better collections consequent on the improved conditions of the latter part of the year.

26. Of the improvement as compared with the actuals of the previous year, 1,709,2 occurred under Land Revenue, due partly to the realizations of arrears, and partly to the low collections and large remissions of the previous year, 172,5 under Salt, due partly to a revival of the trade from the effects of the famine, and partly to larger cash transactions in Madras, 186,4 under Provincial Rates, 149,8 under Customs and 28,2 under Registration owing to the reasons given above, 59,3 under Stamps, due indirectly to the scarcity. These improvements were partly counterbalanced by decreases of 1,229,4 under Opium, and 124,7 under Excise, due to the reasons stated above, and of 17,7 under Tributes.

27. The actuals exceeded the Budget Estimate and the actuals of the previous year by 37,5 and 1,709,2 respectively. The improvement as compared with the Budget was small in the aggregate; there were improvements in some Provinces and falling off in others. The principal improvements were in Burma, (223,4) due to growth in the assessed area and prompt realizations of *Ordinary Land Revenue*, chiefly owing to good harvests, and larger collections of Capitation and Thathameda taxes, in the Central Provinces (67,7) and Punjab (143,4) were due chiefly to better collections of *Ordinary Land Revenue* consequent on the improved condition in the latter part of the year owing to the termination of the famine, and in Bengal (53,2) due chiefly to larger recoveries on account of survey and settlement operations in Behar. The falling off was in the North-Western Provinces (207,8), in Madras (161,9) and Bombay (57,6); in the case of the first the Budget anticipated a large deficiency in the collections owing to a continuance of famine, but the results proved even worse than the Estimate, which, it appears, did not make sufficient allowance for the balance of revenue falling due within, but not collected till after the close of the financial year; in Madras the collections were smaller owing to the unfavourable season, which necessitated the grant of remissions, and to larger remissions in 1896-97 than were anticipated in the Budget, which thus reduced the arrears expected to be collected during 1897-98. In Bombay the Budget did not allow sufficiently for the effects of the famine, owing to which the *Ordinary Land Revenue* collections fell short: other causes for the falling off in Bombay arose from the fall in price of cotton, which delayed the sale of cultivators' produce and led to outstandings to the extent of 23,4 at the end of the year: the prevalence of famine and plague led to further postponements of the revenue due in 1896-97 and to the postponement of the introduction of revised survey rates. Assam contributed 18,5 of the decrease, 16,4 of which occurred under *Ordinary Land Revenue*, due to the epidemic of Kala-Azar in the Nowgong district, and to the effects of the earthquake of June 1897 and the subsequent floods. The improvement over the previous year was due partly to the low collections and large remission of that year and partly to the realization of arrears.

28. Under *Sale of Proprietary Right, etc.*, the increases were the result of under-estimating in the North-Western Provinces, chiefly in respect of capitalized value of abatement of land revenue on lands made over to Railway Companies. Under *Capitation Tax, etc.*, in Burma the increase was due to improvement in both Capitationand Thathameda revenue, the former being due to growth in population, to immigration to the delta districts from parts of Upper Burma, and to greater care in the assessment of the tax, and the latter to more households being assessed, to levy of higher rates in certain districts, and to Railway employés, hitherto exempt, being assessed. The distress in 1896-97 in Upper Burma leading to an emigration to Lower Burma, and to exemption from assessment on account of poverty, chiefly accounts for the difference between that year and the year under report.

29. The principal difference under *Miscellaneous* occurred in Bengal and has been explained above. The increase in Burma (3,6) was due to improvement in Petroleum revenue, and in jade and amber revenues owing mainly to the sale of a quantity of confiscated jade, counterbalanced by decrease in the number of licenses for inland fishing, in consequence of exemption of small casting nets, and of better wages being obtainable by field labourers, and by a decrease in rents from Sea fisheries owing to the collapse of the Bassein pearl oyster beds, and the closing of two turtle-banks in Tavoy.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

I.—Land Revenue—*continued.*

The decrease in the Central Provinces was due to the scarcity, that in Assam to the earthquake and floods, and in the North-Western Provinces it was due chiefly to low Revenue Record Room and quarry receipts.

30. The following tables A and B give the usual particulars regarding the distribution of the Land Revenue between Imperial and Provincial:—

A.—Transactions affecting the Distribution of Land Revenue in 1897-98.

PROVINCES.	CREDITS + DEBITS — TO PROVINCIAL.				
	Transfers under contract.	Subsequent Recurring Transfers.	Special Transfers.	Miscellaneous Adjustments	Total Adjustments.

Assam	596,1	Two-thirds	397,4	+95,4	492,8	...	...	...	103,3	492,8	...	596,1
Bengal	3,855,6	One-fourth	963,9	—76,7	887,2	68,2	54,4	...	3,036,6	941,6	...	3,978,2
N.-W. Provinces and Oudh	5,662 3	One-fourth	1,415,6	—153,8	1,261,8	...	54.2	3 2	4,400,5	1,316,0	3,2	5,719,7
Punjab	2,506,6	Two-fifths	1,002,6	+36,6	1,039,2	...	...	4,3	1,467,4	1,039,2	4,3	2,510,9
Madras	5,384,1	Fixed amt.	1,509,2	— 6,3	1,502,9	...	...	228,7	3,881,3	1,502,9	228,7	5,612,9
Bombay	3,772,2	One-fourth	943,0	+959,8	1,902,8	...	978,3	17,4	1,869,4	2,881,1	17,4	4,767,9

31. From the details of recurring and special transfers which are given in the Appendix to this Report on page 165, it will be seen that the Government of India has, in consequence of the loss to Provincial expenditure owing to agricultural distress, been compelled to make grants-in-aid of Provincial balances to the Central Provinces (81,0), and to the North-Western Provinces (102,7). To Bombay a grant (121,8) was made in aid of Plague expenditure, and to Assam (80,0) for Earthquake expenditure.

II.—Opium.

1896-97. Accounts.			1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	4,850,4	Sale of Bengal Opium	4,192,5	3,992,0	3,991,0
	1,334,8	Bombay Opium Pass Fees	1,400,0	1,026,0	967,0
		Excise Opium—			
21,5		Central Provinces	16,2	20,0	20,3
22,5		Burma	24,6	25,5	23,4
45,2		Assam	46,9	45 9	45,3
72,6		Bengal	72,0	70,0	70,9
48,6		North-Western Provinces and Oudh	49,0	47,5	47,3
7,7		Punjab	8,7	6,8	6,7
	218,1		217,4	215,7	213,9
	5,9	Miscellaneous	6,3	8,6	7,9
	6,409,2	TOTAL	5,816,2	5,242,3	5,179,8

32. Under *Sale of Bengal Opium* the estimated number of chests (39,000) was sold, and the fall of 201,5 in the actuals was due to the average price realized being only R1,023 against an estimate of R1,075 per chest.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

II.— Opium—*continued.*

33. Under *Bombay Opium Pass Fees* the falling off (433,0,) was due to a diminished demand for Indian opium in China, owing partly to the increased production in China itself, and partly to the unfavourable rate of Exchange, and to the lowering of the rate of the duty in October 1897 from R600 to R500.

34. Under *Excise Opium* the Budget anticipated a large decrease in sales owing to the famine; the falling off in Assam was due to the effects of the earthquake and subsequent floods, and partly to the unpopularity of the Malwa opium; in Bengal and the North-Western Provinces it was due to the general scarcity, and in the Punjab it is attributed to the competition of the Malwa drug, which was selling at a lower rate.

35. The following table gives the usual statistics for the last ten years of the produce and sales in Bengal, and the exports from Bombay :

Year.	Bengal. Produce of season. For export.	Bengal. Produce of season. For Excise.	Bengal. Produce of season. Total.	Bengal. Chests sold.	Bengal. Average price per Chest.	Bengal. Total price.	Bombay. Chests.	Bombay. Rate.	Bombay. Amount.

1897-98	1,947,8	156,7	2,463,3	1,727,0	2,299,4	8,594,2

37. The receipts show an improvement of 172,5 as compared with the actuals of the previous year, and a falling off as compared with the Budget Estimate of 139,8, of which 113,2 occurred in Madras, mainly under *Excise on Local Manufacture* (79,8), due chiefly to a fall in the cash and rise in the credit sales, owing mainly to the fall in the price of Government paper ; the fall however was not so great as in the previous year ; and under *Sales of Government Salt* (28,2) due to poor sales at the Madras Depôt. Bengal contributed 42,1 of the decrease under *Duty on Imported Salt* owing to a large quantity of non-duty paid salt having been removed under bond during the year. The continued expansion of revenue under this head noticed in last year's report seems to have received a check.

38. In India the falling off under *Sales of Government Salt* occurred chiefly in Sambhar. The improvement under the second head would have been better by 19,5, but for a decrease in Kohat owing to the stoppage of traffic in consequence of hostilities on the frontier. In Burma the increase under *Duty on Imported Salt* was due to large importations of salted fish and Penang-made gnapi. In Bombay the decrease under this head was due to diminished importations of Government salt owing to the agreement between the Great Indian Peninsula and Southern Mahratta Railways to convey goods *viâ* Poona at low rates of freight. The improvement under *Excise on Local Manufacture* was due to a better demand in the latter half of the year owing to the effects of the famine having to a considerable extent disappeared, and that under *Sale of Government Salt* was due to the introduction of new maundage rate on salt sold in the Konkan Division and to an increased sale of Baragara Salt.

39. The increase over the previous year's actuals was contributed by all the provinces except Bengal, where the falling off occurred under *Duty on Imported Salt*. The improvement in India (99,1) is attributed to the revival of trade in the latter portion of the year from the effects of scarcity and the frontier disturbances. In Burma (15,8) and in Madras (32,8) it was due to the causes explained above, and in Bombay (61,6) to the fact that during 1896-97 both plague and famine raged in several districts, while in the year under review famine had to a considerable extent disappeared.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

IV.—Stamps—*continued.*

40. The actuals showed an improvement over the Budget Estimate and the actuals of the previous year by 5 and 59,3 respectively. The actuals practically agreed with the Budget in the aggregate, but there were considerable differences in all the Provinces and under the several heads. In India and the Central Provinces the Estimates were pitched too high, sufficient allowances not having been made for the effects of the famine. In Burma the improved condition of the agriculturists resulted in fewer law suits and reduced the sales under *Court-fee Stamps,* while by increasing the commercial activity it improved the revenue under *Commercial and other Stamps.* In Assam the decrease was small and was due to the suspension of litigation for sometime owing to the earthquake of June 1897 and the subsequent floods. In Bengal the improvement under the first head was due to increased litigation, probably an after effect of the failure of crops in the previous year, which also led to a larger number of loan transactions, and thus improved the receipts under the second head. In the North-Western Provinces the increase under *Court-fee Stamps* was due chiefly (4,4) to the sale of plain paper to be used with Court-fee Stamps, introduced from 1st December 1897, and partly to increased litigation consequent on a return of prosperity ; the decrease under *Commercial and other Stamps* was due to the large relief afforded to the distressed classes, more especially by the liberal policy of remissions and suspensions of revenue adopted to save the people from financial collapse. In the Punjab the decline under the first head was due to reduced litigation, probably the result of scarcity, while the improved condition of the agricultural classes reduced the borrowing transaction and thus decreased the receipts under the second head. In Madras the improvement was due to the increase in the amount of agricultural loans given by Government, to the indebtedness of landlords forcing them to mortgage their lands, and to tenants having to borrow on bonds to pay their *Kists.* In Bombay the decrease under the second head was due to the prevalence of plague in several districts, the mortality from which, however, brought in additional probate duties which accounts for the increase under *Court-fee Stamps.*

41. The revenue under this head showed a falling off of 189,6 as compared with the Budget Estimate and of 121,7 as compared with the actuals of the previous year. The decline occurred chiefly in Bengal, the North-Western Provinces, and Madras, due generally to agricultural distress. The falling off occurred under *License and Distillery fees, etc.,* the variations under the other heads were small. Under Opium in Burma, Assam, Bengal and Madras the revenue fell short of the estimate owing, in the last case, to famine, in Burma to over-estimate and in Assam to the earthquake and floods, while in Bengal it was due to the abolition of Chandu and Madak licenses. The improvement in the Central and North-Western Provinces was due to under-estimate, in Punjab it occurred in transit duty owing to larger consumption of opium imported from Kashmir and the Hill States, and in Bombay it was partly due to too low an estimate and partly to low prices of opium prevailing in Bombay. Punjab alone showed an appreciable improvement, which occurred chiefly under the first head, partly due to the Estimate having been

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

V.—Excise—*continued.*

kept low in consequence of the universal depression which existed when it was framed, and to the unusually high level of license fees, which are the highest on record.

42. The revenue under this head showed an improvement of 101,6 as compared with the Budget Estimate, and of 186,4 as compared with the actuals of the previous year. This improvement was the result chiefly of increase in Bengal (80,2), in Punjab (33,8), and Madras (19,3), due mainly to large collection of arrears, in Bengal partly also to an increase due to re-valuations, and in Punjab to realizations on account of Patwaris' Fees Fund in the Chenab Colony. These improvements were partly counterbalanced by decreases chiefly in the Central Provinces (24,3), North-Western Provinces (6,4), and Bombay (6,0), due in the first case mainly to suspensions and remissions under the first and second heads; in the North-Western Provinces to the further postponement of reforms in the Rural Police system of Oudh under the Oudh Local Rates Act V of 1894; and in Bombay to reasons stated under I.—Land Revenue (para. 27).

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

VII.—Customs—*continued.*

43. The revenue under this head showed an improvement of 149,4 as compared with the Budget Estimate, and of 149,8 as compared with the actuals of the previous year. This improvement was the result of increased receipts in Madras and Bombay and a falling off in the other Provinces. Of the improvement in Madras 28,1 was under *Import Duties* and 34,5 under *Export Duties*, the former being due to increased import of Kerosine Oil, and the latter to large shipments of rice to Ceylon owing to the supply from Bengal having failed; in Bombay 150,8 occurred under *Import Duties* chiefly in the duties on Silver bullion and coin (153,3), Oils (95,6) and artcles of food and drink (22,0), partly counterbalanced by a falling off in the duties on Cotton Manufactures (18,7), other Metals and Manufactures of metals (30,4), Manufactured articles (59,8) and raw materials (15,3) due to slackness in trade owing to the prevalence of plague, and 15,8 under *Export Duties* due to large shipments of rice to Cutch and Kathiawar. The excess over the actuals of the previous year occurred mainly in Bombay (118,3) and Madras (40,9), and was due generally to the improvements noticed above.

44. Under *Import Duties* the increase in Burma (47,3) was due to the revival of the import trade following the rich rice harvest of December 1896, while the decrease in Bengal (23,4) was chiefly due to a falling off in the duties on cotton (75,7), manufactured articles (47,9) and raw materials (20,7), due to stringency in the money market and famine, partly counterbalanced by increased receipts under articles of food and drink (37,8), Silver bullion and coin (35,1), and Oils (43,7). Under *Export Duties* the decrease in Burma (64,3) was due to the diversion of a large portion of the trade to India owing to the famine, and in Bengal (61,2) owing to smaller exportations of rice. Under *Excise Duty on Cotton Manufacture* the improvement in Madras (3,6) was due to the diversion of the trade in cotton piece-goods to Calcutta and Rangoon (which are Customs ports), owing to the American competition in China, and in Bombay (6,1), to improved receipts under the Cotton Duties Act II of 1896, and activity of the Gujarat mills. Under *Land Customs and Miscellaneous* the increase was chiefly in Madras (9,6), where it was due to increased export of British rice through the French ports of Pondicherry and Karikal, and in Burma (4,8) due to overtime fees earned by preventive officers, hitherto kept out of account, having been treated as miscellaneous receipts, and the payments out of them as charges under 9.—Customs (para. 74).

VIII.—Assessed Taxes.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
219,3	India	222,8	217,1	221,5
49,8	Central Provinces	49,8	47,0	47,8
78,0	Burma	84,6	91,0	94,1
29,9	Assam	30,3	30,2	30 6
491,8	Bengal	490,0	490,0	494,9
241,4	N.-W. Provinces and Oudh	240,0	239,0	243,2
132,4	Punjab	133,0	140,0	139,5
246,0	Madras	240,0	245,0	247,4
364,2	Bombay	359,8	390,0	376 5
1,872,8	TOTAL	1,850,3	1,889,3	1,895,5

45. The receipts showed an improvement of 45,2 and 22,7 over the Budget Estimate and the actuals of the previous year respectively. The improvement, which occurred in all the Provinces except India and the Central Provinces was due generally to under-estimates. In Burma it was partly due to the introduction of Act II of 1886 in Mandalay Town; and in the North-Western Provinces to the presence of a larger number of officers on duty in consequence of famine and plague. In Bombay the receipts would have been better but for the falling off due to the absence of surplus profits on the Great Indian Peninsula Railway, and decrease in the earning of the Bombay, Baroda and Central India and Southern Mahratta Railways owing to a decline in traffic caused by the famine and plague.

46. The *India* figures include, in addition to the collections made in the Districts directly administered by the Government of India, the recoveries of the non-Civil Departments from the salaries of Government officers. The details are given below:—

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
84,3	Civil Department, India	88,8	83,0	83,0

47. The receipts fell short of the Budget Estimate by 16,7, but exceeded those of the previous year by 5,6. Though the difference in the total is not very large, the variations under the several heads in the various provinces are considerable. The only increases occurred in India (6,7) and Burma (144,0), the former being due to a large refund by Messrs. Ogilvy, Gillanders & Co., London, on account of sale proceeds of cargoes of Andamans timber, retained by them in 1896-97 in part payment of freight and other charges, and the latter mainly to larger extractions of timber consequent on favourable floods and high prices. The decrease in the other provinces was mainly due to the effects of famine. In Assam it was due to the earthquake, which rendered roads impassable and the rivers useless for floating purposes; and in Bengal to the reduction of royalty on produce floated down the river consequent on the cyclone of October 1897 in Chittagong. In Madras the decrease was partly due to too sanguine an estimate.

48. Under *Timber, etc., removed by Government Agency* the only differences requiring special notice are in the Punjab, where there was a large falling off, mainly due to the small demand for fuel by the North-Western Railway owing to slackness of traffic, and the dryness of the season 1896, which prevented the timber being floated down to the sale depôts; in Bombay, where the prevalence of plague adversely affected the prices received at the auction sale of timber, and difficulty in getting carts and labour caused a falling off in the supply of fuel to the Southern Mahratta Railway; and in the North-Western Provinces, where the sale of firewood to the Commissariat Department at Chakrata and at Ranikhet and Lansdowne fell off owing to the absence of troops, while plague restrictions at Hardwar reduced the sale of bamboos.

49. Under *Timber, etc., removed by Consumers or Purchasers* the variations were mainly due to the causes stated above; the only points calling for particular notice are, that in Assam the crop of thatching grass was totally destroyed by floods and by cattle driven up into the hills by the floods, no royalty being realized owing to the prevailing distress, and that the receipts from waste land grants declined under the new rules. In the North-Western Provinces the decrease was partly due to less extraction owing to slackness of demand and to failure of purchasers of standing trees to pay in the instalments due. In Bombay the demand for fuel from the North-Western Railway fell off in consequence of the agricultural depression in Northern India, and plague quarantine rules also brought about a fall in the demands for forest produce. The small improvement in Punjab (2,8) was due to a larger demand for fodder, increased outturn of charcoal, better receipts on account of grazing, larger sales of standing trees, and the introduction of an improved method of disposing of bamboo coupes.

50. Under *Other Receipts* there was an improvement of 20,6. The increase in India has been explained above. In Burma the increase was due to larger collections under drift timber and duty on foreign timber, the receipts however fell short of those of the previous year; and in Punjab the improvement was due to larger sales of drift timber and better collections of rafting fees.

51. The revenue under this head showed an improvement of 45,6 over the Budget Estimate, and of 28,2 over the actuals of the previous year. The improvement was contributed chiefly by Bengal (16,0), Punjab (5,0), and Madras (29,0), occurring in the last under *Other Receipts* due to the system of granting certificates of previous non-encumbrance of land in connection with State Loans; in the other two Provinces it was due to the registration of a larger number of deeds, as an effect of the famine. In Burma the increase was due to more extended operations. In the Central Provinces and the North-Western Provinces the decrease was due to the assistance which both landlords and tenants received from Government, and from private charity, which served to keep them out of money-lenders' hands. The falling off in Assam was due to the earthquake and floods, and in Bombay to the combined effects of famine and plague.

52. The receipts under this head are for the most part fixed. The fluctuations that occur arise generally either from the non-payment of dues or from advance or arrear payments. There was a falling off in the actuals of 17,6 and 17,7, as compared with the Budget Estimate and the actuals of the previous year respectively. The decrease in the Central Provinces was chiefly due to the non-payment by the Khairagarh State of the tribute of 3,5; in Burma there were some remissions and postponements; and in Bombay it was chiefly due to the instalment of the subsidy from Kutch, which fell due in April 1897, having been paid in the previous year; this receipt, with arrear collections in the previous year, account for the difference in the actuals of the two years.

Section A.—DIRECT DEMANDS ON THE REVENUE.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
10,909,7	EXPENDITURE . . .	11,229,4	10,842,5	10,816,8

53. The expenditure under this section showed a saving of 412,6 as compared with the Budget Estimate, and of 92,9 as compared with the actuals of the previous year. Of the saving as compared with the Budget Estimate, 265,6 occurred under Opium owing to the outturn of the crop having fallen short of the estimate; 96,4 under Salt, due chiefly to an over-estimate in Madras; 74,4 under Forests, due chiefly to provision for survey operations and certain new works in Madras and Bombay not having been fully utilized, and to re-organization of the subordinate Forest Establishment. There were other small savings, the principal being 14,3 under Refunds and Drawbacks, and 16,7 under Assignments and Compensations, the charges under the former are of a fluctuating character, and the savings under the latter occurred chiefly in Madras and Bombay. These savings were partly counterbalanced by excesses of 20,9 under Land Revenue, due chiefly to indirect famine expenditure and to payments of commission on collections in Burma, of 29,1 under Excise, due chiefly to a change in the proportion of distribution of the combined establishment charges between Salt and Excise in Madras, and of small excesses under Stamps and Customs.

54. Of the decrease as compared with the actuals of the previous year, 97,6 occurred under Opium, due to smaller payments to cultivators owing to the smaller outturn of the crop; 49,6 under Salt, due chiefly to less expenditure under Purchase of salt and freight in Madras, and partly to less expenditure charges due to the transfer of the Orissa Salt Department from Madras to Bengal; 43 2 under Refunds and Drawbacks and to smaller decreases under Assignments and Compensations, Stamps, and Provincial Rates, counterbalanced by an increase of 78,0 under Land Revenue due to indirect famine charges and large payments of commission on collections in Burma, of 27,6 under Excise, 8,0 Customs, 7,8 Forests, and smaller savings under Assessed Taxes and Registration.

55. The charges under this head are fluctuating and do not admit of an accurate forecast. The expenditure fell short of the Budget Estimate and the actuals of the previous year by 14,3 and 43,2 respectively. The decrease, as compared with the Budget, was the net result of savings of 6,5 under *Salt Refunds* and of 29,8 under *Customs Refunds*, and excesses of 13,0 under *Land Revenue Refunds* and of 9,0 under *Other Revenue Refunds.* The decrease under *Salt Refunds* in Bombay, both as compared with the Budget and the actuals of the previous year, was due to the falling off in the Salt trade in the earlier part of the year in consequence of the famine and plague. Under *Land Revenue Refunds* the excess in Bengal (4,3) was due chiefly to the refund of the balance of an estate that had been confiscated and subsequently restored; in Madras there were large refunds of Land Revenue erroneously credited in the previous year, and in Bombay there was a special refund (1,7) in the Satara District. Under *Other Refunds* the excess was contributed by all the Provinces except Bombay, where there was a small saving. In Burma 3,2 of the excess occurred under Excise, while in the North-Western Provinces it occurred chiefly under Forests. The large decrease under Customs Refunds in Bombay (30,4) was due chiefly to drawbacks on merchandise re-exported in consequence of the dullness of trade.

56. The expenditure under this head fell short of the Budget Estimate and the actuals of the previous year by 16,7 and 20,4, respectively.

57. The saving, as compared with the Budget, occurred chiefly in Madras (6,6) and Bombay (9,9). In Madras it occurred under *Land Revenue Compensations* (2,3), owing to the non-drawal of the allowance of the Raja of Malabar in consequence of his death (9), and of the non-payment of several pensions (1,4), and under *Salt Compensations* (3,9) owing to non-payment of the compensation for suppression of earth-salt manufacture in Pudukottai. In Bombay the saving occurred chiefly under the first head, and was due to non-payment of the grant to Shahaji Raje Bhosle Akalkotkar, pending the settlement of claim to heirship (1,1), to non-payment to small inamdars and other grantees (8,1), and to saving in the adjustment on account of alienated land revenue (2,8). The saving was partly counterbalanced by an excess of 1,1 under *Excise Compensations*, due to the payment of arrears (2,1) to the Chief of Sangli, reduced by (1,0), due to non-payments to certain Native Chiefs. There was a small saving of 1,9 in India under *Salt Compensations* due to smaller payments to the Jeypore and Jodhpore States of the Royalty under the Sambhar Lake Treaty (1,2), and of compensation payable to the Kohat Chiefs. In the Central Provinces an excess of 9 under *Excise Compensations* was due to the payment of arrears of compensation for resumption of Abkari right. The increase in Punjab under *Customs Compensations* was due to the payment of claims belonging to the previous year.

58. The fall, as compared with the previous year, occurred chiefly in the North-Western Provinces (11,5), Madras (6,8), and Bombay (9,2). In the North-Western Provinces the decrease was due to the large arrear payments in 1896-97. In Madras it was due to the causes already explained, and in Bombay it occurred partly under *Land Revenue Compensations* (7,7) for reasons given above, and partly under *Excise Compensations* (1,5), due to the payment in 1896-97 of compensations for two years to the Rewa Kantha Chiefs.

59. The expenditure in India exceeded the Budget Estimate and the actuals of the previous year by 20,5 and 70,9, respectively. The excess over the Estimate occurred chiefly under *Charges of District Administration* (43,1), due mainly to indirect famine expenditure and larger payments of *Commission on Collections* (13,0) in Burma, owing to the growth of revenue not having been fully allowed for, counterbalanced by savings (34,8) under *Survey and Settlement.* The excess over the previous year was spread over all the heads except *Survey and Settlement*, where there was a decrease of 42,9.

60. Under *Charges of District Administration*, the excess of 43,1 was chiefly contributed by the North-Western Provinces (14,7), Madras (36,7), Bombay (6,9), and the Central Provinces (4,9), counterbalanced by savings in the other Provinces except India, where there was a petty excess. The excesses were generally due to additional expenditure necessitated by the famine. In the North-Western Provinces the entertainment of temporary establishment in connection with the acquisition of land for Canal and Railway purposes, accounted for a portion (6) of the excess, and in Madras a large portion (23,6) was due to fees for searches in Registration Offices in connection with the grant of loans under the Land Improvement and Agriculturists' Loans Acts in districts affected by famine, and in Madura for reclamation of lands under the Periyar works. The savings in Burma (4,5), Assam (1,5), and the Punjab (1,3) occurred chiefly under Salaries and Allowances, and were due to the absence of officers on leave and a lower rate of Exchange Compensation Allowance. In Burma the saving was counterbalanced to the extent of 2,3 by excess expenditure under Survey establishment. The saving in Bengal (15,6) is nominal, being due to a change in the method of adjusting fees realized on travelling account of partition, which are now deducted from expenditure under this head instead of being credited as receipts. Disregarding this there was an excess of 1,2 under Salaries, of 3,9 under Allowances due chiefly to the payment of grain compensation allowances, and of 2,4 under Supplies and Services

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

3.—Land Revenue—*continued.*

and Contingencies, counterbalanced by a saving of 3,2 in Record Room charges. The variations, as compared with the previous year, are mainly due to the causes explained above.

61. Under *Survey and Settlement* the saving in most of the Provinces was due partly to less charges for professional Surveys; in Burma 7,0 of the saving was due to partial or entire postponement of Settlement Operations and Departmental Surveys in certain districts; in the North-Western Provinces the Settlement Operations were not as extensive as anticipated. In Punjab the saving (1,7) was the result of a saving of 5,7, due partly to over estimate and partly to delay in the commencement of Settlement Operations in the Muzaffargarh district, and an excess of 4,1 due to the creation of the appointment of Settlement Commissioner. In Bombay the saving was due to less expenditure under Supplies and Services on account of Cadastral Maps and to larger recoveries of contributions from Native States for Foreign service, which are deducted from charges, counterbalanced by an increase under professional surveys, due chiefly to a lump deduction ordered in the Estimate by the Government.

62. Under *Land Records and Agriculture* the saving amounted to 7,9. The excess of 2,3 in the Central Provinces and of 2,4 in the Punjab occurred in the Patwari Fund expenditure, due in the former case to famine, and in the latter to no provision having been made for the Chenab Colony Fund. The excess of 6,6 in Bombay was due mainly to temporary famine establishments (?,1), and plague establishments (5), for which no provision was made; to increased travelling charges of Circle Inspectors (1 4), and to payment of grain compensation (4,0). These increases were partly counterbalanced by a saving of 9, chiefly in salaries, and 1,6 due to the establishment of tapedars and kotwars having been below the sanctioned scale. The principal savings occurred in Burma (4,3), due to provision for the supplementary survey of the Minbu and Sagaing districts having been only partially utilized. In Assam there was a saving of (3,2) due chiefly to the establishment of District Mandals and Kanungoes having been below sanctioned strength (2,4), and to the appointment of second Superintendent not having been filled up In the North-Western Provinces the saving was (9,8) due chiefly to savings in the pay and allowances of Patwaris and Kanungoes. An increase of 3,9 in establishment charges consequent on famine has been counterbalanced by savings. In Madras the Estimate is usually pitched high. The excess over the actuals of the previous year in the Central Provinces, Punjab, and Bombay were chiefly due to the causes explained above.

63. The excess under *Commission on Collections* occurred in Burma (13,0), and was due partly to sufficient allowance not having been made for growth of revenue, and partly (1,4) to the deputation of an officer in connection with the question of the administration of inland fisheries in the Irrawaddy Division. The lower figure of the previous year was due partly to agricultural distress and partly to less collection of revenue. The decrease in the Central Provinces was due to remissions and suspensions of arrears of revenue owing to famine.

64. Under *Allowances to District and Village Officers* the excess occurred in the Central Provinces, and represents remunerations of kotwars (13,8) and grain compensation allowance (3,9) in consequence of famine, for which no provision was made. In Madras the Estimate was pitched too high, and in Bombay the allowances were not fully claimed during the year, and the adjustments on account of alienated lands were less than the Estimate.

65. In England the excess was due to *Law Charges* in connection with appeals from India being larger than was anticipated.

4.—Opium—*continued.*

66. The Indian expenditure showed a saving in comparison with the Budget Estimate, and the actuals of the previous year of 267,8 and 99,0, respectively. As usual these variations were the results mainly of variations in the outturn of the crop, which in the year under review amounted to 85,176 maunds against 100,000 maunds in the Estimate, and 87,281 maunds the actual production of the previous year. The *Payments to Cultivators,* which form the bulk of the charges, fell short of the Estimates in both Agencies. Under *Opium Factory* the savings in both Agencies were due to less freight and manufacturing charges. The higher expenditure, as compared with the actuals of the previous year, in the Behar Agency, was due to larger payments for timber, and in the Benares Agency to higher manufacturing charges. Under *District Staff* the excess in the Benares Agency was due chiefly to payment of grain compensation (8) and to higher travelling charges (6). The excess over the actuals of the previous year occurred chiefly in transit and weighment charges. The excess of 9 in Bombay was due to the payment of the privilege leave allowance of the Opium Agent, Benares. This excess was covered by re-appropriation sanctioned by the Government of India.

67. The excess in England was due to larger demands than anticipated for stores. The extra expenditure due to famine is estimated at 2,5. The saving under Exchange Compensation Allowance amounted to 7.

68. The Indian expenditure, as compared with the Budget Estimate and the actuals of the previous year, showed savings of 96,7 and 50,1, respectively. The savings, compared with the Budget, occurred chiefly in Madras (60,1) due to over-estimate under *Salaries, Establishment and Contingencies* and *Purchase and Freight.* In India there was a saving of 24,1, of which 7,8 occurred under the first minor head, and was due to less outlay on petty construction and repairs (2,6) and to less expenditure on Preventive establishment (5,3), due partly to reductions in the Indus preventive line, and 16,3 under *Manufacture and Excavation* due to smaller demands for salt, chiefly in Sambhar, Didwana, and Pachbudra. Bengal contributed 8,7 of the saving and Bombay 3,7, the former due partly to savings in the provision for the new Preventive establishment, and partly (4,0) to the provision for Steam Launches for that establishment not having been utilized, and the latter to less expenditure under *Purchase and*

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

5.—Salt—*continued.*

Freight owing to slackness of trade, counterbalanced by payment of grain compensation, and of 1,2 to the Bombay, Baroda and Central India Railway Company on account of Government share of the cost of construction of a platform and siding at Bhynder railway station. The saving in Madras, as compared with the previous year, was chiefly due to less expenditure on *Purchase of Salt and Freight* and the transfer to Bengal of the Orissa Salt Department, and which also accounts for the increase in Bengal.

69. The excess in England was due to larger demands for stores than anticipated.

70. The actuals agree closely with the Budget, there being an excess of only 7 on the whole. This occurred under *Charges on Sale of Stamps, including discount* in Bengal (6), Punjab (3), and Madras (6), and was due to large sales of stamps, and in the North-Western Provinces (7) due to freight and other contingencies connected with water-marked paper, the use of which was introduced into the Province during the year. These excesses were counterbalanced to the extent of 1,1 by savings in Bombay owing to smaller issues of stamps of low denominations on which alone discount is allowed. Under *Stamps supplied from Central Stores* the variations in the Central Provinces (4), Assam (5), Bengal (2,1), and Punjab (5) were due to over-estimates; the increase in Madras (1,0) due to a change in the method of calculating the value of stamps issued.

71. The excess in England was due to the demand having been larger than was anticipated.

72. The Indian expenditure exceeded the Budget Estimate by 29,1 and the actuals of the previous year by 27,8. The excess occurred chiefly in Madras (36,5 and 28,6, respectively), and was chiefly nominal, being due to a change in the distribution of the charges between Salt and Excise sanctioned after the Budget was framed. The excess due to this cause was covered by re-appropriation sanctioned by the Local Government. Burma contributed 1,5 of the excess due to higher payments under rewards, owing to rigorous measures taken for the suppression of illicit trade. The saving in the Central Provinces was due chiefly to the construction of certain distilleries not having been undertaken during the year (2,0), and partly to petty saving under District Executive Establishments. In Bengal the saving occurred under contingencies (6,7), counterbalanced by higher charges under supplies and services (1,2), and under District Executive Establishment (2,9), chiefly under travelling and grain compensation allowances.

5	Punjab	5	9	1,0
6,2	Bombay	6,1	5,8	5,8
54,3	TOTAL	54,6	53,1	52,5

73. The charges were less than the Budget Estimate and the actuals of the previous year by 2,1 and 1,8, respectively. The saving occurred chiefly in Bengal (1,9), and was due to a smaller outlay on re-valuation work. The excess (5) in Punjab is due to the charge to this head of the unpaid portion of Patwaris' share of mutation fees, which have been credited to Revenue Deposits for future payment. This excess requires to be sanctioned.

Savings under Exchange Compensation Allowance			..	4	...	3	7

74. The expenditure exceeded the Budget Estimate by 7 and the actuals of the previous year by 8,0. The excess over the Budget occurred chiefly in Burma (3,6), and was due mainly to a change in the system of treating over-time fees earned by Customs establishment. These fees were formerly paid direct to the officers who earned them, but since June 1897 have been credited as Miscellaneous Customs Revenue, the payments made against them being charged under this head. There was a corresponding increase under VII.—Customs. The saving in Bengal was due to the establishment being below the sanctioned strength. In Madras the provision for establishment at *Other Ports* was not fully utilized. In Bombay the decrease was due to absence of officers and to lower payments of rewards in the Presidency Division.

10.—Assessed Taxes.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.

5,3	Bombay	5,4	5,4	5,4
30,3	TOTAL	32,7	32,2	32,3

75. The expenditure showed a saving of 4 as compared with the Budget Estimate, and exceeded that of the previous year by 2,0. The excess over the previous year in Burma was due to the introduction of the Income Tax Act into Mandalay town with effect from April 1897. In Bengal it was due to higher establishment charges in the year under review. The saving of 3 in Bengal, as compared with the Budget, occurred under Allowances. The small excess of 1 in Madras has been sanctioned by the Local Government.

Savings under Exchange Compensation Allowance	3	7	1,3	4	...	4	2	5	7	4,5

76. The Indian expenditure showed a saving, as compared with the Budget Estimate, of 77,8, and an excess over the actuals of the previous year of 14,9. The saving is spread over all the Provinces except India, where there was an excess due mainly to charges in England in connection with Padouk timber sold in the London market, 1,131 tons having been sold against an expected sale of 500 tons.

77. Under *Timber, etc., removed by Government Agency* the excess in India has been explained above, but was also due to a small extent to extra charges for cartage of timber from Coorg for the Ordnance Department, Madras. In Bengal the number of sleepers cut exceeded the estimate. In Bombay the excess was due to large payments of arrears and to expenditure on special famine grass operations. The savings in the Central Provinces and Madras were chiefly due to departmental operations having been retarded by famine; in the latter Province it was partly due to over-estimate. In Assam it was due to the suspending of departmental operations after the earthquake, which rendered cart-roads useless and the rivers unserviceable for floating purposes. In the North Western Provinces the saving was due to smaller demands from the Military Works and Commissariat Departments, and to a delay in cutting fuel; and in Punjab to a scarcity of skilled sawyers and to unfavourable seasons for sleeper works and rafting purposes, and to smaller demands from Railways. Under *Timber, etc, removed by Consumers or*

Section A.—DIRECT DEMANDS ON THE REVENUE—*concluded.*

11.—Forest Expenditure—*continued.*

Purchasers, the saving, which was contributed to by all the Provinces, was due chiefly to the reorganization of the subordinate Forest and Depôt Establishment.

78. The saving occurred chiefly under *Other Charges* (38,7). The largest savings were in Madras (11,9) and Bombay (12,9). The former was due mainly to a large provision for extension and improvement, chiefly in connection with the Survey of India parties, which was not worked up to. In Bombay the provision for the erection of forest boundary marks by famine labour was not fully utilized, and certain works provided for were not carried out. These savings were counterbalanced to the extent of 3,0 by the transfer to this head of charges of grain compensation allowance provided for under *Establishment*. The savings in the other Provinces were chiefly due to works of construction and forest improvement not having been carried out to the extent proposed. Under *Establishment* the saving amounted in the aggregate to 19,1, and was spread over all the Provinces except Assam and Madras, where the effect of the reorganization of the subordinate establishment was not fully provided for. In the other Provinces the saving was due chiefly to the absence of officers on leave, to lower rates of exchange compensation, and to full effect not having been given to the reorganization scheme. In Bombay the saving, due to absence of officers and the low rate of exchange compensation allowance, was augmented by the transfer of charges on account of grain compensation referred to above. The excess over the previous year (20,7) was mainly due to the reorganization of the subordinate Forest Establishments, and to variations in the number and class of officers on duty.

79. The excess in England was due to a larger demand for stores from Bombay.

12.—Registration.

Extra charges due to Famine		...	1	...	...	1,6	...	...	1	1	1,9

80. The charges were less than the Budget Estimate by 6, and exceeded those of the previous year by 7,1. The saving, as compared with the Budget, was the result of excesses in Bengal (3,5) and Punjab (1,9), and savings in all the other Provinces, chiefly in the North-Western Provinces (9), Madras (3,0), and Bombay (1,4). The above excesses were, in both Provinces, due to the expansion of the operation of the department, to which cause the excess over the actuals of the previous year was also due. The saving in the North-Western Provinces occurred under commission to Sub-Registrars. In Madras the saving under the first head was due to the abandonment of the scheme for the revision of the Registration Manual, and to less travelling and contingent charges, and under the second head it was due to an over-estimate (3,1), counterbalanced by increased payment of commission and salaries due to the larger receipts in consequence of famine, and to the grant of privilege leave respectively (1,1), and in Bombay the saving was due to a falling off of revenue.

Section B.—INTEREST.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
1,082,6	RECEIPTS	841,3	868,9	872,2

81. The receipts in this section show an excess of 30,9 over the Budget Estimate, and a falling off of 210,4 as compared with the actuals of the previous year. Of the improvement, as compared with the Budget, 7,7 occurred in India, and was due to an increase of 3,3 on account of *Interest on Loans to Municipal and other Public Corporations*, and of 4,1 under *Other Items* on account of interest on arrears of Revenue and special advances to the Banks of Bengal and Bombay. The increase of 15,2 in England, excluding exchange, was due to the investment of the cash balance at a higher rate of interest during a portion of the year.

82. The decrease of 210,4 as compared with the actuals of the previous year was chiefly due to the adjustment of the premium on loans in India in 1896-97, and to the larger investment of cash balance at a higher rate of interest during that year in England.

83. As explained in previous reports, the receipts under this head in India arise from the Paper Currency Investment and from loans granted by Government to Municipalities and other public bodies, Native States and cultivators. No alteration has been made in the Paper Currency investment during the year. The interest on the investment of the nominal value of 2,048,7 made during 1896-97 did not become due till 30th June 1897, as explained in last year's report, thus increasing the interest realized and credited in the year under report. The following statement shows the balances of the different kinds of loans during the last five years:—Owing to the amalgamation of Upper and Lower Burma, the balances of loan under Mofussil Municipalities (5,1) and under Advances to Cultivators (29,8) in Upper Burma on 31st March 1897 have been transferred from Imperial to Provincial Advance and Loan Account, hence the reduction in the balances under these loans in the Imperial section of the statement on the 31st March 1898:

	31st March 1894.	31st March 1895.	31st March 1896.	31st March 1897.	31st March 1898.

84. The interest paid in 1897-98 by the Local Governments to the Government of India on account of the loans held on the Provincial account amounted to 154,4, while the actual sum realised by them and credited to Provincial revenues amounted in the aggregate to 156,6. The fluctuations under the different heads are explained below.

85. Under *Interest on Loans to Native States* the receipts in India, which were on account of loans granted to Baoni States, the Maharaja of Ajaigarh and the Sultan of Muskat closely agree with the Budget Estimate. In Bengal the payment of interest, both current and arrear, on the Cooch Behar State Railway loan was deferred till 1901-1902, under orders of the Government of Bengal, No. 1829-P., dated 29th July 1898.

86. Under *Presidency Corporations* the short receipt of 2,0 in Bengal, in comparison with the actuals of the previous year, was due to the reduction of the outstanding balances of the loans to the Calcutta Municipality and the Port Trust. In Madras the increase was due to the further loan of 45,5 taken by the Harbour Trust Board in 1895-96.

87. Under *Interest on Loans to Municipal and other Public Corporations*, the increase in India was 1,5 on account of interest on advances in the Military Department, for which short provision was

Section B.—INTEREST—*continued.*

XII.—Interest—*continued.*

made in the Budget Estimate. In the North-Western Provinces the excess (3,1) over the previous year's actuals was due to the low receipts of that year. The increase in Madras was the result of the grant of fresh loans.

88. Under *Interest on Loans to Landholders and other Notabilities* the excess in India was due to under-estimate. The variations in Bombay over Budget and actuals of the previous year were due to the special receipt of 9 from the Jath State on account of interest on loans granted to it during the year, for which no provision was made in the original Estimate.

89. *Interest on Advances to Cultivators.*—Tha small receipt in India, as compared with the Budget, was due to the repayment of advances. In the Central Provinces the receipts fell below the Budget and the actuals of the previous year owing chiefly so the prevailing scarcity, in consequence of which the cultivators were unable to meet their liabilities. In Burma and the North-Western Provinces the increase, both over the Budget and the actuals of the previous year, was due to unexpected recoveries. In Bengal the receipts from cultivators fell off by 1,7 as compared with the Budget, owing to scarcity This decrease was partly counterbalanced by increased receipts of 1,3 on account of the Rajapur Drainage Scheme. The interest on additional investment made in 1896-97 enhanced the receipts under *Interest on Currency Investments* as explained above.

90. The variation under *Interest on Securities of Provincial Funds* in Madras was due to investment made during the year. The decrease under *Interest on Overdrawn Capital of Railway Companies* was due to smaller recoveries from the Assam-Bengal Railway, and to no adjustment having been made on account of interest payable by the Guaranteed Railways. Under *Other Items* the receipts in India and in Bombay in 1897-98 included interest on some special advances to the Banks of Bengal and Bombay. The high figure of 1896-97 was due, as explained in last year's Report, to the premium of 124,2 on the 3 per cent. loan of 1896-97, reduced by commission (6,2) on 3½ per cent. loans transferred to that loan. The increase in Bengal and Madras was chiefly due to receipts on account of interest on arrears of revenues.

91. In England the increase was due to the investment of cash balance at a higher rate of interest than was estimated for a portion of the year.

Section B.—INTEREST.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
3,453,9	EXPENDITURE	3,550,0	3,499,2	3,472,3

92. The total charges in this section showed a saving of 77,7 as compared with the Budget Estimate, and excess of 18,4 over the actuals of the previous years. As regards the former, exchange accounts for a decrease of 172,5. The increase of 94,8 under the other heads was mainly due to the payments in England (117,8) and India (50,5) on account of discount on the loans raised during the year, and to larger payments of interest in England on India Bills (60,1), counterbalanced by reduced transfer to Railway, etc., Interest (20,5), owing to reduction in Railway Capital expenditure incurred during the year, to smaller payments of interest on loans (109,1), and 23,8 in payment of interest on Savings Bank Deposits.

93. As compared with the previous year, the excess was due chiefly to the adjustment in 1897-98 of interest due to the Uncovenanted Service Family Pension Fund for 1896-97, as was explained in previous year's report, and the payment of discount on the loans raised both in India and in England, counterbalanced by the savings caused partly by the rise in the rate of exchange and partly by the transfer of a larger portion of interest charges in India to Railway Revenue Account and Irrigation Works, in consequence of the increase in the total capital expenditure on State Railways and Irrigation Works.

13.—Interest on Ordinary Debt.

94. Before proceeding to examine the interest charges in detail, it is usual to exhibit the amount of loans raised or discharged during the year, and the following figures supply the necessary particulars for 1896-97 and 1897-98:—

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
	PERMANENT DEBT.			
	INDIA—			
6,048,7	Debt incurred	4,000,0	3,000,0	3,000,1

* The above amounts are exclusive of 105,8 cancelled, comprising 95,0 charged to Railways on account of Sinking Funds of the East Indian, Eastern Bengal, and Sind, Punjab and Delhi Railways, and 10,8 charged to Discount Sinking Fund.

95. The Budget in India provided for a public loan of 4,000,0. Subsequently the Secretary of State reduced the amount of the loan to 3,000,0, and this sum was raised in August at 3½ per cent. at

Section B.—INTEREST—*continued.*

13.—Interest on Ordinary Debt—*continued.*

an average rate of R98-5-3 per cent. Of the balance of the loans previously advertised for discharge 299,3 were paid, consisting of 8,0, 99,1, and 192,2 on account of 4½, 4, and 3½ per cent. loans, respectively, besides a payment of 2 on account of 4 per cent. India Stock notes. Of the loans bearing interest 120,0 was paid on account of Gwalior loan in accordance with the terms of the agreement with the Durbar under which the loan was originally taken.

96. In England 3,500,0 India 2½ per cent. stock was issued as provided for in the Budget Estimate. In the Budget 2,000,0 was provided for temporary loans on the Security of India Bills, of which the sum of 1,000,0 was required to pay off an equal amount of the temporary loans outstanding on 31st March 1897; but in consequence of suspension of drawing of the India Bills, it was necessary to enhance the amount to 6,000,0.

97. The total Interest on debt paid in India and in England is shown below:—

1896-97. Accounts.	Rate. Debt in India on 31st March 1897.	Principal.	Interest due.	Budget.	1897-98. Revised.	Accounts.
46,5	4½	1,022,3	46,4	46,0	46,0	46,2
215,0	4	5,230,0	209,2	210,2	210,2	200,8
3,390,2	3½	90,918,6	3,182,2	3,280,0	3,192,5	3,184,0
42,9	3	10,954,8	328,6	327,0	328,6	307,6
4,8	Provincial Debentures	85,5	3,4	5,0	4,0	4,1

54,0	Interest on Loans in course of discharge			10,0	25,0	26,4
...	Discount on Loans and Miscellaneous			...	50,7	50,6
3,753,4	Total Interest paid in India			3,878,2	3,857,0	3,819,7
3,825,2	England			3,907,7	4,069,2	4,069,1
2,527,8	Exchange			2,579,2	2,278,8	2,291,5
6,353,0	Total Interest paid in England			6,486,9	6,348,0	6,360,6
10,106,4	GRAND TOTAL			10,365,1	10,205,0	10,180,3

98. This total amount was divided between Interest on Ordinary Debt and Interest on Debt for Railways and Irrigation as shown below:—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
	Interest on Ordinary Debt—			
—1,373,5	India	—1,505,6	—1,510,4	—1,543,6
2,630,7	England	2,717,8	2,879,3	2,879,2
1,738,5	Exchange	1,793,8	1,612,4	1,621,4
2,995,7		3,006,0	2,981,3	2,957,0
	Interest on Debt for Railways and Irrigation Works—			
5,126,9	India	5,383,8	5,367,4	5,363,3
1,194,5	England	1,189,9	1,189,9	1,189,9
789,3	Exchange	785,4	666,4	670,1
7,110,7		7,359,1	7,223,7	7,223,3
10,106,4		10,365,1	10,205,0	10,180,3

99. The payment in India was less than the Budget Estimate by 58,5. The decrease chiefly occurred in payment of interest on the 3½ per cent. loans. The figure under discount on loans represents discount on the new loan of 1897-98, for which no provision was made in the Budget, as, at the time of framing the Estimate, the price of paper ruled high. In England the increase over the Budget Estimate consists of 117,8 on account of the discount on the issue of 3,500,0 India 2½ per cent. stock, 60,1 in interest on India Bills, counterbalanced by a decrease of 6,7 in interest on India 2½ per cent. stock, and 10,0 for interest on temporary loans from the Bank of England which were not required. The decrease in exchange, compared with the Budget Estimate and with the actuals of the previous year, was due to the more favourable rate of exchange obtained during the year. The large reduction in India under *Ordinary Debt* was due to a saving (58,5) in the payment of interest on loans, partly reduced by a smaller transfer (20,5) to interest on Railway and Irrigation Works consequent on a reduction in the Capital Expenditure, chiefly on Railways. The payment of discount both in India and England mainly explains the excess over the previous year.

100. The excess in the amounts chargeable under this head to the Central Provinces (7), Benga (1,2), Madras (3,3), and Bombay (4,0) have all, with the exception of 1 in Bengal, been sanctioned by the Local Governments.

	Accounts	1897-98	1	..	1		515,3

101. The expenditure in India was less than the Budget Estimate by 28,5, and more than the actuals of the previous year by 57,2. The savings, as compared with the Budget, occurred chiefly under Savings Bank Deposits in India on account of interest on Post Office Savings Bank Deposits (24,6) in consequence of larger withdrawals than were anticipated, of 1,0 in the interest on Regimental Savings Bank Deposits, and of 5 on other accounts. These savings were partly counterbalanced by increases of 1,6 under State Railway Provident Institutions and 7 under Civil Engineers' Provident Fund. Under *Special Loans* the decrease of 6 in India was in the annuities on account of 8 per cent. Madras Perpetual Loans, and that of 8 in North-Western Provinces was on account of lapses and undrawn arrear of Wasika pension. The saving in Bombay was caused by the transfer of some endowment funds to the hands of Trustees. The decrease under *Miscellaneous* was chiefly on account of interest on the balances of Railway Funds. The increase, as compared with the actuals of the previous year, occurred under *Treasury Notes and Service Funds*, and was on account of adjustment during 1897-98 of interest due to the Uncovenanted Service Family Pension Fund for 1896-97, as explained in last year's Report.

102. Out of the excess of 9 in Bengal, 5 have been sanctioned by the Local Government by re-appropriation, and the remaining 4, together with 1,4 in Burma and 2 in Punjab (which arose mostly in connection with the interest on the Deposits in State Railway Provident Institutions), still await sanction.

103. The usual details of the interest on Treasury Notes and Service Funds and Savings Bank Deposits are noted below:—

Interest on Treasury Notes and Service Funds.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.

+80,4	POST OFFICE (NET)	+78,0	+131,9	+149,7
+124,7	TELEGRAPH (NET) . . .	— 7	+252,8	+257,8
+94,8	MINT (NET)	+14,3	+85,6	+ 93,6

104. The net receipt in this section exceeded the Budget Estimate by 409,5 and the actuals of the previous year by 201,2. The largest improvement occurred in the net receipts of the Telegraph Department, and was mainly due to the abnormally large increase in message traffic owing to the Military operations on the North-West Frontier, the famine, plague and the earthquake of June 1897 in Assam.

105. Under Post Office the growth of revenue from the sale of Postage Stamps and Money Order Receipts was much above the normal, but the improvement was partly counterbalanced by an increase (11,0) in the adjustments of exchange on the sterling payments to English, Colonial and other Foreign Post Offices.

106. The gradual improvement in the net results of the transactions of the Postal Department for the last five years is shown by the following figures:—

	Net Receipts.
1893-94	3,8
1894-95	25,5
1895-96	69,7
1896-97	80,4
1897-98	149,7

107. The improvement in the net receipts of the Mint over the Budget Estimate was chiefly due to an exceptionally large dollar coinage for the Straits Settlements and to the recoinage of large amounts of Kashmir and Bhopali rupees.

1,783,5	GRAND TOTAL .	1,827,3	1,869,5	1,879,2

108. The total revenue exceeded the Budget Estimate by 51,9 and the actuals of the previous year by 95.7 The increase over the Budget occurred chiefly under *Sale of Ordinary Stamps* (30,0), *Sale of Service Stamps* (10,4), and *Money Order Receipts* (21,9), and was due to the growth of the operations of the department being much above the normal, in consequence of the famine, plague, and the Military Operations on the North-West Frontier. This improvement was partly counterbalanced by the enhanced deduction under *Payments to English, Colonial and other Foreign Post Offices* (11,0), owing to the adjustment of exchange on the sterling payments to the London Post Office for the exchange of letters and parcels, and to the payments of arrears to certain colonial and other post offices. There was a small improvement of 1,1 under *Mail Cart, Parcel Van, Passenger and Goods Service,* due to the extension of traffic on the Simla-Kalka line, but this increase was more than covered by a decrease of 1,6 under *Parcel and other Postage collected in Cash,* chiefly owing to a reduction in the amount of postage taxed on unpaid and insufficiently paid covers, and the introduction of the system of "registered" newspapers under which postage fees on these publications are realized in stamps.

109. As compared with the previous year, the improvement which occurred under all the heads was chiefly due to the famine and the Military Operations on the North-West Frontier, and to a small extent to the plague.

XIV.—Telegraph—*continued.*

Indian Telegraphs.

110. The increase over the receipts of the previous year was derived principally from State messages; the number of such messages increased from 608,612 in 1896-97 to 870,278 in 1897-98, owing chiefly to the Military Operations on the North-West Frontier. The famine, plague and the earthquake in Assam also contributed to some extent to the abnormal increase in State messages. There was besides an increase in receipts from private traffic, which, during a part of the year 1897-98, was stimulated by speculations in grain, silver, and gold, while the earthquake in June 1897 and the Military Operations on the frontier caused an increase in private telegrams. Plague and famine interfered in some places with trade and affected the receipts. The number of private messages increased from 4,468,972 in 1896-97 to 4,842,949 in 1897-98. The decrease of 9,2 in the *Rent of Wires and Instruments leased to Railways and Canals* was due to the reduction in rate sanctioned by the Government of India in Public Works Department letter No. 183T., dated 10th August 1896. The increase over the Budget Estimate was due to the causes stated above.

Indo-European Telegraphs.

111. The increase was due to the message traffic transferred from the Indian Telegraph Department having been larger than in the previous year and than that provided for in the Budget Estimate. The falling off as compared with the Revised Estimate, was due to an interruption in the Teheran route in February 1898.

XV.—Mint.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
14,6	Seignorage on Silver	11,3	50,0	48,7
137,6	Gain on Copper Coinage	50,0	40,0	42,6
	Other Receipts—

2,4	Bombay	2,0	60,0	67,8
156,6	TOTAL	67,5	171,8	182,1

112. The revenue under this head showed an increase of 114,6 over the Budget Estimate and of 25,5 over the actuals of the preceding year. The greater portion of the improvement in comparison with both the Budget and actuals of the previous year occurred in Bombay under *Seignorage on Silver* and *Other Receipts.* The increase under the former was due to an exceptionally large dollar coinage for the Straits Settlements to replace Japanese silver coins, and that under the latter partly to the same cause, but chiefly to the re-coinage carried out for the Kashmir and Bhopal Durbars.

113. The decrease under *Gain on Copper Coinage* was due to the unprecedentedly large absorption of copper coin in connection with famine relief works in the previous year.

114. The increase under *Other Receipts* in Calcutta was due mainly to the re-coinage of Bhopali rupees and the coinage of cents for the Straits Settlements.

115. The expenditure in India was less than the Budget Estimate by 13,2, but exceeded the actuals of the previous year by 44,0.

116. The saving (2,7) under *Chief Office, Calcutta*, as compared with the Budget, was due to leave arrangements and to a reduction in the number of Superintendents attached to the Director General's Office (7), to less exchange compensation allowance and hill journey charges (6), to savings in establishment charges in consequence of leaves and temporary vacancies (1,2), and to less charges for purchase and repair of furniture and petty contingencies (3). Under *Presidency and District Offices* the saving of 14,1 was due chiefly to the provision for revision of establishment not having been fully utilized (12,3), to leave arrangements and temporary vacancies in Post Office establishments (3,3), to gain in working of combined offices (2,7); to smaller charges for salaries of officers due to leave and deputations (1,0), to less exchange compensation allowance (6), and to savings under contingencies due chiefly to excessive provision (5,7), partly counterbalanced by larger payments of compensation for dearness of provisions (10,2), and to increased salary charges due to the entertainment of 9 additional Inspectors and privilege leave arrangements (1,3). The excess under this head over the actuals of the previous year (19,9) was due partly to the normal expansion of the Post Office establishment (13,2), and partly to higher payment of grain compensation allowances (8,8), counterbalanced to the extent of 2,0 by savings under salary charges. Under *Road Establishment and Contingencies* the excess of 2 was the chief result of excess payments for grain compensation allowance (3,9), and for extra despatch of letters (7), due to insufficient provision, and of savings due to an over-estimate under Rainy Season and Miscellaneous charges (2,2), and to the abolition of a number of contracts for conveyance of mails in Burma, and to the provision for

Section C.—POST OFFICE, TELEGRAPH, AND MINT—EXPENDITURE—*continued.*

15.—Post Office—*continued.*

revision of mail lines not having been fully used (2,1). The excess over the actuals of the previous year under this head was due chiefly to the above causes and to the extension of runners' lines. The saving under *Railway Charges* occurred chiefly in the payments to the East Indian, Indian Midland, and South Indian Railways (6,8), partly counterbalanced by heavy payments (6,0) on account of the introduction of the special train service from the 17th September 1897. The increase over the actuals of the previous year was mainly due to the introduction of the special train service system and to higher payments to the Great Indian Peninsula and North-Western Railways in consequence of the development of the Railway Mail Service business. Under *Mail Cart, Parcel Van, Passenger and Goods Service Establishments and Charges,* the saving was due to excessive provision made with reference to the high prices of grain, for the maintenance of transport animals (8), and an over-estimate for contingent charges (6). The decrease, as compared with the previous year, was due to the high cost in 1896-97 of the maintenance of animals. The excess under *Other Charges,* both as compared with the Budget and the actuals of the previous year, was due to certain arrear payments to the P. and O. Company. The increase in the sale of ordinary stamps accounts for the excess under *Discount on Sale of Postage Stamps* as compared with the previous year. The saving under *Subsidies* was due to the termination of the contract with the India General Steam Navigation Company for the conveyance of Assam Mails (1,0), non-payment of small sums of 3, counterbalanced, to the extent of 9, by arrear payments and payments for additional services during the year. The excess of 9 under *Stationery and Printing* was due to an under-estimate for stationery, and the excess, as compared with the previous year, was due to larger supplies of stationery and more printing work done for the Department. Under *Miscellaneous* the excess of 4 was due to an under-estimate of payments for compensation for lost insured articles. The excesses under *Stationery and Printing* and *Miscellaneous* have been met by re-appropriations sanctioned by the Director General of Post Office.

117. Under *Disrict Post Charges* the excesses in the Central Provinces, Bengal, and the North-Western Provinces were due chiefly to payments of grain compensation allowances, and the increase in Burma to the subsidy, sanctioned with effect from the 25th March 1897, for conveyance of mails between Taungup and Kalindaung, partly counterbalaced by a saving of 5 under establishments and contingencies. The excess in the Central Provinces has been met by an additional grant sanctioned by the Government of India, and those in Burma, Bengal, and the North-Western Provinces by re-appropriations sanctioned by the Local Governments. The extra charges due to famine are estimated at 25,8. The savings under Exchange Compensation Allowance are 7.

Section C.—POST OFFICE, TELEGRAPH, AND MINT EXPENDITURE—*concluded.*

16.—Telegraph—*continued.*

Indian Telegraphs.

118. The expenditure during 1897-98 was 67,3 more than that in the previous year. The increase in the expenditure in India was due partly to a greater demand for the construction of departmental and canal lines of telegraph, and partly to increased working expenses owing to the expansion of operations of the Department. During the year 1897-98 ten new Departmental and sixty-three Postal combined offices were opened. The increase in the expenditure in England was due to larger expenditure on stores. The actual expenditure of the year fell short of the Budget Estimate, owing partly to restriction of expenditure under the orders of the Government of India, and partly to short outlay on works owing to the Railway programme of the year not having been fully worked up to. There was also a decrease in the furlough allowances paid in England, including exchange. The extra charges due to famine are estimated at 2,9. The savings under Exchange Compensation Allowance are 2,4.

Indo-European Telegraphs.

119. The decrease in the capital expenditure was due partly to the buildings for the signalling staff at Teheran having been almost completed during 1896-97, and partly to larger issues of stores for repairs of land lines and cables in the Gulf section, while the increase under Revenue was due to an increase in the homeward traffic and in the percentage of traffic carried by the Indo-European route.

120 The increase over the Budget estimate was due to the increased payments in England in respect of revenue mentioned above.

17.—Mint.

2	" England	7	4,9	5,3
2	" Exchange	5	2,7	3,0
61,8	GRAND TOTAL	53.2	86,2	88,5

121. Under Establishment the accounts showed excess of expenditure both in Calcutta and Bombay. The excess of 1,3 in Calcutta was due to increase of expenditure of 2,1 on account of extra establishment, for which an additional grant of 2,0 was sanctioned in Financial Department No. 58-A., dated 6th January 1898, partly counterbalanced by savings of 8 under Operative establishment and under Salaries, due to the absence on furlough of the Mint and the Assay Masters. The increase of 4,0 in Bombay was chiefly due to an unusually large dollar coinage and to a large coinage of small silver in connection with the famine, which led to the entertainment of large temporary establishments and to an increase of overtime allowances. The difference in the actuals of two years was due to the reasons given above, and to the fact that the actuals of 1896-97 were low on account of absentees.

122. The increase under *Loss of Weight in Coinage*, both in Calcutta and Bombay, over the Budget and in Bombay over the accounts of the preceding year was due to the re-coinage of large amounts of Kashmir and Bhopali rupees and other uncurrent coins.

123. The increase under *Other Charges*, both in Calcutta and Bombay, was the result of heavy expenditure in the purchase of Local stores. The excess of 3,2 in Calcutta was covered by an additional grant of 3,5 sanctioned in the letter quoted above.

124. In Bombay out of the excess of 20,9 over the Budget, 9,0 were covered by additional grants sanctioned by the Government of India in their letters Nos. 4796-A. and 5049-A, dated 28th October and 16th November 1897, respectively, and 11,0 were sanctioned by re-appropriation from savings under 1.—Refunds and Drawbacks, under Government of India No. 1233-A., dated 15th March 1898.

125. The excess of 1,8 in Calcutta and 9 in Bombay require sanctions of the Government of India. The extra charges due to famine are estimated at 1. The savings in Exchange Compensation Allowance are 4.

Section D.—RECEIPTS BY CIVIL DEPARTMENTS.

1,678,6	RECEIPTS	1,689,2	1,703,1	1,723,5

126. The receipts in this section showed an improvement of 34,3 over the Budget Estimate, and of 44,9 over the actuals of the previous year. As compared with the Budget, there was an improvement of 60,4 under Marine, due mainly to larger recoveries on account of hire of vessels employed in conveying troops to the South Coast of Africa, Mombassa, and Suez, and to and from the Cape and Mauritius, and to larger Pilotage Receipts in Bengal; and 23,9 under Police, chiefly due to recovery from the Burma Railway Company of its share of the cost of Railway Police from 1st September 1896, and to large receipts on account of private watchmen in the town of Bombay; there were also small improvements under Medical (2,6), and Scientific and other Minor Departments (3,2). These increases were partly counterbalanced by decreases of 11,9 under Law and Justice—Courts of Law, due chiefly to a change in the system of realization of Kurk Amins' fees in the North-Western Provinces; of 29,0 under Law and Justice—Jails, due mainly to a smaller demand for jail manufactures, and to the admission of convicts in an enfeebled condition unfit for remunerative labour, and of 14,9 under Education, chiefly in fees and fines.

127. The increase, as compared with the actuals of the previous year, occurred chiefly under Marine (40,2), and Police (11,4), due to the causes explained above affecting the improvement over the Budget.

128. The receipts under this head fell short of the Budget Estimate by 11,9, but exceeded the actuals of the previous year by 7. As compared with the Budget and the previous year's actuals there was a large decrease under *Court-fees realised in Cash*, chiefly in the North-Western Provinces, due partly to a change in the system of realization of Kurk Amin's fees, which, in certain cases, are now levied in stamps, and partly to the effects of famine. The improvement in Bengal occurred under Amins' fees. There was a decrease of 3,8 under *General Fees, Fines, and Forfeitures*, the receipts under

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

XVIA.—Law and Justice—Courts of Law—*continued.*

which consist chiefly of Magisterial fines, and are of an uncertain character; the Estimate in Bengal, where the largest fall occurs, seems to have been pitched too high, while in Madras the increase was partly due to large fees realized by the High Court for printing, and also partly to the transfer to this head from XXV.—Miscellaneous, of fines realized under the Police Act by Bench Magistrates. Under *Sale-proceeds of Unclaimed and Escheated Property* the decrease in India was due to the lapses of estates in the hands of the Administrator General being smaller than usual, and much below the Budget. The improvement in Madras was due to the seizure of an unclaimed sum of 1,8 from a swindler in the Tinnevelly district. Under *Other Receipts* the increase in Bengal was due to larger receipts from fees for examinations of Pleaders (1,8), and from miscellaneous receipts. In Punjab the improvement occurred under "Other items."

129. Under *Sale-proceeds of Jail manufactures* the decrease of 25,7, as compared with the Budget Estimate, is the net outcome of variations in all the provinces, the chief of which are a falling off of 18,8 in the Central Provinces, and of 11,5 in the North-Western Provinces, and an increase of 10,8 in Bengal; the decreases are the results of smaller demands for jail manufactures, and the admission of a large number of convicts in an enfeebled condition unfit for remunerative labour, while the increase in Bengal was due to large supplies of manufactured articles to the Police and Military Departments. In the Central Provinces the extent of the famine was not realized when the Budget was framed, which also provided for a contract which the Reformatory School failed to obtain. In Madras the decrease was due to an outbreak of cholera in three Central Jails; and that in Bombay to the release of long term prisoners, well acquainted with factory work on the occasion of the Diamond Jubilee, to the existence of plague in House of Correction, Bombay, and the difficulty in obtaining raw materials in the Yerrowda Central Prison owing to plague restrictions. The net receipts under this head, after deducting the corresponding charges under 19B, are given below:—

130. The receipts under this head exceeded the Budget Estimate by 23,9, and the actuals of the previous year by 11,4. Under *Police supplied to Railways* no provision was made in the Budget, as the recovery of the seven-tenths share of cost of Railway police is adjusted by deduction from expenditure; the actuals represent the excess of the recovery from the Burma Railway Company for the period from 1st September 1896 to March 1897, over the amount adjusted by deduction from expenditure in 1897-98. The Revised was an under-estimate. Under *Police supplied to Public Departments, Private Companies and Persons* the increase occurred chiefly in Bengal and Punjab, in the former being due to larger recoveries for police supplied to Railway Companies (1,0) and for Punitive Police (5), and in the latter to larger recoveries for police supplied to private persons. Under *Presidency Police,* the improvement was almost entirely in Bombay, where it was due to the large demand for Ramosis (private watchmen), owing to the absence of many of the inhabitants of the town in consequence of plague. Under *Other Receipts* the principal variations are increases in Burma (6,3), due to adjustment of value of stores returned to the Military Department, and in Punjab (7); and decreases in Assam (2,8), due to a change in the system of supplying rations to and making ration recoveries from the Military Police; in Bengal (8) due to smaller recoveries on account of Village Police (1,4), counterbalanced by an increase under miscellaneous receipts (8), and in the North-Western Provinces (8) due to decrease in rewards to Police paid from sums received from other departments and the public. The decrease under *Police supplied to Municipal, Cantonment, and Town Funds* occurred chiefly in Burma (1,5), due to non-recovery from the Mandalay Municipality, and in the North-Western Provinces (7), due to over-estimate, which was corrected in the Revised; on the other hand, there was a small improvement in Bombay (8), due to receipt from the Baroda Cantonment which was not anticipated in the Budget. Under *Fees, Fines, and Forfeitures* the net decrease was 5, the variations in most cases being due to Cattle Pound receipts; in Burma the improvement was partly due to fines in gambling cases.

	Accounts 1897-98	47,7	33,0	113,9	6,1	200,7

131. The receipts under this head exceeded the Budget Estimate by 60,4, of which 36,5 was under *Dockyard Services, etc.*, due chiefly to large recoveries (31,5) on account of hire of vessels employed in conveying troops to the South Coast of Africa, Mombassa and Suez, and to and from the Cape and Mauritius, and to large receipts (5,0) for works done for private individuals, etc.; 1,7 occurred under *Sale-proceeds of Vessels and Stores* due to sales of vessels not anticipated in the Budget. Heavy shipments of rice to India and general improvement in trade brought a large number of vessels to Burma ports, and resulted in an increase of 4,0 under *Coast Light Dues*; *Pilotage Receipts* in Bengal, which are of a fluctuating character, contributed 17,4 towards the improvement. The increase (40,2), as compared with the previous year, was also due to the cause stated above.

XIX.—Education.

132. The receipts fell short of the Budget Estimate by 14,9, and of the previous year by 3,3. Of the decrease, 11,0 occurred under *Fees and Fines*; in Bengal the increase anticipated in the Budget under Government Schools was not realized; in Madras the falling off was chiefly in fees from Art Colleges and Schools; and in Bombay the decrease was attributed to the prevalence of plague; and 4,5 occurred under *Other Receipts*, chiefly in Bombay, owing to smaller sales of books at the Sind and Government Central Book Depôts.

133. The Indian receipts under this head exceeded the Budget Estimate by 2,8, but fell short of actuals of the previous year by 3,2. The improvement, as compared with the Budget, was mainly due to increases under *Lunatic Asylum Receipts* (1,5), chiefly in Burma (5), and the North-Western Provinces (9), the former being due to larger receipts from non-pauper patients, in consequence of the extension of the Rangoon Lunatic Asylum buildings, and the latter to improved receipts from the Dairy farm attached to the Lunatic Asylum, Bareilly; and under *Other Receipts* (2,7), contributed chiefly by Madras (1,1) owing to the transfer to this head from XXV.—Miscellaneous receipts from private scavenging fees and sale-proceeds of manure and street sweepings, and by Bombay (6), owing to the adjustment of the value of medicines returned to the Medical Store Department by Civil Officers. The small decrease of 5 under *Contributions* was the result of considerable variations in the different Provinces, the principal of which are decreases of 2,6 in the Central Provinces and of 8 in the North-Western Provinces, owing to contributions towards local dispensaries, village sanitation works, and vaccination having fallen off; and of increases of 1,4 in Bengal, owing to a special contribution paid by the Chittagong Municipality; and of 1,9 in Madras due to large contributions from private individuals, chiefly in the districts of Vizagapatam, Tinnevelly, North Arcot, and Trichinopoly.

134. The Indian receipts under this head showed a small increase of (3,2) over the Budget Estimate, and of 2,1 over the actuals of the previous year. The principal variations are decreases of 1,6 in Madras under *Cinchona Plantations*, owing chiefly to a reduction in the price of quinine supplied to Government Medical Depôts, and of 1,4 under *Receipts on account of Public Exhibitions and Fairs*, owing mainly to the prevalence of famine; and increases of 2,2 under *Labour and Emigration*, chiefly in Assam, owing to the large number of labourers imported, and of 1,4 under *Sale of Maps, Instruments, etc.*, due to sale of Archæological paintings not anticipated.

15,445,2	EXPENDITURE	15,467,8	15,721,3	15,739,6

135. The expenditure in this section showed an increase of 271,8 as compared with the Budget Estimate, and of 294,4 as compared with the actuals of the previous year. As compared with the Budget Estimate the largest increase occurred under Medical, where there was an excess of 278,6, due to charges connected with the bubonic plague in all the provinces except Burma and Assam. There was an excess of 79,7 under Law and Justice—Jails, and of 49,6 under Police, due chiefly to the high prices of food grains and payment of grain compensation. Part of the excess under Jails was due to an increase of jail population in some provinces, and under Police, to charges connected with the plague. There was an increase of 16,2 under Law and Justice—Courts of Law, chiefly under Criminal Courts. These excesses were largely counterbalanced by savings under the other heads, the principal of which were 45,1 under Education, spread over all the provinces, and due chiefly to some special provisions not having been utilized and to loose estimating in respect of Local charges, and 49,8 under Political, due mainly to the subsidy of the Amir of Afghanistan not having been fully drawn.

136. Of the excess, as compared with the previous year, 278,7 occurred under Medical, 77,3 under Police, and 38,6 under Law and Justice—Jails, due mainly to the causes named above, and 38,2 under Law and Justice—Courts of Law, due chiefly to larger payments of grain compensation. These excesses were partly counterbalanced by decreases, the chief of which were 69,5 under Political, due partly to the subsidy of the Amir of Afghanistan not having been fully drawn and to payment of arrears of his subsidy in the previous year, 41,2 under Marine, of which 19,1 occurred in the expenditure in England and 22,1 in India, due to less payments of exchange compensation allowance and the special payment in 1896-97 in Madras to the Harbour Trust Board, in satisfaction of its claim against the Madras Port Fund, and 28,7 under General Administration in the expenditure in England.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

18.—General Administration—*continued.*

137. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 14,1 and 7 respectively. The excess over the Budget occurred chiefly in India and Bombay; all the other Provinces except the Central Provinces, where there was a petty excess, showed small savings. The excess occurred chiefly under *Secretariat*, and was due in India mainly to increased telegram charges owing to famine and the disturbance on the North-West Frontier, and in Bombay to the appointment of an additional Under Secretary, and heavy expenditure on temporary establishment and telegram charges in connection with the plague.

138. Under *Salaries of Governor General, Governors, etc.*, the excess of 1,4 in Burma was due to the province having been raised to the status of a Lieutenant-Governorship with effect from 1st May 1897, and that of 1,0 in Bengal was due to arrangements consequent on the grant of medical leave to Sir Alexander Mackenzie. Under *Staff and Household* the excess of 4,8 in India was due chiefly to increased Hill Journey charges and allowances (2,7) and to heavy telegram charges (2,2); that of 6 in Burma was due to the change in the status of the Province, and that of 5,5 in Bombay chiefly to heavy telegram charges in connection with the famine and plague; against these excesses there was a saving of 1,0 in the North-Western Provinces due to low expenditure for contract contingencies. The saving under *Executive Council* was the result of the stoppage of exchange compensation allowance to Members of the Council. Under *Legislative Council* the excess in India was chiefly due to larger payments of salaries and travelling allowances of non-official members of the Viceregal Council (1,0) owing to a larger number of such members being present on duty, to the absence of an officer on privilege leave (4), and to payment of a reward for preparing an index of Enactments (5); in Burma no provision was made for a Legislative Council; and in Madras the saving was due to the non-payment of 5 provided for the Member, Viceregal Council, and to saving in the salary of the Assistant Secretary.

139. The *Secretariat* charges exceeded the Budget by 23,1, of which 16,5 was in India, 3,8 in the Central Provinces, 7 in Assam, 1,4 in Bengal, and 1,5 in Bombay, counterbalanced by savings of 1,4 in Burma, of 1,0 in the North-Western Provinces, of 1,1 in Punjab and of 8 in Madras. The details of the India Secretariat charges are given below :—

1896-97. Accounts.	*Secretariat (India).*	Budget.	1897-98. Revised.	Accounts.
29,8	Financial Department	29,7	29,7	29,3
6,9	Statistical Department	7,5	7,8	7,8
28,0	Home Department	23,9	28,0	28,9
40,1	Foreign Department	43,7	49,1	44,8
25,6	Revenue and Agriculture	23,5	28,2	27,5
7	Translator's Department	7	7	8
32,2	Public Works Department	31,3	30,1	31,9
3,3	Government Record Department	3,9	3,3	3,3
49,8	Military Department	49,5	55,7	55,9
216,4	TOTAL	213,7	232,6	230,2

140. The excess in the Home Department (5,0) was due chiefly to telegram charges connected with the famine (3,4), to the payment of arrear and transit pay of an officer, and the appointment of an officer on special duty (1,1); that in the Foreign Department (1,1) was due to heavy telegram charges (2,1), counterbalanced by savings under Salaries owing to the appointment of officers on lower pay provided for (6) and under Establishment (5). The excess over the previous year was in telegram charges. The excess in the Revenue and Agricultural Department was chiefly due to high telegram charges (3,3), and to absence of officers on privilege leave (9), and other petty excesses, partly counterbalanced by savings in the grant for special charges for famine correspondence (1,7). That in the Military Department (6,4) was due to high telegram charges chiefly connected with the North-West Frontier disturbances (5,9), and Hill Journey allowances (5). The excess over the previous year was due to the high telegram charges. The small excess of 6 in the Public Works Department was due to the absence of officers on privilege leave (1,1), to Hill Journey charges and allowances (5), counterbalanced by savings in establishment charges (1,1). The excess in the Central Provinces was chiefly due to the appointment of an additional officer for the disposal of famine work (1,5), to officers on special duty (7), and to the absence of officers on leave (9). In Assam it was due to extraordinary expenditure in consequence of the earthquake. In Bengal it was due to absence of officers on leave, and increased establishment and contingent charges, and in Bombay to increased expenditure connected with the plague, as explained above. The saving in Burma was chiefly due to the appointment of officers on lower salaries than those provided for, and to less outlay on postage telegrams and miscellaneous charges. In the North-Western Provinces it was due to the termination of the appointment of the Scarcity Secretary earlier than was anticipated

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

18.—General Administration—*continued.*

(6), and to less establishment charges (4). In the Punjab the provision for the re-organization of the gazetted staff was not utilised, and in Madras it was due to savings under Establishment resulting from re-organization and the absence of an officer on leave, partly counterbalanced by the entertainment of extra establishment in connection with famine work. Under *Tour charges* the saving in India was chiefly under charges for special trains, while the excess in the North-Western Provinces was due to high tour expenses of the Lieutenant-Governor. Under *Board of Revenue and Financial Commissioner* the saving of 4,1 in Punjab was due to the abolition of the appointment of Second Financial Commissioner. In India the charge represents the arrear and transit pay of the Hon'ble Mr. Rivaz prior to his taking charge of the Home Department; and in Madras the excess was due partly to the salary of the Famine Commissioner and partly to the grant of privilege leave. Under *Commissioners* the excess in India (8) was due to the payment of arrear and transit pay of Messrs. Holderness, Fuller and James prior to their taking up appointments under the Government of India; in Bengal the excess (8) was due to the absence of officers on privilege leave, partly counterbalanced by savings under contingencies; the excess in the North-Western Provinces (1,6) was due to the absence of officers on privilege leave, and entertainment of temporary establishment for famine work (9) and to increased expenditure on contingencies (1,0); in Burma the saving (1,4) occurred chiefly under diet and travelling allowance of witnesses, contingencies, and exchange compensation allowance; the saving (7) in Punjab occurred under allowances and contingencies. Under *Inspector-General of Stamps, Registration, etc.*, the saving in Assam was due to the lower rate of pay and personal allowance drawn by the present Inspector-General. The total charges for *Account* and *Currency Offices* are shown below :—

		Civil Account.	Currency Offices.	Total Civil Account and Currency Offices.	Office of A. G., P. W. Dept.	TOTAL.
Accounts	1896-97	213,7	33,3	247,0	24,3	271,3
Budget	1897-98	220,0	28,6	248,6	25,0	273,6
Revised	1897-98	211,6	30,4	242,0	23,7	265,7
Accounts	1897-98	214,1	30,4	244,5	23,5	268,0

141. The savings under civil account offices were due to the absence of officers on furlough, deputation, and the delay in the introduction of the outside audit scheme in the North-Western Provinces and partly also to the change in system of adjusting recoveries from Incorporated Local Funds on account of audit fees now accounted for by deduction from this head by debit in the local section under *General Establishment of Local Fund Officer.* The excess under Currency offices was due to the grant of privilege leave to officers, revision of establishment in Calcutta, and high charges for extra shroff, travelling and contingencies in Bombay. Under *Allowance to Presidency Banks* the saving in India was due to the non-payment to the Bank of Bengal of the allowance for general treasury duties (4,4), while in Bombay the excess was due to the payment to the Bank of Bombay, during 1897-98, of the 2nd instalment for 1896-97 of the charge on account of public debt duties. Under *General Establishment of Local Fund Officers* the excess in the Central Provinces and Bombay was due to the change in the method of adjusting recoveries of audit fees referred to above; in Bengal the charges were exceptionally low, and in Madras the increase expected with the establishment of additional Punchayet unions was over-estimated.

142. In the expenditure in England there was an increase of 2,6 in telegram charges, and of 2,3 on account of the additional store to the India Office Building, partly counterbalanced by a decrease of 2,8 in salaries, and 1,0 in charges of the Store Department.

143. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 17,0 and 39,2, respectively. The largest difference, as compared with the Budget, occurred under *Criminal Courts* (19,4), chiefly in Bengal (5,9), North-Western Provinces (9,5), Punjab (2,5), and Madras (3,8). The excess in Bengal was due to payment of grain compensation (2,1) and to increased expenditure on travelling (3,8), these reasons also account for the increase over the previous year's actuals; in the North-Western Provinces it was due partly to the large number of officers present on duty in consequence of the famine (4,9), the prevalence of which and of plague resulted in extended tours causing an increase of travelling allowances (2,2), and more contingent expenditure (1,9); the excess over the actuals of the previous year was due chiefly to these causes; in the Punjab the increase occurred chiefly in charges for temporary establishment (1,8), for diet and road money of witnesses (1,0), and for contingencies (1,0), partly counterbalanced by a saving of (1,4) under Salaries and Exchange Compensation Allowances, and in Madras it was chiefly due to the extra expenditure entailed by the famine. There was also a small excess in the Central Provinces due to indirect famine charges. Under *High Court, etc.*, the principal variations are an excess of 1,1 in the North-Western Provinces owing chiefly to the entertainment of a second Additional Judicial Commissioner, sanctioned during the year, and of his establishment for two months; of 1,5 in Punjab due to the appointment of a sixth Judge for a portion of the year; and of 1,0 in Madras chiefly on account of printing executed by the High Court on behalf of Suitors (1,5), partly counterbalanced by savings due to the absence of two Puisne Judges on leave without allowances. The variations under *Law Officers* are chiefly due to higher payments of pleaders' and barristers'

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

19A.—Law and Justice—Courts of Law—*continued.*

fees for Civil and Criminal cases in Bengal (5), Punjab (3,7), and Bombay (1,0), counterbalanced by less charges on this account in the North-Western Provinces (4) and Madras (6), and to savings under salaries in Burma (1,7). In the aggregate the differences under *Civil and Sessions Courts* is a small saving of 2,6, but variations are considerable in some of the Provinces; the more important are an excess of 16,5 in Bengal, of which 12,1 was on account of grain compensation allowance, 2,2 on account of grant of privilege leave to Subordinate Judges and Munsiffs, and 1,9 on account of remuneration of copyists and temporary establishment, and savings in the Central Provinces (4,3), Punjab (3 6), Madras (7,6), and Bombay (3,6), due largely to the absence of officers on leave and to vacancies; other causes of variations are in Punjab less expenditure on grain compensation (1,1) and allowances and contingencies (1,0), and in Madras the discontinuance of the appointment of a Civilian Subordinate Judge (1,0), and less expenditure on Process-serving establishment (1,1) and contingent charges (1,1); in Bombay the saving due to the above cause and to less expenditure on temporary establishments was partly counterbalanced by higher charges for travelling, owing to judicial establishment. being employed on plague duty, for grain compensation allowance, and for diet and road money of witnesses. There was an excess of 1,0 in Assam due to extraordinary expenditure in connection with the earthquake, and the grant of grain compensation allowance. Under *Courts of Small Causes* the only noteworthy differences are the savings in Bengal (1,2) and Bombay (8), the former being due to the absence of Judges on leave, and the latter to the deputation of two Judges to other appointments, owing to decrease of work in the court on account of the plague in Bombay. Under *Refunds* the charges are of a fluctuating nature, and in India proved unusually high owing to heavy refunds of lapsed estates in the hands of the Administrator-General, Bengal.

144. The Budget Estimate in England provided for the out fit of two Judges expected to come out to India, but none came.

19B.—Law and Justice—Jails—*continued.*

145. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 78,0 and 35,5 respectively. The excess occurred wholly under *Other Jail Charges* (112,4), and was contributed by every province except India and Burma. It was due chiefly to high prices of food grains and to purchase of grain for stock in anticipation of a still further rise, and to high jail population in the North-Western Provinces and the Punjab. Other causes, however, contributed to this excess, the following are the most important. In Bengal there were excesses under Hospital and Sanitation charges (2,6), charges for moving prisoners (1,5), grain compensation (2,2), live stock, tools and plant (2,0), and under charges for police custody (1,4) : these excesses were partly counterbalanced by savings, chiefly under supplies and services (1,7), and charges for clothing and bedding for prisoners (9) ; in the North-Western Provinces there were increases under Hospital charges (2 8), charges for moving prisoners (2,5), and clothing and bedding of prisoners (1,5): these excesses were counterbalanced to the extent of 2,3 by savings mainly under salaries and Establishment ; and in Bombay clothing and bedding charges showed an excess of (3,0). The saving in Burma was due chiefly to the release of 2,021 prisoners on the occasion of the Diamond Jubilee, and to a falling off in the number of admissions (10,4), counterbalanced by an excess of 6,8 due to purchase of grain for a reserve stock. The larger figure of 1896-97 was due to larger jail population, to heavier purchases of grain in advance, and to high prices of grain. Under *Jail manufacture* the saving in the Central Provinces (11,9) was due to the Reformatory School having failed to obtain certain contracts provided for, and to the emaciated conditions of the convicts which rendered them incapable of remunerative labour. In Burma the purchases of raw material and tools and plants were small. In the North-Western Provinces the saving (12,2) was due to less expenditure on raw materials, owing to a low demand for jail manufacture in consequence of the famine, to the admission of prisoners in a debilitated condition and incapable of productive labour, and to the system of adjusting cost of raw materials manufactured for use in Jail departments, by credit to this head and debit to *Other Jail Charges.* In the Punjab the saving (3,0) was due to non-payment to Jailors of commission provided for (6), and to less charges for raw material due partly to less demand for bricks (6), and partly to the system of adjusting cost of raw materials manufactured for Jail departments ; the variations between the two years were also due to those causes. In Madras the decrease (6,5) was due to a falling off in manufacturing operations due to the prevalence of cholera in certain jails ; and in Bombay it was due chiefly to the method of adjusting the cost of raw material manufactured for use in Jail departments. The excess in Bengal (4,9) was the net result of an excess of 9,2 on freight on machinery, and tools and plant, and a saving of 4,3 due to less purchase of raw materials. The decrease as compared with the previous year was due to the large purchase of raw materials in 1896-97.

146. The excess under *Convict Charges at Port Blair, etc.*, was due chiefly to increased expenditure under Commissariat Supplies due to high prices of food grains (6,0), and under Marine Supplies (5), counterbalanced by savings under Salaries and Establishment (2,0), under Forest and Medical Supplies (2,8), and under Passage Money (3). The excess over the previous year occurred chiefly under Commissariat and Forest supplies.

147. The excess in England was due to a larger demand for stores than was expected.

Savings under Exchange Compensation Allowance	2	6	3,1	3	1,3	8	7	1,2	1,1	9,3

148. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 49,3 and 77,2 respectively. The excess as compared with the Budget was the result chiefly of an increase under *District Executive Force* (73,7) due mainly to payment of grain compensation, and to charges connected with the famine and plague, and a decrease of 24,4 under *Special Police* due mainly to less purchase of rations.

149. Expenditure in excess of the Budget occurred in the Central Provinces (10,3), Bengal (31,4), Punjab (5,9), Madras (3,8), and Bombay (33,8). The charges for grain compensation accounted for a considerable portion of the excess in each Province except Madras as shown below:—

	Presidency.	District.	Other heads.	TOTAL.

	6,2	42,8	6,1	55,1

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

20.—Police—*continued.*

150. The variations under the several heads are generally due to the charges mentioned above, to the absence of officers on leave, and to Exchange Compensation Allowance. Important variations other than these are noticed below.

151. Under *Presidency Police* the excess in Bengal over the previous year was due to larger payments of grain compensation allowance; in Bombay the recovery of the Municipal Contribution fell short by 2,5, and the charges for private watchmen exceeded the provision by 5,6; there was a corresponding increase on the receipt side on this account (*vide* para. 130). These excesses were partly counterbalanced by savings due to the absence of the Commissioner on leave and in clothing charges and rents for Municipal Police. The excess over the previous year was due to the high charges for private watchmen. Under *Superintendence* the excess in Bengal (7) and part of that in Punjab (8) was due to the purchase of tents. The excess in the North-Western Provinces, and part of that in Madras was due to high tour and contingent charges. Under *District Executive Force,* the excess was mainly due to the payment of grain compensation allowance as shown above. It was also partly due in the Central Provinces to the employment of a large number of police owing to the famine (1,7), and to high travelling charges due to large remittances of treasure and frequent transfers of policemen (1,3). In Bengal to too large a deduction for probable savings (8,0), to additional police for districts affected by famine and for plague duty (2,7), and to high travelling expenses (2,9); the excess over the previous year was chiefly due to payment of grain compensation. In Madras the increase was due to payments of famine batta and additional temporary police (4,4), increased outlay on clothing, arms, and accoutrements (1,6), contingent charges (1,4), and on travelling charges consequent chiefly on the famine (2,3). These increases were partly counterbalanced by savings under petty works of construction and repair (2,3), under salaries (5) and under hospital charges due to famine (6); and in Bombay the excess was partly due to additional police for plague duty (9,5), additional police at Poona (8,0), to high travelling charges (3,1), counterbalanced by saving under salaries and Exchange Compensation Allowance (1,4), under Establishment (2,2), clothing charges (3,6). The excess over the previous year was due to higher charges connected with the famine and plague. Savings occurred in India (1,6), Burma (6,3), and North-Western Provinces (9,1). In Burma, the saving was due, in addition to the general causes mentioned above, to a revision of the police force, to the non-amalgamation of the Port Trust police with the district police, and to the force having been below strength, partly counterbalanced by heavier outlay on petty construction and repairs and on punitive police. The savings in the North-Western Provinces occurred chiefly in the charges for police force (18,1), and for arms and accoutrements (2,1), but even here the expenditure on grain compensation (7,4) materially reduced the savings, which was further reduced by travelling charges (9) and increased expenditure on police escorts (2,9), due chiefly to frequent movements of prisoners and treasure. Under *Municipal and Cantonment Police* the excess over the Budget and the actuals of the previous year in Bengal and Punjab was due to high payments on account of grain compensation, and in Bombay to the reorganization of the Baroda cantonment police. Under *Government Railway Police* the absence of expenditure in Burma is due to the adjustment of arrear contributions from the Burma Railways Company (*vide* para. 130); in the North-Western Provinces the excess was due to plague preventive measures on the East Indian Railway (2), and to payment of arrears of house-rent allowance to Railway Companies (4); in the Punjab the excess was due to the adjustment on account of quarters occupied by the North-Western Railway police (1,5), charges on account of the Kotri-Rohri Railway police (1,3), and to larger expenditure under contingencies (9). The saving in Madras (2,5) was due chiefly to the provision for the Railway police scheme not having been utilized.

152. Under *Village Police* the saving (3,7) was the net result chiefly of a saving of 7,8 in the North-Western Provinces and excesses of 2,7 and 2,0 in Bengal and Bombay, respectively. The saving in the North-Western Provinces was due to the revision of the Rural Police system in Oudh not having been carried out to an appreciable extent (8,4), partly counterbalanced by higher expenditure on rewards to chaukidars (5). The excess in Bengal both as compared with the Budget and the actuals of the previous year was due to payment of grain compensation, and to increased charges for rewards to chowkidars, and in Bombay it was due to an under-estimate of 3,7, and to payment of grain compensation allowance (8), partly reduced by savings in allowances to heads of village police and watchmen (1,1), and in the provision for reorganization of the Village Police Establishments paid from village officers' Cess Fund (Sind). The savings under *Special Police* occurred chiefly in Assam (9,8) and Bengal (17,0); in Assam it was due to a change in the free ration system (3,3), to the failure of the contractor to supply the full quantity of rations required for the Lushai Hills Battalion (5,3) and to vacancies in the Police Force (1,4); the decrease as compared with the actuals of the previous year (9,6) was mainly due to these causes also; in Bengal the saving both as compared with the Budget and the actuals of the previous year was due to smaller outlay on the purchase of rations. The excess in Burma (3,4) was due chiefly to an over-estimate of the probable savings; as compared with the previous year the increase (6,9), occurred under supplies and services, and purchase of supplies, reduced by savings in the pay of the force and Exchange Compensation Allowance. In Punjab the excess (1,3) over the actuals of the previous year

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

20.—Police—*concluded.*

was due to the reorganization of the Border Police, but as the grant for this purpose was not fully utilised there was a saving of 9 as compared with the Budget. Under *Cattle Pounds* the saving occurred chiefly in Madras (1,9) and Bombay (3,6); in the former it was due to an over-estimate, and in the latter it was attributed to the greater freedom allowed to the grazing of cattle in consequence of the prevalence of scarcity during the year. Under *Other Charges* the saving in India was chiefly due to short strength of the Thuggee and Dacoity Police force and less expenditure on travelling allowances.

153. The excess expenditure in England was due to a larger number of officers, than was provided for, having come out during the year.

154. The Indian expenditure exceeded the Budget Estimate by 19,6, but fell short of the actuals of the previous year by 22,1. The excess over the Budget occurred chiefly under *Marine Stores and Coal for Building and Repairs of Ships*, and was due to smaller recoveries from other departments owing to works for the Eastern Bengal State Railway provided for in the Budget not having been carried out, and to large purchases of country coal for the Muscat and Bushire coal depôts.

155. Under *General Supervision and Accounts* and *Marine Survey and Establishment* the variations were due mainly to the absence of officers on leave and deputation, and to the lower rate of exchange compensation allowance. The saving under *Dockyards* was mainly the result of less expenditure on wages of hired workmen (4,9), owing chiefly to some works for the Eastern Bengal State Railway contemplated in the Budget not having been carried out during the year, and to smaller recoveries (5,9) from other departments and Local Governments. Under *Salaries and Allowances of Officers and men afloat* the excess in India occurred chiefly in pay and victualling charges (5,6), due to the employment of the Royal Indian Marine Ships *Canning* and *Dalhousie* in the conveyance of troops to the South Coast of Africa and to Mombassa during the time they should have been laid up with reduced crews, partly counterbalanced by saving in the pay and allowances of officers (3,0) due to absences and vacancies, and to less exchange compensation allowance. This excess was counterbalanced by the increased recoveries under the corresponding Revenue head (see para. 131). The saving, as compared with the previous year, was chiefly due to less payment of exchange compensation allowances. In Burma the saving was due to change of officers and less outlay on allowances and contingencies in the R. G. S. *George*, and to occasional lending of launches to other departments. In Bengal the saving occurred in the charges for salaries and victualling of officers.

156. Under *Marine Stores, etc.*, the minus entry in India was the result of the system of adjusting recoveries by deduction from charges. The charges exceeded the Budget by 9,3 due to heavy expenditure on coal for the Muscat and Bushire coal depôts, and owing to the employment of Royal Indian Marine Ships *Canning* and *Dalhousie* on trooping service outside Indian waters (5,8), and to a large purchase of steel from the Cossipore Foundry and Shell Factory, and to payment of freight on a consignment of timber supplied by the Forest Department, Burma, to the Bombay Dockyard (3,5). The recoveries fell short of the anticipations by 12,6, due chiefly to certain works for the Eastern Bengal Railway provided for in the Budget not having been carried out during the year. The difference between the two years' actuals was due to large recoveries in 1896-97, partly counterbalanced by heavy expenditure on pine planks for the Suakin expedition and a special large purchase of coir. In Burma the excess was due to a large purchase of stores and coal. The high figure of 1896-97 was due to the transfer to this head of the outstanding balance of the Marine Store and Coal advance account. In Bengal the saving was due to the small outlay on the repair of Pilot vessels and for purchase of coal. The charges under *Pilotage, Pilot Establishment, etc.*, which depend on the tonnage of vessels visiting and leaving port, were exceptionally high in Bengal during the year. Under *Other Charges* the saving in India (3,1) was due to less expenditure on hire of vessels (10,0), owing to no transport having been hired in place of the *Warren Hastings* as was anticipated in the Budget, partly counterbalanced by an excess of 1,7 due to heavy expenditure on repairs of H. M. S. *Sphinx* and to the employment of more than one vessel in Indian waters owing to disturbances in the Persian Gulf; of 1,4 due to the cost of fitting up the *Porpoise* with electric light installation; of 1,2 due to salvage and miscellaneous charges incurred in connection with the loss of the *Warren Hastings*, and for extra compensation for loss of property to officers of that vessel; of 2,4 due to payment of unusually high freight on stores sent out from England. In Burma the excess was due to a larger charge than was anticipated for the construction of the Light Vessel *Kalagauk* (3,8), and for the repairs and outfit of the Light Vessel *Kemmendine* (1,3), partly counter-

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

21.—Marine—*continued.*

balanced by savings due to the contract for the Bhamo-Sinbo line not having been renewed, and to the provision for the river conservancy charges not having been fully utilized. In Assam the saving of 1,0 was due to the expiry and non-renewal of the contract for the Surma Valley Mail Service. In Bengal the saving was due to less expenditure on the hire of ships and vessels. In Madras charge of the previous year represents the payment made to the Harbour Trust Board in satisfaction of its claim against the Madras Port Fund.

157. The excess in England was due to a larger demand than was anticipated for stores.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

22.—Education—*continued.*

158. The Indian expenditure showed a saving of 45,2 as compared with the Budget Estimate, and an excess of 5,3 as compared with the actuals of the previous year. The saving was contributed by all the Provinces except Bengal (where there was an excess of 1,5), and occurred chiefly in Bombay (11,4). Madras (9,0), Central Provinces (6,2), and Burma (8,3). The excess of 1,5 in Bengal requires to be sanctioned.

159. Under *Inspection* the excess in Bengal was due partly to the reorganization of the Provincial Educational Department, and partly to an excessive deduction in the Budget for probable savings, and in Madras it was due to the introduction of the scheme relating to the Indian and Provincial Educational Services. To this cause the excess under *Government Colleges* in Madras is also chiefly due, it was, however, partly owing to the purchase of special furniture for the Law College. Under *Government Schools* there was a saving of 24,7, to which all the Provinces except Bengal contributed. The decrease in the Central Provinces (2,3) was due to less expenditure on petty construction and repairs of schools, in Burma it was due to the vacancies and deputation of officers; in the North-Western Provinces (1,6) it occurred chiefly in establishment charges of Primary Schools; in Punjab (2,2) the saving occurred partly in the contingent charges of Secondary Schools and of the Central Training College (1,3) and partly to an over-estimate (8) by District Boards; in Madras it was due to an over-estimate in the Local section (8,5), partly counterbalanced by excess expenditure of 1,1 under Primary Schools in the Provincial section; and in Bombay (8,2) it was also chiefly due to an over-estimate in the Local section (6,3), and to saving under establishment (1,4). Under *Grants-in-aid and Payments by Results* the saving in Burma (1,6) was due to an over-estimate; the irregularity in the payments makes an accurate forecast under this head impossible. In Assam the saving (1,4) was due to a decrease in the number of schools in consequence of the earthquake and subsequent floods. In Bengal the decrease (1,6) occurred chiefly in the grants to Middle English and Vernacular Schools (2,4), partly counterbalanced by an excess of 6 due to an excessive deduction on account of probable savings. These decreases were partly counterbalanced by excesses chiefly in Madras (2,6) and Bombay (2 0); the former occurred almost entirely in the Provincial section under payments by results. In Bombay it was partly due to the lump deduction made in the Budget in the Provincial section having proved excessive (1,0), and to a payment of arrears, in the Local section, of grants to indigenous schools (1,0). Under *Other Charges* the saving (13,3) occurred almost entirely in Madras (8,9), and Bombay (3,3). In Madras it was due chiefly to the provision (8,0) for Students' Hostels not having been utilized, and in Bombay to a decrease under supplies and services in the Sind Book Depôt (7) and to less expenditure on purchase and publication of books in the Central Depôt, partly counterbalanced by an excess of 9 due to a payment to the heirs of the late Mr. Pandit for editing the *Atharva Veda.*

160. The Indian expenditure was less than the Budget Estimate and the actuals of the previous year by 19,4 and 15,6, respectively. The variations under this head are due mainly to variations in the number of Senior and Junior Chaplains on duty or on leave, and in the rate of Exchange Compensation Allowance. Under *Church of England* the saving in India was due chiefly to the absence of the Lord Bishop and his Domestic Chaplain on furlough (3,1). In Burma the saving was entirely due to the absence of the Lord Bishop, and in Madras to the extent of 6. In England the Budget provided for the passage of eight Chaplains, but only five came out.

161. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 263,6 and 263,7, respectively. There would have been no excess over the Budget but for the special charges under *Grants for Medical Purposes* connected with the bubonic plague in all the Provinces except Burma and Assam. The excess over the actuals of the previous year was also due to higher expenditure connected with the plague.

162. The saving under *Medical Establishments* was contributed by all the Provinces except India and the Central Provinces, and was due chiefly to the deputation of officers on Field Service in the North-Western Frontier and on famine and plague duty. Under *Vaccine Establishments and Sanitary Commissioner* the saving in India was due chiefly to less expenditure on Cholera Inoculation Experiments; in the Central Provinces it was due partly (8) to the employment of Sanitary Inspectors as Assistant Surgeons and the debit of their pay and travelling allowances to *Medical Establishments*, and partly (4,3) to less expenditure than was expected on Village sanitation consequent on short realizations of local subscriptions; in Bengal it was due partly to the deputation of officers to Bombay in connection with the plague (1,5), and partly to savings under establishment (8) and allowances (1,4). The excess in the North-Western Provinces is due to the recoveries from Municipalities for the Sanitary Engineer's Office having been credited to Advances Recoverable against the outstanding debit under that head, which was the result of the former practice of transferring the charges on this account to Advances Recoverable instead of being deducted from the charges for the year; in Madras the excess was chiefly due to an under-estimate, and in Bombay the excess, both over the Budget and the actuals of the previous year, was due to the appointment of an additional officer in connection with the inspection of passengers by sea. Under *Medical Schools and Colleges* the savings were due chiefly to the absence of officers; but in the Punjab it was partly due to less expenditure under Supplies and Services, and in Bombay partly to less outlay on English stores. In Madras the excess was chiefly due to an excessive deduction for probable savings, and to larger expenditure on the purchase of instruments, chemicals, and Europe stores. Under *Government Hospitals and Dispensaries* the excess in Assam (3,2) was due chiefly to the earthquake, which necessitated increased grants to Dispensaries (1,2), and larger outlay on petty construction and repairs (6), and to increased immigration (1,0); in Bengal it was due chiefly to the deduction for probable savings having proved too high (3,3), and to increased charges of the Campbell Hospital (1,1), partly counterbalanced by the non-payment of grants to certain hospitals and dispensaries (2,0), and to less outlay under supplies and services of the General Hospital; in Madras (8) the excess occurred in the Provincial Section (1,4), chiefly on account of medicines supplied by the Military Department, counterbalanced bv saving of 5 in the Local Section; and in Bombay the excess (6,4) was chiefly due to a lump deduction of 5,0 in the Budget ordered by the Local Government, and to heavy charges for salaries of officers on famine duty, to larger issues of medicines and instruments for famine purposes, and to temporary establishments on account of plague, partly counterbalanced by less grants to hospitals and dispensaries. These excesses were almost covered by savings in the Central Provinces (1,6), due to the deputation of officers to the Public Works Department for famine duty (6), and to the provision (8), for creating a senior grade of Hospital Assistants not having been utilised; in Burma (3,8), due to the transfer of Assistant Surgeons to medical charge of districts and to Hospital Assistants having been below the sanctioned

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

24.—Medical—*continued.*

strength, partly counterbalanced by increased outlay on Europe medicines and instruments (4), and on quinine obtained from the Government Quinologist, Madras, for sale in Burma (5) ; in the North-Western Provinces (2,2) in the grants for salaries and establishments (9), travelling allowances (4), and contingencies (5), of Local Hospitals and Dispensaries and in the grant for Female Dispensaries (4) ; and in Punjab (2,4) due to an over-estimate in the Local Section. The excess over the actuals of the previous year occurred chiefly in Assam (2,7), Bengal (2,9), Madras (3,0), and Bombay (2,4). In Assam and Bombay it was due to causes which caused the excess over the Budget, and in Bengal it was due to the high charges of the Campbell Hospital in diet and clothing of patients and larger grants made to Municipalities. Under *Lunatic Asylum* the excess, both as compared with the Budget Estimate and the actuals of the previous year, was chiefly due to increased expenditure on diet of patients owing to the prevailing high prices of food grains.

163 The excess in England was due to the payment of pay, passages, etc., of Medical Officers and Lady Nurses in connection with the plague in Bombay.

164. The Indian expenditure was less than the Budget Estimate and the actuals of the previous year by 51,8 and 67,4, respectively. The saving was almost wholly in India, and occurred chiefly under *Political Subsidies*, due to the subsidy of the Amir of Afghanistan not having been fully drawn. The saving was contributed to by all the provinces except Punjab (6,8), Madras (8), and Bombay (4,5). The excess in the Punjab being due chiefly to expenditure in connection with the Frontier disturbances and in Bombay to special payments under *Refugees and State Prisoners* on account of the debts of the ex-King Thebaw (5,5) and the ex-Wali of Kandahar (1,0), authorised by the Government of India in Finance and Commerce Department letters No. 1051 A., dated 2nd March 1898, and No. 5098-Ex., dated 24th November 1897, the latter being covered by an additional grant sanctioned in Finance and Commerce Department letter No. 980-A., dated 25th February 1898. The saving, as compared with the previous year also occurred under *Political Subsidies*, and was due partly to the actuals of 1896-97 having included arrear payments of the subsidy of the Amir of Afghanistan, and partly to his subsidy not having been fully paid in year under report.

165. Under *Political Agents* the variations occurred chiefly under salaries, but the increase in Punjab, both as compared with the Budget and the actuals of the previous year, was due to the charges of the Political Agent of Dir and Swát, provided for under *Charges on the North-West Frontier*, having been charged to this head with effect from 1st April 1897. This change in classification accounted for 6,4 of the decrease in Punjab under the latter head, and 4,3 occurred in the payments to the Khyber Tribes, and 7,8 in the charges for guarding hill passes, due in both cases to the recent frontier disturbances. Under *Political Subsidies* the difference in India has been explained above. The small excess in Punjab (1,2) was due to payment of arrears to the Mehtar of Chitral. The increase in Punjab under *Durbar Presents and Allowances to Vakeels*, both as compared with the Budget and the actuals of the previous year, was due to the disturbances on the North-West Frontier. The excess under *Refugees and State Prisoners*, which occurred wholly in Bombay, has been explained above. The excess over the actuals of the previous year in India was chiefly due to payments of arrear pensions of a Burmese Prince; in Bengal the figures include payments to certain Burmese prisoners, which were formerly adjusted on the India books. Under *Other charges* the excess was almost entirely in the Punjab, due to increased expenditure on the Tirah Expedition (7,0), Mohmand Expedition (6), Malakhand Field Force (2,5), and on the Tochi Expedition (6,7), and to charges for telegrams connected with the Frontier risings (5,3), counterbalanced to the extent of 4,1 by savings in the provision for the Mohmand Boundary Demarcation Mission. The excess over the previous year's actuals was due chiefly to these causes. The excess in Burma was due chiefly to higher expenditure on the Chinese Frontier Delimitation Commission, which also accounts for the excess over the actuals of 1896-97, in which year there were no charges on this account. The excess in Bombay (9) was due to the expenditure on the Abyssinian Expedition met from the additional grant sanctioned by the Government of India in Finance and Commerce Department, No. 980-A., dated 25th February 1898, partly counterbalanced by savings in the expenditure against the revenues, of Berbera and Bulhur and of Zaila owing to the grants for stipendiaries not having been fully utilised. The saving in India was due to the deputation of the Inspector-General of Imperial Service Troops to England in connection with Her Majesty's Diamond Jubilee (3,7), to less expenditure from the grant for Secret Service at the disposal of the Viceroy (1,5), and to the abolition of the Rajkumar College in Bundelkhand (8), counterbalanced to the extent of 4,1 by charges on account of Surgeon-Major Brazier-Creagh's mission to Seistan not provided for.

166. The excess expenditure in England was due to the payment of 2,0 to the Secretary of State for Secret Service, and of 7 for the entertainment of Persian Envoys on the occasion of Her Majesty's Diamond Jubilee.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*concluded.*

26.—Scientific and other Minor Departments—*concluded.*

167. The Indian expenditure showed a saving of 10,4 as compared with the Budget Estimate, and an excess of 20,7 as compared with the actuals of the previous year. The saving was the result of petty differences under the various heads, which are explained below; the principal savings occurred under *Geological and other Surveys* (3,3), and *Other Charges* (4,8). The excess over the previous year occurred chiefly under *Survey of India* (10,5), *Veterinary and Stallion Charges* (4,1), and *Other Charges* (3,2).

168. Under *Survey of India* there was a saving of 1,1, due chiefly to a saving of 1,5 under Head-Quarters Offices, owing to the absence on furlough and retirement of engravers (8), and to the deputation of the Superintendent, Simla Drawing Office, with the Tirah Field Force (1,7), partly counterbalanced by increased salary and travelling allowance charges of the Trigonometrical Office, Dehra. There was a saving under Survey Parties (12,5), but this was more than counterbalanced by smaller recoveries from Local Governments (13,9). As compared with the previous year the expenditure of Survey Parties showed an incrsase of 2,0, while the recoveries from Local Governments showed a decrease of 14,3, the net result being an increase of 16,3, which was reduced by savings under Controlling and Administrative Staff (2,6), due to absence of officers on furlough, and under Head-Quarters Offices (1,9), due to less expenditure in the Mathemetical Instrument Manufactory, counterbalanced by increased establishment charges, chiefly of the correspondence and drawing branches and of the Trigonometrical Office, Dehra. Under *Geological and other Surveys* the saving in India (2,0) was the result of a number of petty variations, the principal of which occurred under travelling allowances of Geologists, and the Inspector of Mines and their establishments (6), under the grants for Working and Transport of boring rigs (2), for publication of special works in Europe (3), and for additional grant for works executed by Dr. Waagen (2). In Burma the provision of 5 for preservation of archæological remains, 1 for travelling allowances, and 1 for contingencies of the Archæological Department was not utilized, and in Madras the saving was due chiefly to the non-utilization of the provision of 3 for revision of the establishment of the Archæological Survey. Under *Other Scientific Departments* the saving in India was due chiefly to the post of second Assistant Superintendent in the Central Museum having remained vacant, and the excess in Madras was due to the cost of Europe stores supplied to the Kodaikanal Observatory not provided for ((1,2), counterbalanced by a saving due to the absence on leave of the Superintendent of the Museum. Under *Veterinary and Stallion Charges* the saving of 3,0 was contributed chiefly by Burma (2,1), and Punjab (1,0), due in both Provinces chiefly to the grants for purchase of bulls and stallions not having been utilized, and in Burma partly also to the full number of Veterinary Assistants not having been entertained. The excess in Burma, as compared with the previous year, was due to the number of such Assistants employed in 1897-98 being larger than in the previous year, and to a larger outlay on medicines and instruments. The saving in Madras was due to less expenditure on pony and mule breeding, and to the employment of officers on famine duty, and in Bombay it was due to the grant for purchase of stallions not having been utilized and to less outlay on the maintenance, etc., of stallions. The increase in India (6) was due chiefly to more expenditure on feed of stallions (1,1), owing to high prices of grains, to payment of grain compensation (3), and to larger contingent expenditure of the Imperial Bacteriologist (4), partly counterbalanced by savings under District Native Establishment (3), and under construction, repairs, and purchase of stables (5); and in Bengal the excess (5) occurred chiefly under contingencies. The excess in Bengal over the actuals of the previous year (1,0) was chiefly due to increase in the pay of lecturers, to larger outlay on hospital necessaries, and in the purchase and keep of cattle. Under *Other Charges* the saving in India (2,0) was due partly to the post of the Agricultural Chemist being vacant for some months, and partly to the grant for miscellaneous expenditure not being fully utilized. The saving in Bombay (1,7) was due chiefly to less expenditure on agricultural experiments (1,0), and to no provincial grants for Public Fairs having been paid to smaller grants for horse and cattle shows. The other variations under this head are not important. Under *Labour and Emigration* the saving in Assam (1,1) was due partly (7) to over-estimate of fees for inspecting tea gardens, and (4) to smaller recoveries from the Assam Administration for the deficit in the transactions of Inland Labour Transport Fund. Under *Statistics* the excess in Burma is due to the expenditure in connection with the preparation of the Upper Burma Gazetteer.

169. In England there was a decrease of 9 in grants for objects of a literary, scientific, or antiquarian character, of 1,0 in the purchase of stallions, and of 2 in the value of stores sent out.

Section E.—MISCELLANEOUS.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
1,066,6	RECEIPTS	1,023,1	899,5	941,0

170. The receipts under this head fell short of the Budget Estimate by 82,1 and the actuals of the previous year by 125,6. The decrease, as compared with the Budget, was chiefly under Exchange (116,0), counterbalanced by an increase of 38,8 under miscellaneous, due to the revaluation of gold coins (12 6), to receipts from unclaimed deposits lapsing to Government (15,0), to fines realized from Frontier tribes and to the commutation value of lapsed Wasika pensions under the first and sixth Oudh Loans (31,0) reduced to the extent of 25,9 by a change in the method of adjusting recoveries on account of partition fees. The falling off, as compared with the actuals of the previous year, occurred chiefly under Exchange (100,2), and under Receipts in aid of Superannuation, Retired and Compassionate allowances (14,7) mainly in England.

171. The receipts under this head are of a fluctuating character. The only variation which calls for notice is the increase under *Contributions for Pensions and Gratuities* in Burma which was due to contributions paid by officers lent to the Burma Railways Company not having been allowed for in the Budget.

172. In England the falling off was in the receipts of the Military Funds and subscriptions to Indian Civil Service Family Pensions.

	Accounts 1897-98	11,8	1,7	3,1	6	24,9	8,7	6,0	11,8	11,4	80,0

173. The variations under this head are not large, but it may be explained that the increase under *Receipts from Sale of Stationery* was chiefly in the value of stationery supplied to State Railways Under *Other Press Receipts* the variations are mainly due to over or under estimates, but in the North Western Provinces the decrease was chiefly due to the High Court now getting private appeals printed at private presses instead of through the Government Press as formerly, and in Punjab it was partly due to a reduction in the rates for printing by the Jail Department.

174. It is somewhat difficult to compare the Budget Estimate and the accounts owing to the lump reduction on the total of the Budget Estimate. Taking, however, the detailed figures as they stand, apart from the lump deduction, the principal changes are explained below. Under *Guaranteed Companies* the reduction was mainly due to larger receipts for stores both on cash payment and by transfer to Revenue Account of the Bombay, Baroda and Central India (45,7) and the Great Indian Peninsula Railways (101,5), and to an over-estimate of the expenditure on stores and works on the Madras Railway (52,5). The reduction would have been larger by 35,0, but for the improvement in the rate of exchange. The principal variations under *Subsidised Railways* occurred on the Southern Mahratta (including Mysore)

Section E.—MISCELLANEOUS—*continued.*

XXIV.—Exchange—*continued.*

Railway due to smaller withdrawals on account of restriction of expenditure in India, on the Assam-Bengal Railway owing to the fact that no provision was made for the issue of debentures in England, and consequently no provision in India for capital expenditure, or loss by exchange thereon. Debentures were, however, raised and the capital expenditure resulted in a loss of 28,2. On the Burma Railway the increased loss was due to the improvement in the rate of exchange and to larger capital expenditure on stores and work. Under *Remittance Account* the better result against the Bengal and North-Western Railway was due to the improvement in the rate of exchange. As compared with the actuals of the previous year the largest difference occurred in respect of the East Indian Railway advances, owing to the issue of a smaller amount of debentures in the year under report, and under *Subsidised Railways*, chiefly in the transactions of the Assam-Bengal and Burma Railways; in the latter case the expenditure of only a part of the year, *viz.*, from 1st September 1896, was shown as capital expenditure on Subsidised Railways, and in the case of the latter to heavy withdrawal in India in 1897-98 against capital raised by the issue of debentures in England.

Section E.—MISCELLANEOUS—*continued.*

XXV.—Miscellaneous—*continued.*

175. The Indian revenue under this head exceeded the Budget Estimate by 38,4 and the actuals of the previous year by 25,8. These improvements were mainly the results of increases of 12,6 in India under *Gain by Exchange on Transactions in India* owing to the re-valuation of gold coins, of 15,0 under *Unclaimed Deposits* and of 31,0 under *Extraordinary Items* in the North-Western Provinces (12,1) and Punjab (19,9), due in the former case to the adjustment of the commutation value of Wasika pensions lapsed to Government under the first and sixth Oudh Loans, and in the latter to fines realized from Frontier tribes in consequence of the recent expeditions, and the decrease of 25,9 under *Miscellaneous Fees, Fines and Forfeitures,* chiefly in Bengal, due to recoveries on account of partition fees being adjusted by deduction from charges under 3.—Land Revenue (para. 60) instead of by credit to this head as hitherto.

176. Under *Unclaimed Deposits* the increase occurred chiefly in Bengal, Punjab and Bombay; in Assam the refunds of lapsed deposits exceeded the amount which lapsed to Government and the excess was debited to 32.—Miscellaneous. Under *Government Audit Fees* the increase was due to the transfer in the Central Provinces and Burma to this minor head from *Other Items* of recoveries from Local Funds of the cost of local audit. The increase under *Contributions* was also due chiefly to the transfer from *Other Items* of recoveries from Incorporated Local Funds for cost of management and Local Audit in the Central Provinces, Assam and Bengal. The decrease under *Rents* was due to the transfer of receipts from staging bungalows to XXXII.—Civil Works. In Madras notwithstanding this transfer the receipts exceeded the Budget chiefly in choultry rents.

177. Under *Other Items* the increase was wholly in Bengal (10,9) and Madras (1,4), in the former 1,6 occurred in the Provincial Section and 11,4 in the Local, partly counterbalanced by the transfer referred to above, and in the latter in the Local Section due to larger sales of avenue clippings and larger receipts under sundries. The decrease in the other Provinces was mainly due to the transfers referred to above. In the North-Western Provinces the fall was chiefly under Miscellaneous Nazul Receipts, and in Punjab partly to the closing of the Khyber route (4,0) in consequence of the Afridi rising.

Section E.—MISCELLANEOUS.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts
5,856,7	EXPENDITURE	5,913,0	5,724,5	5,716,8

178. The total expenditure in England and India was less than the Budget Estimate and the actuals of the previous year by 196,2 and 139,9. Apart from Exchange, to which the saving is mostly due, the expenditure in India exceeded the Budget Estimate and the actuals of the previous year by 28,8 and 62,0, respectively, and the sterling charges showed a decrease of 8,3 as compared with the Budget, and an increase of 6,7 when compared with the previous year's actuals. Under Civil Furlough and Absentee Allowances the sterling charges fell short of the Budget by 38,3; under Superannuation the sterling and Indian expenditure exceeded the Budget by 17,5 and 22,5, respectively; under Stationery and Printing there was an excess in India of 13,6 and in England of 6,7, and under Miscellaneous there was a saving in India of 14,7 owing to the transfer to 45.—Civil Works of charges on account of staging bungalows, while the expenditure in England showed an excess of 5,9, chiefly in the cost of Insignia of Indian Orders.

179. The Indian expenditure exceeded the Budget Estimate and the actuals of the previous year by 7,6 and 6,4, respectively. The excess occurred in Bengal (4,9), Punjab (2,7), and Bombay (4,6), being due in the first two cases, chiefly to arrear payments, but in Punjab the excess was partly due to a payment of 1,2 to Malik Mani Khan, under the orders of the Government of India. In Bombay the increase was due to the adjustment in connection with the advance for liquidating the debts of Zai-ul-Nissa Ladli Begum, the daughter of Mir Jafar Ali Khan of Surat, partly counterbalanced by the postponement of the grant to the Angria family. The saving in the other Provinces was chiefly due to lapses, but in the North-Western Provinces it was partly counterbalanced by payment of Wasika pensions for an extra month in consequence of the lunar leap year (2,1), and in Madras it was enhanced by a Tanjore pensioner not having drawn her pension for nine months. The excess over the actuals of the previous year was due mainly to the above causes, and in Bengal was enhanced by payment of pension of the

Section E.—MISCELLANEOUS—*continued.*

27.—Territorial and Political Pensions—*continued.*

Mysore Family (4,2) hitherto adjusted on the India books. This also explains the difference in India between the figures of the two years. In Bombay the excess would have been greater but for the payment of arrears in 1896-97.

28.—Civil Furlough and Absentee Allowances.

375,8	TOTAL, INCLUDING ENGLAND	376,1	295,9	294,1

180. The charges incurred in this country depend on the number and grade of officers lent to foreign service who happen to be on leave. The figures do not call for any remark save that the trifling excesses in India and the North-Western Provinces require formal sanction. In England the saving (38,3) occurred mainly in the absentee allowances of officers of the Indian Civil Services. The small excesses of 1 in India and 1 in Punjab require to be sanctioned.

181. The saving under this head occurred entirely in consequence of the improvement in Exchange.

182. The Indian expenditure exceeded the Budget Estimate by 22,5, of which 13 5 occurred under *Superannuation and Retired Allowances* in all the Provinces except Assam, Madras, and Bombay, and was due mainly to sufficient allowance not having been made in the Budget for the normal growth of the expenditure under this head. The following statement shows this growth during the last six years:—

1892-93	830,4
1893-94	863,5
1894-95	899,1
1895-96	925,1
1896-97	963,2
1897-98	998,3

183. Under *Compassionate Allowances* the increase in Punjab was due to the adjustment of charges formerly adjusted on the Burma books. Under *Gratuities* the excess in Burma was due to the retirement on gratuities of a large number of the employés of the late Burma State Railway under the special concessions offered by Government, and that in Bengal was due to certain special payments. Under *Military Orphan and Medical Retiring Funds* the Budget in Bengal, the North-Western Provinces and Punjab was taken too low, while in Madras it was too high. In Bombay there were special payments in 1896-97 on account of marriage portions and arrears. Under *Other charges* the actuals in Madras represent bonuses paid to Provident Funds.

184. In England the saving occurred mainly in the pensions of the officers of the Uncovenanted Service, and in Civil Service Annuities.

185. The Indian expenditure under this head exceeded the Budget Estimate and the actuals of the previous year by 13,6 and 28,9, respectively. The excess occurred mainly under *Purchase of Stationery* (17,6), chiefly in Bengal (16,3) and Madras (3,2) ; the former was partly covered by an additional grant of 15,0 sanctioned by the Government of India, Finance and Commerce Department letter No. 947-A., dated 24th February 1898, and the latter was covered by an additional grant of 5,0 sanctioned by the Government of India. The excess over the actuals of the previous year also chiefly occurred under this head.

186. Under *Government Presses* the increase in India (3,9) was due to more printing work done in the Central Press in consequence of famine, plague, and the frontier disturbances. In the Branch Press at Simla there was higher expenditure on temporary establishment and overtime allowances. In Assam the excess (1,0) was chiefly due to expenditure incurred in connection with the earthquake, and in Bombay (1,7), it was due chiefly to heavy freight charges on stores received from Europe, to forwarding charges, and to grain compensation. These excesses were more than covered by savings in the other Provinces, the principal being 6,5 in Burma, due to less outlay on extra and overtime establishment (3,2), and to the non-utilization of the provision of 2,0 for stores and stock from England, 1,5 in the North-Western Provinces due to the High Court getting private appeals printed at private presses instead of through the agency of the Government Press as formerly, and 1,4 in Punjab due chiefly to a reduction in the rates for lithographic printing (2,5), counterbalanced by higher charges for temporary establishments in the Civil Secretariat Press, owing mainly to increase in printing work due to famine. Under *Stationery supplied from Central Stores,* the Budget was exceeded in all the Provinces due to under-estimate, the excess in the Central Provinces and Bombay was no doubt largely due to the increased demand in consequence of the famine ; and in Madras the high demand is attributed to completion of the previous year's indents and fuller compliance with indents for 1898-99, to the supply of special water-marked paper for plaints to the Superintendent of Stamps, to famine and to large supplies of type-writers. Under Other Charges the only important variations occurred in the

20.—Stationery and Printing—*continued.*

Central Provinces, Bombay and Madras; the excesses (2,3) and (9) in the first two cases respectively were under *Printing at Private Presses,* due in the former to the transfer to the *Pioneer* Press of work formerly done in the Government Press, while in Madras the saving was due chiefly to the provision for printing Settlement Registers not having been utilized.

187. In England the demand for stores was larger than anticipated.

188. The Indian expenditure fell short of the Budget Estimate and the actuals of the previous year by 14,7 and 15,9, respectively. The decrease occurred chiefly under *Petty Establishments*, and was due mainly to the transfer of charges on account of staging bungalows to 45.—Civil Works. Compared with the previous year the decrease was also mainly due to this transfer.

189. Under *Remittance charges* there was an increase of 8,3, contributed mainly by Bombay (4,0), Punjab (2,5), Madras (3,1), and Bengal (1,1), being due in the last two cases, chiefly to transfers to districts affected by the famine, and in Bengal partly also to the removal of money held in Currency chests to Calcutta. In Bombay there were large remittances for resource purposes, and in Punjab in connection with the Frontier disturbances. Under *Charitable Donations* the excess in the Central Provinces was due to payments made for the support of famine orphans. Under *Special Commissions of Enquiry* the expenditure in India represents charges on account of the Indian Famine Commission. Under *Other Items* the excess in India (6) represents the loss incurred by the exchange of Bhopali rupees for Government rupees; the saving in the Central Provinces was due to no adjustment having been made for rent of Telegraph lines; in Assam the excess (1,5) was due to the special contributions of 2,0 and 1 made to the Welsh and the Roman Catholic Missions respectively for the restoration of schools and hospitals in the Khasi Hills destroyed by the earthquake; and in the North-Western Provinces the saving (4,0) was due partly to expenditure on account of plague provided for under this head having been transferred to 24.—Medical (2,5), and partly to savings under books and periodicals (7), and other petty items (8).

190. The increase in England was due to higher expenditure on Insignia of Indian Orders (4,0,) and to charges in connection with the Royal Commission on Indian Expenditure, mainly owing to the detention on duty of the Comptroller and Auditor General in England (9), and to larger refunds of fines and penalties incurred by contractors (2,9), partly counterbalanced by smaller payments in respect of stores lost in transit to India (1,8).

Section F.—FAMINE RELIEF AND INSURANCE.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
2,126,4	EXPENDITURE . . .	3,666,2	5,414,2	5,363,1

191. The failure of crops during the years 1896 and 1897 having necessitated heavy expenditure, provision of 3,641,2 was made in the Budget Estimate for expenditure on direct Famine Relief. An accurate forecast of the expenditure was not possible at the time the Budget was framed owing to the absence of any reliable data regarding the extent to which and the time over which relief operations would be necessary. There being considerable excess of expenditure in many Provinces, the Revised Estimate was raised to 5,391,8 to meet this calamity, which, however, proved to be more than sufficient. As the charges for actual Famine Relief works were expected to exceed the limit fixed in normal years for the Famine Insurance Grant, the charges for the construction of Protective Railways was shown under 48.—State Railways. Provision of 25,0 was made for the construction of *Protective Irrigation Works.* The net charge on the revenues (456,5) for Protective Railways, constructed through the agency of the Companies which is shewn under Railway Revenue Account, brought the Famine Insurance Grant to 4,122,7.

192. The following statement shows the total amount chargeable to this grant, and its distribution :—

Famine Relief and Insurance.

1896-97. Accounts.		1897-98. Budget.	Revised	Accounts.
2,079,5	Famine Relief	3,641,2	5,391,8	5,325,6
46,9	Construction of Protective Irrigation Works . .	25,0	22,4	37,5
2,126,4	TOTAL	3,666,2	5,414,2	5,363,1

Section F.—FAMINE RELIEF AND INSURANCE—*continued.*

33.—Famine Relief—*continued.*

193. The actuals show an excess of 1,681,7 over the Budget Estimate. Of this excess 1,200,1 occurred in the Public Works portion. In Burma, Bengal, and Punjab the Estimates on the whole were sufficient, but in the last two there were excesses in the Provincial portion. There were considerable excesses in the other Provinces, the largest of which occurred in Madras and Central Provinces. The variations were chiefly due to the fact that the Estimates were based on insufficient data.

194. The charges in India are due to the deputation of Mr. James as Vice President of the Charitable Relief Fund, the office expenses of that fund, and the employment of officers on famine duty in Native States. The excess of 54,3 in Punjab under Provincial was due to the transfer of the Famine charges, not falling under Local, from Imperial to Provincial under orders of the Government of India. The following table shows the grants made to cover excess expenditure and the amounts still requiring formal sanction :—

		India.	Central Provinces.	Burma.	Assam.	Bengal.	N.-W. P. and Oudh.	Punjab.	Madras.	Bombay.	TOTAL.
Excess over Budget Grant	Imperial	6,2	667,1	...	...	...	220,7	...	713,7	372,3	1,980,0
	Provincial	...	...	...	...	6,2	...	54,3	...	...	60,5
Excess sanctioned by Imperial Government		...	610,0	...	...	...	220,7	...	657,1	295,0	1,782,8
" awaiting sanction of the Imperial Government	Imperial	6,2	57,1	...	...	...	...	...	56,6	77,3	197,2
	Provincial	...	...	...	...	6,2	...	54,3	...	...	60,5

35.—Construction of Protective Irrigation Works.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
...	INDIA	...	...	...
	N.-W. PROVINCES AND OUDH—			
4,4	Betwa Canal	2,2	2,7	2,0
	PUNJAB—			
20,3	Swat River Canal	1,0	2,8	2,1
	MADRAS—			
20,4	Rushikulya project	16,9	13,9	14,4
	BOMBAY—			
1,3	Nira Canal	6	6	4
...	Mhasvad tank	5	...	...
4	Chankapur tank	3,8	...	2,1
1	Other Works	...	2,4	16,5
46,9		25,0	22,4	37,5

195. The decrease was due chiefly to the Kalpani Rajbaha of the Swat River Canal having been nearly completed during 1896-97, and partly to the approaching completion of the Rushikulya project. The increase over the Budget and Revised Estimates was mainly due to the transfer to this head of the normal expenditure on famine relief work done on the Chankapur, Maladevi, and Shetphal tanks in Bombay. The excesses of 1,1 in Punjab, and 14,2 in Bombay require to be sanctioned.

Section G.—37.—CONSTRUCTION OF RAILWAYS (charged against Revenue in addition to that under Famine Insurance).

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
12,8	EXPENDITURE	7,3	4,7	3,8

196. The following are the details of the amount spent under Provincial, nothing having been charged to this head under Imperial, and the explanation of the differences between the Actuals of 1896-97 and 1897-98, as well as between the Actuals and the Budget Estimate of the last-named year:—

PROVINCIAL.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	ASSAM—			
6,6	Jorhat Railway	3,1	1,5	7
—8	Cherra-Companygunj Railway	...	—4	—5
5,8	TOTAL	3,1	1,1	2
	MADRAS—			
1,9	Mayavaram-Mutupet Railway	3,4	2,8	2,8
	BOMBAY—			
5,1	Hyderabad-Shadipalli Railway	8	8	8
12,8	GRAND TOTAL, PROVINCIAL	7,3	4,7	3,8

197. The net decrease occurred chiefly on the Jorhat Railway, owing to the purchase in the previous year of two locomotive engines and to certain adjustments in connection with English Stores.

Section H.—RAILWAYS.

198. The following is a general statement of the Revenue Account, taking the gross figures for Guaranteed Railways instead of the net figures shown in the Finance and Revenue Accounts:—

1897-98.	State Railways.	Guaranteed Railways.	Subsidised Companies.	Miscellaneous.	TOTAL.
GROSS RECEIPTS	19,044,5	5,414,6	15,0	...	24,474,1
WORKING EXPENSES	8,713,4	3,213,2	...	...	11,926,6
Surplus Profits	487,8	110,3	...	...	598,1
Interest	7,182,3	3,377,1	...	...	10,559,4
Annuities	2,676,7	...	...	...	2,676,7
Land and Supervision	...	15,9	113,8	...	129,7
Miscellaneous Railway Expenditure	...	...	...	16,2	16,2
TOTAL EXPENDITURE	19,060,2	6,716,5	113,8	16,2	25,906,7
NET GAIN OR LOSS TO GOVERNMENT—					
1897-98	— *15,7*	*—1,301,9*	*—98,8*	— *16,2*	*—1,432,6*
1896-97	*—1,096,7*	*—1,438,4*	*—61,0*	— *63,9*	*—2,660,0*
1895-96	— *493,9*	*—1,061,8*	+ 7,0	— *71,6*	*—1,620,3*
1894-95	— *737,5*	*—1,535,7*	+25,0	*—100,3*	*—2,348,5*
1893-94	— *666,3*	— *778,9*	+13,1	*—103,4*	*—1,535,5*

199. These figures show that *State Railways* did better than in 1896-97. Under *Receipts* there was an increase of 1,404,9 due to a revival of traffic after the Famine and to the Frontier Expedition, and though the *Expenditure* was more by 323,9 the net result was better than the previous year's by 1,081,0.

200. There was an increase of 276,8 in *Working Expenses* due to increased train mileage run, and a decrease of 57,7 for *Interest* and *Annuities* owing to improvement in Exchange; and there was an increase of 104,8 in the surplus profits paid to companies, consequent on increased earnings.

201. The working of *Guaranteed Railways* resulted in a loss of 1,301,9, which was less by 136,5 than the loss of the preceding year. There was a decrease of 432,8 in the *Net Traffic receipts*, whilst the charge for *Interest* was less by 220,1 by reason of the rise in Exchange.

202. The net loss to Government on the Revenue Account of Railways, as shown above, is considerably affected by the fluctuations in the rate of exchange, which are eliminated in the following figures, showing in each year the net loss or gain for State and Guaranteed Railways, if the rate of exchange had not varied from that of 1886-87:—

	State Railways.	Guaranteed Railways.	TOTAL.
1897-98	+ 674,0	*—898,8*	— *224,8*
1896-97	— *63,1*	*—823,0*	— *886,1*
1895-96	+ 882,2	*—232,4*	+ 649,8
1894-95	+ 896,7	*—553,4*	+ 343,3
1893-94	+ 316,6	*—188,9*	+ 127,7
1892-93	— *234,1*	*—321,7*	— *555,8*
1891-92	+ 315,5	*—210,2*	+ 105,3
1890-91	— *552,5*	*—262,0*	— *814,5*
1889-90	— *746,0*	*—529,6*	*—1,275,6*
1888-89	— *991,1*	*—682,1*	*—1,673,2*
1887-88	*—1,002,0*	*—811,4*	*—1,813,4*
1886-87	— *375,1*	*—675,6*	*—1,050,7*

203. The figures show that the net results, apart from variations in Exchange, improved steadily year by year from 1887-88 to 1895-96, with the single exception of 1892-93, when there was a serious falling off in the wheat export traffic. In 1896-97 traffic receipts were injuriously affected by famine and plague. In the past year, however, owing to a revival of traffic after the famine and to the Frontier expedition, there was an improvement, apart from Exchange, of 661,3.

Section H.—RAILWAYS—RECEIPTS.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
20,297,8	RECEIPTS	20,682,4	21,167,3	21,260,9

204. The following are the items comprised in this group, particulars of which are given in the succeeding statements :—

1896-97. Accounts.		Budget.	1896-97. Revised.	Accounts.
17,639,6	State Railways (gross) . .	18,023,7	18,995,0	19,044,5
2,634,2	Guaranteed Railways (net) .	2,630,0	2,160,0	2,201,4
24,0	Subsidised Companies . .	28,7	12,3	15,0
20,297,8	TOTAL .	20,682,4	21,167,3	21,260,9

205. *State Railways.*—The gross receipts were better by 1,404,9 than those of the previous year. The principal increases occurred on the East Indian, North-Western, Oudh and Rohilkhand, Bengal and North-Western, Indian Midland, and Burma Railways.

206. On the East Indian Railway the increase was due chiefly to pilgrim traffic during October and December 1897, which were considered auspicious months for religious ceremonies, as well as during January 1898 in connection with the solar eclipse and the *Mágh mela* ; to large despatches of Ordnance and Commissariat stores, and to the running of a great number of troop, extra and mule trains in connection with the North-West Frontier expeditions; to increased traffic in rice, wheat, cotton piece-goods, coal, and railway materials carried for foreign lines. On the North-Western Railway the increase was due chiefly to the Frontier expedition, assisted by the revival of the wheat trade. The increase on the Oudh and Rohilkhand Railway was due to a return to ordinary traffic, the depressing effects of the famine having ceased, and to the Military traffic in connection with the operations on the North-West Frontier. The increase on the Bengal and North-Western Railway was due to the earnings of the previous year having been reduced below the average by reason of the prevailing famine; to the line having been extended, and to the development of traffic *viâ* Burhwal during 1897-98. The increase on the Indian Midland Railway was due to an improvement in traffic in wheat, oil-seeds, sugar and jagree, salt and piece-goods, the traffic increasing as times became easier, and to increased receipts on account of mileage and demurrage due to the revival of the export trade, as well as to the adjustment of arrears of shunting at joint stations. The increase on the Burma Railway was due to the continued prosperity of Lower Burma, the result of the good crops, the high price of paddy and consequent good trade, and to the general development of the railway.

207. Compared with the Budget Estimate there was an increase of 1,020,8, of which 584,2 occurred on the East Indian Railway, and was due to pilgrim and military traffic receipts; the increases of 482,8 and 83,6 on the North-Western and Indian Midland Railways were due to the same causes which led to the increase as compared with the actuals of the previous year. The increase of 109,3 on the Burma Railway was due to the Budget Estimate having been kept at a moderate figure, as it was considered unlikely that the earnings of the previous year, which were greatly in advance of those of the year before that, would be maintained; a second year, however, of general prosperity made the estimate incorrect.

208. *Guaranteed Railways.*—The net receipts were 432,8 below those of the previous year, the falling off occurred on the Bombay, Baroda and Central India, and Great Indian Peninsula Railways, and was the result of a decrease in the traffic and increase in working expenses of both the Railways. The falling off in traffic was due to famine and plague, and the increase in expenses to heavy outlay in connection with the renewal of carriage and wagon stock.

(*b*) Outlay on Tirhoot Railway.
(*c*) Includes the Bezwada Extension Railway.

Section H.—RAILWAYS—RECEIPTS—*continued.*

STATE RAILWAYS—IMPERIAL.

East Indian Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	EARNINGS—			
1,700,2	Coaching	1,727,3	1,726,6	1,749,8
3,671,8	Goods	3,479,8	4,075,6	4,065,7
78,9	Miscellaneous and Suspense	93,2	98,1	69,0
5,450,9	TOTAL	5,300,3	5,900,3	5,884,5

209. The receipts, compared with the actuals of the previous year, show an increase of 433,6. There was an increase under *Coaching* of 49,6, the reasons for which have already been given in para. 206. Under *Goods* there was an increase of 393,9, due largely to traffic in rice, wheat, cotton piece-goods, coal and railway materials carried for foreign railways. Compared with the Budget Estimate there was an increase of 584,2. The Budget Estimate was placed at a very low figure, owing to uncertainty as to the prospects of the year in consequence of the plague and the scarcity that prevailed at the time. The famine, however, instead of adversely affecting the traffic, contributed most favourably towards developing the *Goods* traffic of the line by the movement of imported food-grains to the famine-stricken districts. Although the famine and plague affected ordinary *Coaching* traffic to a certain extent, the loss was more than compensated for by the pilgrim and military traffic referred to already. The total receipts of the year would have been still greater had the outstandings on traffic account been realized to the extent anticipated.

Eastern Bengal Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	EARNINGS—			
522,5	Coaching	520,0	483,0	491,8
888,4	Goods	920,0	939,2	949,5
89,7	Miscellaneous and Suspense	80,0	97,8	88,9
1,500,6	TOTAL	1,520,0	1,520,0	1,530,2

210. The receipts were better than those of the previous year by 29,6. There was a decrease of 30,7 under *Coaching* traffic, due, in a great measure, to the stoppage of traffic owing to damages caused by the earthquake of 12th June 1897, and to the famine of 1896-97, which materially affected the 3rd class passenger traffic, plague regulations also affected this traffic. The increase of 61,1 under *Goods* traffic occurred in the last quarter of the year, and was due partly to the splendid jute crop of the year 1897, and partly to the carriage of construction stores for the Hajipur extension of the Tirhoot State Railway, and for the branch lines in connection with the Eastern Bengal Railway. The same causes account for the variations as compared with the Budget and Revised Estimates. No share of net earnings was creditable to the Local Government under the Provincial Contract from 1st April 1897: the year 1896-97 was the last in which a moiety of net receipts was so credited.

Rajputana-Malwa Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	EARNINGS—			
684,9	Coaching	680,0	600,0	610,4
1,265,8	Goods	1,540,0	1,317,5	1,326,1
60,3	Miscellaneous and Suspense	30,0	42,5	38,0
2,011,0	TOTAL	2,250,0	1,960,0	1,974,5

211. Contrasted with the actuals of the previous year the receipts showed a net decrease of 36,5. Under *Coaching* traffic there was a decrease of 74,5, due partly to the stringent measures adopted to restrict the movement of passengers from areas affected by the plague, and partly to the period, April to September 1897, having been considered unpropitious for marriages. There was an increase of 60,3 under *Goods*, due to an improvement in traffic in grain and pulse, salt and sugar, owing to the revival of trade after the famine of 1896. Compared with the Budget Estimate, there were decreases of 69,6 and 213,9 under *Coaching* and *Goods*, respectively, due to the expected improvement in traffic not having been realized.

Section H.—RAILWAYS—RECEIPTS—*continued.*

North-Western Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	EARNINGS—			
1,065,5	Coaching	1,080,0	1,284,0	1,291,7
1,720,5	Goods	1,850,0	2,150,0	2,154,6
101,9	Miscellaneous and Suspense	70,0	66,0	36,5
2,887,9	TOTAL	3,000,0	3,500,0	3,482,8

212. The receipts, as compared with the actuals of the previous year, show an increase of 594,9, due mainly to the Frontier expedition and to the revival of the wheat trade after the famine. The increase would have been still larger, but for the heavy outstandings with the Commissariat Department in connection with the Frontier expedition. Compared with the Budget Estimate there was an increase of 482,8 due to the same causes.

Oudh and Rohilkhand Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	EARNINGS—			
	Coaching	360,0	380,0	375,2
425,3	Goods	480,0	445,0	435,2
32,1	Miscellaneous and Suspense	40,0	75,0	71,7
818,6	TOTAL	880,0	900,0	882,1

213. Compared with the actuals of the previous year there was an increase of 63,5. The increases under *Coaching* and *Goods* are attributable to a return to ordinary traffic and to the military traffic in connection with the operations on the North-West Frontier. The increase under *Miscellaneous and Suspense* was due almost entirely to receipts for hire of stock lent to the East Indian and Eastern Bengal Railways, and to mileage and demurrage of stock on foreign lines. The actuals approximate closely to the Budget Estimate.

Bengal-Nagpur Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	EARNINGS—			
154,6	Coaching	155,0	132,2	132,7
409,9	Goods	447,0	411,0	434,7
48,4	Miscellaneous and Suspense	48,0	46,8	47,9
612,9	TOTAL	650,0	590,0	615,3

214. Compared with the Budget Estimate there was a decrease of 34,7 due to short export of grain and to plague precautions. Compared with the Revised Estimate there was an increase of 25,3, of which 23,7 occurred under *Goods* traffic, due to the revival of traffic towards the close of the year.

Section H.—RAILWAYS—RECEIPTS—*continued.*

Bengal and North-Western and Tirhoot Railways.

1896-97. Accounts.		1897-98. Budget	1897-98. Revised.	1897-98. Accounts.
	EARNINGS—			
217,9	Coaching	240,0	240,0	240,5
271,9	Goods	310,4	290,0	306,2
75,2	Miscellaneous and Suspense	69,6	90,0	78,3
565,0	TOTAL	620,0	620,0	625,0

215. Compared with the actuals of the previous year there was an increase of 60,0, due to the earnings of 1896-97 having been below the average owing to famine, and to the line having been extended. The variations from the Budget and Revised Estimates are small.

Indian Midland Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	EARNINGS—			
219,0	Coaching	218,7	220,0	221,4
318,5	Goods	310,2	368,9	374,3
7	Miscellaneous and Suspense	11,1	24,6	21,3
538,2	TOTAL	540,0	613,5	617,0
52,5	*Deduct*—Bhopal Railway earnings	55,0	48,5	48,4
485,7	Total Indian Midland Railway proper	485,0	565,0	568,6

216. Compared with the actuals of the previous year there was an increase of 82,9, of which 55,8 occurred under *Goods* earnings, due to an improvement in traffic in wheat, oil-seeds, sugar and jagree, and salt and piece-goods. Under *Miscellaneous and Suspense* the increase was due chiefly to receipts on account of mileage and demurrage having increased, and to the adjustment of arrears of shunting at joint stations. Compared with the Budget Estimate, there was an increase of 83,6 due to the causes stated above.

Southern Mahratta Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	EARNINGS—			
230,9	Coaching	240,0	165,0	164,5
409,5	Goods	400,0	440,0	443,5
18,4	Miscellaneous and Suspense	10,0	10,0	9,5
658,8		650,0	615,0	617,5

217. The receipts, as compared with the actuals of the previous year, show a net decrease of 41,3. There was a decrease of 66,4 under *Coaching*, due to a fall in passenger traffic on account of the measures adopted by Government for the prevention of the spread of the plague. Under *Goods* there was an increase of 34,0, due to the larger movements of food grains, owing to the famine. Compared with the Budget Estimate, there was a net decrease of 32,5 due to the same cause which led to the variations as compared with the actuals of the previous year.

South Indian Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	EARNINGS—			
486,2	Coaching	481,0	475,0	475,3
397,6	Goods	415,0	389,0	390,0
15,5	Miscellaneous and Suspense	14,0	26,0	29,1
899,3	TOTAL	910,0	890,0	894,4

218. The variations are not important.

Section H.—RAILWAYS—RECEIPTS—*continued.*

Burma Railway.

1896-97*. Accounts.		1897-98. Budget.	Revised.	Accounts.
	EARNINGS—			
405,1	Coaching	391,0	425,0	434,7
388,6	Goods	355,0	400,0	421,1
10,6	Miscellaneous and Suspense	14,0	20,0	13,5
804,3	TOTAL	760.0	845,0	869,3

* Includes Mu Valley and Provincial receipts.

219. Compared with the actuals of the previous year there was an increase of 65,0, of which 29,6 and 32,5 occurred under *Coaching* and *Goods*, respectively, due to the continued prosperity of Lower Burma, the result of the good crops, the high price of paddy and consequent good trade, and to the general development of the Railway. Compared with the Budget Estimate, the increase was 109,3. It was thought to be improbable that the earnings for the year would keep up to the standard of 1896-97

Other State Railways—Imperial.

1896-97. Accounts.	1897-98. Budget.	Revised.	Accounts.
888,6	940,8	1,035,9	1,042,0

220. Compared with the actuals of the previous year there was an increase of 153,4, the principal being those of 24,9 on the Bengal Central Railway, of 40,2 on the Assam Bengal Railway, of 10,6 on the Lucknow-Bareilly Railway, of 15,0 on the Guntakal-Mysore Frontier Railway, and of 31,5 on the Mysore State Railway, due to the development of passenger and goods traffic and of 40,2 on the East Coast Railway, due to development of traffic on the sections recently opened to traffic. There were other small increases and decreases, which are unimportant.

221. The actuals exceeded the Budget Estimate by 101,2. There were increases, aggregating 138,7, of which the principal were 23,4 on the Bengal Central Railway, 18,7 on the Guntakal-Mysore Frontier Railway, 39,9 on the Mysore State Railway, and 46,2 on the East Coast Railway, due to general development of passenger and goods traffic; whilst the decreases amounted to 37,5, of which 23,4 was on the Assam-Bengal Railway, due to the great loss in the earnings caused by the earthquake of June 1897 and the severe cyclone which visited the Chittagong end of the line in October of the same year.

STATE RAILWAYS—PROVINCIAL.

1896-97.* Accounts.	1897-98 Budget.	Revised.	Accounts.

3,063,8	1,784,0	1,279,8	Great Indian Peninsula	3,050,0	1,750,0	1,300,0	2,830,0	1,860,0	970,0	2,873,1	1,873,7	999,4	1,862,3	65·22
1,099,8	550,7	549,1	Madras	1,090,0	560,0	530,0	1,140,0	570,0	570,0	1,139,7	550,6	589,1	833,2	48·31
5,685,2	3,051,0	2,634,2	Total	5,710,0	3,110,0	2,630,0	5,360,0	3,200,0	2,160,0	5,414,6	3,213,2	2,201,4	3,377,1	59·34

Gross Receipts.

223. The actual receipts during the year under review fell short of those of the previous year by 270,6. The decrease occurred on the Bombay, Baroda and Central India and Great Indian Peninsula Railways due to famine and plague, while on the Madras Railway there was an increase, owing to the improvement in traffic in grain and pulse.

The total gross receipts have fallen short of the Budget Estimate by 325,4 as under:—

Bombay, Baroda and Central India Railway	—198,2
Great Indian Peninsula Railway	—176,9
Madras Railway	+49,7

224. The decrease on the Bombay, Baroda and Central India Railway occurred both under *Coaching* and *Goods*, but principally in *Coaching*, due to the movements of the population being restricted by the plague regulations. On the Great Indian Peninsula Railway famine, combined with plague, was the cause of the decrease. The increase on the Madras Railway is attributed chiefly to large movements of grain owing to the famine.

Working Expenses.

225. The total working expenses were more than those of the previous year by 162,2. The increase on the Bombay, Baroda and Central India Railway is accounted for chiefly by the heavy expenditure in connection with the renewal of carriage and wagon stock, and that on the Great Indian Peninsula Railway is attributed to heavier replacements of axles, and to repairs and renewals of a larger number of vehicles.

The actual expenses exceeded the provision made in the Budget Estimate by 103,2, as follows:—

Bombay, Baroda and Central India Railway	—11,1
Great Indian Peninsula Railway	+123,7
Madras Railway	—9,4

226. The increase on the Great Indian Peninsula Railway is accounted for by the abnormal expenditure on the replacement of axles and by increased traffic in the last three months of the year.

Section H.—RAILWAYS—RECEIPTS—*concluded.*

XXVIII.—Subsidised Companies (Repayment of Advances of interest).

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
	INDIA—

63,9	MISCELLANEOUS RAILWAY EXPENDITURE .	60,0	23,6	16,2
22,957,8		23,499,2	22,801,3	22,693,5

230. Under *State Railways*, compared with the actuals of the previous year, there was an increase of 381,6 in Working Expenses due to the heavier traffic worked; and of 154,5 in Interest on Debt resulting from the progress of State Railway construction; while under *Guaranteed Companies* there was a decrease of 349,2 in Surplus Profits, etc., due chiefly to the Great Indian Peninsula Railway not having earned any surplus in the first half of 1897, and to the share paid to the Bombay, Baroda and Central India Railway Company being less than in the previous year by 120,2.

231. The increase compared with the Budget Estimate under Working Expenses of State Railways 173,9 was due to improvement in traffic. Under Guaranteed Railways the decrease was chiefly due to the Bombay, Baroda, and Central India Railway having earned no

Section H.—RAILWAYS—EXPENSES—*continued.*

surplus during the second-half of 1897, and to the provision for land to be acquired for the Calicut-Cannanore Branch of the Madras Railway having been only partially utilized owing to delay in commencement of construction operations.

38.—State Railways—Working Expenses.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
8,819,6	EXPENDITURE . .	9,027,3	9,299,1	9,201,2

232. The details of these amounts by individual railways are given on page 87. An explanation of the increases over the actuals of the previous year, and over the figures of the Budget Estimate is given below. There was an excess of 168,5 under Imperial, which was covered by an additional grant sanctioned in Finance and Commerce Department No. 5430-A., dated 16th December 1897. Under Provincial there was an excess in Assam of 5,5, of which 5,3 was sanctioned by the Local Government, and 2 still require to be sanctioned; in Bombay there was an excess of 1,8, which still awaits sanction.

	WORKING EXPENSES—			
457,7	Maintenance	462,6	450,0	403,0
454,8	Locomotive	448,9	461,0	472,4
165,8	Carriage and Wagon	160,7	170,0	146,7
332,7	Traffic	320,0	350,0	352,3
277,7	General, Miscellaneous and Suspense . . .	250,8	276,0	304,9
1,688,7	TOTAL WORKING EXPENSES .	1,643,0	1,707,0	1,679,3
160,3	Share of surplus profits paid to the Company, and contribution to Provident Fund	157,0	273,0	273,9
1,849,0	TOTAL .	1,800,0	1,980,0	1,953,2

233. The chief variations were increases in *Locomotive and Traffic* expenses, owing to increased traffic and improved lighting of vehicles, and decreases in *Maintenance* and *Carriage and Wagon*, due to various petty causes. Under *Company's Share of Surplus Profits, etc.*, the increase was due to increased earnings.

Eastern Bengal Railway.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
	WORKING EXPENSES—			
126,0	Maintenance	123,8	137,7	135,0
147,0	Locomotive	165,4	171,0	166,1
41,2	Carriage and Wagon	58,0	43,0	48,2
139,9	Traffic	136,7	145,0	147,2
150,0	General, Miscellaneous and Suspense	124,1	173,3	169,9
604,1	TOTAL .	608,0	670,0	666,4

234. The main variations were the increases under *Maintenance* due to repairs of damages caused by the earthquake of 12th June 1897, under *Locomotive* expenses due to the replacement of 6 broad-gauge locomotive engines, and increase under *General, Miscellaneous and Suspense* due to increases under Secretary of State's charges, salaries of management and accounts establishment; to hire of locomotives from the Oudh and Rohilkhand Railway, and to mileage and demurrage of foreign vehicles owing to the increased traffic.

Section H.—RAILWAYS—EXPENSES—*continued.*

Rajputana-Malwa Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	WORKING EXPENSES—			
191,2	Maintenance	187,2	217,3	202,2
354,2	Locomotive	412,3	354,1	341,2
88,8	Carriage and Wagon	98,6	93,4	92,4
156,6	Traffic	162,3	159,0	161,9
152,0	General, Miscellaneous and Suspense	148,2	144,0	139,2
942,8	TOTAL WORKING EXPENSES	1,008,6	967,8	936,9
84,1	Share of surplus profits paid to the Bombay, Baroda and Central India Railway Company, and contribution to Provident Fund	101,4	47,2	56,1
1,026,9	TOTAL	1,110,0	1,015,0	993,0

235. Compared with the actuals of the previous year there was a decrease under *Locomotive* expenses 13,0, due to reduced consumption of coal and to the carriage of less coal, and under *General, Miscellaneous and Suspense* 12,8, due chiefly to fluctuations in suspense accounts. The decrease of 28,0 in *Surplus Profits, etc.,* was due to the result of the year's working having proved less favourable than that of 1896-97. Compared with the Budget Estimate the principal variation was under *Locomotive* expenses, where there was a saving of 71,1, due mainly to excess provision having been made under running expenses, fuel, and unclassified expenditure. The decrease of 45,3 under *Surplus Profits, etc.,* was due to the net result of the year's working having proved much less satisfactory than anticipated.

North-Western Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	WORKING EXPENSES—			
589,2	Maintenance	622,0	610,1	558,7
590,5	Locomotive	572,6	663,0	691,7
123,3	Carriage and Wagon	157,4	126,2	121,4
260,2	Traffic	275,0	279,4	277,6
147,4	General, Miscellaneous and Suspense	173,0	191,3	180,8
1,710,6	TOTAL	1,800,0	1,870,0	1,830,2

236. There was a decrease under *Maintenance*, due to the rush of traffic in connection with the Frontier expedition, and the general restriction of expenditure ordered by the Government of India having interfered with work. The increases under other heads were due to increased traffic.

Oudh and Rohilkhand Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	WORKING EXPENSES—			
132,2	Maintenance	124,0	121,5	115,7
108,9	Locomotive	166,5	160,0	154,7
82,6	Carriage and Wagon	38,0	46,0	43,7
77,4	Traffic	78,5	78,5	77,4
49,0	General, Miscellaneous and Suspense	63,0	69,0	70,0
450,1	TOTAL	470,0	475,0	461,5

237. Contrasted with the actuals of the previous year the decrease under *Maintenance* was due to less extensive renewals of permanent-way and girders, while under *Locomotive* the increase was due entirely to special renewals of locomotives. Under *Carriage and Wagon* the decrease was due to reduced outlay on renewals of coaching and goods stock.

Bengal-Nagpur Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	WORKING EXPENSES—			
104,0	Maintenance	97,0	70,3	70,2
98,4	Locomotive	93,5	93,7	92,8
26,8	Carriage and Wagon	26,2	25,0	25,0
53,4	Traffic	55,2	57,0	56,8
69,9	General, Miscellaneous and Suspense	68,1	64,0	72,3
352,5	TOTAL	340,0	310,0	317,1

238. Reduced expenditure on relaying the Katni-Umaria Section accounts for the decrease under *Maintenance.*

Section H.—RAILWAYS—EXPENSES—*continued.*

Bengal and North-Western and Tirhoot Railways.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	WORKING EXPENSES—			
71,0	Maintenance	71,0	71,3	71,6
51,2	Locomotive	56,0	53,0	54,5
18,3	Carriage and Wagon	17,0	15,2	15,5
44,8	Traffic	45,6	47,2	48,1
76,0	General, Miscellaneous and Suspense	71,4	74,1	69,3
176,0	Share of net earnings paid to the Company, and contribution to Provident Fund	197,4	199,2	184,3
437,3	TOTAL	458,4	460,0	443,3

239. Compared with the actuals of the previous year and the Budget Estimate the variations under the several heads of expenditure are small.

Indian Midland Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	WORKING EXPENSES—			
60,1	Maintenance	63,0	68,5	66,4
112,8	Locomotive	110,0	120,0	119,4
26,0	Carriage and Wagon	25,0	26,0	28,7
46,2	Traffic	45,0	48,8	49,7
77,2	General, Miscellaneous and Suspense	77,0	75,5	77,3
322,3		320,0	338,8	341,5
32,4	*Deduct*—Working expenses of Bhopal State Railway	30,0	28,8	28,9
289,9	Total Indian Midland Railway	290,0	310,0	312,6

240. The increase as compared with the actuals of the previous year was due to renewals of rails on the Scindia Section, to payment of grain compensation to gangmen, to heavier train mileage and to larger expenditure on repairs.

Southern Mahratta Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	WORKING EXPENSES—			
84,9	Maintenance	84,5	84,5	83,7
132,6	Locomotive	132,0	129,7	125,2
28,2	Carriage and Wagon	34,5	26,6	25,7
65,2	Traffic	67,0	63,0	61,8
61,3	General, Miscellaneous and Suspense	64,5	63,9	68,1
372,2	TOTAL WORKING EXPENSES	382,5	367,7	365,5
75,6	Share of net earnings paid to the Company, and contribution to Provident Fund	67,5	72,3	72,4
447,8	TOTAL	450,0	440,0	437,9

241. The variations are unimportant and are due to falling off in traffic.

South Indian Railway.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	WORKING EXPENSES—			
109,4	Maintenance	116,5	100,4	103,0
173,9	Locomotive	194,0	169,4	168,3
48,1	Carriage and Wagon	63,5	52,9	51,3
80,6	Traffic	84,5	82,0	81,5
74,7	General, Miscellaneous and Suspense	71,5	70,3	69,0
486,7	TOTAL WORKING EXPENSES	530,0	475,0	473,1
30,2	Share of net receipts paid to the Company, and contribution to Provident Fund	25,0	35,0	34,8
516,9	TOTAL	555,0	510,0	507,9

Section H.—RAILWAYS—EXPENSES—*continued.*

South Indian Railway—*continued.*

242. The *Working Expenses* show a decrease under *Maintenance* due to smaller renewals with 50 lbs. rails, and under *Locomotive* to the cheaper rate at which coal was obtained, and to five engines ordered from England to replace condemned ones not having arrived owing to the engineers' strike. The increase in the Company's share of net receipts and contribution to Provident Fund was due to the increased net earnings of the year.

Burma Railway.

1896-97.* Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	Working Expenses—			
123,6	Maintenance	110,0	128,8	131,7
147,9	Locomotive	140,0	153,0	155,3
37,6	Carriage and Wagon	40,0	42,2	40,8
85,0	Traffic	82,0	90,0	90,4
67,8	General, Miscellaneous and Suspense	75,5	84,4	85,0
461,9	Total Working Expenses	447,5	498,4	503,2
...	Share of surplus profits, etc.	...	16,6	16,6
461,9	Total	447,5	515,0	519,8

* Includes Mu Valley and Provincial share.

243. Compared with the actuals of the previous year there was an increase in the working expenses of 41,3. The increase under *Maintenance* 8 1 was due to very heavy repairs to bridges and lines which were damaged by floods; to the reconstruction of station buildings at Katha which were burned down, and to the payment throughout the year of contribution for leave and pension against payment for only a portion of the previous year; the increases under the other heads were due to opening of new stations and increased traffic, and to increased running expenses consequent on increased train mileage; to charges for police pertaining to the entire period from the transfer of the Railway to a company up to 31st March 1898 having been adjusted in the accounts for 1897-98, and to a large increase under Home Board and Government supervision.

Other State Railways—Imperial.

1896-97. Accounts.	1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
602,2	633,0	666,1	679,6

244. The actuals exceeded those of the previous year by 77,4. The heavier traffic mileage on the Assam-Bengal, Bengal Central, Lucknow-Bareilly, Guntakal-Mysore Frontier, Mysore State, and East Coast Railways accounted for the greater part of the increases. As compared with the Budget Estimate there was a falling off on the Assam-Bengal Railway, 14,2, due to portions of the line being closed to traffic owing to damage done by the earthquake of June 1897 and the cyclone of October of the same year.

State Railways—Provincial.

1896-97.* Accounts.	1897-98 Budget.	1897-98 Revised.	1897-98 Accounts.
37,6	39,3	42,3	44,7

* Excludes Burma Railway.

245. The variations are unimportant. The excess has been partly covered by additional grants, *vide* para. 232.

Section H.—RAILWAY EXPENSES—*continued.*

38.—State Railways.

Interest on Debt.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.

5,452,5	TOTAL INTEREST ON DEBT .	5,629,1	5,511,9	5,509,1

246. There was a decrease in the actuals as compared with those of the previous year and with the Budget Estimate in charges for exchange owing to the rise in the rate of exchange. Omitting exchange, the charges approximate closely to the Budget but exceed those of the previous year as the Capital found by Government is increasing year by year with the progress of construction.

Interest on Capital found by Government.

247. The following statement shows how the interest charged in the accounts of 1897-98 has been calculated :—

CAPITAL EXPENDITURE ON WHICH INTEREST IS CHARGEABLE.

	E. I. Ry.		E. B. Ry.	Other State Railways.	TOTAL.
		3½ per cent.			
Capital Expenditure at end of 1896-97 . .	—563,2	3,994,3	7,695,3	82,293,9	93,420,3

363,5		363,4	341,5	342,2
404,7	TOTAL	445,0	427,7	429,9

Interest.

249. The interest chargeable against the Companies on the advances made by the Secretary of State from funds raised under the provisions of the Oudh and Rohilkhand Railway Purchase Act is shown under this head in England. There is no variation in the sterling amounts. The figures under "India" represent interest on the expenditure incurred in India on the extensions of the Bengal-Nagpur and Indian Midland Railways, which is met from rupee advances.

Section H.—RAILWAYS—EXPENSES—*continued.*

Interest on Capital Deposited by Companies.

477,5	EXCHANGE	528,0	439,5	441,9
1,215,2	TOTAL	1,347,5	1,240,6	1,243,3

Interest.

250. The increase in the sterling payments over the actuals of the previous year occurred on the Assam-Bengal, Southern Mahratta, Burma and Bengal-Nagpur Railways, consequent on the additional capital paid up by the Companies; and under the East Indian Railway on account of capital raised by the issue of debentures.

39.—Guaranteed Companies—Surplus Profits, Land and Supervision.

28,1	TOTAL LAND AND SUPERVISION	145,4	28,6	15,9
475,4	GRAND TOTAL	303,0	145,8	126,2

Section H.—RAILWAYS—EXPENSES—*continued.*

39.—Guaranteed Companies—Surplus Profits, Land and Supervision—*continued.*

Surplus Profits.

251. The decrease, as compared with the actuals of the previous year, was due to no surplus having been earned by the Great Indian Peninsula Railway during the half-year ended 30th June 1897, and to the share of profits paid to the Bombay, Baroda and Central India Railway being less owing to a fall in traffic; there was, however, an increase in the share of profits paid to the Madras Railway Company. Contrasted with the Budget Estimate the decrease was due to the Bombay, Baroda and Central India Railway Company having earned no surplus in the second-half of 1897.

Land and Supervision.

252. The decrease, as compared with the actuals of the previous year, was due to the formation of a separate Consulting Engineer's Office in Rangoon; and to payments for land required for the "Salt Cottaur junction arrangements" in Madras having been for the most part liquidated in 1896-97. The lapse on the Budget Estimate was due principally to the provision made for the cost of land to be acquired for the Calicut-Cannanore Branch of the Madras Railway, not having been utilized in full owing to delay in the commencement of construction operations.

39.—Guaranteed Companies—Interest.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	INTEREST—			
8,2	India	[illegible],2	8,8	8,9
2,161,0	England	2,169,4	2,154,8	2,154,8
2,169,2		2,176,6	2,163,6	2,163,7
1,428,0	EXCHANGE	1,431,8	1,206,7	1,213,4
3,597,2	TOTAL	3,608,4	3,370,3	3,377,1

253 The increase in the charges in India, compared with those of the previous year, was due to the Railway Companies having overdrawn their capital to a greater extent than in 1896-97.

40.—Subsidised Companies—Land, Subsidy and Interest.

Section H.—RAILWAYS—EXPENSES—*continued.*

40.—Subsidised Companies—Land, Subsidy and Interest—*continued.*

254. Compared with the actuals of the previous year there was a net increase of 28,8. Of this increase 3,2 is due to the acquisition of land for new railway lines, and the balance for old lines, chiefly the Bengal and North-Western and South Behar Railways. Compared with the Budget Estimate the small outlay was due chiefly to amounts set aside for the Bhagulpur-Baidyanath, Hardwar-Dehra and Tinnevelly-Quilon Railways not having been utilized, and to the provision for the Brahmaputra-Sultanpur, Mymensingh-Jamalpur, Bengal and North-Western, and the Tapti Valley Railways having been only partly utilized. The small excess of 1 under Provincial requires to be sanctioned.

41.—Miscellaneous Railway Expenditure.

63,9	TOTAL IMPERIAL AND PROVINCIAL	60,0	23,6	16,2

255. The total outlay under *Imperial* is less than that of the previous year by 48,2. No useful comparison can be made between the outlay of the two years by individual projects, as surveys are being completed and new surveys are being started every year. During the year new surveys were taken in hand, and others, for which provision was made in the Budget Estimate, were not commenced, the result being that the expenditure was less by 44,5 than the Estimate. The excess of 7 under Provincial was covered by additional grants.

Section J.—IRRIGATION.

256. The following is a general summary of the results under the head Irrigation :—

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	Major Works—			
2,068,0	Direct Receipts	1,968,1	2,435,1	2,377,7
871,8	Land Revenue due to Irrigation .	940,5	925,1	964,7
2,939,8	TOTAL RECEIPTS .	2,908,6	3,360,2	3,342,4
871,2	Working Expenses . . .	859,8	887,9	892,1
1,253,5	Interest	1,285,0	1,284,1	1,284,3
2,124,7	TOTAL EXPENDITURE .	2,144,8	2,172,0	2,176,4
815,1	Net Receipts (Major Works) .	763,8	1,188,2	1,166,0
	Minor Works and Navigation—			
210,9	Receipts (excluding Land Revenue)	213,9	230,9	227,4
1,126,3	Expenditure	966,9	966,2	967,7
915,4	Net Expenditure (Minor Works)	753,0	735,3	740,3
—100,3	Net Revenue (Irrigation) . .	10,8	452,9	425,7

257. The final net result of the year was better than the actuals of the previous year by 526,0 and than the Budget Estimate by 414,9. This was due principally to the large increase of revenue from major works owing to the seasons having been very favourable for canal irrigation on account of drought.

Section J.—IRRIGATION—RECEIPTS.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
3,150,7	REVENUE . . .	3,122,5	3,591,1	3,569,8

258. The actual receipts in 1897-98 exceeded those of the previous year by 419,1, and the Budget Estimate by 447,3. The increase was due chiefly to the exceptionally dry nature of the seasons, and partly to the development of irrigation from the Chenab Canal and the Godavari and Kistna Delta systems. The increase, due to the latter cause, was to a large extent provided for in the Budget Estimate.

Section J.—IRRIGATION—RECEIPTS—*continued.*

Direct Receipts—Imperial Works.

259. The *gross revenue* in 1897-98 exceeded that of the previous year by 136,2 and the Budget Estimate by 179,2. Of these increases 120,4 and 176,1 respectively occurred in the Punjab, due chiefly to the unusually dry nature of the seasons, and partly to the development of irrigation from the Chenab Canal. Of the increase over the previous year 5,4 occurred in the North-Western Provinces and Oudh owing to the recovery of outstanding balances of the previous year, and 9,9 in Bombay, contributed chiefly by the Nira and Krishna Canals, owing partly to a larger area having been brought under the influence of irrigation and partly to scanty rainfall on lands watered by the Nira Canal.

Direct Receipts—Provincial Works.

260. The *gross revenue* in 1897-98 was better than that of the previous year by 173,5 and the Budget Estimate by 230,4. The increase was due to the very large demand for canal water both in Bengal and the North-Western Provinces and Oudh, owing to the unusually dry nature of the *rabi* season of 1896-97 and the larger area irrigated during the *kharif* season of 1897.

XXIX.—Major Works—Indirect Receipts.

Portion of Land Revenue due to Irrigation.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
117,5	N.-W. Provinces and Oudh	117,5	117,5	117,5
53,1	Punjab	52,3	57,0	57,9
604,3	Madras	676,3	650,0	675,1
96,9	Bombay	94,4	100,6	114,2
871,8	TOTAL	940,5	925,1	964,7

261. The share of land revenue credited to irrigation works during 1897-98 exceeded that of the previous year by 92,9 and the Budget Estimate by 24,2. The increase over the previous year occurred mainly in Madras, and was due chiefly to the development of irrigation from the Godavari and Kistna Delta systems and the Periyar project. The increase, as compared with the Budget Estimate, in the Punjab was due to the revenue credited to the Swat river canal having been transferred to this head after the Budget Estimate had been prepared; and in Bombay to favourable inundation and better working of canals.

XXX.—Minor Works and Navigation.

1896-97. Accounts. A	1896-97. Accounts. B		1897-98. Budget. A	1897-98. Budget. B	1897-98. Revised. A	1897-98. Revised. B	1897-98. Accounts. A	1897-98. Accounts. B

210,9			213,9		230,9		227,4	

A.—Imperial. B.—Provincial and Local.

Imperial Works.

262. The actual receipts during 1897-98 exceeded those of the previous year by 6,8, and the Budget Estimate by 4,2. The increase occurred in India and the Punjab. The increase in India occurred in Baluchistan, where the revenue is recovered in kind, and was due to a larger area having been irrigated, and to rates for grain having slightly increased. In the Punjab it was due to the revision of settlement in the Dera Ghazi Khan District.

Provincial and Local Works.

263. The actual collections of the year 1897-98 were better than those of the previous year by 9,7 and than the Budget Estimate by 9,3. The increase was contributed chiefly by the North Western Provinces and Oudh and the Punjab. In the former it was due to the great demand for canal water owing to drought, and in the latter it occurred in the revenue from the canals and bunds in charge of Civil officers.

Section J.—IRRIGATION—EXPENDITURE.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
3,251,0	EXPENDITURE . . .	3,111,7	3,138,2	3,144,1

264. The expenditure in 1897-98 was less than that of the previous year by 106,9. The decrease was due to the restriction of expenditure during 1897-98 on works classed as "Minor Works and Navigation" owing to famine. The decrease would have been larger had it not been for an increase in the cost of working and maintenance necessitated by increased irrigation, and an increase in the interest charges on the Capital outlay of the year. The increase over the Budget Estimate was mainly due to the increased maintenance charges referred to above.

42.—Major Works—Working Expenses.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
504,5	Imperial Works	475,0	503,9	506,2
366,7	Provincial Works	384,8	384,0	385,9
871,2	TOTAL .	859,8	887,9	892,1

(For details see page 106.)

Imperial Works.

265. The total expenditure in 1897-98 was only 1,7 more than that of the previous year; but compared by Provinces there were some large variations, as shown below:—

Punjab.—The increase of 8,9 was due to increased maintenance charges on the Chenab canal owing to the expansion of irrigation from the canal.

Madras.—The decrease of 17,8 was due to the expenditure in 1896-97 on repairs to damages caused by floods having been very large.

Bombay.—The increase of 8,9 was due partly to special repairs on the Begari canal, and partly to the transfer to this head of the normal expenditure on famine relief work on the Lakh canal and the Ekruk and Mhasvad tanks.

266. The Budget Grant was increased to 503,9 by additional grants* sanctioned during the course of the year to meet the cost of urgent repairs necessitated by increased irrigation and increased collection charges. Against this the actuals show an excess of 2,3; made up of a decrease of 5,5 in the Punjab and of increases of 2, 2,0 and 5,6 in North-Western Provinces and Oudh, Madras and Bombay respectively. The decrease in the Punjab is ascribed principally to savings on maintenance estimates and transfer of establishment charges to capital account, and partly to short payment of *Lambardars'* fees owing to a large amount of revenue having remained unrealized at the close of the year. The increase in Madras and Bombay was mainly due to the adjustment of the normal value of work done by famine relief labour. Of the excess, 28,9 has been sanctioned by the Government of India, and 2,3 still requires sanction.

* Sanctioned by the Finance Department . .	20,1
Grant transferred from 16.—Telegraph . .	6,6
Ditto from 43.—Minor Works and Navigation	2,2

Provincial Works.

267. The expenditure in 1897-98 exceeded that of the previous year by 19,2. Of this increase 7,0 occurred in Bengal and 12,2 in the North-Western Provinces and Oudh. The former being due to increased establishment charges and to heavier charges for collection of revenue, and the latter to higher maintenance and collection charges owing to increased irrigation. Compared with the Budget Estimate the actuals show an increase of 1,1, which is made up of a decrease of 9,4 in Bengal and an increase of 10,5 in the North-Western Provinces and Oudh. In Bengal the requirements of the year were over-estimated. The increase in the North-Western Provinces and Oudh was due partly to additional collection charges on account of increased receipts, partly to repairs to training works on the Ganges river, and partly to the completion of the construction of the channel of the Lower Ganges canal. The excess was covered by an additional grant.

A. Imperial. B. Provincial and Local.

Imperial Works.

269. The expenditure in 1897-98 was less than that of the previous year by 111,6. The decrease was mainly due to the expenditure on Minor Irrigation Works in Upper Burma having been met from Provincial Funds from 1st April 1897, and partly to a smaller programme of expenditure in Bombay. The actuals on the whole compare favourably with the Budget Estimate. The increase of 7,9 in the Punjab was due partly to increased expenditure on works, for which an additional grant of 2,5 was sanctioned during the year, and partly to the transfer to this head of the normal value (5,4) of works on the Ghaggar canal from 33.—Famine Relief. The decrease in Bombay was due to the Establishment charges having been over-estimated. The excess of 5 was covered by additional grants.

Section J.—IRRIGATION EXPENDITURE—*concluded.*

43.—Minor Works and Navigation—*continued.*

Provincial and Local Works.

270. Although the expenditure in Upper Burma was made Provincial, the total expenditure of the year fell short of that of the previous year by 47,0. The decrease was due to the grants made available by the several Local Governments for expenditure during 1897-98 being considerably smaller than in the previous year. On the whole, the Budget Estimate was closely worked up to. The increase of 17,4 in Bengal was due partly to the construction of additional works sanctioned by the Government of Bengal during the course of the year, and partly (10,3) to the transfer of the value of the surplus stock of the Dehri Workshops from "49.—Irrigation" to this head. The decrease of 4,6 in the Punjab was mainly due to the special grant of 3,9 provided for the extension of the Hazur-Khani Branch of the Michni-Nowshera canal, which is in charge of Civil officers, not having been utilized. The decrease in Madras was chiefly due to the outlay on works and repairs in charge of Civil officers having been over-estimated. The excess of 3 in the total has been covered by additional grants.

696,2	RECEIPTS	679,6	660,5	667,8

271. The receipts in 1897-98 fell short of those of the previous year by 28,4. There was a decrease of 8,7 under Military Works owing to a special credit of 9,0 obtained in 1896-97 by the sale of certain buildings. The decrease under Civil Works was due to several small variations in the different Provinces, the most important of which was a falling off under Road Tolls, Contribution for Public Works and Ferry receipts in Bombay, consequent on the prevalence of famine and plague. The falling off from the Budget Estimate is also attributable to this cause.

A.—Public Works in charge of Departmental Officers. B.—Public Works in charge of Civil Officers.

Imperial Works.

273. The decrease in the receipts during 1897-98, as compared with those of the previous year, was due to the provincialization of Civil Works in Upper Burma with effect from 1st April 1897.

Provincial Works.

274. The receipts by departmental officers during 1897-98 were less than those of the previous year by 9,3. The decrease is principally the net result of increases of 9,3 in Burma and 4,7 in the Punjab, and of decreases of 6,9 and 16,5 in Bengal and Bombay, respectively. The increase in Burma was due partly to the cause stated above, partly to additional rentable quarters having been provided and to the revision of rents, and partly to the recovery of 1,3 from the lessee of the Government Saw Mills at Mandalay on its destruction by fire. The increase in the Punjab was due to the sale of the site of the Lunatic Asylum at Lahore to the North-Western Railway. The decrease in Bengal was due partly to the abolition of the Calcutta Workshops and partly to the Government share of the profits from the Darjeeling-Himalayan Railway having been smaller than in the previous year. The decrease in Bombay was mainly due to famine and plague having affected the Toll receipts. The actuals fell short of the Budget Estimate by 5,5. The variations by Provinces occurred in Burma, the Punjab, and Bombay, and were due to the causes explained above.

275. The receipts by Civil Officers exceeded those of the previous year by 8,0. The increase was due mainly to an improvement in the receipts from ferry tolls in the North-Western Provinces and Oudh and partly to transfers to this head of receipts relating to staging bungalows and encamping grounds in accordance with the revised classification. Owing mainly to the latter cause the Budget Estimate was also exceeded by 3,2. In the Revised Estimate the receipts from ferry tolls in Bengal were under-estimated.

Local Works.

276. The revenue realized by Civil officers in 1897-98 fell short of that of the previous year by 14,3 and the Budget Estimate by 12,2. The decrease occurred chiefly in Bombay, and was mainly due to a falling off under road tolls, contribution for Public Works and ferry receipts, consequent on the prevalence of famine and plague. The increase in Burma was mainly due to an improvement in ferry receipts and partly to the transfer of staging bungalow rents from "XXV.—Miscellaneous" to this head. The increase in the North-Western Provinces and Oudh and the Punjab was mainly due to the transfer to this head of receipts relating to staging bungalows and encamping grounds.

5,783,3	EXPENDITURE	5,780,1	5,464,0	5,418,9

277. The expenditure during 1897-98 was less than that of the previous year by 364,4 and fell short of the Budget Estimate by 361,2. This was mainly due to the restriction of expenditure in consequence of famine. The decrease would have been larger had it not been for repairs to earthquake damages in Assam and Bengal.

44.—Military Works.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
899,7	India	919,7	810,3	824,7
2,1	Central Provinces	8	8	7
97,5	Burma	101,1	93,7	84,5

7,3	Bengal	20,2	10,6	9,2
2,2	North-Western Provinces and Oudh	3,5	3,2	1,6
62,4	Punjab	102,3	82,3	80,8
8,6	Madras	8,1	8,2	7,5
19,0	Bombay	29,1	21,4	19,4
1,116,0	TOTAL INDIA	1,207,3	1,063,8	1,059,6
24,7	ENGLAND (Stores)	14,4	66,0	69,6
16,3	EXCHANGE	9,5	37,0	39,2
1,157,0	GRAND TOTAL	1,231,2	1,166,8	1,168,4

278. The actual expenditure during 1897-98 exceeded that of the previous year by 11,4, made up of a decrease of 56,4 in the Indian expenditure, and of an increase of 67,8 in the expenditure in England including exchange. The decrease in India is attributable mainly to restriction of expenditure, to smaller requirements in connection with the occupation of Chitral and its communications, the major portion of the cost of fortified posts, bridges, accommodation of troops, etc., having been charged in the accounts to end of 1896-97, and to the employment of Royal Engineer officers and departmental subordinates on the North-West Frontier operations, in consequence of which their pay was not charged to the Military Works grant. The decrease in Burma was due to considerable expenditure having been incurred in the previous year on the construction of temporary barracks for a regiment of Native Infantry at Kengtung. The increase of 14,0 in Assam was due partly to larger expenditure on the project for providing accommodation for the permanent garrison of Native Infantry at Manipur, and partly (4,7) to expenditure in restoring and repairing the damages caused by the earthquake of the 12th June 1897. The increase of 18,4 in the Punjab was due to the outlay incurred on the construction of Military roads and outposts in the Tochi Valley. The increase in the expenditure in England was due to larger payments by the Secretary of State on account of water pipes and other English stores.

279. Compared with the Budget Estimate, the actuals show a decrease of 62,8, made up of a decrease of 147,7 in the Indian expenditure, and of an increase of 84,9 in the expenditure in England including exchange. The decrease in the Indian expenditure was due partly to transfers of grant from India to England (73,7) and to "47.—Special Defence Works" (11,7), and partly (62,5) to savings from the grants owing to the curtailment of expenditure until the month of January 1898 under the orders of the Government of India. In Assam there was an excess of 8,7 due chiefly to the causes explained above. The increase in England was due to the larger demand for stores as explained in the foregoing paragraph.

Imperial Works.

280. *Departmental Officers.*—The expenditure in 1897-98 was less than that of the previous year by 357,0. The decrease was mainly due to the expenditure on works in Upper Burma, which had hitherto been met from Imperial funds, having been transferred to Provincial, with effect from 1st April 1897. Excluding Burma, the expenditure during 1897-98 was 50,0 less than that of the previous year. The decrease occurred chiefly in Assam (12,7) and the Punjab (33,1). The former was principally due to less expenditure on the construction of the Nichuguard-Manipur road, which is approaching completion, and to the expenditure on repairs of this road having been charged to Provincial in 1897-98; and the latter was due to the large expenditure incurred in the previous year on the re-construction of the Public Works Department Secretariat Buildings at Simla. The increase of 12,7 in India was the net result of an increased expenditure of 51,5 on the Bangalore water-works and of a reduction of expenditure aggregating 38,8 in the minor provinces classified under "India General and Political," owing chiefly to the grants made available being smaller than in the previous year. The decrease in the remaining provinces was due to a smaller programme of works in 1897-98.

281. The actuals fell short of the Budget Estimate by 20,2. The decrease was due partly to a write-back of 10,8 from Imperial to Provincial on account of suspense balances appertaining to Civil Works in Upper Burma, and partly to the requirements in Bengal, Madras and Bombay having been over-estimated. The increase of 9,4 in Assam was due partly (about 5,8) to the re-construction and repairs of Imperial Buildings damaged by the earthquake, and partly (about 3,6) to irregular expenditure towards the close of the year on the Nichuguard-Manipur road.

Provincial Works.

282. *Departmental Officers.*—The expenditure in 1897-98 exceeded that of the previous year by 181,5. The increase was due chiefly to the expenditure on Civil Works in Upper Burma having been made Provincial, with effect from 1st April 1897. The increases of 20,5 in the Central Provinces and of 11,2 in the North-Western Provinces were due to larger grants having been made available. The increase of 72,7 in Assam was due to the restoration and repairs of buildings damaged by the earthquake. The decrease of 40,7 in Bengal was due to a smaller programme of works. The decrease would have been larger by 16,4 had it not been for repairs to earthquake damages to buildings. The decrease in the Punjab (16,0), Madras (64,5), and Bombay (49,8) was due to restriction of expenditure owing to famine in the former two provinces and plague and famine in the latter. Compared with the Budget Estimate, the actuals show a decrease of 23,3; the net result of an increase of 88,0 in Assam due to repairs of earthquake damages and to savings aggregating 111,3 in other provinces, owing mainly to the restriction of expenditure in consequence of famine and plague. The excess in Assam was covered by additional grants.

283. *Civil Officers.*—The decrease of 55,3 in expenditure, as compared with that of the previous year, was due chiefly to smaller grants for repairs to roads and new works of Miscellaneous Public Improvement in Bengal and to Municipalities in Madras for water-supply and drainage works. The lapse of 16,4 from the Budget Estimate in Madras was due to the progress on the construction of the Mount Capper Jail not having been so great as anticipated, and to smaller allotments to Municipalities for water-supply and drainage works.

Local Works.

284. *Departmental Officers.*—The expenditure in 1897-98 was less than that of the previous year by 65,8. The decrease was mainly due to smaller grants having been assigned by the several Local Governments. The lapse from the Budget Estimate was due to an over-estimate of expenditure. The increase of 9,8 in Bombay was due to outlay incurred against supplementary grants aggregating 15,9 sanctioned by Local Boards; this grant was not, however, fully utilized owing to failure of contractors to complete works and to non-payment of compensation for land.

285. *Civil Officers.*—The expenditure in 1897-98 was less than that of the previous year by 55,3 and the Budget Estimate by 198,8. The decrease occurred in all the provinces except Punjab, where there was a small excess of 2,6. The saving was mainly due to the restriction of expenditure in consequence of famine. The excess in Assam has been covered by additional grants sanctioned by the Government of India and the Local Government.

Section L.—ARMY SERVICES.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
953,3	RECEIPTS	881,3	897,2	881,9
24,255,3	EXPENDITURE	24,195,5	27,027,0	26,996,8
23,302,0	NET .	23,314,2	26,129,8	26,114,9

286. The Indian and English portions of the above figures are as follows :—

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
	RECEIPTS.			
824,1	India	814,6	820,7	809,4
77,8	England	40,2	49,0	46,4
51,4	Exchange	26,5	27,5	26,1
953,3	TOTAL .	881,3	897,2	881,9
	EXPENDITURE.			
17,261,3	India	16,968,9	20,300,3	20,362,6
4,211,1	England	4,353,4	4,312,0	4,244,2
2,782,9	Exchange	2,873,2	2,414,7	2,390,0
24,255,3	TOTAL .	24,195,5	27,027,0	26,996,8

287. The receipts in India fell short of the Budget Estimate and of the actuals of the previous year by 5,2 and 14,7 respectively. The variations do not call for any special remarks.

288. The receipts in England exceeded the Budget Estimate chiefly by larger receipts on account of the Indian Troop Service and increase in the subscriptions to the Pension Fund.

289. The following statement shows separately the ordinary and special charges included under expenditure in India :—

1896-97. Accounts.			1897-98. Budget.	Revised.	Accounts.
		SPECIAL ITEMS :—			
...		Military operations on the N.-W. Frontier . .	...	3,864,0	3,848,0
352,7(*a*)		Other special services .	321,6(*b*)	187,6(*b*)	188,5
337,6		Mobilization arrangements	...	...	...
	690,3		321,6	4,051,6	4,036,5
	16,571,0	Other Charges . .	16,647,3	16,248,7	16,326,1
	17,261,3	TOTAL .	16,968,9	20,300,3	20,362,6

(*a*) Includes charges for Waziristan Field Force and Chitral Relief Force } both classified in the Financial Statement
(*b*) „ provision for Chitral Relief Force. } as warlike operations.

290. Under the head "Military Operations on the North-West Frontier" are shown charges incurred in connection with the Tochi Field Force, the Malakand Field Force and North-West Frontier disturbances, and the force sent to Mekran. These operations commenced in June 1897, and, for the first two, extra grants of 341,8 and 3,360,0, respectively, were sanctioned by the Finance Department in August 1897 and January 1898. A further grant of 146,2 will therefore be necessary.

Section L.—ARMY SERVICES—*continued.*

291. The total Budget provision and actual expenditure for Other Special Services are shown in detail below:—

	1897-98. Budget.	1897-98. Accounts.
Charges for—		
Occupation of Chitral and its communications .	182,6	65,0
Chitral Relief Force	6,5	2,8
Wano Garrison	30,8	32,0
Tochi Garrison	46,0	43,7
Gilgit Agency	32,8	14,2
Kajuri Kach and Jondola Garrisons . . .	10,4	11,2
Kengtung Garrison	11,5	19,4
Las Bela Escort	1,0	2
	321,6	188,5

292. The saving under "Occupation of Chitral and its communications" and "Tochi Garrison" was partly nominal, as the extra expenditure incurred on account of the normal garrisons in Chitral, the Malakand and the Tochi Valley was compiled for a part of the year under the head "Malakand Field Force, etc.," in the first two cases and under "Tochi Field Force" in the other case. The decrease under "Gilgit Agency" was in Commissariat charges, and was due to the reduction of the garrison and to recoveries on account of the year 1896-97 having been adjusted by deduction from expenditure in 1897-98. The small excess under the head "Kengtung Garrison" was due to *atta* having been issued to the Native troops stationed there instead of rice.

293. The cause of the reduction of 321,2 in the ordinary expenditure, as compared with the Budget, is shown by the following figures:—

	Budget.	Accounts.	Excess + Reduction—
Army and Garrison Staff . . .	551,2	533,0	—18,2
Regimental Pay	8,404,7	8,266,4	—138,3
Commissariat	3,616,2	3,611,1	—5,1
Remount	366,8	303,3	—63,5
Clothing	259,7	245,0	—14,7
Medical	746,4	748,6	+2,2
Ordnance	882,8	851,9	—30,9
Miscellaneous	94,4	76,3	—18,1
Other heads	1,725,1	1,690,5	—34,6
TOTAL .	16,647,3	16,326,1	—321,2

The principal savings are tabulated below:—

(1) Smaller payments of Exchange Compensation Allowance, owing to the actual payment rates of exchange being higher than the Budget rate	61,8
(2) Savings in pay, stores and clothing secured by the despatch to Mombassa of the 27th Bombay Infantry and Head-Quarters Wing, 4th Bombay Rifles, at the cost of the Home Government	10,4
(3) Savings from the short strength of the Army, due chiefly to the establishment of British Infantry in India having been short by two battalions for a part of the year	106,9
Carried over .	179,1

Section L.—ARMY SERVICES—*concluded.*

Brought forward .	179,1
(4) Transfer to the Civil Department of the charge for the pay of soldiers and medical officers on plague duty . . .	17,1
(5) Savings due to the purchase of a smaller number of remounts and young stock and to the purchase of Australian animals at a more favourable rate of exchange	34,5
(6) Smaller consumption of malt liquor, owing to the absence of several British regiments on field service and reduction in price from 1st January 1898 under a new contract . .	56,8
(7) Less expenditure for movement of troops and stores in consequence of troops being on field service	53,3
(8) Lapse of the special grant for the purchase of camels for mobilization purposes	10,1
(9) Less charge for camps of exercise, owing to troops being on field service	8,1
(10) Savings in the cost of feed of cattle and remounts . . .	52,4
(11) Recoveries by deduction from charge of the value of supplies to other departments	20,2
(12) Savings in the cost of clothing	13,0
(13) Less charge for horse allowance to Artillery and Cavalry officers	11,8
(14) Favourable rates of food supplies in the Madras Command .	42,9
(15) Savings under Reserve Force, Ambulance Transport, war service materials, cultivation expenses and contingencies . .	37,1
	536,4

The only considerable excesses are—

(1) Increased cost of food supplies owing to famine and field operations on the North-West Frontier . . .	48,8
(2) Special money grants to European and Native troops on the occasion of the Diamond Jubilee	11,7
(3) Compensation to Natives for dearness of provisions and forage.	180,9
	241,4

294. As compared with the actuals of the previous year, the excess was due to the expenditure on the Military Operations on the North-West Frontier. Rejecting these charges, there was a decrease due mainly to the mobilization charges of the previous year (337,6) and the balance to the adoption of a more favourable rate of exchange for paying British troops, and Exchange Compensation Allowance; to less clothing charges, due to the introduction of the new clothing scheme in 1896-97 having resulted in heavy charges during that year; and to smaller local purchases of supplies for Ordnance Factories, owing mainly to the employment of the factories to manufacture supplies required for the operations on the North-West Frontier, the cost of which was charged to Special Services. These decreases were partly counterbalanced by larger expenditure on account of food supplies in consequence of the famine.

295. The expenditure in England showed a saving, as compared with the Budget, chiefly under Indian Troop Service and Stores. Under the former, it was due to the engagement of smaller transports, and under the latter to a smaller demand for stores. Less charges for Deferred pay caused a saving under Home charges of British forces serving in India; and the absence of fewer officers on furlough in England resulted in a decrease under Furlough Allowances of Officers of the Indian service.

93,5	TOTAL NON-EFFECTIVE SERVICES	84,2	87,1	88,6
...	Military operations on the N.-W. Frontier	...	82,3	73,6
824,1	TOTAL INDIA	814,6	820,7	809,4
	ENGLAND—			
64,9	Effective Services	29,2	34,8	32,0
12,9	Non-effective Services	11,0	14,2	14,4
77,8	TOTAL ENGLAND	40,2	49,0	46,4
51,4	EXCHANGE	26,5	27,5	26,1
953,3	GRAND TOTAL	881,3	897,2	881,9

296. In the Indian Receipts the total decrease, as compared with the Budget, is only 5,2. There was a heavy decline under *Commissariat*, which is explained below. The falling off under *Clothing Establishments* was due to smaller receipts from sales of part-worn cloths under the new clothing scheme, according to which all personal clothing becomes the property of the soldiers, and to smaller issues of regimental necessaries. The special recovery of 73,6 on account of the Tochi and Malakand Field Forces, classed under "*Military Operations on the North-West Frontier*," largely reduced the falling off.

297. The details of the receipts under *Commissariat* are as follows:—

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
317,7	Sale of malt liquor	319,8	261,1	263,0
72,9	Sale of provisions and stores	68,7	73,4	77,0
19,9	Sale of rum	15,8	19,0	16,4
29,8	Other heads	39,7	26,7	26,4
12,0	Special Services	15,9	6,9	6,7
452,3	TOTAL	459,9	387,1	389,5

298. The falling off in the sale-proceeds of malt liquor was due to smaller consumption owing to the absence of a large number of British troops on field service, where malt liquor is not issued. Under *Other heads* the largest decrease was due to the sale of fewer elephants than anticipated. The receipts under *Special Services* for a part of the year were classified under "Military Operations on the North-West Frontier". The decrease, as compared with the previous year, was also the result of the causes explained above.

Section L.—ARMY SERVICES—RECEIPTS—*continued.*

XXXIII.—Army—*continued.*

299. The receipts in England exceeded the Budget Estimate by 2,8 under *Effective Services*, due to increased receipts on account of the Indian Troop Service (7,8) and to larger sales of unserviceable stores (1,7), counterbalanced by a decrease of 6,8 in the value of clothing, etc., in possession of Regiments on their transfer from the Indian to the British Establishment, and by 3,4 under *Non-Effective Services*, due chiefly to sufficient provision not having been made for the growth of receipts under the Indian Military Service Family Pensions.

Army and Garrison Staff.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
25,4	Commander-in-Chief	27,2	26,9	24,5
41,7	Lieutenant-Generals Commanding the Forces	43,5	41,0	41,6
73,3	Adjutant General	76,6	75,0	79,1
16,8	Artillery Branch	16,2	15,2	14,7
4,0	Cavalry Branch	3,8	3,5	3,8
24,2	Musketry Inspection	25,0	24,0	23,1
52,3	Quarter Master General	55,9	50,7	50,7
3,3	Gymnastic Instruction	3,5	3,8	3,7
3,5	Army Signalling	3,5	3,3	3,4
188,3	District Commands	184,5	179,6	185,8
62,9	Garrison and Station Staff	61,6	60,6	59,3
29,3	Hill Sanitaria	29,4	27,0	24,8
10,6	Miscellaneous Depôts	11,2	10,6	10,2
11,9	Staff of Local Forces	9,1	8,2	8,1
3	Staff Miscellaneous	2	3	2
5,3	Special Services	5,5	2,6	2,2
553,1		556,7	532,3	535,2

300. Of the total saving of 21,5 under this head, as compared with the Budget, 10,5 was due to less payment of salaries and 5,8 to less payment of Exchange Compensation Allowance. The large saving was under the sub-head *Hill Sanitaria,* due chiefly to the closing of hill depôts in the Bengal and Punjab Commands during the winter months. There was also a saving of 4,0 in the tour expenses of the Commander-in-Chief in India, and of Lieutenant-Generals Commanding the Forces. Under *Special Services* the expenditure for a part of the year on account of the "Occupation of Chitral" and "Tochi Garrison" was shown under Military Operations on the North-West Frontier.

Administrative Staff.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
15,8	Personal Staff of the Governor-General, Governors, and Lieutenant-Governors	15,9	15,9	16,2
17,0	Accountant General, Military Department	17,0	17,0	17,6
	Controller of Military Accounts—			
27,6	Central Branch	27,2	26,9	27,6
14,1	Accounts Branch	14,4	14,3	14,0
43,1	Pay Branch	43,1	44,6	45,1
34,2	Commissariat Branch	34,0	34,8	34,2
7,6	Commissariat Branch, Rangoon	7,4	7,8	7,6
19,4	Ordnance and Clothing Branches	18,5	19,2	19,3
17,6	Circle, Field and Pension Pay Officers	14,9	14,2	13,9
6,6	Inspections, Special Duties, and Probationers	10,4	7,8	8,1
1,3	Special Services	1,7	6	8
204,3		204,5	203,1	204,4

301. The variations under this head are small and do not require any explanation.

Regimental Pay.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
4,260,6	European Army	4,079,5	3,994,9	3,956,0
4,308,9	Native Army	4,325,2	4,279,4	4,310,4
29,2	Special Services	27,7	13,3	11,8
8,598,7	TOTAL	8,432,4	8,287,6	8,278,2

302 The saving under this head of 154,2, as compared with the Budget Estimate, was due chiefly to a decrease of 40,9 under Exchange Compensation Allowance, of 85,8 under pay due to the short strength of British troops in India, of 14,6 under salaries due chiefly to the absence of officers on leave, and to deputations to the Civil Department for employment on plague duty. The saving of 320,5, as

Section L.—ARMY SERVICES—EXPENDITURE—*continued*.

Regimental Pay—*continued*.

compared with the actuals of the previous year, was due chiefly to the adoption of more favourable rates of exchange for payment of British troops, to less Exchange Compensation Allowance, to the British Infantry having been below the authorized strength by two battalions for a part of the year, and to other British troops having been less in excess of the authorized strength than in the previous year.

303. The details of the principal sub-heads of the European Army are given below :—

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
1,074,5	Artillery	1,019,2	1,012,8	1,006,0
441,1	Cavalry	408,2	409,0	405,0
5,5	Engineers	5,9	4,9	3,9
2,640,7	Infantry	2,548,0	2,474,4	2,442,7
4,2	Invalid and Veteran Establishment	3,8	3,5	3,5
49,8	Staff Corps, General List Officers, Unattached and Unemployed Officers	48,2	41,2	45,1
7,2	Colonel's Allowances	9,6	4,3	5,4
37,6	Other Charges	36,6	44,8	44,4
4,260,6	TOTAL	4,079,5	3,994,9	3,956,0

304. Under *Artillery* the saving, as compared with the Budget Estimate, was due chiefly to an insufficient deduction having been made on account of officers absent in Europe (3,7), to less Exchange Compensation Allowance (4,6), to the replacement of Civilian Ordnance artificers by sergeant armament artificers on lower rates of pay, and to vacancies in the permanent establishment of lascars and followers, etc., (6,9), and to less charges for horse allowance (4,9), partly counterbalanced by increased charges for good conduct pay (3,6), and deferred pay (3,5). Under *Cavalry* the saving due to absence of officers in Europe (2,1), and to Exchange Compensation Allowance (1,5) was more than counterbalanced by an excess of 6,5 in the pay of warrant and non-commissioned officers, rank and file, and native artificers and followers due to excessive deduction for probable savings; but the charge for horse allowance was less by 6,8. Under *Infantry* there was a saving of 13,8 in the pay of officers, and of 72,0 in that of warrant and non-commissioned officers, rank and file, due chiefly to short strength of the British Infantry by two battalions for a part of the year, and of 10,9 in Exchange Compensation Allowance. Under *Staff Corps*, etc., the largest saving was under General Officers unemployed, due to retirements. Under *Colonel's Allowances* the saving was due chiefly to fewer recipients Under *Other charges* the excess was mainly the result of money grants to troops on the occasion of the Diamond Jubilee. The decrease, as compared with the previous year, has been explained above.

305. The details of the principal sub-heads under the Native Army are as follows :—

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
56,6	Artillery	57,0	56,3	57,4
13,7	Body-Guard	15,0	15,0	14,8
1,284,9	Cavalry	1,287,8	1,280,3	1,276,4
139,0	Sappers and Miners	134,7	138,2	136,0
2,587,6	Infantry	2,594,6	2,563,0	2,596,9
53,0	Annual grant-in-aid of half-mounting	49,7	52,8	57,0
28,0	Kit-money for Recruits	34,6	29,0	26,2
32,5	Hutting-money	28,7	29,0	27,5
69,9	Reserve Forces	77,2	70,0	72,3
43,7	Other Charges	45,9	45,8	45,9
4,308,9		4,325,2	4,279,4	4,310,4

306. The variations were not large under any of the sub-heads, and it is only necessary to specify a few of them. Under *Cavalry* there was a saving of 11,4 as compared with the Budget Estimate, 8,8 of which was due to the absence of officers on furlough in England, recovery of home advances, and the deputation of officers on plague duty at the cost of the Civil Department, and 0,5 to less Exchange Compensation Allowance. These savings were partly counterbalanced by an increase of (3,8) in the pay of native commissioned and non-commissioned officers, due to an advance payment of salary to certain corps, and to an over-estimate of probable savings in the Budget. Under *Annual Grant-in-aid of Half Mounting* the Budget provision was insufficient. The saving under *Kit money for Recruits* was due to the enlistment of fewer recruits than anticipated.

307. The decrease under *Special Services* is due to the causes already explained.

Section L.—ARMY SERVICES—EXPENDITURE—*continued*.

Commissariat Charges.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
505,2	Establishment	528,4	501,8	513,1
1,742,2	Supplies	1,779,0	1,753,0	1,870,8
863,1	Services	938,9	895,4	905,3
338,4	Transport Branch	369,9	346,3	321,9
247,1	Special Services	236,8	131,5	136,5
204,6	Mobilization	...	...	...
3,900,6	TOTAL	3,853,0	3,628,0	3,747,6

308. The saving under this head (105,4) was the result chiefly of an excess under *Supplies* and savings under all the other heads. The excess was due to large payments of compensation to Native troops for dearness of provisions and forage owing to high prices in consequence of famine, partly counterbalanced by small local purchases of malt liquor due to the absence of a large number of troops on field service. The saving under *Services* occurred chiefly in Railway, and Sea and Inland water charges, owing to fewer movements of troops and smaller consignments of stores due to the large number of troops on field service. Under *Transport* there were smaller purchases of animals, and under *Special Services* the decrease was due chiefly to the expenditure on the "Occupation of Chitral and its Communications" for a part of the year having been charged under Military Operations in the North-West Frontier.

309. The decrease, as compared with the previous year, was due to absence of mobilization expenditure. Rejecting this item there was an excess of 51,6, chiefly due to higher prices for food supplies and forage, counterbalanced by the decrease under *Special Services* due to the reasons stated above.

310. The details of the expenditure under *Establishment* are given below :—

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
52,0	Supervising Staff	51,6	49,1	47,8
236,9	Executive Establishment	242,1	230,9	234,1
43,2	Ambulance Transport	46,0	43,4	42,1
161,5	Subordinate Establishment	177,8	166,8	173,5
9,9	Khedda Establishment	7,7	8,4	11,1
1,7	Other Heads	3,2	3,2	4,5
505,2		528,4	501,8	513,1

311. Under *Supervising Staff* the saving was due chiefly to absence of officers on furlough and to savings in Office Establishments, etc., (2,0), to less Exchange Compensation Allowance (5), and less travelling and out-station allowances (1,4). Under *Executive Establishment* the saving was due chiefly to insufficient deduction having been made in the Budget for probable savings (2,5), to less Exchange Compensation Allowance (1,8), and to smaller charges for contingencies and advertisements (1,1). Under *Ambulance Transport* the reduction was due to short strength of bearers. Under *Subordinate Establishment* the saving was due principally to less expenditure for water gear and establishments and for supply of water, owing chiefly to the absence of a number of troops on field service. Under *Khedda Establishment* the increase was due to the entertainment of a larger temporary establishment for hunting operations than was provided for, and to hire of elephants, boats, and carts to a larger extent than anticipated.

312. Under *Supplies* the details are as follows :—

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
701,2	Provisions for Europeans	765,4	730,0	748,5
155,6	Provisions for Natives	188,0	173,5	178,9
	Compensation to Natives—			
405,6	(*a*) for dearness of provisions	371,7	306,0	481,1
107,8	(*b*) for dearness of forage	80,0	138,0	151,5
16,1	Purchase of Reserve Stock	19,5	17,2	13,7
353,3	Malt Liquor purchased locally	350,1	293,6	293,3
7,4	Rum	5,7	5,5	3,1
2,8	Dairy Farms	3,4	3,5	3,8
...	Contingent Expenses	2	2	...
—7,6	*Deduct*—Value of Supplies to other Departments	—5,0	—4,5	—3,1
1,742,2		1,779,0	1,753,0	1,870,8

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Commissariat Charges—*continued.*

313. There was an increase of 91,8 in the aggregate, made up chiefly of increased payments of compensation to Native troops, counterbalanced by savings under Malt Liquor. The excess under *Compensation*, etc., was due to the prevalence of high prices of both food supplies and forage on account of the famine. The saving under *Malt Liquor* was due to the absence of a large number of British troops on field service, where malt liquor was not issued, and to a more favourable contract for supplies. The savings under *Provision for Europeans* and *Provision for Natives*, due to short strength of troops and favourable rates of food supplies, were reduced to a certain extent by larger purchases for stock purposes. The excess over the previous year (128,6) occurred chiefly under *Provisions for Europeans* (47,3) and *for Natives* (23,3), and under *Compensation to Natives, etc*, (119,2), due chiefly to high prices due to famine, counterbalanced chiefly by a decrease under *Malt Liquor* (60,0), due to the reasons explained above.

314. Under *Services*, excluding Special Services, the following details are supplied:—

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
33,4	Hire of Transport	39,0	32,0	41,4
18,7	Sea and Inland Water Charges	23,7	22,6	19,3
347,2	Railway Charges	409,4	349,8	357,4
57,0	Grass Cultivation	86,2	83,7	78,6
312,8	Feed of Horses, Battery Mules, Yaboos, Bullocks and Elephants	267,2	311,5	319,7
9,1	Regimental Equipment and Camp Contingencies	12,0	8,4	7,4
24,9	Implements, Godown Furniture, etc.	27,4	27,1	31,8
60,0	Other Heads	74,0	60,3	49,7
863,1		938,9	895,4	905,3

315. Under the first head the small excess of 2,4 was due to more movements of European troops by route march and to less utilization of Government transport, partly counterbalanced by less charges for the conveyance of stores due to smaller consignments of Commissariat and Miscellaneous stores. Under the next two heads the saving was due to fewer movements of European and Native troops and to the conveyance of smaller consignments of stores, especially Commissariat and Ordnance stores. Under *Grass Cultivation* the saving was chiefly under Establishments. Under feed of *Horses, Battery Mules, etc.*, the excess, both over the Budget (52,5) and the actuals of the previous year, was due to higher prices owing to scarcity and to field operations on the North-West Frontier. The saving under *Regimental Equipment* (4,6), due to the absence of several regiments on field service, was nearly covered by the excess under the next head (4,4) caused by larger purchases of dead stock articles and more contingent charges incurred in Commissariat Godowns. Under *Other Heads* the saving occurred chiefly under Cattle Farm (Hissar) (18,4), and was due chiefly to issues of food supplies to cattle having been made from reserve stock and to a number of cattle having been sent to other districts to graze owing to scarcity of fodder at Hissar. There was also a saving of 1,3 in the charges for feed of elephants under Khedda charges (Dacca), due to casualties among Khedda elephants, and of 1,2 on account of smaller purchases of battery bullocks and savings in the purchase and repair of gear. The excess, as compared with the actuals of the previous year under the first three heads, was due chiefly to larger movements of troops and stores, and that under *Grass Cultivation* to a change in classification in the Madras and Bombay Commands.

316. The details of the charges in the *Transport Branch* are as follows:—

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
333,6	Depôt and Regimental	363,0	339,1	315,8
4,8	Ambulance Transport	6,9	7,2	6,1
338,4	TOTAL	369,9	346,3	321,9

317. Under *Depôt and Regimental* the large saving was chiefly due to fewer purchases of animals, to the cost of replacement of animals killed and articles issued on field service having been charged to the service concerned, and to smaller charges for food.

318. Under *Special Services* the saving was due mainly to the causes already explained (86,4), and to the reduction of the Gilgit Garrison (15,9), partly counterbalanced by higher charges on account of "Wano Garrison," "Tochi Garrison," and "Kajuri Kach and Jandola Garrisons," due to high prices of food supplies.

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Remount and Veterinary.

319. The details are given below :—

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
3,5	Supervising Staff	3,4	3,3	3,3
27,9	Depôt Establishments	35,2	34,6	33,5
9,3	Veterinary Inspection	8,8	8,5	9,0
34,0	Station Veterinary Hospitals	35,3	33,7	31,8
5	Veterinary Schools	4	5	4
2,4	Remount Depôt, Garden Reach	2,7	2,1	2,3
121,7	Purchase of Remounts	140,0	117,3	118,7
50,4	Feed of Cattle and Remounts	93,0	63,3	65,1
37,8	Miscellaneous	48,0	43,9	39,2
287,5	Total excluding mobilization	366,8	307,2	303,3
77,4	Mobilization	...	...	...
364,9	Total including mobilization	366,8	307,2	303,3

320. The total saving (63,5) under this head as compared with the Budget was mainly caused by the purchase of fewer remounts and young stock and at lower rates (13,7) by purchase of Australian animals at more favourable rates of exchange (7,7) and by less feed charges and cultivation expenses (34,5).

Clothing Establishments.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
11,3	Superintending Establishments	11,5	10,9	10,4
6,2	Manufacturing and Store Establishments	6,4	6,2	6,1
	Supplies and Services—			
199,4	Factories	152,8	143,3	143,9
43,0	Regimental	41,2	42,0	33,2
43,6	Compensation in lieu of clothing	47,8	48,8	51,4
1,7	Special Services	6	8	8
305,2		260,3	252,0	245,8

321. The saving under this grant (14,5) was spread over most of the sub-heads, but occurred mainly under *Factories* (8,9), due to fewer garments having been made up and smaller charges for local purchases; and under *Regimental* (8,0) owing to a reduction in the rates of making clothing, and to claims held over on account of absence of troops on field service. The provision under *Compensation in lieu of clothing* was partly an under-estimate. The larger expenditure of the previous year was mainly under the first two heads named above, and was due to the introduction of the new clothing scheme which resulted in large purchases locally and in the making up of a larger number of garments.

Barrack Establishments.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
4,3	Executive Establishments	4,5	4,2	4,1
58,0	Subordinate Establishments	55,1	54,0	53,0
13,6	Station Conservancy	15,6	15,7	15,3
11,1	Barrack Furniture	9,9	10,9	13,1
42,5	Barrack Bedding	52,0	48,6	50,3
41,6	Lighting Charges	36,5	35,3	35,5
62,2	Miscellaneous	58,5	56,4	59,7
1,3	Special Services	2,6	7	2,1
234,6		234,7	225,8	233,1

322. The variations from the Budget are generally unimportant, the only items worth mentioning being the saving under *Subordinate Establishments* (2,1) and under *Barrack Bedding* (1,7) against an excess of 3,2 under *Barrack Furniture.* Under the first, it was due to the absence of troops on field service, which caused a saving of 1,1 in the punkha-pulling establishment, and to the extra conservancy establishment not having been entertained to the estimated extent. Under the second, the saving was also partly due to the absence of troops on field service (3,4), and partly to fewer new issues of bedding under the four

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Barrack Establishment—*continued.*

years' rule (3,0), counterbalanced to the extent of 4,5 by the outlay in the Bengal Command to replace condemned bedding. The excess under *Barrack Furniture* was due to increased charges for washing and repair of punkha fringes and to the supply of a larger number of bamboo blinds necessitated by fair wear and tear.

Administration of Martial Law.

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	Judge Advocate-General's Department—			
5,7	Head-Quarters	6,0	5,8	5,7
15,4	Commands	15,7	15,3	14,7
21,1	Miscellaneous	20,9	21,0	20,4
42,2		42,6	42,1	40,8

323. There is a trifling saving under this grant head, due chiefly to the absence of officers on furlough and smaller contingent charges.

Medical Establishments.

324. The charges are classified under the following heads:—

1896-97. Accounts.			1897-98. Budget.		1897-98. Revised.		1897-98. Accounts.	
		Medical Establishment—						
28,1		Head-Quarters and Commands		28,2		27,1		26,9
436,8		Districts . .		446,7		425,0		449,3
11,3		Nursing Service . .		12,9		11,9		12,0
28,6		Army Hospital Corps . .		28,3		28,3		27,7
18,8		Medical Store Depôts . .		19,8		19,0		18,6
1,0		Followers' Hospitals . .		1,3		1,0		9
7,9		Miscellaneous . . .		10,2		8,3		7,1
	225,8	Medical Supplies . .	221,0		220,0		234,7	
		Deduct—						
	28,1	Issues to other Departments	*22,0*		*26,6*		*28,6*	
197,7				199,0		193,4		206,1
730,2		Total excluding Special Services		746,4		714,0		748,6
		Special Services—						
20,5		Mobilization . . .		...		...		...
4,4		Other		3,1		2,0		2,0
755,1		GRAND TOTAL .		749,5		716,0		750,6

325. There were savings in all the minor heads with the exception of two, the excesses under which caused a net increase of 1,1 over the Budget. The savings were in almost all cases unimportant, and were due chiefly to variations in salaries and contingencies. The only saving which calls for special notice is that of 3,1 under *Miscellaneous*, which was due principally to fewer Military pupils having been under tuition in Medical Colleges and Schools (1,7), to the closing of certain Cantonment hospitals in the Madras Command (6), and to smaller purchases of books and periodicals (4). The excesses occurred under *Medical Establishment, Districts* and *Medical Supplies.* Under the first the increase (2,6) was the result of an over-deduction in the Budget for probable savings in salary, and of higher charges for temporary establishment and travelling than estimated, partly counterbalanced by savings due to the deputation of officers to the Civil Department for Plague duty and in Exchange Compensation Allowance. The excess under *Medical Supplies* was due to increased expenditure on medical comforts and diet in consequence of increased sickness of troops, and higher rates of articles of diet owing to scarcity. About half of this excess was covered by the increased credit (taken in the accounts by deduction from the charge) under *Issues to other Departments*, owing to larger supplies to Civil hospitals and dispensaries, to famine and plague hospitals, and to troops sent out to Mombassa. The excess under this head (1,1) requires to be sanctioned.

326. The decrease, as compared with the previous year was due chiefly to the absence of mobilization charges in 1897-98. Disregarding this item there was an excess, which occurred mainly under *Medical Establishment, Districts* (12,5), due to the presence of a larger number of officers on duty and to the higher rate of pay granted, with effect from 1st April 1897; and under *Medical Supplies* due to increased sickness of troops and higher price of articles of diet.

Section L.—ARMY SERVICES EXPENDITURE—*continued.*

Ordnance.

327. The charges are sub-divided below, the mobilization charges in 1896-97 being shown separately:—

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	ESTABLISHMENTS—			
39,4	Supervising Staff	41,1	40,7	41,1
197,8	Arsenals and Depôts	201,5	198,0	199,2
208,8	Factories	226,1	225,1	222,4
11,9	Fort Armaments	11,6	10,8	10,9
	STORES—			
164,6	For Arsenals and Depôts	147,1	147,4	161,9
196,8	For Factories	172,6	165,9	163,1
13,8	Freight	11,8	10,6	12,2
47,6	Camp Equipage	57,0	55,5	53,9
13,3	Line Gear	13,9	13,1	12,8
35,1	Other Charges	35,6	35,6	34,1
	Deduct—			
40,9	Supplies to other Departments	*35,5*	*41,1*	*59,7*
888,2	Total excluding Special Services	882,8	861,6	851,9
	Special Services—			
33,0	Mobilization	...	...	...
2	Other	1	1	1
921,4		882,9	861,7	852,0

328. The most important excess is that of 14,8 under *Stores for Arsenals and Depôts,* due chiefly to the purchase of stores for Colonial and other Governments. This was, however, more than met by larger recoveries (24,2) under *Supplies to other Departments,* resulting chiefly from the issue of a large quantity of old shot and shell to the Eastern Bengal State Railway (5,0), issue of stores to the Native troops sent to East Africa (6 6), and despatch of stores to Cairo, Malta, etc., (9,7). Under *Stores for Factories,* the provision for local supplies to the Foundry and Shell Factory, Gun Carriage Factories, and to the Kirkee Small Arms Ammunition Factory was over-estimated. The saving under *Factories* was in Salaries and Exchange Compensation Allowance. Under *Camp Equipage* the charges for purchase and repair were less than estimated. As compared with the actuals of 1896-97, almost half the decrease was due to the special expenditure in that year for mobilization. There was a large decrease under *Stores for Factories,* due to smaller purchases owing to the stoppage of ordinary work in consequence of factories being fully occupied for some time in meeting the requirements of the forces on the North-West Frontier. There were larger recoveries in the year under report from other departments, but the decrease due to this cause was more than covered by an increase under *Establishments—Factories,* due to the employment of more extra temporary artificers owing to larger outturn.

Other Effective Charges.

329. Under *Sea Transport charges* the increase was mainly due to the grant of passages to the British and Native Officers who proceeded to England to form part of the Guard-of-Honour to Her Majesty the Queen on the occasion of the Diamond Jubilee " (2,6)," to more charges for passages from port to port in India (7,9), and to the employment of the R. I. M. S. *Clive* for conveyance to England of the surplus troops of 1896-97 (1,7), partly counterbalanced by a saving in the charges for articles of sea kit supplied to troops on their voyage to England (2,4). The decrease under *Volunteer Corps* was due chiefly to insufficient deduction made in the Budget for probable savings in salaries, and to certain appointments having been held by Civilians (7,4). Savings under Contingencies and Exchange Compensation Allowance (1,8) were more than covered by an excess under travelling (2,1), due to more frequent inspections.

330. The excess of 9,3 under *Sea Transport Charges* requires sanction. A report that the grant was likely to be exceeded was made to Government.

The figures under *Miscellaneous Services* may be sub-divided as follows:—

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
62,2	Special charges	43,4	36,0	32,2
78,9	Other Items	94,4	81,7	76,3
141,1		137,8	117,7	108,5

Section L.—ARMY SERVICES EXPENDITURE—*concluded.*

Other Effective Charges—*continued.*

331. Under *Special charges* the expenditure for a part of the year on account of the Occupation of Chitral and its communications was compiled under Malakand Field Force. There was also a saving under Chitral Relief Force, owing to smaller arrear charges (3,7), and an excess under Kengtung Garrison (7,4), due to *atta* instead of rice having been supplied for the use of Native troops. Under *Other Items* the saving was due chiefly to an over-estimate for contingencies (6,1), to the non-utilization of the grant for camps-of-exercise (8,1), owing to the withdrawal of troops for operations on the North-West Frontier, and to less extra staff and command allowances (2,2).

Military Operations on the North-West Frontier.

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
	Military Operations on North-West Frontier—			
...	Malakand Field Force and North-West Frontier Disturbances	...	3,452,0	3,468,1
...	Tochi Field Force	...	400,0	369,1
...	Mekran	...	12,0	10,8
...		...	3,864,0	3,848,0

332. As stated in paragraph 290, 3,701,8 of this excess has been sanctioned, and the balance 146,2 still requires to be sanctioned.

Non-effective Charges.

333. Under *Rewards for Military Services* the increase (1,8) was wholly in the Native Army, and was due chiefly to the grant of concessions to troops in commemoration of the Diamond Jubilee, and to new awards of the Order of Merit for service on the North-West Frontier. Under *Military Pensions to Europeans* the decrease (13,3) was due chiefly to less capitalised payments (9,8) to British officers than anticipated. Under *Military Pensions to Natives* there were increased payments of compensation for dearness of provision to Madras pensioners owing to scarcity (12,5). Under *Widows' Pensions and Compassionate Allowances* the increase was due mainly to the operations in the North-West Frontier, partly counterbalanced by savings under widows' pensions caused by casualties. The excesses under *Rewards for Military Services* (1,8), *Military Pensions to Natives* (14,1), and *Widows' Pensions and Compassionate Allowances* (9), and under *Superannuation Pensions and Gratuities* (3), require to be sanctioned.

Expenditure in England.

334. The saving in the Home effective charges (92,2) occurred mainly under *Stores for India* (42,1) There was under this head a decrease of 72,8 in Ordnance Stores and an increase of 25,1 for stores in connection with the Malakand and Tochi Field Force. The saving (22,8) under *Indian Troop Service* was mainly owing to the engagement of smaller transports. There was also a large decrease under *Furlough Allowances* (34,2). The fluctuations in non-effective charges were unimportant.

Section LL.—SPECIAL DEFENCE WORKS—EXPENDITURE.

47.—Special Defence Works.

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
94,6	EXPENDITURE	19,4	35,4	23,7

335. The distribution of expenditure is noted below :—

1896-97. Accounts.		Budget.	1897-98. Revised.	Accounts.
21,7	India	...	2,0	—4,0
43,9	England	11,7	21,4	17,7
29,0	Exchange	7,7	12,0	10,0
94,6	TOTAL .	19,4	35,4	23,7

336. This major head was kept open during 1897-98 for the record of expenditure in connection with armaments only; the accounts of works and suspense transactions pertaining thereto were closed on the 31st March 1897; this circumstance, coupled with the fact that the Secretary of State's payments for armaments are approaching completion, accounts for the large decrease in expenditure during 1897-98. The excess was sanctioned by the Government of India.

337. The Secretary of State continued to debit under the head "Special Defences" payments in England on account of works the accounts of which had been transferred to "44.—Military Works," with effect from the 1st April 1897; these payments were, therefore, adjusted by credit to expenditure in England under "Special Defences" and debit to "Military Works" through the Indian accounts. A sum of about 4,3 was so adjusted, which accounts for the greater portion of the lapse of 6,0 from the Revised Estimate of expenditure in India. The balance of the lapse was mainly due to over-estimates of the expenditure likely to be incurred in Ordnance Factories in connection with the equipment of the North-West Frontier Defences, and of charges for freight payable in India. The Budget Estimate did not provide for any such charges. The increase in the expenditure in England, as compared with the Budget Estimate, was due to the Secretary of State having paid some arrear claims.

338. The figures shown under this head represent the surplus or deficit of each Provincial Government in respect of the revenues and charges assigned to it, including Incorporated Local Funds. The differences between the Estimates and Accounts under the various Revenue and Expenditure heads have been explained in detail in the foregoing pages, and the share of these pertaining to the Provincial and Local sections of the accounts for the several groups is given below separately for each province. The Budget provided for an expenditure from Provincial balances of 71 lakhs and from Local balances of ·48 lakhs; but the accounts show the net Provincial expenditures less by 24 lakhs and the net Local revenue more by 49 lakhs. The actual decrease in the Provincial balance in the course of the year therefore amounted to 47 lakhs, and the Local revenue was increased by 1 lakh, consequently the Provincial and Local balances being taken together, the actual decrease was 46

lakhs. These figures do not, however, give a true idea of the actual transactions of the year, for, in order to produce even this result, Imperial Revenues had to bear about eight-ninths of the charge for direct Famine Relief (5,325,6) for which Provincial and Local Revenues are in the first instance responsible, and had also to make special grants amounting to 183,7, to the Central Provinces (81,0) and to the North-Western Provinces (102, 7). The Imperial Government also made a special assignment of 80,0 to Assam for expenditure due to the Earthquake, and a special contribution of 121,8 to Bombay in aid of Plague expenditure. It will be seen that even with these grants the Central Provinces and the North-Western Provinces closed the year without any Provincial balances, and that the other Local Governments, except Burma, with the consent of the Imperial Government, were compelled to close their Provincial account with balances much below the prescribed minima.

339. As compared with the Budget Estimate, the improvement was contributed to by all the Provinces except Central Provinces and Assam. In the Central Provinces the Provincial account of the year was closed without any balance, as was explained above. In the Local Section there was a falling off under all the Receipt heads, counterbalanced by savings in expenditure chiefly under Civil Departments and Buildings and Roads. In Assam the special assignment of 8 lakhs mentioned above mainly explains the increase in Revenue. The increase in expenditure occurred chiefly under Buildings and Roads (94,1), and was due to charges in connection with the Earthquake; this excess was partly counterbalanced by savings under direct demands on the Revenue (11,6) and under Civil Departments (12,0). In Burma, where the largest increase appears, the improvement occurred under all the heads, both in the Receipts and the Expenditure. In Bengal the increase of 108,5 in the Provincial Revenue under all the heads was counterbalanced by increased expenditure of 101,1, chiefly under Civil Departments (93,1) and Famine Relief (52,1). In the Local Section the improvement occurred under almost all the heads. In Punjab and Madras the improvement occurred chiefly under Principal heads of Revenue, and Buildings and Roads. These improvements were partly counterbalanced by Famine Relief charges, which were subsequently transferred to Provincial. In Bombay the improvement occurred in the Local Section partly counterbalanced by increased expenditure in the Provincial section due to the Plague.

340. As compared with the actuals of the previous year, the improvement was mainly due to increased collections of Revenue owing to the better agricultural prospects in the latter part of the year.

4,984,4	EXPENDITURE	6,588,6	4,604,6	4,328,5

341. The following table compares the whole of the Capital Expenditure with the Estimates of the year and the actuals of the previous year:—

1896-97. Accounts.		1897-98. Budget.	Revised.	Accounts.
46,9	35.—Construction of Protective Irrigation Works	25,0	22,4	37,5
4,244,0	48.—State Railways	5,838,6	3,903,4	3,632,0
740,4	49.—Irrigation Works	750,0	692,8	692,4
...	50.—Miscellaneous Public Improvements .	...	8,4	4,1
5,031,3		6,613,6	4,627,0	4,366,0

342. Owing to the disturbance of working arrangements caused by the restriction of expenditure on the construction of railways rendered necessary by the depletion of cash balances, and owing to strikes in England having materially affected the expenditure on stores in that country, as well as to the fact that the Assam-Bengal Railway Company raised debentures not contemplated when the Budget Estimate was framed, the provision was reduced in the Revised Estimate, but it was not found possible to work up even to the reduced figure of the Revised Estimate for State Railways on which there was a lapse of 271,4, part of which (175,7) was caused by the credit under Burma Railways for the value of stores balances transferred to the Company.

48.—State Railways—*continued.*

1896-97. Accounts.		1897-98. Budget.	1897-98. Revised.	1897-98. Accounts.
	DISTRIBUTED AS BELOW:—			
2,339,3	India	4,049,1	2,612,2	2,367,4
1,146,8	England	1,078,0	827,7	809,0
757,9	Exchange	711,5	463,5	455,6
4,244,0	TOTAL	5,838,6	3,903,4	3,632,0

343. On account of heavy expenditure on actual Famine Relief the whole of the Capital Expenditure for construction of State Railways was charged under 48—State Railways, and no portion was transferred to Famine Insurance Grant.

344. As regards *Lines under Construction*, the lapse on the Assam-Bengal Railway, Part I, was due to the estimates by land acquisition officers having been in excess of actual requirements. The expenditure on the Assam-Bengal Railway, Part II, in excess of the Company's paid-up capital during 1897-98 was less than anticipated for the reasons explained in paragraph 342. The excess on the Rae Bareli-Benares Railway was due to additional works having been found necessary. The lapse on the Kotri-Rohri Railway and Indus bridge and the East Coast Railway was due to English stores and girders not having arrived in time owing to the engineers' strike in England. The lapse on the Mari-Attock Railway and the Bezwada-Madras Railway was due to the restriction of expenditure ordered by the Government of India during the middle of the year, and on the latter partly to the failure of contractors to supply sleepers, thus retarding construction considerably. The excess on the Lyallpur-Khanewal Railway was due to work having been pushed on vigorously. The lapse on the Hajipur-Katihar Extensions was due to the general restriction of expenditure, to the question of the alignment from Kosi to Katihar not having been settled, and to bridge and permanent-way materials not having been issued to works to the extent anticipated. During the year a small sum was sanctioned to admit of brick burning on the Shadipalli-Balotra Railway, and a sum of 3,0 was spent on the Agra-Delhi Chord, but the construction of no other new Railway projects was commenced during the course of the year.

345. As regards *Open Lines*, the amount spent by the East Indian Railway in excess of the sum raised by the issue of debentures, was 308,7. There was a lapse on the Rajputana-Malwa Railway due to short expenditure on the proposed new works at Cawnpore, and to the transfer of outlay on works at Ujjain to the Nagda-Ujjain and Ujjain-Bhopal Railways, and to the sale of Locomotive and Carriage and Wagon stock to the Mombassa-Uganda and Hyderabad-Godavery Valley Railways. The credit under Burma Railways represents the value of stores transferred to the Company on its formation in September 1896. The excess on the Eastern Bengal Railway was due to increased work in connection with doubling the line between Ranaghat and Poradaha, to works at Pachooria, Lalgola, Chitpur and Naihati, and to an increase in the English cost of additional rolling-stock. The lapse on the Tirhoot Railway was due to the cost of certain works being over-estimated, to the Barowni junction not having been taken in hand, and to the materials for the erection of Engines not having been received from England. The lapse on the Oudh and Rohilkhand Railway and on the North-Western Railway was due to the general restriction of expenditure, and on the latter to the transfer of sleepers and permanent-way material to the Lyallpur-Khanewal Railway. The lapse on the South Indian Railway was due to the postponement of several large works and to the non-arrival of English stores from England. On *Other Railways* the principal lapses occurred on the Dhond and Manmad and Wardha Coal Railways and the Warora Colliery. The lapse on the Dhond and Manmad Railway was due to the additions to bridges from Ahmednagar to Kopargaon not having been put in hand, and to outlay on fencing having been deferred pending completion of connection with the Hyderabad-Godavery Railway at Manmad. The lapse on the Wardha Coal Railway was due to the provision for strengthening bridges and for the construction of staff quarters not having been utilized for want of sanction to the works. The lapse on the Warora Colliery was due to the transfer of a drilling machine and a hauling engine to the Umaria Colliery.

346. The grant made available for expenditure in 1897-98 was not worked up to, owing partly to restriction of expenditure on the Mandalay Canal in Burma, partly to a transfer of 10,3 from expenditure previously recorded under this head to "43.—Minor Works and Navigation," on account of suspense balances of the Dehri workshops in Bengal, and partly to the grants assigned for the works in the North-Western Provinces and Oudh and Madras not being fully utilized.

347. The actuals represent expenditure incurred on the construction of a jetty and a shed at Chittagong. The work is being carried out by the Assam-Bengal Railway Company, and the expenditure so incurred is transferred to the Public Works Department, Bengal, for final adjustment. The work is estimated to cost 48,9 and the expenditure was covered by a sanction accorded in Public Works Department letter No. 234-A. G., dated 8th November 1898.

Section P.—UNFUNDED DEBT.

	1897-98. Budget.	Revised.	Accounts.
Special Loans	...	...	—12,1
Treasury Notes and Service Funds, India	+48,4	+29,6	+28,9
Savings Bank Deposits	+454,0	—393,3	—325,0
TOTAL	+502,4	—363,7	—308,2

349. Under *Special Loans* the debit of 12,1 represents the commutation value of Wasika pensions lapsed to Government. The large falling off of 19,5 under *Treasury Notes and Service Funds* was partly due to the debit of 10,0 for the purchase of a building for the Uncovenanted Service Family Pension Fund office, and partly to an over-estimate. The details of *Savings Bank Deposits* transactions are as follow :—

	Budget.	Revised.	Accounts.
Post Office Savings Banks	+305,0	—427,2	—352,0
State Railway Provident Institutions	+69,0	+10,5	+12,4
Civil Engineers' Provident Fund	+30,0	+29,5	+23,1
Regimental Savings Banks	+18,0	—21,5	—22,8
Special accounts	+26,0	+7,2	+5,1
Forest Officers' Provident Fund	+6,0	+8,2	+9,2
TOTAL	+454,0	—393,3	—325,0

350. The heavy net withdrawal of 352,0 under *Post Office Savings Banks* was due to short receipts and increased withdrawals, chiefly on account of high prices of food due to famine. The decrease under the *State Railway Provident Institution* was chiefly due to large withdrawal for investment in Government Securities of the deposit of the Burma State Railway Provident Institution on its transfer to a private company. The variations under Regimental Savings Bank depend to a great extent on the transfers of British Regiments between India and England, and therefore an accurate estimate cannot be made. The difference under *Special Accounts* was chiefly due to purchase of Government Securities on account of General Family Pension and the Hindu Family Annuity Funds. Bombay and Madras made no provision in their Estimates for deposits in *Forest Officers' Provident Fund.*

TOTAL			+1,497,5			+3,386,7			+2,944,6

351. The net credit to *Provincial Balances* has been explained in paragraph 338. Under *Excluded Local Funds* the net debit was contributed chiefly by Punjab, due to the high charges of the Famine Fund, and by Bombay, where heavy expenditure was entailed on the Cantonment Funds, especially at Poona and Kirkee, owing to the plague. The net debit against *Railway Funds* was due to an over-estimate of receipts. The character and magnitude of the transactions recorded under *Departmental and Judicial Deposits* render an accurate forecast impossible. The net credit was contributed chiefly by India in Military and Railway Deposits, by the North-Western Provinces in Personal and Civil Courts Deposits, and by Punjab in Revenue and Personal deposits. There were large payments in Bengal under Revenue, Civil Courts and Personal Deposits, and in Bombay under Personal Deposits due to famine, and under Municipal Deposits in connection with expenditure on account of the plague. The other fluctuations are not sufficiently important to require special explanation.

352. The net figures entered against the head *Advances* may be divided as follows :—

	Budget.	Revised.	Accounts.
Coinage Accounts	...	—160,0	—598,7
Other Advances	+123,9	—255,9	—250,1
	+123,9	—415,9	—848,8

353. Under *Coinage Account* the difference between the actuals and the Budget was due chiefly to a net debit of 433,1 under Bullion Advances by reason of increase in the balance of Bullion at the Mints on account both of Government silver and of the silver tendered for re-coinage by the Bhopal and Kashmir States. There was also a net credit of 11,8 on account of Mint certificates issued for silver tendered for the coinage of British dollars at the Bombay Mint. The Budget anticipated a reduction in the small coin depôt balances of 36,3, but the actuals show an increase of 166,4 owing to the return into Government Treasuries of copper coin issued during the preceding year on account of famine. There was a net debit of 11,0 under Copper Coinage Account due to a debit of 46,1, being the amount by which the stock of coin and copper at the Mints and small coin depôts at the close of the year was increased, counterbalanced by a credit of 35,1 owing to the consequent increase of the balance at credit of the Mint Profit Account.

354. The net debit under *Other Advances* is the final outcome of a number of transactions; the cause of the net debit of 250,1 is however brought out by the following figures :—

Special Advances	+17,5
Permanent Advances	+92,9
Other Advances	—155,7
Account with Foreign States	—204,8

355. The credit under Special Advances was due to the adjustment of the discount on the stock certificate issued to the Currency Department in 1896-97, and debited to this head temporarily as explained in last year's report, partly counterbalanced by a debit in the North-Western Provinces on account of advances to landholders for village famine relief works. The net credit under Permanent Advances was chiefly the result of the recovery of the special advances made to officers employed on Famine Relief Works. Under Accounts with Foreign States the large debit occurred mainly in India (103,1) and Punjab (93,5).

Section Q.—DEPOSITS AND ADVANCES—*continued.*

356. Under *Suspense Account* the variations are chiefly on account of fluctuations in the balances in the hands of departmental officers. The main differences were the decrease in the balances of the Buildings and Roads Branch of the Public Works Department (127,0), especially in the North-Western Provinces and Oudh, the Central Provinces and Bombay, and the increase in the balances in the hands of Civil Departmental Officers (45,0), chiefly Opium Agents in Bengal.

357. The gross credits and debits working up to the net figures under *Exchange on Remittance Accounts* are as follows :—

Budget, 1897-98. Sterling Amount.	Budget, 1897-98. Exchange. Cr.	Budget, 1897-98. Exchange. Dr.		Accounts, 1897-98. Sterling Amount.	Accounts, 1897-98. Exchange. Cr.	Accounts, 1897-98. Exchange. Dr.

...	3,395,7	797,6	NET .	...	4,665,2	...
	2,598,1					

358. The following is a statement of the adjustments in the accounts by which the above result was obtained:—

1897-98. Budget. Sterling.	1897-98. Budget. Exchange.		1897-98. Accounts. Sterling.	1897-98. Accounts. Exchange.
+13,000,0	8,580,0	Bills drawn by the Secretary of State . .	9,506,1	5,306,7
+177,1	116,9	Net remittances of Railway Capital to India .	166,6	93,8
—728,5	—480,8	Miscellaneous remittances	—1,137,1	—593,9
...	471,0	Withdrawals by Railway Companies against Rupee advances	...	...
		Deduct—		
—16,998,6	*11,219,1*	Net expenditure in England	*16,820,2*	*—9,471,8*
...	*66,1*	Lump alteration by the Financial Department .	...	...
	2,598,1	Difference, being exchange brought to account in excess of that involved in the Remittances from India during the year	...	4,665,2

359 The difference under *Miscellaneous* was chiefly due to exchange on the Rupee advances to the Bengal-Nagpur and Indian Midland Railway Extensions and the Rohilkund-Kumaon Railway.

Section R.—IMPERIAL LOANS AND ADVANCES.

	1897-98. Budget.		1897-98. Accounts.	
Imperial Loans and Advances . . .	107,6	—16,1	100,1	—55,1

360. The following are the details :—

1897-98. Budget. Amount advanced.	1897-98. Budget. Amount repaid.		1897-98. Accounts. Amount advanced.	1897-98. Accounts. Amount repaid.
2,3	27,7	Loans to Native States	26,5	22,9
7,8	58,1	„ Presidency Corporations and Port Trusts . .	7,9	58,1
...	1,8	„ Mofussil Municipalities	2,0	1,9
...	9,4	„ District and other Local Committees . .	11,5	9,9
...	6	„ Landholders and Notabilities	7	5
6,0	10,0	Advances to Cultivators	6,5	6,8
16,1	107,6	TOTAL AS ABOVE .	55,1	100,1

361. The payment under *Loans to Native States* represents loans to the Sultan of Muskat (6,0), Cooch Behar State for Railway (20 0) and Sikkim State (5), against 2,3 only on account of Loans to Cooch Behar State provided in the Budget. The amount repaid was 15,0 against a provision of 25,4 in the Budget on account of repayment of loans by the Maharaja of Cooch Behar, and the remainder 7,9 includes the actual amount repaid by the Sultan of Muskat (2,1), and by the Baoni State (3), for which provisions were made in the Budget. The Maharaja of Ajaigarh repaid the full amount of the loan 5,0 advanced to him in previous year, and the Sikkim State repaid the loan (5) mentioned above, which were not anticipated in the Budget. Under *Presidency Corporations and Port Trusts*, the Bombay Port Trust took the loan for the extension of the Victoria Dock provided in the Budget. The repayments correspond with the amount provided in the Budget. No provision was made in the Budget for the advance of 2,0 to the Ajmere Municipality, which was sanctioned in Financial Department No. 2369-A., dated 26th May 1897. The advance of 11,5 under loans to *District and other Local Committees* represents advances of 3,1 to Cantonment Committee, Secunderabad, granted in Financial Department No. 1887-A., dated 28th April 1897, and of 8,4 advanced in the Military Department not provided for under this head. The repayments almost correspond with the Budget Under *Loans to Landholders, etc.*, a sum of 7 was advanced to Arbab Badal Khan, Ahmed Khanzai, of Baluchistan, under Financial Department Resolution No. 5458-A., dated 18th December 1897. Under *Advances to Cultivators* the accounts include chiefly the advances and repayments, in India, and the variations, which are small, call for no remark.

SECTION RR.—PROVINCIAL LOANS AND ADVANCES.

	1897-98. Budget.	1897-98. Accounts.
Provincial Loans and Advances . .	411,7 —748,6	858,0 —1,411,6

362. The following are the details:—

1897-98. Budget. Amount advanced.	1897-98. Budget. Amount repaid.		1897-98. Accounts. Amount advanced.	1897-98. Accounts. Amount repaid.

...	5,9	" Port Funds	...	5,0
...	6,4	" District Committees	1	9,7
22,5	4,9	" Landholders, etc.	15,3	5,4
559,6	327,6	Advances to Cultivators	1,202,8	767,3
8,8	15,1	" under Special Laws	59,3	21,2
748,6	411,7	TOTAL AS ABOVE	1,411,6	858,0

363. Under *Loans to Mofussil Municipalities* the following are the details by Provinces of advances and repayments during the year:—

	Budget, 1897-98.		Accounts, 1897-98.		Excess (+) Deficiency (—)	
	Advanced.	Repaid.	Advanced.	Repaid.	Advanced.	Repaid.
Central Provinces	10,0	3,3	9,2	2,8	—8	—5
Burma	3,0	5,1	...	5,3	— 3,0	+2
Assam	...	1	...	1	...	...
Bengal	30,0	7,9	24,3	7,6	—5,7	—3
North-Western Provinces and Oudh	30,0	18,6	27,8	15,3	—2,2	—3,3
Punjab	12,0	11,2	13,0	9,2	+1,0	—2,0
Madras	15,0	2,9	11,5	4,8	—3,5	+1,9
Bombay	57,7	2,7	48,3	4,3	—9,4	+1,6
TOTAL	157,7	51,8	134,1	49,4	—23,6	—2,4

364. In the advances there were savings in all the Provinces except Punjab, where there was a small excess. The principal savings occurred in Bengal (5,7), Madras (3,5), and Bombay (9,4). In Bengal the loan granted to the Darjeeling Municipality was 3,8 below the Estimate, and out of the reserve of 4,5 to meet unforeseen requirements only 3,3 were utilized. In Madras and Bombay the actual requirements of Municipalities fell short of the Estimate. Advances to Municipalities were restricted chiefly to requirements in connection with famine and plague.

365. Under *Port Funds* the Chittagong Port Fund was permitted to defer payment of the instalment of the loan granted to it, which fell due during the year. Under *District Committees* the larger receipts were due to an arrear recovery in Bengal from the Durbhanga District Board, and to the advance payment in Bombay by the Ahmedabad District Local Board of an instalment due on 1st April 1898 Under *Landholders, etc.*, only 15,0 were advanced to the Jath State, against a provision of 22,5.

366. Under *Advances to Cultivators* the following are the details:—

	Budget, 1897-98.		Accounts, 1897-98.		Difference Advanced.	Difference Repaid.
	Advanced.	Repaid.	Advanced.	Repaid.		
Central Provinces	110,0	61,2	152,7	74,8	+42,7	+13,6
Burma	66,0	31,9	37,9	32,7	—28,1	+8
Assam	5	1	4	1	—1	...
Bengal	50,0	16,2	216,6	119,6	+166,6	+103,4
North-Western Provinces and Oudh	140,4	72,3	172,4	207,8	+32,0	+135,5
Punjab	50,0	51,1	176,9	142,5	+126,9	+91,4
Madras	25,0	27,5	178,4	27,8	+153,4	+3
Bombay	117,7	67,3	267,5	162,0	+149,8	+94,7
TOTAL	559,6	327,6	1,202,8	767,3	+643,2	+439,7

Section RR.—PROVINCIAL LOANS AND ADVANCES—*continued.*

367. The advances exceeded the Estimate in all the Provinces, except Burma and Assam. The increase was due to famine, in consequence of which large advances were made under the Land Improvements and Agriculturists' Loans Act, and the following additional grants were sanctioned by the Government of India to meet them, *viz.*:—Bengal (142,5), Punjab (100,0), Madras (33,9), and Bombay (121,5). In Bombay, in addition to the above grant, 7,5 from the head *Loans to Landholders, etc.*, was transferred to this head. In the Central Provinces the figures shown under "Advanced" and "Repaid" include 41,7 and 42,4, respectively, on account of advances to officers for making advances to cultivators. In Bengal both the charges and receipts were swelled by 64,5 by an incorrect adjustment. The larger recoveries represent payment of advances made on account of the famine.

368. Under *Advances under Special Laws* the increase in advances occurred in Bengal, and was due to the transfer to this head of the capitalized value (47,1) of the Rajápur drainage scheme. The increased receipts also occurred in Bengal, and were due chiefly to larger recoveries on account of the advances for the Howrah and Rajápur drainage works.

369. As explained in former reports, these are all net sums. The Indian figures represent the difference between the advances taken by the Railway Companies and the credits given to them, chiefly on account of stores used on revenue account. The English figures represent the difference between the capital deposited by the companies with the Secretary of State, and the withdrawals for expenditure on stores, establishment charges, etc. These figures are necessarily liable to great fluctuations. But the following general explanations are furnished. Under *Guaranteed Companies* the difference in India under the Bombay, Baroda and Central India Railway was due chiefly to larger sale of stores and to larger deposits by outsiders for works to be done. The improvement under the Great Indian Peninsula Railway was due to heavier consumption of stores by revenue for replacement of Cammell's axles and for renewals of carriages and wagons, and to larger sales of obsolete and other stores. The net credit under the Madras Railway was mainly due to the postponement of several large works in consequence of financial pressure and to large deposits received from outsiders for work to be done. In England there was a saving of 437,5 for charges on account of establishment and cost of stores, etc., under all the lines, while the receipts on account of subscribed capital were 904,0 less than was anticipated, and the renewal of the Railway debentures (amounting to 1,439,4,) involved the payment of 9,6 to the holders as discount.

370. Under *Subsidised Companies* the lapse on expenditure in India on the *Southern Mahratta and Mysore Railways* was due chiefly to restriction of expenditure and to the postponement of the construction of a part of the additional rolling stock owing to late arrival of materials from England. In the case of the *Indian Midland Railway*, the excess in India was due to greater progress having been made on formation and bridgework on the Saugor-Katni extension, to a portion of the cost of the new engines having been brought to account in 1897-98 owing to late arrival and to smaller issues of stores to Revenue. The Estimates did not provide for the issue of debentures in England by the *Assam-Bengal Railway*, and consequently no provision for expenditure was made in India under this head. Debentures were however raised and the expenditure was debited to this head by a corresponding reduction of charges under 48.—State Railways—Construction. Adjustment of unexpected debits for cost of surveys undertaken by Government in previous years in connection with the Sini-Cuttack-Calcutta extension and the rapid progress of work on extensions account for the excess charge in India under the *Bengal-Nagpur Railway*. The *Branch line Companies* deposit capital in Government treasuries, and draw against these deposits for expenditure on construction according to their requirements. The *South Behar* deposited 280,0 and withdrew 245,2 in 1897-98 against 300,0 and 326,5 provided in the Estimates. In England there was a saving of 418,3 for cost of stores, establishment charges, etc., and the receipts on account of subscribed capital were more by 42,5. The receipts on account of transfer fees, etc., which are very uncertain, also exceeded the Estimates by 1,0, while the renewal of debentures (amounting to 1,000,0) involved the payment of 12 5 to the holders as discount.

Section T.—REMITTANCES.

1897-98		25,714,4	25,714,5

Section U.—SECRETARY OF STATE'S BILLS.

	1897-98. Budget.	Revised.	Accounts.
Drawings	13,000,0	9,378,0	9,506,1
Payments	13,025,3	9,385,2	9,472,8

372. The following are the amounts of bills and transfers drawn during the year by the Secretary of State :—

		£	Rx.	Rate in pence.
April	1897	865,2	1,383,3	15·01
May	"	802,8	1,333,0	14·45
June	"	930,5	1,526,2	14·63
July	"	949,5	1,519,1	15·00
August	"	641,6	994,5	15·48
September	"	63,3	96,0	15·82
October	"	...	...	...
November	"	...	...	...
December	"	793,6	1,236,7	15·41
January	1898	931,9	1,397,2	14·29
February	"	1,520,0	2,291,3	15·92
March	"	2,007,7	3,035,5	15·87
		9,506,1	14,812,8	15·40

373. The payment account of the year is as follows :—

	£	Rx.
Bills of 1896-97 outstanding on 1st April 1897	470,1	749,1
Bills drawn in 1897-98 as entered above	9,506,1	14,812,8
TOTAL BILLS FOR PAYMENT	9,976,2	15,561,9
Bills paid in 1897-98	9,472,8	14,794,9
Bills outstanding on 1st April 1898	503,4	767,0

Section V.—CASH BALANCE.

	1897-98. Budget.	Revised.	Accounts.
BALANCE ON 1ST APRIL 1897—			
India	13,465,8	13,873,7	13,873,7
England	2,814,7	2,832,4	2,832,4
TOTAL	16,280,5	16,706,1	16,706,1
BALANCE ON 31ST MARCH 1898—			
India	13,321,7	16,722,3	15,982,4
England	2,271,3	2,168,3	2,534,3
TOTAL	15,593,0	18,890,6	18,516,7
Increase (+) or decrease (—) of balance on 31st March 1898	—687,5	+2,184,5	+1,810,6

374. The above difference is distributed between India and England in the following proportions:—

	1896-97. Budget.	Revised.	Accounts.
India	—144,1	+2,848,6	+2,108,7
England	—543,4	—664,1	—298,1
TOTAL	—687,5	+2,184,5	+1,810,6

375. Taking India and England together, the net transactions of the year were better than expected in the Budget by the sum of 2,498,1. The variations which brought about this result are as follows:—

	Better.	Worse.
Increase in Imperial Deficit	...	2,895,2
Decrease in Provincial Deficit	732,3	...
Decrease in Capital Expenditure of State Railways and Irrigation works not charged to Revenue	2,260,1	...
Decrease under Permanent Debt incurred	...	847,1
Increase under Temporary Debt incurred	4,000,0	...
Decrease in deposits of Savings Banks	...	779,0
Increase under Departmental and Judicial Deposits	222,1	...
Net excess payment under Advances	...	973,0
Net excess credit under Exchange on Remittance Account	1,517,2	...
Net excess payments under Loans and Advances by Provincial Governments	...	216,7
Larger withdrawals by Railway Companies	...	132,8
Improvement in the balance of Secretary of State's Bills remaining unpaid at the end of the year	17,9	...
Larger withdrawals under remittances	...	318,8
Minor variations	...	88,9
	8,749,6	6,251,5
NET BETTER	+2,498,1

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 4th, 1899.

Quiet weather has prevailed during the week under review, with hardly any rainfall and very few local storms, but the temperature in many parts of the country has been unsteady and the range of temperature in many of the provinces has been larger than usual. The storm which crossed Northern India during the latter half of last week lay over Lower Bengal at the commencement of the week under review, and light to moderate thunder showers and dust storms occurred in different parts of North-East India on the 26th, 27th and 28th, due to the action of this storm. On the 1st and 2nd, the weather was fine and quiet generally, but on the 3rd and 4th slightly unsettled conditions appeared simultaneously in the north-east and north-west and light local showers occurred in these two areas. Except in the north-west and north-east, the weather over India was fine and rainless, but in the south of Tenasserim and also in parts of Ceylon some rain was received during the week. The mean temperature of the week was very nearly normal, but as mentioned above, the temperature was unsteady varying in the different provinces from considerably below to considerably above the normal average.

Daily Summary.—*Sunday, February 26th.*—The storm which had crossed Northern India during the preceding week was shown over Lower and South-West Bengal. The winds were hence feebly cyclonic and a few scattered showers had fallen over North-Eastern India. Elsewhere pressure was uniform, though lower than usual, the winds light and variable, and the weather settled, though Cochin reported a local shower and there had been a trifling fall of snow in parts of Kashmir. The heat was low for the time of year in Bombay, in Lower Burma and in Assam, but was more or less excessive elsewhere, more particularly so within the region covered by the barometric depression, where the principal variations from the normal were Balasore $+8^{\circ}\cdot9$ and Burdwan $+7^{\circ}\cdot3$.

Monday, February 27th.—The barometer had fallen over the west of the Peninsula, but had risen elsewhere, more particularly in the north-west and centre. The depression over Bengal was still fairly discernible, though it had nearly filled up. The winds throughout the country were light and rather variable. The mean temperature had decreased over by far the greater part of the country. All over the Bombay Presidency, Rajputana, Central India, the west of the Central Provinces, and part of Madras as well as over Lower and Central Burma and Assam, the heat was low for the time of year, while in the intervening region it was higher than usual. The following variations exhibit the distribution of temperature relatively to the normal: Malegaon $-7^{\circ}\cdot1$, Chaibassa $+6^{\circ}\cdot5$ and Mymensingh $-2\cdot6$. The weather in North-East India had been more unsettled than on the previous day, and the thunder showers over that region had been both more extensive and heavier.

Tuesday, February 28th.—The observations showed that the barometer had continued to rise. The storm over Lower Bengal had wholly disappeared, and the ordinary cold weather distribution of pressure, which consists of a high pressure area over North-West India and a low pressure area over the South of the Bay, had been established. Northerly breezes prevailed over parts

of North-West India, southerly winds on parts of the Madras Coast and variable airs and calms elsewhere. There had been further showers in parts of Bengal, but both the amount and the extent of the rainfall had diminished. The mean temperature had generally fallen and was very low for the season in parts of Bombay, Central India and the Central Provinces.

Wednesday, March 1st.—The barometer changes had been unimportant, and pressure continued to decrease from a high pressure area in the West Punjab to a low pressure area over the centre of the Bay. South-easterly breezes were blowing down the Gangetic Plain, north-easterly winds over the central parts of the country and variable airs elsewhere. Calms were reported from Bengal. The only rainfall was a light shower in Baluchistan. The principal change in the temperature conditions was a brisk rise in Baluchistan and North-West India. The heat had been excessive over the Indus Valley Districts and in Burma, and less than usual over part of the Central Provinces, but elsewhere the variations from the normal were small.

Thursday, March 2nd.—The pressure conditions were practically unchanged and the high pressure area in the north-west was as marked as on the 1st. The winds blew from the usual cold weather directions—from north-west and west down the Gangetic Plain, from north-east over the Central Provinces, and from south-east and east over the Peninsula. Calms were reported from Bengal. Fine cloudless weather prevailed with no rain. The temperature had risen over some central districts and exceeded the normal over the Central Provinces and Berar.

Friday, March 3rd.—The barometer had fallen everywhere and over Northern India and the East of the Peninsula, briskly to rapidly. A storm was appearing over the western desert, while at the same time low pressures were developing along the foot of the Himalayas. The wind had shifted to the southward over the western desert, but the Westerly and West-North-Westerly wind down the Gangetic Plain and the North-East wind over the Central Provinces still held. Light snow had fallen over Kashmir and light rain in parts of Bengal and Assam. Temperature had risen in the extreme west and south of India, and the heat was greater than usual over the Punjab and Sind.

Saturday, March 4th.—The depression over the western desert had apparently filled up, while on the contrary the low pressure area along the foot of the hills had developed and become more marked. Westerly winds prevailed over a large part of Northern India and breezes between north-west and north-east in most other places, but in North Bengal an easterly wind was appearing. Cloudy weather was reported both from the north-west and north-east, and while light snow had fallen at Minimarg and Srinagar, light rain had been received at Bhamo, Barisal and Jessore. The heat was greater than usual over North-Western India, the south of the Peninsula and the greater part of Burma, the principal variations being $+9^{\circ}\cdot2$ at Jacobabad, $+3^{\circ}\cdot1$ at Bellary and $+1^{\circ}\cdot3$ at Minbu. Elsewhere the weather was cool, the principal temperature variations being $-8^{\circ}\cdot4$ at Kindat, $-6^{\circ}\cdot6$ at Sibsagar, and $-4^{\circ}\cdot1$ at Jubbulpore.

Temperature.—As mentioned above, the temperature has been changeable and unsteady during the week, more particularly in North-Western and North-Eastern India. Thus at the commencement of the week, temperature was largely above the normal in Bengal. This excess gradually diminished till by the 1st it had practically disappeared and subsequently was replaced by a deficiency of temperature. In the north-west the variations from the normal were irregular, until the 2nd, when the temperature rose above the normal and the rise holding, by the close of the week, there was a large excess of heat all over the north west.

The following table gives the temperature variation data for the week:—

Province.	February 1899.			March 1899.				Mean variation of week.
	26th	27th	28th	1st	2nd	3rd	4th	
	°	°	°	°	°	°	°	°

Mean for whole of India	+1·2	−0·2	−0·3	+0·1	+0·1	0	+0·3	+0·2

The above shows a slight excess of temperature on the 26th, but a normal temperature on all the other days. The provincial variations exhibit an excess in Orissa, Chota Nagpur, and the Punjab, a deficiency in Central India and the Bombay Deccan, and normal temperature conditions elsewhere. In the case of Bengal, Orissa, Chota Nagpur, etc., the range of temperature during the week was large. The following are the highest maximum temperatures recorded on each day:—

Sunday, 26th February	—Cuddapah	101°·7
Monday, 27th „	do.	102°·2
Tuesday, 28th „	do.	100°·7
Wednesday, 1st March	—Trichinopoly	99°·1
Thursday, 2nd „	—Tounghoo	99°·7
Friday, 3rd „	—Rangoon	99°·6
Saturday, 4th „	—Cuddapah	101°·2

Rain.—Nearly the whole of the rainfall which occurred over India during the week under review was attributable to the action of a single depression. This depression, which crossed Northern India very quickly during the last two days of the previous week, lay over Lower Bengal on the first day of the present week. It drew the wind into cyclonic directions over North-Eastern India, so that south-west to south-east winds prevailed at the head of the Bay and in Lower Bengal. These winds brought up a good deal of moisture, and showers were reported from a few places in East Bengal and Assam. By the following morning, the 27th, the Bengal depression had to a considerable extent filled up but fresh to strong southerly winds continued to carry much moisture from the northern part of the Bay into Bengal and Assam, and the rainfall area notwithstanding the dispersion of the depression had increased and the rainfall itself had been heavier. Light showers continued to be received in this area until the 28th, but on the 1st and 2nd March, the weather was fine and settled. On the 3rd, however, a small local depression appeared over the Sunderbuns, and on that and the following day light thunderstorms gave trifling showers to a few

places in Lower Bengal. Except in North-East India and more particularly in Deltaic and East Bengal and Assam there has been practically no rain during the week. During the greater part of the period a large high pressure area overlay North-Western and Central India, and the weather was fine with dry winds, and though on the 3rd these conditions changed somewhat and a storm appeared on the north-west frontier, the weather over North-Western India was hardly affected thereby, though in Kashmir light snow or rain showers were reported.

The table at the close of the summary shows that effective rain, *i.e.*, rain of one-tenth of an inch or more was received in eight of the rainfall divisions, *viz.*, East Bengal, the Surma, Hills and Brahmaputra divisions of Assam; Deltaic Bengal, Central Bengal, the Bengal Hills and Orissa, and light unimportant showers in six other divisions, *viz.*, Malabar, South Central Madras, the centre and east of the Central Provinces, the Baluchistan Hills, and the north of the East Coast. In all other parts of the country the weather has been rainless. The rainfall of the week exceeded the normal average in East Bengal, all the Assam divisions, Deltaic and Central Bengal and the Bengal Hills. The excess amounted to nearly one inch in East Bengal and to about half an inch in Assam.

With the present rainfall return, a new rainfall period has commenced, and the information contained in the three last columns of the table is practically the same as that given in the three first columns.

The only noteworthy totals recorded during the week at individual rain-gauge stations were as follow :—

	Inches.
Chandpur—Comillah	3·23
Munshigunj--Dacca	2 47
Sylhet	3·05
Sibsagar	3·21
Contai—Midnapore	3·20
Bu uwan	2·45

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 11th March.*—No rain fell during the week. The water supply is generally sufficient. Some small sowings are proceeding. The standing crops are generally good. The harvest yield is almost normal. Fodder is sufficient. The condition of cattle is good. Prices are almost stationary.

Bombay.—*For week ending 15th March.*—Rain fell in parts of Sind and one taluka of Dharwar and has proved beneficial to the late crops in Shikarpur and the Upper Sind Frontier. The standing crops have been damaged by high winds or drought in parts of Sind and by rats in parts of Bijapur. American cotton has been blighted in two talukas of Dharwar. The harvesting of the late crops is progressing in seventeen and preparations for next season are being made in eleven districts. Cotton picking continues in parts of Gujarat, Kathiawar and the Karnatik. Fodder is sufficient except in parts of Sind and Baroda. Prices have risen in three and fallen in six districts.

Bengal.—*For week ending 13th March.*—Rain fell during the week in the east and north of the Province. The spring crops are being gathered, and the outturn is good. The collection of opium continues, and a fair yield is expected everywhere except in Darbhanga, where it is reported to be meagre. Transplantation of spring rice is almost over. Ploughing for autumn rice and jute is in progress, and sowing has begun in parts of North Bengal. Sugarcane is still being pressed, and in some districts the planting of the new crop has begun. The fodder-supply is sufficient except in parts of Midnapore. The price of common rice continues practically stationary.

North-Western Provinces and Oudh.—*For week ending 15th March.*—Slight showers fell in parts during the week, otherwise clear and seasonable weather has prevailed. The standing crops are thriving and are being irrigated where necessary. The harvesting of the spring crops, the pressing of sugarcane and the extraction of opium continue. Planting of the new cane crop has commenced in parts. Prospects are favourable. Markets are well stocked. Fodder is sufficient. Prices have a rising tendency in a few districts, but are otherwise stationary or falling.

Punjab.—*For week ending 15th March.*—Good rain fell in Shahpur and Peshawar and slight falls are reported from parts of the Umballa, Ferozepore, Multan and Sialkot districts. More is badly wanted throughout the province. Ploughings for the autumn crops continue. The condition and prospects of the standing irrigated crops are generally reported to be average. The crops on unirrigated areas have failed for want of rain in Delhi and are below the average in other districts. The spring crops are being damaged by rats in parts of Umballa and by caterpillars in parts of Ferozepore. The condition of cattle is reported fair in all districts except Delhi. Fodder is scarce in Delhi, Umballa and Shahpur but sufficient elsewhere. Prices are rising in Ferozepore and Rawalpindi, falling in Hissar and Shahpur but are unchanged elsewhere. Wheat is selling from $15\frac{9}{16}$ to $19\frac{1}{2}$, gram 19 to 22, barley 28, bulrush millet 18 to 21, maize 25 to $32\frac{1}{2}$, great millet 23 and rice 13 to 14 seers per rupee.

Central Provinces.—*For week ending 14th March.*—The weather is generally clear and the heat is increasing rapidly. The threshing of the autumn crops has almost been completed. The reaping of the spring crops is in full

swing in the north of the provinces and has nearly been completed in the south. The planting of sugarcane is in progress in Chanda and Bhandara. The preparation of land for monsoon sowings has commenced in Wardha. Fodder is scarce in Sambalpur and in the Warora tahsil of Chanda. The price of wheat and gram has fallen in seven and four districts respectively with the gathering of the harvest. The quotations for *juar* (*sorghum vulgare*) and rice are well below the normal almost everywhere. The cheapest prices are:—wheat 19½, gram 32, rice 22 and *juar* 28¾ seers per rupee. The dearest prices are wheat 12, gram 16, rice 11 and *juar* 20 seers per rupee.

Burma.—*For week ending 11th March.*—In Upper Burma the cultivation of dry weather paddy is progressing favourably. Cotton is being picked in Thayetmyo and the harvesting of early peas and beans, wheat, maize, gram and other miscellaneous island or river side crops has begun in several districts. The standing crops are in good condition. The price of paddy shows a slight increase in Prome, Amherst and Myingyan and a small decrease in Thongwa, Bassein, Pokoko and Mandalay; elsewhere it is stationary.

Assam.—*For week ending 14th March.*—Rain fell in all districts and has facilitated the cultivation of garden crops. Linseed and tea have been slightly damaged by hail in south Sylhet. Ploughing for early and late broad cast rice in the Assam Valley districts and for low land winter rice in Sylhet continues. Gathering of mustard and pulses, hoeing of tea and pressing of sugarcane are in progress. The outturn of mustard is below the average. The prospects of sugarcane are generally good. Plucking of tea has commenced in the Nowgong district. Land is being prepared for jute in Goalpara. Fodder is scarce in the Naga Hills. Prices—common rice, Silchar, Dhubri, Gauhati, Tezpur and Nowgong 16, Sylhet 17, Sibsagar 12, and Dibrugarh 13½ seers per rupee.

Mysore and Coorg.—*For week ending 15th March.*—MYSORE: Prospects of crops are good. Paddy has been harvested in parts of Tumkur. Prices have risen slightly in Kolar and Tumkur and have fallen in Bangalore, Mysore and Shimoga.

COORG:—The threshing of rice and picking of coffee have been completed. Water and fodder for cattle are sufficient. Prices of food grains are stationary.

Berar and Hyderabad.—*For week ending 15th March.*—BERAR: The weather is growing warm. The harvesting of the winter crops is nearing completion. Ploughing of fields for the ensuing monsoon crop is in progress. Fodder and water are scarce in parts of the province. Prices are almost steady.

HYDERABAD: No rain fell during the week. The spring harvest is still proceeding. The standing winter rice crop is in fair condition. Prices of grain continue steady. Prices—wheat 9½, coarse rice 10¼ and *jowari* 22¾ seers per current sicca rupee.

Central India.—*For week ending 15th March.*—No rain fell during the week. Agricultural operations are in progress in all Agencies. The standing crops are in fairly good condition. Prices are below normal in Bhopawar, but are normal elsewhere. The condition of opium is good.

Rajputana.—*For week ending 15th March.*—Agricultural operations are progressing satisfactorily except in Merwara. The state of the crops is generally good, except in Ajmere-Merwara. Cattle are generally in good condition. Fodder is scarce in Sirohi, Marwar, Kherwara, Meywar, Haraoti, Ajmere, Jeypur and Bikanir. Prices are rising in two States, falling in one and are steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 112 persons emigrated during the week. The total emigration from Merwara up to date numbers 4,313 persons. The numbers

employed on relief works were—390 in Ajmere, 5,200 in Merwara and 960 in Marwar. The price of grain in Marwar is 15 seers per rupee.

Kashmir.—*For week ending 14th Marth.*—Rain fell twice during the week. The weather is now fine. Prices continue below normal The price of rice is 27 seers per rupee.

JAMMU PROVINCE: *For week ending 15th March.*—Slight rain fell during the week. The condition of the standing crops is fair. Fodder is sufficient. Prices are generally stationary, wheat selling at 18, and maize at 24 seers per rupee.

Nepal.—*For week ending 11th March.*—Slight rain fell during the week. The weather is seasonable. The prospects of the wheat crop are good. The price of rice is 9 seers per rupee.

DETAILS OF ACCOUNTS AND ESTIMATES.

APPENDIX.

ACCOUNTS AND ESTIMATES.

SUPPLEMENT.

FINANCIAL STATEMENT FOR 1899-1900.

PART I.

INTRODUCTION.

In presenting my Financial Statement of March 1898 I alluded to the calamities of famine, war, pestilence, and earthquake which had fallen upon us during the year then closing, and I went on to refer to the promise of brighter times introduced by the abundant harvest of 1897. The recovery of the country has been more rapid than any of us anticipated at the time I allude to; another good harvest has been gathered, and although the plague still casts a shadow over the land, the general condition of the people as evidenced by the Returns of Trade and of Revenue is prosperous, and the famine of 1896 and 1897 is now little more than a memory, its effects being obliterated by the return of prosperous seasons. I cannot, however, pass from the subject without deriving from it one lesson which it seems to me to afford—namely, that the margin between prosperity and adversity in India must be a very narrow one, for if we have learned that one bountiful harvest suffices to restore the country after a widespread and severe famine, we have learned also that the failure of the seasonal rains in a single month of the year is sufficient to set back a full tide of prosperity; and that this is a possibility which in the administration of India, and in its financial administration especially, we dare not leave out of account.

2. In the two calamitous years of which I told the history last March, namely, 1896-97 and 1897-98, I had to shew that the accounts of the Empire were in deficit to the aggregate amount of, as nearly as possible, seven crores of rupees (Rx. 6,988,100 since increased to Rx. 7,064,233). In the two succeeding years (those of which I present the estimates to-day) I am glad to say that this deficit has been, or will be, more than covered, for so complete is the reversal of last year's position that in passing from 1897-98 to 1898-99 we pass from a deficit of Rx. 5,359,211 to a surplus of Rx. 4,759,400, and in my Budget Estimates for next year I anticipate a surplus of Rx. 3,932,600. I lay these figures before the Council at the very commencement of my Statement, as I have no doubt they are anxious to know, as soon as possible, the general drift of the figures which I now proceed to explain in greater detail.

Accounts of 1897-98.

3. The Accounts of 1897-98 were, as usual, published in the first half of January, and the results then shewn compare as follows with the anticipations formed in March 1898:—

	Revenue.	Expenditure.	Deficit.
	Rx.	Rx.	Rx.
Estimated in March 1898	96,561,500	101,844,600	5,283,100
Actual Accounts	96,442,004	101,801,215	5,359,211
Accounts {Better + / Worse — }	—119,496	+43,385	—76,111

The differences on the whole were very small, as the accounts under each of the heads of Revenue and Expenditure closely followed the Revised Estimate. Indeed, had it not been that we determined after the close of the year to make certain grants (aggregating Rx. 88,100) to the Provincial Governments of Bombay and of Bengal in further reimbursement to them of their famine expenditure, the difference in the whole account between Revised Estimate and Actuals would have been only Rx. 12,000.

Revised Estimates of 1898-99.

4. In the Budget Estimate for 1898-99 I estimated the results of the year to be a surplus of Rx. 891,400. But we now find that mainly through abundant revenue, military economies on the North-West Frontier, and very favourable exchange, the result of the year will be a surplus, as I have already stated, of Rx. 4,759,400. I shall explain afterwards that on a review of the financial position of the several Local Governments, whose balances have been exhausted by famine and plague, and who have still to meet pressing demands for expenditure while the expansion of their revenues has for a time been set back by the calamities referred to, we have decided to make them grants in aid of their resources, out of the surplus that has accrued to us on the Imperial account. The total amount of these grants is Rx. 700,000, and thus the surplus of the year is reduced from Rx. 4,759,400 to Rx. 4,059,400. The money may be described as expenditure brought to account by anticipation, that is to say, it goes at present merely to swell Provincial balances, and when actually spent on the purposes in consideration of which it is granted, it has not again to be charged against the surplus of the year, but passes through the Provincial adjusting entry.

5. The detail of the differences between the Revised Estimates for 1898-99, as now presented, and the amounts taken in the Budget Estimates prepared twelve months ago are set out in the following statement:—

Estimates of 1898-99.

	Budget.	Revised.	Revised Better.	Revised Worse.
ENGLAND.				
STERLING IN ENGLAND—				
Revenue . . . . . . £	188,300	232,500	44,200

Addition (+) or Deduction (—) made for increase or decrease of Provincial and Local Balances	—116,800	+717,900	...	834,700
Special grants to Provincial Governments .	...	+700,000	...	700,000
NET EXPENDITURE CHARGED AGAINST REVENUE IN INDIA	60,301,500	60,743,700	...	442,200
Surplus .	891,400	4,059,400	3,168,000	

(a) Including interest and receipts under Civil Works.
(b) This entry in the Indian portion of the accounts is a *minus* one, as the interest passed to the charge of Railway and Irrigation is greater than the whole amount of interest payable in India.

6. The first point to note is that, except for a small falling-off under Stamps and Registration, every one of the Revenue heads shews better results than anticipated in the Budget Estimates. The improvement under Land Revenue is mostly in Burma and the North-Western Provinces. In Opium we have got much better prices in Bengal than we estimated for, namely, Rx. 4,164,000 against Rx. 3,900,000, and in Bombay the low rate of the pass-duty, as compared with previous years, has led to a revival of the export which last year shewed a very considerable decline. The increase in Salt Revenue, which now produces 9 crores against the 8½ which it gave us in the two famine years, is a satisfactory indication of the improvement in the condition of the people, and the Customs Revenue continues to increase as trade continues to flourish.

7. Post Office and Telegraph shew a falling-off, due in the latter case partly to the cessation of hostilities on the North-Western Frontier, but chiefly to the more extensive use of deferred telegrams which are now delivered by hand, and in the former case to reduction of rates of postage. We calculate that by the increase, from one tola to one-and-a-half, of the unit of weight for inland postage we diminish the annual revenue by Rx. 60,000, and by adopting the Imperial Penny Postage (for India, one anna) we give up Rx. 40,000. A considerable portion of this last item will be recovered for us by an arbitration given in our favour, in respect of the distribution, between the English and the Indian Post Offices, of the subsidy charges payable to the Peninsular and Oriental Company and by reductions of the scale of charge in respect of continental transit.

8. Under Railways—Net Earnings—we have received Rx. 778,100 more than we estimated, the important items being—

		Rx.
1. North-Western	Better	410,000
2. Great Indian Peninsula	Better	416,000
3. Bombay, Baroda and Central India	Better	210,000
4. Rajputana-Malwa	Better	70,000
5. Eastern Bengal	Worse	110,000
6. Southern Mahratta	Worse	80,000
7. South Indian	Worse	50,000
8. Madras	Worse	55,000
9. Assam-Bengal	Worse	31,000
Net of the above	Better	780,000

The improvement is due generally to large exports of grain consequent on good winter crops, and in one case to postponement of works of repair and renewal.

The Plague is responsible for the falling-off on the Railways in Southern India.

An inferior jute crop and the postponement of jute deliveries in Calcutta was the cause of the worse result on the Eastern Bengal State Railway, and inclusion in the Working Expenses of the revenue share of repairs of earthquake damages caused the reduction on the Assam Bengal-Railway.

9. On the expenditure side, the first considerable improvement is under Opium, and is due to our failure to obtain as good a crop as we hoped. We have been able to recommence the building up of our Reserve, but the good season for which for many years we have waited has not yet come, and the produce still remains short of our standard. There has also been a considerable saving in the expenditure of the Salt Departments, and fair amounts in the other Revenue Departments. The Civil Departments shew the usual considerable savings in their Budget Estimates, but the amount has been more than swallowed up in the expenditure caused by Plague. The head "Medical"

alone shews an excess over estimate of Rx. 327,800, most of which is in Bombay, and all of which for practical purposes falls on the Imperial Account, for the Provincial Governments are not able to bear the expenditure without assistance in the form of grants from Imperial.

10. The Army expenditure in India (ordinary) is less by Rx. 84,300 than estimated in the Budget, and of the Budget provision of Rx. 1,458,000 in India for Warlike Operations only Rx. 1,023,700 has been spent, the Military authorities having, from the very beginning of the year, found it practicable to reduce the forces maintained on the North-West Frontier.

Rate of Exchange.

11. The rate of exchange taken for the purpose of the Budget Estimate last March was $15\frac{3}{8}$ pence (or rather £1 = R15·6), that being the rate actually realized in 1897-98. At the opening of the year 1898-99 the current rate was $15\frac{13}{16}$ or $15\frac{7}{8}$, but under the influence of a strong demand in April and May (in each of which months the Secretary of State sold two millions sterling of Council Bills) it quickly rose to 16 pence and over. This demand was due mainly to unusually large exports of Rice, Wheat, and Seeds, the figures of which for the five principal months of export are shown in the following table:—

Exports (Value in Rupees) of Rice and Wheat (including Flour) and Seeds by Sea from British India during February to June 1896, 1897, and 1898.

		February.	March.	April.	May.	June.
Rice	1896	2,30,79,157	2,35,35,019	1,28,19,258	87,78,324	1,05,82,552
	1897	2,05,74,378	2,26,73,146	85,42,095	74,73,502	72,22,085
	1898	2,11,33,697	2,39,73,430	1,74,35,984	1,39,93,271	1,00,28,152
Wheat	1896	13,62,950	14,41,371	20,32,888	27,38,742	21,72,359
	1897	3,28,052	1,83,882	3,47,801	5,03,124	6,14,133
	1898	9,99,271	55,10,041	1,09,23,719	2,85,78,798	2,28,64,833
Seeds	1896	68,45,149	96,72,087	1,08,31,633	1,27,32,470	1,10,86,314
	1897	25,08,515	30,02,053	43,92,610	1,09,06,210	85,56,518
	1898	58,76,128	74,23,872	88,45,785	1,25,27,552	1,16,97,108
Total all three.	1896	3,12,92,356	3,46,48,477	2,5[illegible],83,779	2,42,49,536	2,38,41,225
	1897	2,34,10,945	2,58,59,081	1,32,82,506	1,88,82,836	1,63,92,736
	1898	2,80,09,096	3,69,08,243	3,72,05,488	5,50,99,621	4,45,90,093

12. The position thus gained at the beginning of the year has never been lost, and the rate has continually fluctuated about 16 pence, now a little over it and now a little under it. In the latter half of the year the rate has never been below $15\frac{15}{16}$ pence. The drawings have now for some time stood at Rx. 700,000 a week, and we expect when the year closes to have remitted by Council Bills £19,000,000 equal to Rx. 28,540,000, giving, as nearly as possible, an average rate of sixteen pence. The Revised Estimates for 1898-99 are accordingly made up at this rate.

13. For next year I have made the modest estimate of $15\frac{3}{4}d$. I fully anticipate we shall realize, as this year, something closely approaching to 16 pence, but our continual practice in India is to avoid sanguine estimating, and following this principle I am loth to take a figure which may have the taint of being, under existing circumstances, the best possible.

14. It may be noted that not only are the remittances of the current year the largest on record (there being hitherto only one year, 1881-82, in which they exceeded £18 millions), but we have in addition to these remittances received in India in exchange for silver at the rate of Rx. 15 per £ sterling, Rx. 2,616,400 of gold which we now hold as part of the currency reserve in addition to Rx. 255,400 similarly held on 1st April 1898.

Budget Estimates, 1899-1900.

15. The Budget Estimates of Revenue and Expenditure for the coming year 1899-1900 made up at this rate of exchange shew a surplus of Revenue of Rx. 3,932,600. It will be best perhaps to explain the figures by comparing them with the Revised Estimate for the current year, as exhibited in the Statement in paragraph 5 above.

Budget Estimates of 1899-1900 compared with the Revised Estimates of 1898-99.

	Revised, 1898-99.	Budget, 1899-1900.	1899-1900, Better than 1898-99.	1899-1900, Worse than 1898-99.

(a) Including Interest and Receipts under Civil Works.

16. Under Revenue heads in India the collection of arrears of Land Revenue still goes on, but we do not expect next year quite so much as in the current year. Under Salt and Customs we expect a slight advance over the Budget Estimates of 1898-99, but have not estimated to receive so great an advance over these as we shall certainly receive in the current year. The current prices of Opium warrant our estimating for a considerable increase in the revenue under this head.

17. Under Railways the estimates are for a small advance in net earnings. The details are as follow :—

	Budget, 1898 99.	Revised, 1898-99.	Budget, 1899-1900.
	Rx.	Rx.	Rx.
State Railways—Gross	10,382,600	19,695,800	20,237,100
Working Charges	9,770,500	9,876,600	10,047,000
Net	9,612,100	9,819,200	10,190,100
Guaranteed Railways—Net	2,424,000	2,995,000	3,192,500
TOTAL NET	12,036,100	12,814,200	13,382,600

18. The Great Indian Peninsula Railway contributes Rx. 130,000, the Madras Railway Rx. 65,000, and the East Indian Railway Rx. 60,000 of the improvement shewn in Budget, and we expect the Eastern Bengal and Southern Mahratta Railways to recover from their low figures of 1898-99. The increasing mileage of the East Coast Railway will also bring in better returns; on the other hand, there are heavy renewals on the North-Western Railway to be provided for. Under Civil Departments we have to provide for considerable additions to Police expenditure (partly due to Plague); and we have also made fairly ample estimates for Plague expenditure, the charges under "Medical" in India being as follows:—

	Total.	Including Plague Expenditure.
	Rx.	Rx.
1894-95	1,003,438	...
1895-96	1,020,077	...
1896-97	1,065,158	19,000
1897-98	1,328,952	297,000
1898-99, Revised	1,542,900	508,900
1899-1900, Budget	1,678,100	354,200 + 209,500

The last-mentioned Rx. 209,500 is shewn separately, because it is in the nature of a reserve in the "India" Section of the Accounts, and if actually spent, it will not pass under "Medical" in the Imperial Portion of the Accounts, but be dealt with as a transfer.

19. We have increased the total provision for Military Works to Rx. 1,322,300, against expenditure in 1897-98 and 1898-99 of about Rx. 1,168,385 and Rx. 1,197,600, the purpose of the increase being to meet charges likely to fall upon us in respect of places of defence and similar works on the North-West Frontier.

20. The Military Estimates shew large savings in India as compared with the current year, the India figures being—

	Ordinary Expenditure.	Warlike Operations.	Total.
	Rx.	Rx.	Rx.
1896-97	17,243,137	18,206	17,261,343
1897-98	16,514,547	3,847,992	20,362,539
1898-99, Budget	16,625,800	1,458,000	18,083,800
1898-99, Revised	16,541,500	1,023,700	17,565,200
1899-1900, Budget	16,873,400	38,900	16,912,300

No Remission of Taxation.

21. In view of the surpluses as shewn in the Revised and Budget Estimates, the Government of India have carefully considered the question whether they should propose, at present, any remission of existing taxation. The conclusion to which they have come is that any such proposal would be premature, and this mainly on two grounds. The first is that we have, as it were, to make up for arrears. As stated in my opening paragraph, we have had in the past two years deficits aggregating Rx. 7,064,233, and we ought to regard ourselves as under an obligation to recover our position by accumulating counterbalancing surpluses. The second and weightier reason is that we have in contemplation, as is well known, certain extremely important measures of currency reform, which are under the consideration of a Committee sitting at the India Office in London. Whatever the advice of that Committee may be, we consider we are bound to prepare for any measures that may result from it by preserving as strong a financial position as possible, and we consider we would act unwisely if we were to reduce our financial strength by remitting existing taxation and run the risk of finding ourselves, by our own action, less free than we would otherwise be to undertake any measures of currency reform that may seem desirable.

Railway Construction.

22. I have, in former Financial Statements, referred to the policy recently established of laying down a programme of Railway Construction for three years in advance. The first of these programmes was for the three years ending 31st March 1899. This programme was at first intended to include an expenditure of 27 crores of rupees, but was afterwards extended to 29¾ crores. Latterly, however, financial difficulties have obliged us somewhat to curtail the expenditure, and we expect to expend against the programme of 29¾ crores the following amounts :—

	Rx.
In 1896-97 (actuals)	8,658,800
„ 1897-98 („)	8,145,500
„ 1898-99 (Revised Estimate)	8,387,500
TOTAL .	25,191,800

23. I leave to my Honourable Colleague Sir A. Trevor the task of stating in detail the results of the expenditure. It is sufficient here to set them out in the most general form (the figures of the Railways of Native States and of other Railways that lie outside our accounts being omitted) :—

	Standard Gauge.	Metre Gauge.	Special Gauges.	Total.
March 31, 1896—				
Mileage open . . .	10,430	6,842	36	17,308
„ under construction .	1,490	1,086	...	2,576
TOTAL .	11,920	7,928	36	19,884
March 31, 1899—				
Mileage open . . .	11,728	7,522	36	19,286
„ under construction .	814	971	77	1,862
TOTAL .	12,542	8,493	113	21,148

24. I divide the Railway Construction in the present estimates, for convenience sake with reference to our accounts, into four categories, namely:—

First.—State Railway Construction; money found by Government, but also by debentures in the case of the East Indian and Assam-Bengal Railway Companies.

Second.—Construction by Assisted and Working Companies out of funds raised by them or in some cases advanced by Government to them. Also Branch Line Companies under a firm guarantee.

Third.—Open line capital and new construction by the old Guaranteed Companies.

Fourth.—Construction by Companies outside the accounts of the Government, and also construction by Branch Line Companies on rebate terms.

The above classification slightly differs from that of last year's Statement, as under new arrangements every portion of the above comes within the programme, except the fourth category, *viz.*, Company construction outside the accounts of Government, and Branch Line Companies not under firm guarantee.

25. The Estimates of Capital construction for the two years 1898-99 and 1899-1900 now stand as follows, the figures for programme expenditure in the Revised Estimate of 1898-99 being modified so as to correspond with the new classification:—

	Revised Estimate, 1898-99.	Budget Estimate, 1899-1900.
	Rx.	Rx.
FIRST CATEGORY—STATE RAILWAYS—		
Funds available by Famine Grant	695,400	490,000
Grant under—		
48.—State Railway Construction	2,882,200	3,465,000
East Indian Railway Company's Debentures	1,573,800	750,000
TOTAL	5,151,400	4,705,000
SECOND CATEGORY—ASSISTED COMPANIES	3,155,300	3,009,900
THIRD CATEGORY—OLD GUARANTEED COMPANIES	851,600	1,107,800
TOTAL "PROGRAMME"	9,158,300	8,822,700
Add—FOURTH CATEGORY (outside programme)	1,470,100	950,300
TOTAL	10,628,400	9,773,000

N.B.—The Chittagong Port Works, connected with the Assam-Bengal Railway, shown in last year's Statement as Miscellaneous Public Improvements, are now included as "Railway Construction."

26. Having now carried to a fairly successful issue this policy of temporary activity in railway construction, we think it wise, both from a railway and from a financial point of view, to curtail for a time the rate of progress of railway construction. The nine or ten crores a year sanctioned in 1897 was not meant to be permanently adopted, and we deem it desirable now to allow a short time for the earning capacity of the lines recently constructed to develop itself, before again undertaking special burdens in the direction of capital outlay upon railways.

27. For these reasons we deemed it advisable to fix about 20 crores as the limit of our expenditure for the next three years; and a programme was accordingly prepared for expenditure as follows:—

	Rx.
1899-1900	6,772,700
1900-1901	6,728,400
1901-1902	6,821,000
TOTAL	20,322,100

but we have had to alter these figures for the following reason. In the Budget Estimates of 1898-99, we proposed to spend under the first three years' programme a sum of Rx. 10,788,900 in the year 1898-99, but the inability of the workshops in England to meet the demands which were made upon them by ourselves and the various constructing companies has reduced the expenditure of 1898-99 to Rx. 8,387,500. Many of the orders, however, will be completed and paid for in 1899-1900, and we have therefore to provide, under the new three years' programme, in 1899-1900 not only the intended Rx. 6,772,700, but a considerable amount in addition, which may be regarded as arrears of the old programme handed on to the new one. The amount estimated for is therefore Rx. 8,822,700.

28. The following are the entries under the first category (State Railways) :—

	Revised, 1898-99.	Budget, 1899-1900.
Expenditure by State Agency—		
Open lines—	Rx.	Rx.
North Western	228,300	212,300

Bhramaputra-Sultanpur	68,000	80,000
TOTAL .	3,155,300	3,009,900

30. The estimate under the third category (old Guaranteed Companies) provides for:—

	Revised, 1898-99.	Budget, 1899-1900.
	Rx.	Rx.
Open Line Capital—		
Great Indian Peninsula	73,600	74,000
Madras	20,100	60,000
Bombay, Baroda and Central India . .	459,100	410,000
Extensions—		
Calicut-Cannanore	70,600	200,400
Amalner Palgaon-Chalisgaon Dhulia .	228,200	363,400
TOTAL .	851,600	1,107,800

31. The principal projects classed under the fourth category and outside the "programme" are:—

	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
Bengal Dooars Extensions	40,000	200,000
Bengal and North-Western Railway Extensions	445,000	365,000
Tapti Valley	650,000	230,000
South Behar	204,000	77,500
Smaller Branch Lines	131,100	77,800
TOTAL	1,470,100	950,300

Capital Expenditure on Irrigation.

32. The amount of Rx. 750,000 has hitherto been provided for expenditure on Irrigation. In 1899-1900 a further amount of Rx. 100,000 is provided under this head. The grant for 1898-99 which was of the usual amount, Rx. 750,000, has not been fully worked up to, owing chiefly to the approaching completion of the Chenab Canal and partly to it not having been found possible to start work on the Jhelum Canal in the early part of the year.

33. The principal works under this head are at present:—

	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
Mandalay Canal	90,000	100,000
Fatehpur Branch of the Lower Ganges Canal	63,600	42,600
Chenab Canal	151,500	80,000
Jhelum Canal	36,200	210,000
Jamrao Canal	142,200	133,900
Other Projects	208,700	283,500
TOTAL	692,200	850,000

Remittance and Debt.

34. The following account shews in a shortened form the requirements of the Secretary of State; the figures are drawn up so as to shew separately the transactions on account of Government, and the transactions arising out of the operations of Railway Companies:—

	Revised, 1898-99. £	Budget, 1899-1900. £
Requirements on Government Account—		
Excess of expenditure on Revenue Account	16,091,200	16,324,500
Expenditure not charged to Revenue	791,100	682,100
Net payments on Remittance Accounts, etc	225,400	268,800
Total Requirements	17,107,700	17,275,400
Transactions of Railway Companies—		
Net receipts on account of Capital	2,183,100	1 970,000
Payments for Stores, etc.	2,718,000	3,181,700
Net Outgoings	534,900	1,211,700
Net Funds required	17,642,600	18,487,100

35. The following figures shew the manner in which the above requirements have been or are to be financed:—

	Revised. 1898-99.	Budget, 1899-1900.
	£	£
By Council Bills (net Remittance) . .	19,000,000	17,000,000
By addition to Permanent Debt . .	1,912,800	...
Less reduction of Temporary Debt . .	—1,500,000	...
By reduction of Cash Balance . .	...	1,487,100
Deduct—Addition to Cash Balance .	—1,770,200	...
	17,642,600	18,487,100

36. In last year's Financial Statement I mentioned that the Secretary of State intended, besides renewing £6,000,000 outstanding temporary debt, to raise £6,000,000 permanent debt. This amount was raised in July in the form of India 2½ per cent stock, but it was issued at a considerable discount (namely at a rate of £88 10*s*. 5*d*. per cent), and produced only £5,297,700 in cash. With the money he discharged permanent debt to the extent of £3,384,900, so that the net amount raised by addition to sterling debt was £1,912,800. The Secretary of State has decided that the discount on the loan, *viz*., £702,300, shall not be charged upon the revenues of the year, but shall be discharged by a Sinking Fund at the rate of interest borne by the loan, *viz*., 2½ per cent, lasting over 50 years. There are already one or two Sinking Funds of the kind in connection with the sterling debt; £12,622 being the total charge appearing in the Accounts of 1897-98. The amount added by the new Sinking Fund is about £7,000.

37. The heavy drawings of the year, by Council Bills, enabled the Secretary of State to improve upon his intention of renewing the £6,000,000 outstanding temporary debt, and he renewed only £4,500,000 of it. The remainder of the excess of drawings went towards increase of the Cash Balance, which is estimated to stand, on 31st March 1899 at the unusually high figure of £4,304,400.

38. For next year, 1899-1900, the Secretary of State estimates to draw £17,000,000 by Council Bills, and though he does not estimate for any increase or decrease in either permanent or temporary debt, he considers that in view of the high balances which his Estimates, both Revised and Budget, show, he may find it possible to pay off some of the outstanding temporary debt.

39. In March last we estimated that we would have to raise a rupee loan of Rx. 3,000,000 in India, but as the time approached for our doing so, we found both that improved revenues had added to our resources, and the market was not favourable for so large a loan. We therefore limited our proposed loan to an amount of Rx. 1,200,000 under 3½ per cent conditions, and this amount was raised on August 24th at an average rate of R94 12½ annas per cent. The price remained about this figure for some months, but has recently advanced to over par.

40. We reckon that in India we shall be able next year to meet all the demands upon our Treasuries without raising any new debt, but it must be understood that all these announcements about the amount of contemplated remittances and loans are subject to the usual reservation of entire liberty to the Secretary of State to alter his plans as he may find occasion.

PROVINCIAL FINANCE, 1892 to 1899.

(The tabulated figures in this part are hundreds of Rx., that is, two ciphers are omitted.)

41. The progress of Provincial Finance is easiest studied by considering separately:—

First.—The amount of net Revenue, of which a definite portion settled by the terms of the "Contract" is at the disposal of the Provincial Government for its expenditure on Civil Administration.

Second.—The modification of this Provincial share of net Revenue, caused by special arrangements, different in each Province, in connexion with certain portions of Irrigation and Railway Administration, involving in some cases a small net outlay and in some a small net revenue.

Third.—The appropriation of the funds thus obtained towards the Provincial Expenditure, and especially the relation between the increase of expenditure and the increase of available funds.

42. The first figures to be set out are, therefore, the totals of the net revenues, that is, the revenues less expenditure directly charged against them. They are as follow, the figures being quite independent of any considerations as between Imperial and Provincial:—

Total Ordinary Revenues—

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.
Central Provinces	1,248,6	1,244,0	1,231,2	1,171,3	1,252,9	1,089,5	1,048,5	1,322,9	1,398,7
Burma (*a*)	3,643,3	...	...	...	...	...	3,948,2	4,147,0	4,012,8
Assam	814.0	842,9	962,5	992,1	1,003,4	1,015,3	995 8	1,047,3	1,047,3
Bengal	7,081,6	7,325,2	7,445,8	7,606 9	7,714,8	7,823,5	7,835,9	7,998,8	8,058,9
North-Western Provinces and Oudh	7,677,8	7,716,1	7,778,9	7,589,1	7,866,2	6,655,6	7,264,8	8,419,1	8,470,1
Punjab	3,060,1	3,133,8	3,261,1	3,223.5	3,290,5	3,224,3	3,409,8	3,561,8	3,530,4
Madras	6,817,1	7,106,2	7,460,2	7,645,6	7,719,3	7,478,8	7,863,2	8,015,5	7,988,0
Bombay (*b*)	5,412,1	5,489,1	5,646,1	5,550,6	6,018,2	5,367,0	5,625,2	5,950,2	5,943,0

(*a*) The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

(*b*) The figures relating to alienated Land Revenue, an entry peculiar to Bombay, are omitted from both sides.

43. The next statement shews the portion of these revenues which, according to the Provincial contract in each case, is credited to Provincial Account. The figures stand as follows, and it may be noted that the revision of the contract made with effect from 1897-98 onward, was such as to cause little change in the total of the Provincial share, except in the two Provinces of Bengal and Madras where it was reduced by Rx. 90,000 and Rx. 130,000 respectively, and in the North-Western Provinces where it was increased by about Rx. 120,000, namely, the cessation of a temporary reduction of Rx. 50,000, and a direct addition of about Rx. 70,000. (The figures are as they stand before the addition of the contributions from Imperial entered at the end of the table in paragraph 47 and the special grants-in-aid and expenditure therefrom of which mention is made in paragraphs 65 and 66 below) :—

Provincial Share of Revenues—

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.
Central Provinces	653,3	652,5	647,2	623,9	649,6	598,9	566,1	713,1	750,8
Burma (*a*)	2,604,1	...	...	...	...	...	2,768,5	2,891,8	2,822,5
Assam	477,1	500,3	549,7	556,4	566,0	575,9	564,3	620,0	626,3
Bengal	2,767,1	2,899,4	2,941,4	3,049,2	3,102,6	3,160,9	3,552,1	3,517,5	3,549,3
North-Western Provinces and Oudh	2,235,8	2,254,4	2,284,9	2,218,7	2,309,8	1,959,7	2,101,5	2,719,2	2,729,1
Punjab	1,382,6	1,414,0	1,451,2	1,440,0	1,476,8	1,4[illegible]3,5	1,571,3	1,631,2	1,611,6
Madras	2,368,7	2,491,0	2,587,9	2,653,5	2,676,7	2,627,1	2,558,5	2,655,7	2,632,4
Bombay	2,404,4	2,451,5	2,490,8	2,481,2	2,601,2	2,405,4	2,475,9	2,554,9	2,509,7

(*a*) The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

44. I offer some comments on these two statements, shewing them in parallel columns :—

	Total Imperial *plus* Provincial.	Provincial Share only.
Central Provinces.	Fairly continuous progress—a small drop in 1894-95 due, as the details shew, to failure of Land Revenue—Recovery in 1895-96. Then a serious loss of Revenue in the two famine years 1896-97 and 1897-98. But complete recovery in the early future is anticipated.	The Province obtained in the earlier years little or no margin of revenue beyond that allowed for in the Contract of 1892, and in the famine years there was very great loss as compared with that standard. If the anticipations for 1898-99 and 1899-1900 are realized, it will be very fairly off.
Burma .	No figures are here shewn for the years preceding 1897-98, the accounts having been completely changed in that year by the incorporation of Upper and Lower Burma as a single Province of account. The revenue is considerably in excess of that which was taken as the standard for the framing of the Provincial Contract of 1897. The falling-off in 1899-1900 is under "Forests," and may perhaps be due only to cautious estimating.	Revenue considerably in excess of the standard taken for the contract.
Assam .	Revenue steadily progressive. The effect of the earthquake in 1897-98 is shewn only in a slight slackening of the rate of progress.	Has all along enjoyed a considerable excess of revenue—at present nearly 30 per cent (Rx. 170 to 190 thousands) over the contract figure of 1892. But of this amount Rx. 33,000 represent a special addition made to meet the South Lushai expenditure transferred to Assam.
Bengal .	Also shews a steady progressive revenue. Owing presumably to the famine the progress from 1896-97 to 1897-98 was rather less than in other years. The falling-off was mainly under "Excise," as Land Revenue in Bengal is little subject to variation in consequence of famine.	The accounts of the Province were greatly affected by the withdrawal from the Province in 1897 of the extremely progressive revenue of the Eastern Bengal Railway the share of Revenue substituted therefor not being so progressive. Combining the ordinary revenue and the Railway account the figures stand thus:— Standard of 1892 . . 2,806,3 1892-93 . . . 2,962,4 1893-94 . . . 3,011,0 1894-95 . . . 3,193,2 1895-96 . . . 3,235,7 1896-97 . . . 3,328,0 1897-98 . . . 3,297,8 1898-99 . . . 3,238,7 1899-1900 . . . 3,267,0 which certainly may be called fairly progressive, the figures of the last two years being due in part, it may be hoped, to caution in estimating. The new contract, commencing from 1897-98, involved a reduction of about Rx. 90,000 in the Provincial share.

	Total Imperial *plus* Provincial.	Provincial Share only.
North-Western Provinces.	A fairly progressive revenue till the famine year, then a tremendous falling-off in Land Revenue (1896-97). Partial recovery in 1897-98 and in the following two years very high figures due to recovery of famine arrears.	The unequal operation of the Irrigation account and the change effected in it in 1897 renders it necessary to combine the figures for this Province as in the case of Bengal. They stand thus— Standard of 1892 . . . 2,215,4 1892-93 . . . 2,265,2 1893-94 . . . 2,314,5 1894-95 . . . 2,234,1 1895-96 . . . 2,170,3 1896-97 . . . 2,160,2 1897-98 . . . 2,432,4 1898-99 . . . 2,641,5 1899-1900 . . . 2,632,2 The story of these figures is shortly this,—At first a little improvement over the standard taken for settlement. In 1895-96 a failure of irrigation revenue, 1896-97 famine, and consequent failure of revenue. Thereafter the rapid recovery of the Province and the realizations of famine arrears of revenue bring in ample resources. The new contract, commencing from 1897-98, increased the assets by about Rx. 120,000.
Punjab .	Steady progress as reckoned over the whole period, but a slight set back in the famine year.	The same as in the other column.
Madras .	Shews a very progressive Revenue, the advance being only temporarily interrupted by famine.	Rapid increase of revenue up till the famine year—from that time figure fairly steady, but not advancing. The Provincial share from 1897-98 onwards would stand about Rx 130,000 higher but for the revision of contract which came into operation from that year.
Bombay .	An increase up to the famine year, then a considerable set back which has not yet been fully recovered.	The same remark as the first one in the case of Madras.

45. The sets of figures which I next shew are those relating to the Irrigation and Railway portion of the Provincial contracts, which I have described as coming in in modification of the amount of ordinary revenue otherwise at the disposal of the several Governments. The amount of modification thus imposed has, except in two cases, only slightly changed during the period under review, and the figures are, therefore, of no great importance except in the cases referred to, namely, Bengal and the North-Western Provinces, and these have been dealt with above:—

Railways and Irrigation Accounts—

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.

* The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

46. The next step is to examine the expenditure of the various Governments and observe how far they have kept the increase of it within the limits imposed by the increase of revenue. I shew separately the ordinary expenditure and the direct expenditure upon famine and plague.

47. The details are as follow, and the figures have to be compared with the general statement of available resources in the right column under paragraph 44 above :—

Expenditure Account—

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.

* The figure against Burma in the column " Contract, 1892 " represents the Contract of 1897.

48. *Central Provinces.*—The expenditure up to the famine year rose 2 or 3 lakhs (Rx. 20,000 or 30,000) above the standard of 1892; and since, as already observed, there was no margin of revenue, this resulted in the exhaustion of the ample balance, Rx. 205,400 with which the Province started. The strain of the famine year reduced the balance (apart from direct famine expenditure) still further to a deficit of Rx. 52,600 in 1896-97, and a further deficit of Rx. 204,100

in 1897-98, both of which were made up by grants from the Imperial Exchequer. The Province started in 1898-99 without any balance at all, and it is now expected that there will be a deficit in the year of Rx. 11,200, which must again be made up by a grant from Imperial Revenues. In 1899-1900 its estimated expenditure is well within its means.

The Province has taken practically no share of the cost of famine, which has been entirely Imperial—Rx. 1,640,245.

49. *Burma*.—Has not spent up to the rate of its increase of revenue, and has in consequence an ample and increasing balance. It is arranging now to expend part of the amount in meeting certain demands for Provincial Public Works, and has also made other proposals for expenditure on the public services.

50. *Assam*.—Had a comfortable balance, all along, of 10 lakhs (Rx. 100,000) more or less, keeping its increase of expenditure well up to, but not in excess of, its increase of revenue. The repair of earthquake damages imposed heavy charges in 1897-98 and 1898-99, which have largely exhausted the Provincial balance of Rx. 94,400 and absorbed also a grant of Rx. 160,000 by the Government of India; the balance being reduced for 31st March 1899 to about Rx. 25,000. In 1899-1900, after providing for absolutely necessary expenditure for Public Works and for the repair of earthquake damages, the estimates shew a deficit of Rx. 54,900.

The expansion of ordinary expenditure has been very considerable during the period under review.

51. *Bengal*.—The revenue of this Province, as above shewn, has afforded a margin for expansion of Provincial expenditure—namely, Rx. 2,806,300 in 1892 to (say) Rx. 3,300,000 in 1899-1900. The expenditure, however, was kept well in hand, so that the balance increased from Rx. 225,500 in March 1893 to Rx. 582,000 in March 1896. But this high balance sank to Rx. 92,200 two years later, as Rx. 518,400 out of it were spent in direct famine and plague charges. The ordinary expenditure in the two years now under estimate is taken at Rx. 3,141,600 and Rx. 3,272,000, which may be regarded as within the means of the Province, though it leaves a small deficit on the estimates of 1899-1900.

The Imperial Exchequer incurred famine charges in Bengal up to a total of Rx. 576,821 (about half of the total), but did not otherwise contribute by grants-in-aid to the resources of the Province.

The Province of Bengal has not had much plague expenditure to bear out of its own account, but we have made to it in 1898-99 a grant-in-aid of Rx. 20,000 which it will distribute to those Municipalities and Local Bodies whose funds have been most severely affected by expenditure on plague.

52. *North-Western-Provinces*.—The Province had the advantage of starting in 1892 with a large balance still remaining on the credit side, but the rate of its annual expenditure was in excess of its annual revenue (having been found by reduction of balances), and when in the year before the famine a very favourable monsoon caused a failure of irrigation revenue (an important item in North-Western Provinces finance), the Province found its balance on March 31, 1896, reduced below the stipulated minimum of 20 lakhs (Rx. 200,000), and, as already said, a rate of current expenditure in excess of its current revenue by between 10 and 15 lakhs. During the strain of the famine year nothing could be done to amend this state of things, and the balance was overspent by Rx. 263,600, the amount being accordingly made up by grants-in-aid out of the Imperial Exchequer in the two years 1896-97 and 1897-98.

Under these circumstances, the Province contributed nothing towards the direct famine expenditure, the whole of which, Rx. 2,064,025, was found out of Imperial resources.

For 1898-99 it stands, as explained, without any balance to its credit, and its estimates stand as follows:—

	1898-99. Rx.	1899-1900. Rx.
Revenue Accounts	2,641,500	2,632,200
Expenditure Accounts	2,421,500 (*a*)	2,607,700 (*b*)
Results	+220,000	+24,500

(*a*) Includes Rx. 19,800, Plague. (*b*) Includes Rx. 20,800, Plague.

The handsome surplus which comes in in 1898-99 is due to the recovery by the North-Western Provinces of the arrears of the revenue due in 1896-97 and 1897-98, in compensation for the loss of which Imperial made the grants-in-aid of Rx. 263,600 above alluded to. In the coming year, 1899-1900, the Government, North-Western Provinces, propose to increase their scale of expenditure all round to a rate which they will not be able to maintain after the arrear collections (which add some lakhs to the present scale of revenue) are exhausted and the revenue falls back to its ordinary amount.

In anticipation of this surplus of 1898-99 and 1899-1900 it was stipulated that the benefit of these arrear collections was (*quoad* the Provincial share) to be considered as not applicable to current expenditure, but to be reserved (to the extent of 75 per cent of it) for building up the exhausted Provincial balance. The Government, North-Western Provinces, have fulfilled this pledge, and are now appropriating these arrears to a temporary increase of expenditure bearing in mind the impending diminution in the amount of their annual income as compared with the figures of 1898-99 and 1899-1900.

53. *Punjab.*—The Province has all along proceeded on fairly prosperous lines. The balances which were continually diminishing before the famine year are now on the rise, and the expenditure is within the amount of revenue available. The Province escaped any severe share in the calamities of 1896 and 1897, and the Imperial expenditure on famine was less than 3 lakhs (Rx. 30,000), the Province itself contributing about 12 lakhs (Rx. 120,000) or, including " Local, " nearly 16.

54. *Madras.*—The expanding revenues of this Province have carried it through its period of disaster. It contributed moderately, that is, a total of a little over 20 lakhs (Rx. 200,000), towards its famine expenditure, the Government of India having undertaken all the rest (*viz.*, Rx. 732,995) so as to leave the Province with an opening balance of Rx. 71,800 in 1898-99. The Government of India further propose to make a grant to Madras of the amount of direct famine and plague expenditure incurred by it in 1898-99, namely, Rx. 20,700, and to estimate for next year a similar grant of Rx. 64,100. They also grant a further sum of Rx. 30,000 in 1898-99, placing the amount at the disposal of the Local Government for grants-in-aid to such Municipalities and Local Bodies as have been most affected by plague expenditure. With its famine and plague expenditure thus made up the Province shows a fair surplus on its transactions of 1898-99, and a small deficit in 1899-1900.

The detailed figures are:—

	1898-99. Rx.	1899-1900. Rx.
Revenue Accounts	2,655,700	2,632,400
Deduct—Railway and Irrigation Account	310,900	313,900
Net available Revenue	2,344,800	2,318,500
Proposed Expenditure, excluding Plague and Famine	2,266,300	2,331,200
Plague and Famine	20,700	64,100
TOTAL	2,287,000	2,395,300

55. *Bombay.*—The continuous advance of the expenditure of the Province while the advance of the revenue was entirely set back by the famine year, has brought a strain upon the finances, irrespective of the direct effect of famine and plague expenditure. The figures may be set out as follows :—

	Revenue Account as modified by Irrigation and Railway figures.	Ordinary Expenditure Account.	Excess of Expenditure.	
	Rx.	Rx.	Rx.	
1892 standard .	2,409,500	2,409,500		
1892-93 . .	2,410,100	2,434,000	6,200	
1893-94 . .	2,475,200	2,455,700		
1894-95 . .	2,480,000	2,526,500		
1895-96 . .	2,604,900	2,560,200		
1896-97 . .	2,403,200	2,588,900	185,700	
1897-98 . .	2,483,600	2,605,400	121,800	
1898-99 . .	2,560,800	2,534,600	26,200	(Excess of Revenue.)
1899-1900 . .	2,578,400	2,604,700	26,300	(Excess of Expenditure.)

The above figures exclude all direct Famine and Plague expenditure, and shew that the revenue and expenditure were in equilibrium for the first four years of the period under review, but that in the next two (the years of calamity), by reason of the falling-off in revenue, without an intermission of the increase in expenditure, the Provincial balance had to bear a reduction of Rx. 307,500.

The actual condition of the account till the end of 1897-98 was as follows :—

	Rx.	Rx.
Balance, March 31, 1892		407,000
Reduced by excess of ordinary expenditure—		
1892-93 to 1895-96	6,200	
1896-97	185,700	
1897-98	121,800	
		313,700
		93,300
Further reduction by direct famine and plague expenditure not included in the above—		
1896-97	35,400	
1897-98	191,500	
		226,900
Net over-expenditure of balance till 31st March 1898 . .		133,600
Cancelled by general grant-in-aid in 1897-98 of . . .		183,600
Leaving credit balance on 31st March 1898 of . .		50,000

The Revised Estimates for Bombay for 1898-99 show :—

Revenues Account	2,554,900	Surplus on ordinary account Rx. 26,200.
Irrigation and Railway Account . . .	+ 5,900	
Expenditure Account, excluding Plague and Famine	2,534,600	
Plague and Famine Expenditure . . .	354,800	

56. Putting the figures of the various provinces together, the following shews the facts up to March 31, 1898:—

Statement in Rx.	Famine and Plague Expenditure (direct). From Imperial sources.	From Provincial and Local sources.	Grants-in-aid by Imperial to Provincial.
Central Provinces	1,640,245	8,820	256,700
Burma	54,975	63,336	...
Assam	...	..	80,000 (a)
Bengal	576,821	553,951	...
North-Western Provinces	2,064,025	...	263,600
Punjab	27,502	157,920	...
Madras	732,995	228,601	...
Bombay	1,242,760	27,887	183,600

(a) For earthquake.

57. The Government of Bombay, both in respect of its Provincial account and in respect of its Municipalities, have been very hardly pressed by plague expenditure. They have submitted to us an examination of the financial condition of their principal Municipalities, and we have agreed to their giving out of their general revenues relief to their Municipalities to the extent of Rx. 228,078, of which the greater part goes to the City Corporation. Including this grant from their revenues, the Government of Bombay will have spent in direct charges of famine and plague—

	Famine. Rx.	Plague. Rx.	Total. Rx.
1896-97	24,000	11,400	35,400
1897-98	...	191,500	191,500
1898-99	24,800	330,000	354,800
Total			581,700

Out of the expenditure of the first two years, aggregating Rx. 226,900, the Provincial Government have met out of their ordinary revenues Rx. 43,300, and the balance Rx. 183,600 has been made up by special contributions by Imperial; in the same way its balance of Rx. 50,000, and Rx. 26,200, its surplus of 1898-99, fall far short of the charges Rx. 354,800 of 1898-99, and it is necessary for the Imperial Government to make a further grant-in-aid of Rx. 278,600 leaving the province, on April 1899, with an opening balance of *nil*. The total direct expenditure on plague and famine which has been borne by the province comes to Rx. 43,300 in the first two years and Rx. 76,200 in the last, or Rx. 119,500 in all.

It is anticipated that Rx. 126,400 of Plague expenditure will be incurred in Bombay in 1899-1900, and an equal amount of grant-in-aid from Imperial to Provincial has been estimated for in that year.

58. The grants shewn in the above paragraphs may be regarded as grants in the ordinary way of business, that is, grants made on the principle that in any case of extreme calamity, when Local aid has been exhausted, the charge must fall, as far as possible, on Provincial resources, and when they are exhausted the Imperial Government must bear the burden; and I think a liberal interpretation has been given to this Imperial responsibility, for we have taken over the direct Provincial expenditure on famine and plague of the two Provinces most affected by plague, without insisting upon their first defraying any part of it out of their own balances, and it is our desire at present to go still farther. On one or two past occasions, when Imperial finances have been subjected to great stress, we have called upon the Provincial Governments to give us aid out of their resources,

and under present circumstances, when Imperial finance by the recovery of exchange and from other causes is prosperous, and Provincial finance has been sore smitten by the consequences of famine and plague, we consider that a portion of our surplus cannot be better employed than in restoring the financial condition of the various provinces and relieving them from the financial difficulties which accompany the emergence from a state of famine and plague, so as to enable them to carry on their ordinary administration and meet their ordinary administrative necessities.

59. In the case of Bombay, though, as above described, we have made large grants towards the direct expenditure on famine and plague, yet the effect of these two calamities is still shewn in the falling-off in revenue and in indirect expenditure (on police and the like) which accompanies plague measures. We propose on these considerations to make to Bombay a grant of Rx. 150,000.

60. Bengal has not been affected by plague expenditure to anything like the same extent as Bombay ; but, on the other hand, its finances have suffered from the very large extent to which the famine expenditure was met from Provincial and Local resources. We propose to make to it a similar grant of Rx. 150,000. This is in addition to the assistance already undertaken to be given from Imperial sources towards the European General Hospital at Calcutta, and also in addition to Rx. 20,000 mentioned in paragraph 51.

61. In Assam the only immediate difficulties arise in connection with earthquake damages. Towards this we have already given Rx. 160,000, and the Chief Commissioner has asked for Rx. 67,500 more. We propose now to close this account by a grant of Rx. 100,000.

62. The accounts of the Central Provinces are weighted only in respect of the very small balance it at present possesses, and the Estimates of 1898-99, as already stated, produces a deficit of Rx. 11,200 ; we propose to make it a grant of Rx. 50,000.

63. The claim of Madras arises mainly in respect of the fact that, at the last revision of the Provincial contracts, a larger resumption of revenue was made from it than from any other province. We propose to make a grant to it of Rx. 100,000, besides the above mentioned grants for the Famine and Plague expenditure, namely, Rx. 50,700 in 1898-99 and Rx. 64,100 in 1899-1900.

64. Burma in our opinion requires no assistance, nor, if we make a strict reckoning, do the North-Western Provinces or the Punjab. But the expenditure in these two provinces has been limited by the consideration of their general financial position, and they have also had to bear some expenditure, both direct and indirect, upon plague. We propose to give to the former a grant of Rx. 100,000, and to the latter a grant of Rx. 50,000.

65. All these amounts will be granted in the accounts of the year 1898-99, and the same amount (less the excess expenditure in the Central Provinces, Assam, Bengal, Madras, and Bombay already provided for by the Provincial Governments in their estimates) will be entered in the Estimates of 1899-1900 as expenditure out of Provincial balances under the head of Civil Works,—not as an invitation to the several Local Governments to expend the amounts in that year, but as a permission to them to do so (by re-appropriation or otherwise), if on a consideration of their general financial position and of the necessity of keeping a balance in hand, they deem it advisable. The amounts thus entered include in the case of Bengal and Madras the payments they may make against the grants of Rx. 20,000 and Rx. 30,000 referred to in paragraphs 51 and 54. The Provincial Governments should, however, bear in mind that the grants now made are grants made once for all, and that it will be dangerous for them to take them as warranting any expenditure of a recurring character; also that the Government of India in making the grants admits against itself no liability to make

good to Provincial Governments the loss or expenditure incurred by them in respect of the kinds of expenditure to which it has had regard in assessing the distribution of the grants; but admits merely that as in times of Provincial financial prosperity it has called upon the provinces to come to the aid of the general exchequer, so in times of Imperial financial prosperity it is reasonable and expedient that it should depart from a strict interpretation of its financial relations to the Provincial Governments and aid them when at the same time they have had, and have, special financial misfortunes pressing on them. Perhaps I may refer in this connexion to paragraphs 127, 128 and 129 of Major Baring's (Lord Cromer's) financial statement of 1883.

66. These several free grants, as they may be called, are specially entered in the figures attached to the Financial Statement and are in addition to those entered at the end of the statement in paragraph 47. They are:—

	Rx.
Central Provinces	50,000
Assam	100,000
Bengal	150,000
North-Western Provinces	100,000
Punjab	50,000
Madras	100,000
Bombay	150,000
TOTAL	700,000

67. We have made fairly ample provision next year, namely, Rx. 126,400 in connection with the estimates of Bombay, Rx. 64,100 in Madras, and Rx. 209,500 not yet appropriated, for expenditure on combating the plague, which we may not unlikely have to meet in the future out of Imperial resources as we have done in the past. But we are not prepared, in a general way, to pay, out of Imperial resources, all the direct expenditure which the plague may cause, or to relieve Municipalities and other Local Bodies from the burden which necessarily falls upon them in respect of sanitary and medical expenditure caused by the approach or the advent of plague. Still less can we undertake to make up to Provincial Governments the excess expenditure which may have to be incurred under Police or in the other ordinary departments of Provincial Administration, or invite them to deal with ordinary administrative demands upon them with the same freedom which might be possible and even advisable, were we not all in the presence of a threatening calamity that necessitates our husbanding our resources as far as is possible.

TWENTY YEARS' FINANCE.

68. Following up a purpose which I set before myself in last year's Financial Statement, I published, contemporaneously with the Finance and Revenue Accounts of last year, a summary of these accounts for the twenty years ending March 31, 1898. The summary was necessarily a statement of figures only, with no attempt at criticism, and I desire here to give some continuous account of the results which the figures shew, and explain where our Revenue and Expenditure have during these twenty years increased or decreased. The plan I adopt is to take one set of figures as the standard of the Revenue and Expenditure at the beginning of the period (or rather, say, for the year 1879), and another set as representing the standard for 1896 (that is, before the famine burst on the land). These seventeen years may be taken as a period of practically continuous financial history.

69. For the first of these two standards I take the average of the figures of 1878-79 and 1879-80. If we eliminate the war figures of these two years, which

in a comparison such as the present ought to be excluded, we obtain the following figures:—

		1878-79. Rx.	1879-80. Rx.
Surplus or Deficit		+ 2,134,098*	− 1,227,893
War Expenditure, India		600,109	4,591,644
" England	£	76,110	174,480
Surplus if war be excluded		2,810,317	3,538,231

But we have still further to modify these figures by reason of the fact that they did not provide for the full famine liability of Rx. 1,500,000, the Famine Insurance being at the time in suspense, owing to the heavy war expenditure. This consideration adds Rx. 1,187,177 and Rx. 1,396,353 to the expenditure and reduces the surpluses to Rx. 1,623,140 and Rx. 2,141,878; or an average of Rx. 1,882,509.

That is, if we exclude consideration of war expenditure, and if we take Rx. 1,500,000 as the proper annual measure of famine liabilities, we had in 1879 a surplus of revenue of Rx. 1,882,500.

70. To find the similar figure for 1896, I take the figures of the Budget of that year which may be taken as expressing the standard of Revenue and Expenditure at the time. They are as follows, namely:—

		Rx.
Revenue in India (Budget)		97,316,800
Expenditure, England, net (Budget)	£	15,735,300
Exchange (according to rate actually realized)		10,222,300
India (Budget), less Rx. 20,000 war		69,368,500
Add—Amount wanting to make up Rx. 1,500,000 Famine Insurance		500,000
Total		95,826,100
Surplus of Revenue		1,490,700

71. We have therefore, comparing the standard of 1879 with that of 1896, a slightly worse position in the latter of the two years. I have made a careful analysis both of the increase of Revenue and of the increase of Expenditure between the two years, and I find it to be as follows:—

Imperial Account.

	Rx.	Rx.	Rx.
Increase of Revenue under Salt, Customs, Tributes and Miscellaneous	...	3,810,000	
Imperial Share of Increase of Revenue under Revenues provincially administered	...	5,429,400	
Increase of net Revenues under Post Office, Telegraph, and Mint	...	457,400	
Improvements under Debt Services, Railways, and Irrigation (excluding consideration of exchange)	6,327,500		
Deduct—Loss by exchange charged against Railway Liabilities	2,608,300		
		3,719,200	
Famine Insurance reduced in account by transfer to the preceding head of charges for interest on Indian Midland and Bengal-Nagpur Railways	...	401,500	
Cessation of Railway Construction out of Revenue	...	845,800	
Total available Improvement	...	...	14,663,300

Absorbed as follows:—	Rx.	Rx.	Rx.
Deterioration of Opium Revenue	...	3,679,800	
Addition to charges for exchange. (Rate diminished from 19·85 pence to 14·45 pence)	7,337,300		
Deduct—Amount taken to Railway Account	2,608,300		
		4,729,000	
Deficit on Civil Administration of Upper Burma	...	455,300	
Army Services: net Charges increased from Rx. 16,693,700 to Rx. 22,167,800 (irrespective of exchange)	...	5,474,100	
Charges under "Political" increased from Rx. 427,100 to Rx. 898,700	...	471,600	
Civil and Miscellaneous charges in India increased from Rx. 1,189,200 to Rx. 1,541,300	352,100		
Less—Savings by decrease under Assignments and Territorial Pensions and Stationery	223,800		
		128,300	
Sterling Expenditure other than Army, Debt Services, and Railways increased (excluding exchange) from £2,486,400 to £2,920,200	...	433,800	
Total	...	...	15,371,900
Excess of demand over available means	...	...	708,600

Provincial Account.

Increase of Provincial share of Revenue under Revenues provincially administered (*a*)	...	4,102,700	
Increase in net charges for Provincial Civil Administration from Rx. 14,374,900 to Rx. 18,160,800	...	3,785,900	
Balance of increase of Revenue not absorbed	...	...	316,800

(*a*) That is, ¼ of Land Revenue and of Excise: ½ of Assessed Taxes, Forest, and Registration: ¾ of Stamps.

The deterioration on Imperial Account, Rx. 708,600, less the improvement on Provincial Account, Rx. 316,800, gives a net deterioration of Rx. 391,800, namely, a reduction in the surplus of Revenue from the standard of Rx. 1,882,500 in 1879 to that of Rx. 1,490,700 in 1896.

72. This list shews that the resources made available by increased revenue and careful administration have practically been absorbed by (1) Loss of Opium Revenue, (2) Increase of Exchange Charges, (3) Increase of Military Expenditure, (4) Increase of Political Expenditure, (5) Increase of Provincial Expenditure, *i.e.*, of charges of Civil Administration, (6) Net Charges on account of Upper Burma.

73. On the first two of these no remark need be made here; they are misfortunes we have had to accept. The last may also be passed over without remark; the occupation of Upper Burma was a measure forced upon us by

political necessity, apart from any question of finance. The Province will, we trust, shortly meet the expenses of its civil administration, but naturally it does not as yet fully pay its way. The other three heads call for special explanation.

74. The subject of Military Expenditure is too vast to be entered on in detail. A general explanation of its increase was given by Sir Henry Brackenbury in the Budget Debate of 26th March 1896 and by Sir Edwin Collen on the same date in 1897. In respect of their military charges the Government of India feel the same necessity which presses upon all other Military Powers, and which has imposed upon even the most pacific nations increased burdens. Both our military system in its details and our general military and defensive policy are closely linked with those of England; and we cannot escape the necessity of increasing our defensive expenditure in the same way, though not perhaps to the same extent, that England does.

75. In illustration of this point I present the following figures; the English ones are taken from the Statistical Abstract of the United Kingdom, 1882 to 1896, pages 10 and 11 :—

	Defensive Expenditure, United Kingdom (a)			Defensive Expenditure, India (b)
	Army.	Navy.	Total.	Army and Military Works.
	£	£	£	Rx.
1882-83	15,133,451	10,259,853	25,393,304	16,928,587
1883-84	16,095,326	10,728,781	26,824,107	18,079,134
1884-85	18,600,338	11,427,064	30,027,402	16,955,165
1885-86	17,027,084	12,660,509	29,687,593	17,340,369
1886-87	18,429,272	13,265,401	31,694,673	19,413,293
1887-88	18,167,196	12,325,357	30,492,553	20,548,766
1888-89	15,919,738	12,999,895	28,919,033	20,305,140
1889-90	17,345,812	13,842,241	31,188,053	20,511,504
1890-91	17,550,023	14,125,358	31,675,381	20,821,160
1891-92	17,258,900	14,150,000	31,408,900	22,570,532
1892-93	17,541,700	14,302,000	31,843,700	23,705,932
1893-94	17,939,700	14,048,000	31,987,700	23,537,693
1894-95	17,899,800	17,545,000	35,444,800	23,966,973
1895-96	18,459,800	19,724,000	38,183,800	23,976,714
1896-97	18,269,800	22,170,000	40,439,800	24,384,447

(a) Excluding Expeditions and Naval Defence Fund.

(b) Excluding Special Defences and the following Expeditions: (1) Egypt, (2) Quetta, (3) Burma, (4) Chin-Lushai, (5) Chitral.

76. The result of these figures is to shew that while the Defence Expenditure in the United Kingdom has increased by 59 per cent, that in India has increased by only 44 per cent, even including the increase due to the fall of exchange, which affects Indian Military Expenditure in a special degree, owing to the large proportion of it that is measured by a sterling standard. The statement of expenditure in the United Kingdom is free from disturbance by this cause; while, on the other hand, the increase of Indian expenditure includes Rx. 2,526,000 directly due to this cause alone; and if this amount were excluded, the percentage of increase would be reduced to 29.

	£
Net English Expenditure	4,000,000
British Soldiers' pay	1,590,000
Total	5,590,000
	Rx.
Difference of exchange 19·85d. and 14·45d.	2,526,000

77. The two most recent measures causing considerable increase of Military Expenditure were the raising of the pay of native soldiers in 1895, and of that of British soldiers in 1898. The former of these concessions had been delayed on financial grounds for a length of time which all our military advisers considered to be open to objection. The second measure, the increase of British soldiers' pay, is the

result of the determination of Her Majesty's Government on a question of general imperial policy.

78. Under the head of Political Expenditure, the increase measured by percentage is even more considerable; in amount it is Rx. 471,600. A few remarks will shew that this increase has been caused solely by the necessities of external policy. Two-fifths of the whole amount arises from the one item of Rx. 180,000 for the subsidy of His Highness the Amir of Afghanistan; and the Afghan Refugees cost at least Rx. 60,000 more. The period under consideration, moreover, has witnessed the rise and development of the Baluchistan Agency, which now accounts for Rx. 130,000 of the outlay charged under this head; the appointment of an Agent on the Perso-Afghan Frontier (Rx. 13,000); the occupation of the Gilgit and Chitral Frontier (Rx. 16,000); and considerable new expenditure, say, Rx. 40,000, in controlling the tribes and employing levies along the North-Western Frontier. The head "Political" contained also in 1896 Rx. 14,000 expended on the African Coast of the Gulf of Aden (the corresponding revenues are under Miscellaneous), and the scheme of Imperial Service Troops has caused a further increase of Rx. 22,000.

79. I pass to the figures shewn against Provincial (including Local) net expenditure, which has increased during the period under review from Rx. 14,374,900 to Rx. 18,160,800. These are the charges of Civil Administration generally, and under such heads increasing outlay is not only justifiable but inevitable, in every country in which civilization is not stationary or retrograding. The system of Provincial finance is based on the theory that the increase in the Provincial share of the Revenues can be set aside for increase of expenditure upon Civil Administration, and that, if the increase is kept within this limit, we have by this limitation, under ordinary circumstances, sufficiently taken into consideration the financial difficulties arising from falling exchange, from the necessities of Military and Political Expenditure, from wars and famines. We proceed, therefore, on the assumption that there is no objection to the Provincial share of the normal growth of Revenue being, as fast as it accrues, spent on administrative improvements. As has often been pointed out, a Provincial Government can do nothing with its money except spend it; it cannot, for example, utilize a surplus for remission of taxation.

Conclusion.

80. The statement which I have laid before the Council exhibits, I think, a very favourable condition of Indian Finance. Some of these favourable elements are, I admit, temporary only, and due in a large measure to a specially active trade, others however are permanent and betoken the return of the prosperity and progress which I noted in my statement of March 1896, and which were so rudely interrupted by the outbreak of famine. The plague, though it is a great anxiety to both Imperial and Provincial Administrations, it is, financially speaking, well within our power to cope with, and as the first responsibility for the measures taken in connexion with it rests with the Provincial Administrations, I have been particular to examine the position of the Provincial Financial Accounts, and trust that the measures of relief and assistance sanctioned by the Government of India and set out in the statement will enable them to face the difficulties in which they are placed, though I take for granted they do not claim relief from their share in the anxieties which are inseparable from financial administration in India.

PART II.

DETAILS OF THE ACCOUNTS AND ESTIMATES.

Section I.—The Accounts of 1897-98.

81. The Revised Estimate of 1897-98 was framed for a deficit of Rx. 5,283,100; in the closed Accounts this figure rises to Rx. 5,359,211, or Rx. 76,111 worse than was anticipated when the Revised Estimate was framed. *Accounts of 1897-98.*

The variations between the figures finally entered in the Accounts of the year and those assumed for the purposes of the Budget and the Revised Estimate are explained in the Appropriation Report published in the *Gazette of India* of the 18th instant.

The following statement compares the Revised Estimates with the Accounts of the year:—

		Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
REVENUE.					
India	Rx.	96,262,000	96,139,287	...	122,713
England	£	192,000	193,662	1,662	...
Exchange	Rx.	107,500	109,055	1,555	
TOTAL .	Rx.	96,561,500	96,442,004	...	119,496
EXPENDITURE.

Imperial, Provincial, and Local	Rx	77,136,300	76,939,069	197,231	...
Adjustment of Provincial and Local Surplus or Deficit .	Rx.	—705,700	—457,678	...	248,022
NET . .	Rx.	76,430,600	76,481,391	...	50,791
England	£	16,291,000	16,198,263	92,737	...
Exchange	Rx.	9,123,000	9,121,501	1,499	...
TOTAL .	Rx.	101,844,600	101,801,215	43,385	...
DEFICIT .	Rx.	—5,283,100	—5,359,211	...	76,111

82. The Revenue in India was less than the sum anticipated in the Revised Estimate by Rx. 122,713, and the Expenditure finally chargeable against that Revenue, after making allowance for the adjustment of the sums by which Provincial and Local Revenues were in surplus or deficit, exceeded the forecast by Rx. 50,791. In India, therefore, the Accounts as a whole turn out worse than the Estimate by Rx. 173,504. Against this must be set an improvement in Revenue in England of Rx. 3,217, and a decrease in Expenditure in England of Rx. 94,176—in all Rx. 97,393, including exchange. The sum of Rx. 76,111, being the difference between the results obtained in India and England, represents the total falling-off in the Accounts as compared with the Revised Estimate of the year. *1897-98. General Results.*

83. The Land Revenue actually realised fell short of the Revised Estimate by Rx. 248,658. In the North-Western Provinces the collections were over-estimated by Rx. 157,820, and in Bombay by Rx. 104,384; while in Burma a sum of Rx. 46,270 was collected in excess of the Estimate. Owing to the fact that the largest instalment of Land Revenue falls due towards the close of the financial year, there is at all times a difficulty in making a precise forecast of the March collections, and in the past year the Estimate was also indirectly affected by the *1897-98. Revenue in India.*

famine, which left it uncertain to the last moment to what extent it would be possible to enforce any given measure of compliance with the revenue demand of the year.

The Opium Revenue proved worse than the Estimate by Rx. 62,528, due to a decline in the exports of Malwa Opium to China. On the other hand, the realisations under Customs show an improvement of Rx. 63,895, and the Railway Revenue rose by Rx. 90,857 owing to a slight increase of traffic on some of the Railways towards the close of the year.

1897-98. Expenditure in India.

84. On the Expenditure side the outlay on Famine Relief during the last weeks of the year was less by Rx. 66,112 owing to the cessation of operations earlier than had been anticipated. In the Railway Revenue Account there was a saving of Rx. 125,704 on the Revised Estimate mainly under Working Expenses. Army Expenditure shows an excess of Rx. 62,239 due to increased payments to Native Troops on account of compensation for dearness of provisions and forage.

1897-98. Revenue and Expenditure in England.

85. The reduction in Expenditure in England of £92,737, or including Exchange Rx. 94,176, consists for the most part of a saving under Army Charges of £67,773. The increase in Revenue in England comes to the trifling sum of £1,662, or including Exchange Rx. 3,217, and consists mainly of recoveries on account of stores.

86. The Expenditure not charged to Revenue amounted to Rx. 4,328,541 as compared with Rx. 4,604,600 entered in the Revised Estimate.

Section II.—Revised Estimate of 1898-1899.

1898-99. Statement of the gross figures.

87. The following is a general comparison of the Budget Estimates with the Revised Estimates of 1898-99:—

		Budget.	Revised.	Revised, better.	Revised, worse.
REVENUE.					
India	Rx.	98,791,700	101,217,400	2,425,700	
England	£	188,300	232,500	44,200

SURPLUS .	Rx.	891,400	4,059,400	3,168,000	

1898-99. General features.

88. The leading characteristic of 1898-99 is the rapid recovery of the revenue from the effect of the unfavourable conditions prevailing in the two preceding years. Under all heads of Revenue, except Stamps and Registration, the sums actually realised are largely in excess of the forecast framed a year ago. The general prosperity of the people has added to the receipts under Salt and Customs; abundant harvests have increased the Railway Revenue; Opium has sold for higher prices and has cost less to produce; the burden of famine

relief has been removed; military expenditure has been reduced earlier and to a larger extent than was anticipated; and the charge for exchange has been less by a crore of rupees than that assumed in framing the Budget. The only adverse feature is the revival and extension of plague which has increased the medical expenditure in every Province and injuriously affected some branches of revenue.

1898-99. General Results.

89. The Revenue in India is expected to exceed the Budget Estimate by Rx. 2,425,700, and besides this there will be a reduction of expenditure of Rx. 1,006,800 made up of Rx. 518,600 under Army, Rx. 305,200 under Opium, and Rx. 208,500 under Public Works—Buildings and Roads. Of this total improvement in India of Rx. 3,432,500, Rx. 1,534,700 occurs under Provincial and Local, and Rx. 1,897,800 under Imperial. The Revenue in England shows an increase of £44,200, and the Expenditure a decline of £151,100. Adding to these a reduction of the net charge for exchange by Rx. 1,074,900, the final result is an increase of the surplus of the year by Rx. 3,168,000 from Rx. 891,400 to Rx. 4,059,400.

1898-99. Increase of Revenue in India.

90. The more important increases of Revenue in India occur under the following heads:—

	Rx.
Land Revenue	111,200
Opium	349,600
Salt	319,200
Provincial Rates	92,100
Customs	307,900
Forests	102,400
Miscellaneous	102,100
Railway Receipts	884,200
Irrigation Major Works	193,200

1898-99. Land Revenue.

91. The increase of Rx. 111,200 in the collections of Land Revenue includes the following amounts in excess of the Estimate:—

	Rx.
Burma	100,800
North-Western Provinces and Oudh	52,000
Bombay	33,600

In Burma the continuous expansion of cultivation induced by a fertile soil and light settlements and the revision of assessment-rates have added to the ordinary revenue, and the yield of the Capitation Tax has been raised by the natural increase of population. In the North-Western Provinces and Oudh large sums are expected to be realised on account both of ordinary arrears and of revenue suspended during the famine. The enhanced collections in Bombay include arrears due to plague in some districts and to bad seasons in others; while in Sind the revenue has been raised not only by these causes, but by a favourable inundation greatly extending the area under spring crops.

Account must also be taken of the following decreases:—

	Rx.
Madras	32,100
Central Provinces	35,000
India	10,900

The decrease in Madras is due to a fall in the sales of lands benefited by the Periyar Irrigation Scheme in Madura; the Central Provinces figures are affected by suspensions of revenue and smaller recoveries of arrears; and the decline under India General is caused by the failure of the rains and general scarcity in Ajmir, and by drought, locusts, and low prices in Baluchistan where the Land Revenue is collected in produce.

92. Although the collections of Land Revenue in 1898-99 are expected to exceed the Budget Estimate, the Imperial share of the total collections will be considerably less by reason of the special contributions given in aid of Provincial resources which involve a re-adjustment of the Imperial and Provincial shares of the revenue.

The following table compares the respective shares as they appear in the Budget and Revised Estimates :—

	Land Revenue, Budget of 1898-99.		Land Revenue, Revised Estimates of 1898-99.	
	Imperial share.	Provincial share.	Imperial share.	Provincial share.
	Rx.	Rx.	Rx.	Rx.
Distribution according to Provincial Settlement	16,237,900	11,330,300	16,264,300	11,415,100
Add or *Deduct*— Special contribution in aid of Plague and Famine expenditure and of General Resources of Provincial Governments	—150,000	+ 150,000	—1,129,300	+1,129,300
Distribution according to Estimates	16,087,900	11,480,300	15,135,000	12,544,400

The contribution of Rx. 150,000 entered in the Budget Estimate of 1898-99 includes Rx. 80,000 granted to Assam in aid of expenditure incurred on the repair of Earthquake damages, and Rx. 70,000 to Bombay in aid of Plague expenditure. The amount in the Revised, Rx. 1,129,300, is made up as follows :—

	Rx.
General contribution in aid of Provincial resources as stated in paragraph 66 of this Statement	700,000
Special contribution in aid of Earthquake expenditure in Assam	80,000
Special contribution in aid of Plague expenditure by Local Bodies in Bengal	20,000
Special contribution in aid of Famine and Plague expenditure in Madras (Provincial and Local)	50,700
Special contribution in aid of Famine and Plague expenditure in Bombay	278,600
TOTAL	1,129,300

1898-99. Opium Revenue.

93. The receipts from Opium in Bengal are likely to exceed the estimate by Rx. 264,500, the bulk of which represents the difference between R1,000 a chest, the price assumed in the Budget for Bengal Opium, and R1,055, the average actually realised. At the same time the quantity sold during the last three months of the year has risen by 450 chests, representing an increase in revenue of Rx. 51,600. More favourable conditions in the China market, aided by the reduction of the pass-duty on Malwa Opium from R600 to R500 per chest, which took place in October 1897, seem to have brought about a substantial recovery of the trade, though the exports have as yet hardly returned to the

level at which they stood before the great decline of 1896-97 and 1897-98. The result is an increase in the receipts over the estimate of Rx. 84,000.

94. Of the increase of Rx. 319,200 under Salt, the sum of Rx. 215,000, which has been realised in Madras, represents mainly the recovery of revenue deferred under the credit system from the previous year. The revenue brought to account during the year has probably also been to some extent enhanced by the fact that the rise in the price of Government paper during the last few months has tended to discourage resort to the credit system and to stimulate cash sales. *1898-99. Salt Revenue.*

The receipts of the Northern India Salt Department show an increase of Rx. 52,200 due partly to normal development, but mainly to the revival of trade in Kohat salt consequent on the pacification of the frontier.

95. An increase of Rx. 23,200 in Bengal is due to the receipts under Local having been under-estimated in the Budget. In the North-Western Provinces Rx. 17,100 and in Madras Rx. 22,900 have been added in the collection of arrears, and in Bombay the increase of Rx. 17,600 has followed the rise in Land Revenue. *1898-99. Provincial Rates.*

96. Of the rise of Rx. 307,900 under Customs, Rx. 199,100 occurs in Burma, —Rx. 66,200 under Imports, chiefly Manufactured Articles, Liquors, and Articles of Food and Drink, and Rx. 130,000 under Export Duty on Rice. Bengal accounts for Rx. 105,000 distributed over Articles of Food and Drink, Silver Bullion and Coin, Oils, and Liquors; and Bombay shows Rx. 37,000 comprising considerable increases under Oils, Liquors, Silver Bullion and Coin, Articles of Food and Drink, and Excise on Cotton Goods, and substantial decreases under Manufactured Articles and Import Duty on Cotton Goods. A decline of Rx. 34,200 in Madras occurs under Spirits and Liquors, Imported Cotton Goods, and Miscellaneous Exports. *1898-99. Customs Revenue.*

97. The increase of Rx. 102,400 under Forests is made up of a rise of Rx. 199,500 in Burma, mainly due to the large demand for, and high market value of teak timber, which has added Rx. 111,500 to the royalty paid by the Bombay-Burma Trading Corporation for the forests from which they derive their supplies. The increase also includes a sum of Rx. 12,000 paid by the same Company in connection with mal-practices committed by their employés. A reduction of Rx. 71,400 in Bombay is ascribed to the depression in trade caused by the continuance of plague, and to the smaller demand for locomotive fuel in Sind and for forest produce in general. *1898-99. Forest Revenue.*

98. The increase of Rx. 102,100 under Miscellaneous Revenue includes one sum of Rx. 57,400 recovered from the Burma Railway Company for the value of work done by famine labour on the Meiktila-Myingyan Railway, and another of Rx. 37,500 realised in Madras by the sale of cloth manufactured at Government expense during the recent famine in order to afford relief to weavers in distress. *1898-99. Miscellaneous.*

99. The great rise of Rx. 884,200 in Railway Revenue in India is mainly due to the general development of traffic of all kinds which results directly and indirectly from the opening of new sections of line, and to the large export of grain which was rendered possible by the harvesting of good winter crops. The more important increases occur on the following lines:— *1898-99. Railway Revenue.*

	Rx.
North-Western	310,000
Great Indian Peninsula (net)	416,000
Bombay, Baroda and Central India (net)	210,000
East Indian	200,000
Rajputana-Malwa	160,000

and the more important decreases on the following :—

	Rx.
Eastern Bengal	110,000
Southern Mahratta	115,000
South Indian	70,000
Mysore	55,000
East Coast, including Bezwada-Madras	60,000
Madras (net)	55,000

The reduction on the Eastern Bengal State Railway was due to a short jute crop, and that on the Railways in Southern India to the effect of plague on the passenger traffic. The falling-off on the East Coast Railway was caused by delay in opening the Bezwada-Madras Section.

1898-99. Irrigation Revenue.

100. The increase of Rx. 193,200 in Irrigation Revenue is distributed as follows :—

	Rx.
North-Western Provinces and Oudh	56,200
Punjab	120,800
Other Provinces	16,200

In the North-Western Provinces the area irrigated during the past *Kharif* season was larger than had been anticipated. A similar expansion of irrigation occurred on the Bari Doab, Sirhind, and Swat River Canals in the Punjab and on the Deccan and Guzarat Canals in Bombay, while in Sind a better supply of water produced an enhanced demand. The receipts were also raised by the recovery of outstanding balances on the Western Jumna Canal and in the Deccan and Guzarat.

1898-99. Telegraph Revenue.

101. The only decrease of any moment in the revenue of the current year occurs under the head of Telegraph Receipts, which show a falling-off of Rx. 154,800 made up as follows :—

	Rx.
Indian Telegraph	114,400
Indo-European Telegraph	40,400

The falling-off under the former head is due partly to the cessation of military operations on the North-West Frontier, but chiefly to the fact that, since the practice of delivering deferred telegrams by hand instead of sending them by post has been introduced, this class of message has gained greatly in popularity, and has to a considerable extent taken the place formerly occupied by ordinary and urgent messages. The decline in the Indo-European receipts occurs in the message traffic with the Indian Telegraph Department transferred at Karachi.

1898-99. Increases of Expenditure in India.

102. The more important increases of expenditure in India are :—

	Rx.
Medical	327,800
State Railways: Working Expenses	106,100
Guaranteed Companies: Surplus Profits, Land, and Supervision	106,100
Mint	49,000

1898-99. Medical Expenditure.

103. The large increase under Medical is due to the impossibility of making an accurate forecast of the expenditure required to guard against the spread of the plague in new directions, and to combat the disease where it has once become established. The cost of these operations continues to be far heavier in Bombay than elsewhere, and out of the total increase of Rx. 327,800 in the expenditure entered under Medical no less than Rx. 268,200 has been incurred in that province. The following statement gives an estimate of the cost in each province under Imperial, Provincial, and Local heads of the preventive and remedial

measures undertaken in 1896-97, 1897-98, 1898-99, and contemplated in 1899-1900:—

Statement of direct and indirect expenditure connected with the plague under the various heads of Accounts for the years 1896-97, 1897-98, 1898-99, and 1899-1900.

TOTAL	227,600	17,800	13,800	25,800	5,500	147,700	179,400	617,600
GRAND TOTAL, FOUR YEARS	258,200	41,200	70,000	79,900	69,200	212,700	839,600	1,570,800

104. The Statement illustrates the gradual spread of plague since its first appearance in Bombay in 1896-97. In that year the measures undertaken to check the progress of the disease cost Rx. 23,700, of which Rx. 18,100 was spent in the area where it was actually prevalent, the balance representing outlay on railway inspection and similar measures designed to guard against its extension to provinces not then infected. In 1897-98 the total expenditure rose to Rx. 348,600, including Rx. 252,000 in Bombay and Sind. In addition to this, Bengal devoted Rx. 32,200 to the development of protective measures on lines of railway and to watching arrivals from infected areas; the North-Western Provinces and Oudh spent Rx. 25,900 in suppressing the outbreak of plague at Hardwar; and the Punjab spent Rx. 15,400 on preventive operations in the districts of Jullundur and Hoshiarpur. In 1898-99 there was a further increase of the total expenditure, as shown in the Revised Estimate, to Rx. 580,900, including Rx. 390,100 in Bombay, Rx. 58,300 in Madras where the plague has appeared in several districts, Rx. 48,100 in the Punjab, Rx. 27,400 in the North-Western Provinces, Rx. 19,600 in Bengal where protective arrangements were maintained and an outbreak occurred in Calcutta, and Rx. 20,200 under India General which includes the cost of combating the outbreak in Bangalore.

105. The estimate for next year amounts to Rx. 617,600, and provides for an increase of expenditure in Madras from Rx. 58,300 to Rx. 147,700; while the charges in Bombay are taken at Rx. 179,400, or Rx. 210,700 less than the Revised figures of the current year. A provision of Rx. 209,500 has been made under India General in order to meet requirements which cannot now be foreseen.

106. During the four years covered by the Statement the total expenditure by Government and District Funds in India amounts to Rx. 1,570,800, to which must be added £22,560 (including Exchange Rx. 34,862) spent in England on payments to doctors and nurses engaged for service in India. Even where plague itself has not appeared the necessity of maintaining inspection camps on the chief lines of communication imposes a severe burden on Provincial finances and strains the resources of the medical staff. The Statement takes no account of the heavy expenditure incurred by Native States and Municipalities except in so far as it includes grants made by the Bombay Government in aid of municipal outlay on plague.

The expenditure from the Home Treasury on account of pay, passage, etc., of medical officers and lady nurses in each of the four years has been or will be as follows:—

	Sterling. £	Exchange. Rx.	Total. Rx.
1896-97	1,013	669	1,682
1897-98	11,247	6,333	17,580
1898-99 (Revised)	5,300	2,700	8,000
1899-1900 (Budget)	5,000	2,600	7,600
TOTAL	22,560	12,302	34,862

1898-99. State Railways: Working Expenses.

107. The rise in the Working Expenses of State Railways represents for the most part the cost of earning the increased revenue mentioned in paragraph 99 above. It is due chiefly to the heavier traffic worked, the greater lengths of mileage open, and to more extensive renewals of stock and permanent-way. Some lines have also had to provide for special repairs of the damage caused by the earthquake of 12th June 1897 and by floods. The more important increases occur on the following Railways:—

	Rx.
East Indian	190,000
Rajputana-Malwa	90,000
Assam-Bengal	36,000

These are, however, to some extent counterbalanced by a decrease in the Working Expenses of the other lines noted below :—

	Rx.
North-Western	100,000
East Coast, including Bezwada-Madras	40,000
Southern Mahratta	35,000
Mysore	23,000
Oudh and Rohilkhand	20,000

108. The increase of expenditure under Surplus Profits, Land, and Supervision is made up of an increase under Surplus Profits of Rx. 197,200 and a decrease under Land and Supervision of Rx. 91,100. Under the former head no provision was made in the Budget Estimate for the payment of surplus profits to the Madras Railway Company, and the goods earnings of the Bombay, Baroda and Central India and the Great Indian Peninsula were under-estimated. The charges under Land and Supervision are reduced owing to less land being taken up for the Calicut-Cannanore Branch in Madras and certain minor lines in Bombay than had been originally expected. *1898-99. Guaranteed Companies: Surplus Profits, Land, and Supervision.*

109. The increase in Mint expenditure occurs partly under temporary establishment and overtime allowances for the recoinage of Bhopal and Kashmir rupees—an outlay more than counterbalanced by an increase in the Mint receipts. But the major portion of the increase is due to a loss of Rx. 40,000 on copper coinage in 1898-99. The gain or loss on copper coinage represents the difference between the face value of the coins actually put into circulation and the cost of making and distributing them. Of the enormous quantity of copper coin issued in the famine years for relief payments, a large proportion is now returning from circulation because it is in excess of the normal requirements of the people. The Estimate provides for the resulting loss on the coins so returned. *1898-99. Mint Expenditure.*

110. The more important decreases of expenditure occur under the following heads :— *1898-99. Decreases of Expenditure in India.*

	Rx.
Land Revenue	59,600
Opium	305,200
Salt	53,400
Education	60,300
Political	83,000
Subsidised Railway Companies: Land and Subsidy	81,200
Civil Works	208,500
Army	518,600

111. The decrease of Rx. 59,600 under Land Revenue occurs for the most part under the heads of Salaries, Exchange Compensation Allowance, Establishments, and Savings under Survey and Settlement in the North-Western Provinces, the Punjab, and Burma. The decrease of Rx. 15,400 in Madras is mainly under Local, and arises from delay in giving effect to a scheme for raising the pay of village accountants. *1898-99. Land Revenue Expenditure.*

112. Under Opium the reduction of Rx. 305,200 in the estimated expenditure is almost wholly under Payments to Cultivators, which vary from year to year with the yield of the crop. The greater part of it occurs in Behar, where the sums likely to be required seem to have been greatly over-estimated. *1898-99. Opium Expenditure.*

113. Of the decline of Rx. 53,400 under Salt, Madras accounts for Rx. 25,100, more than half of which is under the Purchase and Freight of Salt. A decrease of Rx. 12,500 in Bengal is due to the whole of the Preventive Staff sanctioned for Orissa not having been appointed during the year. A similar decline in the expenditure of the Northern India Salt Department is due to smaller payments of salaries, reduction of charges for manufacture, and to the abolition of the Indus Preventive Line. *1898-99. Salt Expenditure.*

1898-99. Education Expenditure.

114. The decline of expenditure on Education is largest in Bengal (Rx. 17,200), owing to the charges on account of salaries being over-estimated, and in Bombay (Rx. 12,700) where the outlay was affected by the prevalence of plague.

1898-99. Political Expenditure.

115. Of the reduction of Rx. 83,000 under Political Expenditure, more than half is due to the subsidy to the Amir of Kabul not having been drawn in full. An apparent saving is also caused by the charges for the escort of the Burma-China Boundary Delimitation Commission being adjusted in the Military Accounts.

1898-99. Subsidised Railway Companies; Land and Subsidy.

116. The decrease in the payments to Subsidised Railway Companies occurs wholly in the item of land, and is due to the programme of the year not having been worked up to in the case of the Bengal and North-Western, Bhagalpur-Baidyanath, Mymensingh-Jamalpur, Amritsar-Sarhali, Jullundur-Hoshiarpur, and several other Railways.

1898-99. Civil Works.

117. Of the entire saving of Rx. 208,500 anticipated under the head of Civil Works, Rx. 118,800 occurs in the Local Section of the Estimates, and is due partly to the failure of District Boards to work up to their estimates, and partly to the estimates themselves having been revised in Bombay and Madras in order to provide funds for plague purposes. The former cause accounts for differences of Rx. 35,000 in Bengal, Rx. 21,400 in the North-Western Provinces and Oudh, and Rx. 12,400 in Burma; and the latter for decreases of Rx. 26,100 in Bombay, and Rx. 22,000 in Madras.

In the Provincial Section the savings amount to Rx. 69,600, of which the North-Western Provinces and Oudh contribute Rx. 9,000, Bombay Rx. 13,500, and Madras Rx. 18,400. In the North-Western Provinces the decrease is due partly to expenditure proceeding at a slower rate than was expected, and partly to the transfer of the Ghazipur Steam Ferry to the Bengal and North-Western Railway. In Bombay grants were reduced on general financial grounds after the Budget was passed, and in Madras savings were caused by a transfer to the Educational Department and by the non-payment of grants to Municipalities for water-supply projects.

1898-99. Army Expenditure.

118. The large decrease of Rx. 518,600 in Army Expenditure in India comprises the following important reductions:—

	Rx.
Military operations and special services due to the demobilisation of the Tirah Expeditionary Force in April 1898, and the substitution of the Khyber Brigade with moveable column for the Khyber Force as originally constituted	291,100
Saving on Exchange Compensation Allowance owing to the rise in exchange	41,200
Reduced expenditure under Army and Garrison Staff and Regimental Pay and Allowances with reference to recent actuals	24,500
Saving arising from the short strength of the Army . .	55,700
Saving on account of Troops serving in East Africa and Mauritius and charged to the Imperial Government . .	33,400
Transfer to the Civil Estimates of charges for the pay of officers on plague duty	24,100
Lapse of provision for increase of Commissariat-Transport Officers	20,000
Reduced price of food and forage	65,000

1898-99. Exchange Compensation Allowances.

119. One cause of saving which affects not only Army Expenditure, but most of the important heads of Expenditure in India, is the rise in the rate of exchange, on the basis of which the Exchange Compensation Allowances have been calculated. The average rate assumed in the Budget Estimate of 1898-99 for this calculation was $15\frac{1}{2}$*d.*; but the four quarterly rates with reference to which the allowances have been actually paid are $15\frac{29}{32}$*d.*, $15\frac{31}{32}$*d.*, $15\frac{27}{32}$*d.*, and $15\frac{31}{32}$*d.*, yielding an average for the whole year of $15\frac{59}{64}$*d.* The consequent saving amounts to Rx. 119,000.

1898-99. Revenue in England.

120. The Sterling receipts are expected to exceed the Budget Estimate by £44,200. The three important items composing this increase are: £18,000 under Interest on temporary investments of Cash Balance, the rates of interest realised being higher; £9,000 representing larger miscellaneous receipts connected with the supply of stores to India; and £10,400 under Army receipts, mainly in connection with the Indian Troop Service and other effective services.

1898-99. Expenditure in England.

121. The Sterling expenditure is expected to be less than the Budget Estimate by £151,100. The important variations comprising this difference are (1) a reduction of £83,300 in the charge for interest on loans; (2) a saving of £145,200 in the Army effective and non-effective charges; and (3) increases of £36,300 and £24,400, respectively, under Civil Furlough Allowances and Military Works.

The Interest charges are less by £83,300, of which £35,400 represents a decrease in interest on India $2\frac{1}{2}$ per cent Stock owing to the loan this year not having been issued so early as was expected; £44,900 comes under reduction in interest on India Bills, due to a smaller amount of Bills being issued; while in addition to these savings, £10,000 provided to meet interest on temporary loans from the Bank of England was not required. On the other hand, the discount on the loan of £6,000,000 India $2\frac{1}{2}$ per cent Stock issued in July 1898 amounted to £702,300. As this sum is exceptionally large, it has been decided to depart from the usual practice of entering the whole of it as a charge on the Revenue of the year, and to reduce the amount of debt incurred in excess of the money actually raised by means of a Discount Sinking Fund spread over 50 years, the rate of interest adopted in the calculation for the Sinking Fund being $2\frac{1}{2}$ per cent. A sum of £7,000 has accordingly been entered in the Revised Estimate as the first investment towards this Sinking Fund.

As regards Army charges, the reduction in the demands for stores—mainly Ordnance stores—amounted to £105,000, and the payments for pay and pensions of non-effective and retired officers of the Indian Service and for furlough allowances of officers of that service are expected to be less than the Estimate by £88,000. On the other hand, arrear payments of £34,500 due to the War Office for effective and non-effective Army charges of the year 1897-98 have been made in the current year; there has also been an excess charge of £17,000 under the head of Troop Service.

The payments for Civil Furlough and Absentee Allowances have exceeded the Estimates owing to the exceptionally large number of officers on furlough, and the demands for stores required for the Bangalore Water-works have swelled the expenditure on account of Military Works.

1898-99. Exchange.

122. The net charge for Exchange on Sterling expenditure is less than in the Budget Estimate by Rx. 1,074,900. The net Sterling expenditure is less by £195,300, and the Exchange on this difference at the rate of £1 = R 15·6, the rate of the Budget Estimate, is Rx. 109,400, which is the saving in Exchange due to the decrease in Sterling payments. The direct saving from the rise in the rate of Exchange from £1 = R 15·6 to £1 = R 15 is, therefore, Rx. 965,500.

Section III.—Budget Estimate of 1899-1900.

1899-1900. Statement of the gross figures.

123. The following is a general comparison of the Budget Estimate of 1899-1900 with that of 1898-99:—

		1898-99.	1899-1900.	1899-1900, better.	1899-1900, worse.
REVENUE.					
India	Rx.	98,791,700	101,645,900	2,854,200	
England	£	188,300	207,100	18,800	
Exchange	Rx.	105,400	108,500	3,100	
TOTAL .	Rx.	99,085,400	101,961,500	2,876,100	
EXPENDITURE.					
India—					
Imperial, Provincial, and Local	Rx	72,610,100	73,762,600		1,152,500
Adjustment of Provincial and Local Surplus or Deficit .	Rx	—116,800	—924,700	807,900	
NET .	Rx	72,493,300	72,837,900		344,600
England	£	16,474,800	16,531,600		56,800
Exchange	Rx	9,225,900	8,659,400	566,500	
TOTAL .	Rx.	98,194,000	98,028,900	165,100	
SURPLUS	Rx.	891,400	3,932,600	3,041,200	

1899-1900. Main features.

124. The year opens with fair promise. Except in limited areas in the Central Provinces and the Punjab the agricultural prospects are good, and the bulk of the population have returned to the standard of living which prevailed before the scarcity compelled them to reduce their consumption of all but absolute necessaries. An expansion is accordingly looked for under all the principal heads of Revenues, except Registration fees, which are really payments for services rendered; and Railway receipts, which are a good test of general prosperity, are expected to show a corresponding increase. The only serious rise of expenditure is in the medical charges connected with the plague: the other increases represent improvements of administration, or outlay required to earn increased revenue.

1899-1900. General Results.

125. The Revenue in India is expected to exceed the estimated receipts of 1898-99 by Rx. 2,854,200, while the Expenditure, after allowing for the adjustment of Provincial and Local surpluses or deficits, will be increased by Rx. 344,600. In England an improvement of £18,800 in Revenue is anticipated against a rise in Expenditure of £56,800. At the same time the net charge for exchange will be reduced by Rx. 569,600, so that the combined account works out to a surplus of Rx. 3,932,600, being Rx. 3,041,200 in excess of the estimated surplus of 1898-99.

1899-1900. Increases of Revenue in India.

126. The following are the most important increases of Revenue in India:—

Land Revenue	73,700
Opium	673,900
Excise	60,900
Provincial Rates	91,500
Customs	58,200
Assessed Taxes	55,900
Forest	55,100

Railways—	
State, Gross Receipts	854,500
Guaranteed, Net Traffic Receipts	768,500
Irrigation—	
Major Works—Direct Receipts	139,800
Land Revenue due to Irrigation	71,100

127. The growth of Land Revenue is most marked in Burma, where Rx. 107,900 is expected to accrue from revision of assessments and increase in cultivation. In the North-Western Provinces and Oudh Rx. 110,300 will be gained by enhancements of revenue resulting from the regular revision of settlements. An increase of Rx. 34,300 in the Central Provinces is due to provision having been made for the recovery of famine arrears. Decreases of Rx. 113,500 in Madras and of Rx. 25,400 in Bombay are caused by the reduction of the arrear balances which swelled the receipts in the current year added in the latter case to a less favourable inundation in Sind. *1899-1900. Land Revenue.*

128. The Estimate anticipates an increase of Rx. 587,300 in the Opium Revenue in Bengal. Prices show an almost unbroken rise throughout the past year; the average per chest has gone up from R1,023 in 1897-98 to R1,055 in the current year and the price realised at the sale of March 1899 is R1,149 against R948 at the same time a year ago. R1,100 has accordingly been taken as the average price for the ensuing year. In Bombay it is assumed that the revival of the trade in Malwa Opium, which has followed on the reduction of duty, will continue unabated, and that the number of chests exported will be the same as in the current year. On this basis an increase in revenue of Rx. 84,000 is looked for. *1899-1900. Opium Revenue.*

129. The Excise Revenue has been slow to recover from the depression caused by the famine, and the Estimate anticipates only the moderate increase of Rx. 60,900. To this the North-Western Provinces and Oudh contributes Rx. 67,500 due to the normal growth of revenue and to the introduction of administrative reforms, while Burma, Bengal, and Bombay look forward to increases of about Rx. 25,000 apiece. On the other hand, the actuals of the current year in Madras point to a decline in revenue which is estimated at Rx. 110,000. *1899-1900. Excise Revenue.*

130. Of the increase of Rx. 91,500 under Provincial Rates, Bengal contributes Rx. 38,700 arising from the completion of revaluations in the Districts of Dinajpur and Backerganj. In Madras an increase of Rx. 21,600 is looked for from Village Service Funds. *1899-1900. Provincial Rates.*

131. In Bengal an increase of Customs Revenue, amounting to Rx. 55,000, is anticipated, mainly under Liquors, Articles of Food and Drink, and Silver Bullion and Coin. In Burma an aggregate improvement of Rx. 51,200 is expected under Export Duty on Rice and various heads of Import Duty, specially Liquors, Articles of Food and Drink, and Manufactured Articles. The Estimate for Madras shows a decline of Rx. 34,200, chiefly under Liquors, Imported Cotton Goods, and Exports. *1899-1900. Customs Revenue.*

132. The increase under the head of Assessed Taxes is largest in Bengal (Rx. 25,000) and in Madras (Rx. 15,000), and is due to progressive revision of the assessments and to general improvement in the administration of this head of revenue. *1899-1900. Assessed Taxes.*

133. An increase of Rx. 69,700 under Forest Revenue anticipated in Burma really represents a decline from the abnormal receipts for which credit has been taken in the Revised Estimates. The demand for teak at the present high prices is expected to fall off; the Bombay-Burma Trading Corporation will reduce their exports of timber from the Pyinmana forests, and the revenue obtained in the form of royalty will be diminished in proportion. *1899-1900. Forest Revenue.*

1899-1900. Railway Revenue.

134. The Railway Revenue of the coming year is estimated at Rx. 1,623,000 in excess of the amount taken in the Budget of 1898-99. The forecast is justified by the excellent promise of the spring crops and by the additional mileage likely to be opened for traffic during the year.

1899-1900. Irrigation Revenue.

135. The Estimate of Irrigation Direct Receipts for 1899-1900 is based upon the normal expectations of Revenue, and anticipates a falling-off from the exceptionally high returns indicated by the Revised Estimate of the current year. As compared with the Budget of 1898-99, it provides for an increased Revenue of Rx. 139,800, which includes an increase of Rx. 80,200 in the Revenue from the Canals in the Punjab, and Rx. 54,100 from Canals in the North-Western Provinces and Oudh, due in each case to the growth of the demand for canal irrigation.

1899-1900. Decrease of Revenue.

136. The only important decrease of Revenue in India occurs under Telegraph Receipts, which show a falling off of Rx. 130,400 as compared with the Budget of 1898-99. This, however, represents an advance of Rx. 24,400 on the Revised Estimate of the current year, and indicates that the growth of operations in India is overtaking the decrease of Revenue brought about for the time being by the cessation of military operations, the extended use of deferred messages, and the falling-off in the Indo-European message traffic transferred at Karachi.

1899-1900. Decreases of Expenditure.

137. The chief reductions in Expenditure in India occur under the following heads:—

	Rx.
Army Services	1,171,500
Interest on Ordinary Debt	202,000
Famine Relief	79,400
Construction of Protective Railway	178,300

1899-1900. Army Expenditure.

138. The following are the principal causes which have contributed to bring about the important decrease of Rx. 1,171,500 in Army charges:—

	Rx.
Reduction of Military Operations and Special Services .	1,176,500
Saving under pay of British troops due to exchange being taken at 1*s.* 4*d.* instead of 1*s.* 3¼*d.* the rupee . .	120,000
Saving in Exchange Compensation	20,800
Saving under Regimental Pay and Allowances . . .	45,000
Fall in the prices of food-supplies	60,000
Saving due to the cost of the 1st Bengal Infantry stationed at Mauritius being debited to Her Majesty's Government	21,200
	1,443,500

Against the above important decreases in expenditure the following increases are provided for:—

Provision of messing allowance made for the whole year instead of for part only as in 1898-99	114,600
Smaller deduction in India on account of excess provision in the Home Estimates	48,300
Mobilisation Equipment of the additional corps included among the extra units of the field Army . . .	39,500
Reserve of compressed fodder to facilitate mobilisation operations	37,600
Re-establishment of Cantonment Hospitals . . .	20,700
	260,700

139. As was explained in last year's Financial Statement, the decrease of Interest charges represents for the most part the interest on the difference between the Capital Expenditure on Railways and Protective Works and ordinary loans contracted in India. *1899-1900. Interest on Debt.*

140. Except in a small portion of the Central Provinces where the people have not yet recovered from the famine of 1897-98, and in the South eastern districts of the Punjab where both the *kharif* and the *rabi* have suffered from want of rain and the area protected by irrigation is small, the prospects of the coming year are excellent, and it has not been found necessary to make any substantial provision for the relief of scarcity. Out of Rx. 85,000 provided last year to meet the probable wants of certain districts in Madras where the cold weather rains had partially failed, only Rx. 1,700 was spent and the small sum of Rx. 5,700 now entered is almost entirely intended to meet the possible requirements of Hissar and the neighbouring districts of the Punjab. *1899-1900. Famine Relief.*

141. The Budget Estimate of 1898-99 provided Rx. 668,300 for outlay on the construction of Protective Railways, and this was raised during the year to Rx. 695,400 distributed as follows:— *1899-1900. Construction of Protective Railways.*

	Rx.
East Coast Railway	60,000
Bezwada-Madras	669,400
Godavari Bridge	166,400
Guntakul-Mysore	— 400
South Indian	— 200,000
	695,400

For the coming year the Expenditure has been placed at Rx. 490,000 allotted to—

	Rx.
East Coast Railway	40,000
Bezwada-Madras	30,000
Godavari Bridge	200,000
South Indian	50,000
Madura-Paumben	100,000
Tinnevelly-Quilon	70,000
	490,000

If to this latter sum be added Rx. 370,400, being the net charge for the Indian Midland and Bengal-Nagpur, two Protective Railways constructed by Companies; Rx. 603,900 set apart for Reduction of Debt; Rx. 30,000 allotted for Protective Irrigation Works; and Rx. 5,700 for the relief of distress, the resulting total makes up the sum of Rx. 1,500,000 set apart for expenditure on Famine Insurance.

142. The rate of exchange assumed in the Budget Estimates for 1899-1900 for the purpose of calculating Exchange Compensation Allowances is 15⅞*d.* the rupee, and the total saving under the various heads of Expenditure affected by this item of charge, amounts to Rx. 56,400. *1899-1900. Exchange Compensation Allowances.*

1899-1900. Increases of Expenditure in India.

143. The chief increases of Expenditure in India anticipated in the Budget occur under the following heads :—

	Rx.
3.—Land Revenue	65,600
Police	102,600
Medical	463,000
Reduction of Debt	278,100
State Railways :	
Working Expenses	276,500
Interest on Debt	98,900
Guaranteed Companies :	
Surplus Profits, Land, and Supervision	250,700
Irrigation, Minor Works and Navigation	51,500
Military Works	163,800
Civil Buildings and Roads	648,700

1899-1900. Land Revenue Charges.

144. The Madras Estimate under 3.—Land Revenue includes an increase of Rx. 38,700 mainly intended to provide for a long standing scheme for the improvement of the position of Taluk Gomastahs, for the revision of Village Establishments, and the extension of Survey and Settlement. In Burma the charges of District Administration are being raised by Rx. 27,800 to meet the increased demands of a young Province with a growing Revenue.

1899-1900. Police Charges.

145. In Bengal an addition of Rx. 30,200 has been allotted under Police charges for improving the investigating staff of the District Police, and for strengthening the force in Calcutta. A provision of Rx. 27,200 has been made in the North-Western Provinces for adding to the number of Assistant District Superintendents and introducing reforms in the Rural Police System of Oudh. There are also smaller increases in the Punjab, Madras, Bombay, and Assam due partly to plague charges and partly to the reorganisation of the force and the cost of supplying improved arms and accoutrements.

1899-1900. Medical Charges.

146. Every Province, except the Punjab, anticipates a rise in Medical Expenditure, the largest increases being Rx. 131,500 in Madras and Rx. 79,200 in Bombay, both mainly on account of the plague expenditure shown in detail in paragraph 103 above. As the general resources of both these Governments have been seriously reduced by famine and plague, the Government of India have as is explained above, come to their aid with contributions from Imperial Revenues. The specific contributions thus passed in the Estimates through the Land Revenue head are Rx. 64,100 in Madras, and Rx. 126,400 in Bombay. In addition to the increases shown under Provincial expenditure on plague a reserve of Rx. 209,500 has been provided under India General in order to meet any unforeseen necessities which may arise during the year.

1899-1900. Reduction of Debt.

147. As no necessity for the relief of Famine is anticipated and the expenditure on Protective Railways and Irrigation Works has been reduced, an additional sum of Rx. 278,100 required to make up the Famine Insurance grant to the full amount of Rx. 1,500,000 will be charged under Reduction of Debt.

1899-1900. State Railways.

148. The increase of Rx. 276,500 under the Working Expenses of State Railways is due to provision being made for heavier traffic, a greater length of open line, and extensive renewals of permanent-way and other works which have been left unfinished during the current year.

1899-1900. Railway Interest.

149. The increase in the Railway Interest represents the interest payable on the new capital outlay to be undertaken on Railways.

1899-1900. Guaranteed Companies.

150. The increase of Rx. 250,700 under Guaranteed Companies is accounted for by the fact that the moiety of surplus profits payable to the Bombay, Baroda and Central India Railway is estimated at Rx. 187,000 against Rx. 117,000 in

1898-99, while the amount due to the Great Indian Peninsula is expected to rise from Rx. 60,000 to Rx. 270,000. It is improbable that the Madras Railway will earn surplus profits during the coming year, but a small provision of Rx. 10,000 has been made to cover the contribution to the Provident Fund and any small amount of surplus profits that may be declared. *Surplus Profits, Land, and Supervision.*

1899-1900. Minor Works and Navigation.

151. The greater portion of the increase under Minor Works and Navigation occurs in Burma and Bombay, and is due to the gradual extension of the works classified under this head.

1899-1900. Military Works.

152. The increase of Rx. 163,800 on account of Military Works includes a sum of Rx. 150,000 which has been added to the ordinary grant for Military Works in order to provide for defensive works beyond the administrative frontier of India.

1899-1900. Civil Buildings and Roads.

153. The increase under Civil Buildings and Roads is occasioned by the fact that the greater part of the free grants made to Provincial Governments in aid of their general resources have been entered under this head with the object of rendering them available for immediate expenditure if the financial position of the Governments concerned admits of it.

1899-1900. Revenue in England.

154. The increase of £18,800 in Sterling receipts in England occurs almost entirely under Army Receipts, and is due to larger receipts under the head of Indian Troop Service and larger recoveries on account of the value of clothing, accoutrements, etc., in the possession of Regiments on their transfer from the Indian to the British establishment.

1899-1900. Expenditure in England.

155. The Sterling expenditure in England is estimated at £16,531,600 as compared with £16,474,800, the forecast for the current year.

Of the variations which bring out this result, reduced interest payments account for £45,100. The charges on account of the Post Office are less by £17,400 owing to a more favourable adjustment of the cost of the Eastern Mail Service as between the English and Indian Post Offices.

The payments of interest on capital deposited by Railway Companies show an increase of £42,600 due to further deposits of capital made by the East Indian Railway, the Bengal-Nagpur Railway, and the Indian Midland Railway. A decline in the charges on account of the Assam-Bengal Railway is owing to the rate of interest guaranteed on the Company's share capital having been reduced from 3½ to 3 per cent.

The Civil Superannuation and Pension Charges show an increase of £43,300, owing to a gradual increase in the claims to pension.

Under Effective Army charges the total in 1899-1900 is about the same as in the Budget Estimate of 1898-99, but the cost of the Indian Troop Service and the Miscellaneous charges will be less by £8,000, while, on the other hand, the estimate of the payments to the War Office in respect of British Forces serving in India is higher by £9,000.

Under Non-Effective Army Charges there will be a total increase of £21,000 made up of an increase in the payments to the War Office of £37,000, of small increases under Miscellaneous Pensions and other charges aggregating £4,000, and a reduction of £20,000 in the charges for pay and pensions of non-effective and retired officers of the Indian Service.

1899-1900. Exchange.

156. The charge for Exchange on the net Sterling expenditure during the coming year is less by Rx. 569,600 than in the Budget Estimate of 1898-99. The net Sterling expenditure is more than in the Estimate of 1898-99 by £38,000, and the exchange on this difference at the rate of £1=R15·6, being the rate assumed in the Budget Estimate for 1898-99, is Rx. 21,300. The direct saving from the rise in the rate of exchange from £1=R15·6 to 15·75*d.* the rupee, the rate taken for the coming year, amounts, therefore, to Rx. 590,900.

Section IV.—Statements comparing the figures of the Estimates under the more important heads of Revenue and Expenditure with those of past years.

157. Throughout the period covered by the statement the Land Revenue of the area included under India General, has been below the standard of Rx. 175,000 attained in 1893-94. It escaped the influence of the famine of 1896-97, but during the present year there has been a marked drop in the revenue owing to a failure of the rains and general scarcity in Ajmir. An improvement is looked for in the coming year.

158. In the Central Provinces the whole area was affected by famine which began earlier and lasted longer than anywhere else in India. The effect on the Land Revenue was marked and extended over 1896-97 and 1897-98. Since then there has been a return of prosperity and the Revised Estimate includes Rx. 56,000 and the Budget Rx. 36,000 on account of famine arrears. Recent information shows that there has been some failure of crops in the wheat-growing areas of Saugor and Damoh, and the Budget has been framed on more cautious lines than was proposed by the local officers.

159. The Land Revenue in Burma received only a slight check in 1896-97 and then resumed its normal course of steady progress due to extension of cultivation, revision of low assessments based on provisional data, and the enhanced yield of the capitation tax which follows the growth of population in a new Province with large areas of fresh land.

160. Assam was untouched by the famine, and the figures of 1896-97 show an increase in the Land Revenue. In the following year the revenue was affected by the earthquake which reduced for the time being the tax-paying capacity of the people, while in Kamrup and Nowgong large tracts of land have been rendered uncultivable by the sand that has been thrown up. The reduction of revenue from this cause is estimated by the Chief Commissioner at not less than a lakh of rupees. Allowance has been made for this in framing the Budget of 1899-1900.

161. In Bengal the Land Revenue being permanently settled at very low rates is to a great extent beyond the reach of famine, but the calamity of 1896-97, which extended to the whole of North Behar, to a large part of Chota Nagpur and Western Bengal and to isolated tracts in Central Bengal, directly affected the rental of Government Estates where the State is itself the landlord, and reduced the recoveries of survey charges in Behar.

162. Distress in the North-Western Provinces began early and was widely diffused but the recovery of the country has been rapid. The Revised Estimate includes Rx. 440,000 on account of suspensions of revenue, and the Budget anticipates recoveries of Rx. 417,300 on this account besides Rx. 77,800 due to revision of settlements.

163. In the Punjab the revenue rose directly the famine was over, and although during the current year the estimate has not been worked up to and suspensions of revenue have been necessary in Hissar and the neighbouring districts, it is hoped that this will be counteracted by extension of cultivation along the Chenab Canal and in the Montgomery district.

164. The Revenue in Madras is improving in the manner characteristic of the Province. The balance in arrear at the close of 1896-97 has been steadily reduced and the Budget anticipates an increase of Rx. 70,900 from the resettlement of the Kistna and Godavari districts and from extension of cultivation.

165. In spite of famine and plague in Bombay arrears of revenue amounting to Rx. 250,500 have been recovered in the current year and a favourable inundation in Sindh has swelled the revenue by expanding the cultivated area. In the coming year there will be smaller arrears to collect, and the conditions in Sindh are expected to be less favourable, but Rx. 51,000 will be added to the demand by revision of settlements.

OPIUM.

166. Throughout the period comprised in the table the revenue derived from the sale of Bengal Opium follows the average price per chest offered at the Calcutta sales, which in its turn is determined mainly by the dollar and tael prices obtained in China. The growing competition of the Chinese drug has prevented the prices in China from rising in proportion to the increased value of the rupee due to the Currency legislation of 1893. The trade has also been handicapped by the uncertainties of exchange and the stringency of the Indian money market. These latter conditions have now improved and somewhat larger stocks are available for the China market. It is therefore hoped that the rise of Opium revenue in the current year, which was due largely to a scanty crop in China, may continue.

The decline in the exports of Malwa Opium which the table brings out, and its recent revival, are due to the same causes as those which affected Bengal Opium. The revival has been helped by the reduction of the pass-duty, which was found to be more than a declining trade could bear, to R500 per chest.

The receipts from Excise Opium are governed by the same causes as Excise Revenue generally, but as the consumers of opium are a comparatively well-to-do class, the returns are perhaps somewhat less sensitive to the influence of famine.

167. The main items of expenditure are payments to cultivators, the amount of which varies directly with the number of chests of Bengal Opium produced, and the quantity of Malwa Opium purchased for excise purposes which depends on the anticipated demand. The increase in charges is also due to the fact that the position of the officers of the Opium Department, which had long been admitted to be unsatisfactory, has of late years been bettered.

SALT.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.

Charges	521,044	523,352	473,747	519,600	466,100	537,300

(a) Chiefly excise on local manufacture. | (b) Chiefly duty on imported salt.

168. The fluctuations of the aggregate Salt Revenue correspond closely to the material condition of the mass of the people who consume salt. A sharp decline in the famine year 1896-97 has been followed by a gradual rise which in the Revised Estimate for the current year exceeded the standard of the revenue of 1895-96. The Bengal statistics, however, follow a somewhat different course. There the receipts rose in 1896-97 and fell in 1897-98 when the revenue of every other Province shows a rise. In explanation of this it may be observed, first, that large portions of the area supplied from Bengal escaped famine altogether, while the cultivating classes found their purchasing power greatly augmented by high prices; secondly, that the demand of 1897-98 was affected by the earthquake and cyclone of 1897; and thirdly, that imported salt is less sensitive to local influences than salt produced in the country.

The increase in the revenue in Northern India during the current year is mainly due to the revival of traffic in Kohat Salt since the cessation of the frontier disturbances. It is doubtful, however, whether the demand will continue on the same scale during the coming year; and reduced receipts are also expected from the salt produced at Sambhar, Didwana and Pachbudra. For Burma and

Bengal the estimate is normal; in Madras it assumes a consumption of about 70 lakhs of maunds. The Bombay estimate has been taken at a moderate figure in view of the uncertainty arising from the prevalence of plague.

STAMPS.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99. Budget.	1898-99. Revised.	1899-1900, Budget.
REVENUE.						
Court Fees and Plain Paper	3,224,216	3,216,005	3,305,376	3,301,100	3,411,000	3,442,800
Commercial and other Stamps	1,418,875	1,476,870	1,456,034	1,478,900	1,396,300	1,425,800
Other Revenue	83,964	84,867	75,633	75,900	32,600	28,500
TOTAL . Rx.	4,727,055	4,777,742	4,837,043	4,855,900	4,839,900	4,897,100
Charges—						
India . Rx.	95,158	97,006	97,998	99,700	97,100	100,400
England (Stores) . £	43,492	40,808	35,844	37,800	36,500	39,300
Exchange . Rx.	33,044	26,967	20,185	21,100	18,200	20,600
TOTAL . Rx.	171,694	164,781	154,027	158,600	151,800	160,300

169. The Stamp Revenue depends on such a wide variety of transactions that fluctuations in its aggregate yield can hardly be ascribed to any single cause. Scarcity, for example, exercises a converse effect on the demand for the two main classes of Stamps. On the one hand it compels self-denial in the pursuit of litigation, on the other it promotes the execution of documents for the purpose of raising money. Both these tendencies are reflected in the revenue returns. The receipts from Court-fees drop sharply in the famine year, but they recover at once, and their progress is so rapid that its effect was greatly under-estimated in framing the Budget of the current year. In the case of Commercial Stamps the course of development is reversed. The revenue rises in the famine year and falls continuously from that time to a level below that of 1895-96. It was over-estimated in the Budget of the current year, and the figure taken for 1899-1900 represents only a moderate advance on the standard of 1895-96.

EXCISE.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99. Budget.	1898-99. Revised.	1899-1900, Budget.
REVENUE.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Bengal	1,337,850	1,339,931	1,274,775	1,325,000	1,335,000	1,350,000
North-Western Provinces	549,459	446,444	451,496	490,000	557,500	557,500
Madras	1,438,405	1,489,657	1 461,945	1,530,000	1,390,000	1,420,000
Bombay	1,164,147	1,099,650	1,094,996	1,120,000	1,146,000	1,146,000
Other Provinces	1,232,556	1,238,518	1,206,242	1,252,300	1,302,500	1,304,700
TOTAL	5,722,417	5,614,200	5,489,454	5,717,300	5,731,000	5,778,200
Charges	207,957	212,855	240,463	250,200	243,000	261,800

170. The progress of Excise Revenue, like the growth of the receipts from Court-fees, is a fair test of the ability of the people to spend money on luxuries. The years of scarcity show accordingly a marked decline, and in Bombay, owing probably to plague and the apprehension to which it gives rise, the

standard of 1895-96 has not yet been regained. In Madras, on the other hand, the effect of the famine and apprehended plague in reducing revenue was for a time neutralised by the extension of the tree-tax system of raising revenue from toddy. This system attained its present maximum application in 1897-98. The increase of charges is due to the adoption of more efficient methods of administration and prevention.

PROVINCIAL RATES.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99. Budget.	1898-99. Revised.	1899-1900, Budget.
REVENUE.	Rx	Rx	Rx.	Rx	Rx.	Rx.
District Local Funds	2,184,443	2,086,080	2,269,731	2,320,600	2,402,300	2,374,400
Provincial Cesses, including Famine Insurance	664,081	657,260	641,731	671,600	670,000	675,600
Village Service and Patwaris	734,443	607,487	678,399	726,400	737,100	748,600
Other Cesses	124,038	126,028	133,429	135,400	142,700	152,900
TOTAL	3,707,005	3,536,855	3,723,290	3,860,000	3,952,100	3,951,500
Charges	52 675	54,301	52,530	52,400	55,700	60,600

171. As was pointed out last year, the revenue from Provincial Rates is determined by the causes affecting Land Revenue, to which in most Provinces the rates bear a definite relation. The rise of revenue in the last three years corresponds therefore to the recovery of Land Revenue from famine influences. It should be added, however, that in tracts where the Land Revenue is permanently settled the revenue from Provincial Rates is increased independently of the Land Revenue by the periodical revaluation of the aggregate rental of a district for the purpose of levying these cesses.

172. The decline in the revenue from import duties in 1896-97 was due not merely to the effect of the famine in reducing the demand for manufactured articles and metals but also to the exemption of cotton yarns from duty and the reduction of the duty on cotton manufactures from 5 to 3½ per cent. The volume of the trade in cotton goods was not affected until the following year when the imports declined greatly. Since then business has revived, but it is still suffering from the effects of the plague in Bombay, a great producing and distributing centre, and from the overstocking of markets in China and Japan. The revenue from oils is derived chiefly from kerosene. The trade in this article fluctuates greatly and the cheaper oils from Russia and Sumatra are now beginning to compete successfully with the finer American oil. The increase under articles of food and drink is due to the imports of beet-sugar, principally from Germany and Austria, which has been poured into India in considerable quantities. The extraordinary rise in the imports of silver, especially in a year when the effects of the famine were still severely felt, is a phenomenon of which no satisfactory explanation has been found, but the trade is now diminishing and with a large demand springing up for gold, the decrease next year is expected to be considerable. The export duty shows a great contraction in 1896-97 and 1897-98 owing to great quantities of Burma rice, which would otherwise have been exported to foreign countries and have paid duty accordingly, being diverted to India to meet the famine demand. The large exports of 1898-99 followed on a bumper crop in Burma, the chief exporting province, but such a harvest is not expected to recur and the surplus available for export to foreign countries during 1899-1900 is likely to be considerably less than in the previous year.

ASSESSED TAXES.

	Accounts, 1895-96.	Accounts, 1896-97	Accounts, 1897-98.	1898-99.		1899-1900, Budget.
				Budget.	Revised.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Deduction by Government from Salaries, Pensions, and Interest payments	447,688	439,259	414,404	479,800	447,400	440,700
Other Collections	1,387,501	1,433,550	1,450,971	1,413,100	1,482,700	1,499,100
TOTAL .	1,835,189	1,872,809	1,895,465	1,892,900	1,930,100	1,948,800
Charges	29,868	30,323	32,278	32,700	33,100	33,500

173. The progress of this branch of revenue depends upon the general prosperity of the classes from which it is collected and upon the improvements constantly being introduced in the methods of assessing and levying the tax. The people by whom it is paid are to a great extent either independent of adverse seasonal influences, or derive a profit from their direct or indirect results, and the revenue accordingly does not show any distinct variation in relation to scarcity.

FOREST.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.
				Budget.	Revised.	
	Rx	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue	1,660,504	1,733,869	1,739,514	1,735,600	1,838,000	1,790,700
Expenditure	911,161	993,955	1,001,089	1,050,500	1,010,200	1,067,700
NET	749,343	739,914	737,825	685,100	827,800	723,000

174. The revenue under Forest has recovered from the effects of the famine and has resumed its normal rate of progress. The great increase shown in the Revised Estimate of the current year is due to the exceptional demand for teak timber which is not expected to be maintained during 1899-1900.

INTEREST RECEIPTS.

176. The reduction in the Interest expenditure which has taken place during the period is due on the one hand to an increase in the amount of interest charged against Railways and Irrigation, and on the other to the reduction in the rate of exchange.

POST OFFICE, TELEGRAPH, AND MINT.

177. The Postal revenue displays unbroken progress throughout the period, and its advance in the coming year would have been more marked but for the introduction of the one-anna rate of postage to the United Kingdom and British Possessions and the concurrent reduction in the Inland rates of letter postage. At the same time a substantial addition has been made to the expenditure in order to provide for administrative improvements which have been needed for a long time.

178. The Telegraph receipts of 1897-98 were abnormally high owing to the great use of the telegraph in connection with frontier wars, famine, and plague. The decline experienced in the current year and anticipated in the next year is due partly to the cessation of military operations and partly to the increased popularity of deferred telegrams.

179. The increase in the Mint expenditure in 1898-99 is explained in paragraph 109 above.

CIVIL DEPARTMENTS.

(a) Includes Upper Burma charges up to 1896-97.

180. The progressive increase of total expenditure during the first three years of the period was partially arrested in 1898-99, but has been resumed in the Budget for the current year. This includes a large increase under Medical rendered necessary by the persistence of plague in Bombay and its spread to Madras, and likely to be further enhanced by the recent appearance of the disease in Calcutta. Provision has been made in Burma for the appointment of an additional Judicial Commissioner and for increasing the salaries of the Civil Administrative Staff, while in Bengal two Additional District and Sessions Judges and several temporary Subordinate Judges and Munsifs are to be appointed. The Police are to be strengthened in Bengal, the North-Western Provinces, Madras and Bombay.

183. The Revised Estimate of net receipts on State Railways is better than the Budget Estimate for 1898-99 by Rx. 207,100. The improvement is chiefly on the North-Western and Rajputana-Malwa Railways, due to a large traffic in grain, seeds and cotton.

184. The reduction in the Interest charges in India follows on the smaller outlay on Construction due to short shipments of stores from England. The rise in the rate of Exchange has caused a considerable saving on the Sterling charges, thus making the net result considerably better than in the original estimate.

185. The net receipts from State Railways in 1899-1900 are estimated at Rx. 370,900 higher than the Revised Estimate for 1898-99 in anticipation of a further improvement in traffic based on the excellent prospects of the spring crops and on the additional mileage which it is expected will be opened during the year. The increase in the Estimate of Working Expenses amounts to Rx. 170,400 and is due to heavier traffic, increased open mileage, and provision

for heavy renewals of way and works unfinished in 1898-99. There is also an increase in Interest charges, chiefly in India, due to the progress of Capital Outlay.

186. The Revised Estimate of net receipts from Guaranteed Railways exceeds the original Estimate by Rx. 571,000. This result is due to a marked improvement in goods traffic on the Great Indian Peninsula and Bombay, Baroda and Central India Railways following on an amelioration of the unfavourable conditions which obtained during the last two years, as well as to a reduction in the outlay on renewals on the Bombay, Baroda and Central India Railway.

The increase in Surplus Profits and other charges in India is more than covered by the saving in Exchange on Sterling Interest, leaving the net result, Rx. 606,600, better than the original Estimate.

A further improvement in traffic is expected in 1899-1900, but owing to the increase in Surplus Profits, etc., payable in India, and to the lower rate of Exchange adopted, the net result falls short of the Revised Estimate by Rx. 30,700 only.

187. The Revised Estimate of direct receipts from Major Works is better than the Budget Estimate for 1898-99 by Rx. 193,200. The increase occurs chiefly in the Punjab and the North-Western Provinces and Oudh, and is due to a larger area having been irrigated in the past *kharif* season than was anticipated. The small increase of Rx. 22,700 in the receipts from Minor Works is due partly to the same cause, and partly to the revenue in the Montgomery District which was hitherto shown as Indirect, having been treated as Direct receipts in accordance with the new Schedule of Water-rates. The Budget Estimate for 1899-1900 has been based on normal demands for water in the *kharif* season of 1899 and besides allowing for an increase of Rx. 30,800 in the revenue from the Chenab Canal due to development of irrigation, provides also for favourable *rabi* irrigation in the Punjab generally. The increase of irrigation in 1898-99 caused a small increase in Working Expenses. The increase of Rx. 27,100 in Working Expenses provided for in 1899-1900 is due to additional lengths of canals and distributaries being opened for irrigation.

188. The financial results obtained during 1896-97 and 1897-98 from Irrigation Works, for which Capital and Revenue Accounts are kept, are given below :—

	1896-97.	1897-98.
MAJOR WORKS.	Rx.	Rx.
Capital Outlay—		
Direct and Indirect . { During the year . .	831,509	775,125
Direct and Indirect . { To end of year . .	33,352,211	34,127,336
Revenue Account—		
Gross Revenue	2,976,795	3,382,684
Maintenance and Working	964,522	993,250
Net Revenue .	2,012,273	2,389,434
Interest	1,253,542	1,284,250
Net Profit .	758,731	1,105,184
Percentage of net Revenue of the year on the Capital Outlay to end of the year	6·03	7·00
MINOR WORKS.		
Capital Outlay—		
Direct and Indirect . { During the year . .	196,930	132,200
Direct and Indirect . { To end of year . .	5,308,360	5,292,447
Revenue Account—		
Gross Revenue	585,180	588,693
Maintenance and Working	259,175	239,512
Net Revenue .	326,005	349,181
Percentage of net Revenue of the year on the Capital Outlay to end of the year	6·14	6·60

The figures in this table are taken from the administrative accounts. In the case of Minor Works interest on the Capital Outlay is not charged, as the Capital Expenditure is incurred from Revenue.

MILITARY WORKS—						
Expenditure	1,205,938	1,157,006	1,168,385	1,185,100	1,197,600	1,322,300
Receipts	49,699	61,268	52,561	50,300	54,200	50,900
Net .	1,156,239	1,095,738	1,115,824	1,134,800	1,143,400	1,271,400
CIVIL WORKS—						
Imperial—						
Expenditure	763,458	809,383	428,523	559,800	556,300	519,200
Receipts	66,421	59,537	55,631	54,700	55,600	55,600
Provincial—						
Expenditure	2,063,159	2,131,781	2,258,018	2,531,000	2,461,400	3,251,400
Receipts	305,041	279,888	278,562	280,300	291,900	289,500
Local—						
Expenditure	1,777,957	1,685,125	1,564,010	1,745,600	1,626,800	1,713,500
Receipts	292,671	295,521	281,069	293,400	294,700	292,900

189. The expenditure on Provincial and Local Civil Works during 1898-99 is expected to fall short of the Budget Estimate by Rx. 69,600 and Rx. 118,800. This is due partly to the expenditure having been over-estimated in some Provinces, and partly to the restriction of outlay in Bombay and Madras in order to provide funds for expenditure in connection with plague.

190. The estimated expenditure on Military Works in 1899-1900 is higher than the Budget Estimate of the previous year by Rx. 137,200. This is chiefly due to provision to the extent of Rx. 150,000 having been made for defensive works beyond the administrative frontier.

191. Under Imperial Civil Works the expenditure in 1899-1900 is less than the Budget Estimate of the previous year by Rx. 40,600, owing for the most part to the completion of the Bangalore Water-works.

In the Provincial and Local Section of the Estimates, the provision for expenditure depends chiefly on the state of the Provincial and Local balances, and in 1899-1900 considerable additions have been made in the Provincial Section in connection with the free grants to Local Governments of Rx. 700,000, as explained in paragraph 65; the total increase over this year in the Provincial Section is Rx. 790,000, and in the Local Section Rx. 86,700.

192. The variations in the above figures have been explained in paragraphs 118, 120, 121, 138, 154, and 155 above.

Section V.—Capital Expenditure on Public Works not charged against Revenue.

193. In paragraph 177 of the Financial Statement for March 1898 the programme sanctioned by the Secretary of State for the construction of Railways in India during the three years 1896-97 and 1897-98 and 1898-99, which involved the expenditure of 29⅜ crores of rupees, was referred to and explained.

The year 1898-99 being the last of the three years to which the programme of 29⅜ crores applied, it was considered necessary to prepare a new programme of Railway Construction for the three years from 1899-1900 to 1901-2. The large Cash Balances in the Indian Treasuries, which justified the policy of extending Railway Construction which was adopted in 1895-96, have now been exhausted. The new estimate of expenditure has accordingly been framed at a moderate figure, and a programme for the next three years working up to Rx. 20,322,100 has been sanctioned by the Secretary of State. In consequence, however, of the heavy lapse on the grant for 1898-99, amounting to Rx. 2,401,400, much of which is due to short outlay in England consequent on the engineering strikes and the failure of contractors to complete orders placed with them for stores, it has been decided, with the concurrence of the Secretary of State, to add a sum of Rx. 1,060,000, representing a portion of this lapse, to the grant for 1899-1900. A further addition of Rx. 1,090,000 has since been provisionally sanctioned under certain conditions, subject to the Secretary of State's approval. This new programme includes all Railway Construction for which Government undertakes any responsibility or gives any guarantee, and includes therefore, in addition to the classes of outlay provided for in the earlier programme, (1) the Capital expenditure of the three old Guaranteed Companies, and (2) outlay on branch lines of Railway incurred by Private Companies on firm guarantee by Government. The details of the new programme may be compared as follows with the corresponding expenditure in the three years ending with 1898-99:—

	1896-97, Actuals	1897-98, Actuals.	1898-99, Revised.	Total.	1899-1900.	1900-1.	1901-2.	Total.
I.—State Lines—	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
(i) Managed by the State.	3,705,834	2,354,102	2,379,500	8,439,436	1,829,000	1,747,200	1,673,000	5,249,200
(ii) Managed by Companies.	1,973,841	2,258,587	2,771,900	7,004,328	2,876,000	2,552,000	2 755,500	7,183.500
II.—Lines of three old Guaranteed Companies.	285,348	437,819	851,600	1,574,767	1,107,800	550,000	471,400	2,129,200
III.—Lines of other Guaranteed or Assisted Companies.	2,979,194	3,526,515	2,937,300	9,443,009	2,841,900	1,820,000	1,921,100	6,583,000
IV.—Branch Lines on firm guarantee.	1,008	124,251	218,000	343,259	168,000	59,200	...	227,200
TOTAL	8,945,225	8,701,274	9,158,300	26,804,799	8,822,700	6,728,400	6,821,000	21,372,100

194. The Budget Estimate of 1898-99 provided for an expenditure of Rx. 13,051,300 on Railways, Irrigation Works, and Miscellaneous Public Improvements, including Rx. 1,129,900 on account of expenditure under the head of Open Line Capital by the three old Guaranteed Companies and Rx. 334,500

for Branch Lines with a firm guarantee. The total sum was distributed as follows :—

	Rx.
34.—Construction of Protective Railways . . .	668,300
48.—State Railways—Construction	4,951,300
49.—Irrigation	750,000
50.—Miscellaneous Public Improvements . . .	48,000
Capital of Indian Railway Companies	3,475,000
Guaranteed Railways—Open Lines	1,129,900
" " Extensions	750,000
Branch Line Companies	334,500
East Indian Railway Company's Debentures . . .	944,300
TOTAL .	13,051,300

195. During the course of the year it became apparent that, owing to the late arrival of English stores consequent on the engineering strikes in England and other causes, it would be impossible to work up to the amount of the Budget Estimate. It was also decided that expenditure on the jetties at Chittagong should not be treated as Miscellaneous Public Improvements not charged to Revenue, but should form a part of the expenditure under "48.—State Railways—Construction," the necessary adjustment in regard to previous expenditure being duly carried out. The Revised Estimates for Capital expenditure on Railways and Irrigation Works during 1898-99 have accordingly been prepared as under :—

	Rx.
34.—Construction of Protective Railways . . .	695,400
48.—State Railways—Construction	2,882,200
49.—Irrigation	692,200
Capital Account of Indian Railway Companies . . .	2,937,300
Guaranteed Railways—Open Lines	552,800
" " Extensions	298,800
Branch Line Companies	218,000
East Indian Railway Company's Debentures . . .	1,573,800
TOTAL .	9,850,500

or for a sum less by Rx. 3,200,800 than the amount of the Budget Estimate.

In addition to the above sum, the Branch Line Companies not in receipt of a firm guarantee and the Companies whose accounts are outside the Government accounts are expected to spend during the year Rx. 1,470,100 as under :—

	Rx.
Branch Line Companies—	
Ahmedabad-Parantij	600
Mymensingh-Jamalpur	70,000
South Behar	204,000
Tapti Valley	650,000
	924,600
Outside the Government Accounts—	
Bengal and North-Western Railway Extensions . . .	445,000
Segowlie-Raksaul	20,500
Nilgiri	40,000
Bengal Dooars Extensions	40,000
	545,500

Thus making a total of Rx. 11,320,600 for all Railways and Irrigation Works in India.

196. In Despatch No. 351 (Financial), dated 10th November 1898, from the Government of India, to the Secretary of State, it was proposed to incur expenditure to the extent of Rx. 20,322,100 on the construction of Railways during the three years 1899-1900 to 1901-2, distributed as under:—

	Rx.
1899-1900	6,772,700
1900-1	6,728,400
1901-2	6,821,000
TOTAL	20.322,100

The Secretary of State's approval to this forecast was conveyed in his telegram dated 10th January 1899.

197. The programme of proposed expenditure during 1899-1900 provides for a sum of Rx. 6,772,700. The reasons for the heavy lapse on the grant for 1898-99, amounting to Rx. 2,401,400, have already been stated in paragraph 193 above, and it has been explained that a sum of Rx. 2,150,000 has been added to the grant for 1899-1900. With this addition the total amount available for expenditure on construction of Railways will stand at Rx. 8,922,700. From this figure, however, it will be necessary to deduct a sum of Rx. 100,000 on account of the Capital cost of the Umaria Colliery which will be transferred to the Rewa Durbar with effect from 1st April 1899. The net amount entered in the Estimates for construction of Railways therefore stands at Rx. 8,822,700.

This sum has been distributed for expenditure on Railways as under:—

	Rx.
34.—Construction of Protective Railways	490,000
48.—State Railways—Construction	3,465,000
Capital of Indian Railway Companies	2,841,900
Branch Line Companies	168,000
Guaranteed Railways and Extensions	1,107,800
East Indian Railway Company's Debentures	750,000
Total amount available	8,822,700

In addition to the above, further Capital expenditure will also be incurred in 1899-1900 by Branch Line Companies not in receipt of a firm guarantee, and other Companies whose accounts are outside the Government accounts, to the extent of Rx. 950,300 as under:—

	Rx.
Branch Line Companies—	
Ahmedabad-Parantij	2,100
Mymensingh-Jamalpur	60,000
South Behar	77,500
Tapti Valley	230,000
TOTAL	369,600
Outside the Government Accounts—	
Bengal and North-Western Railway Extensions	365,000
Segowli-Raksaul	10,700
Nilgiri	5,000
Bengal Dooars Extensions	200,000
TOTAL	580,700

The provision for Irrigation Works amounts to Rx. 850,000.

The total Capital expenditure on Railways and Irrigation Works in 1899-1900 accordingly amounts to Rx. 10,623,000.

48.—State Railways—Construction.

198. The Budget grant for 1897-98 amounted to Rx. 5,838,600 as under:—

		Rx.
Total provision in Forecast		10,130,000
	Rx.	
Deduct—Capital of Indian Railway Companies (Rx. 3,710,000 *less* Rx. 1,200,000 for East Indian Railway)	2,510,000	
Provision for Burma Railways . .	1,000,000	
Additional provision for expenditure in England on the Assam-Bengal Railway (Rx. 199,300—Rx. 80,000)	119,300	
		3,629,300
		6,500,700
Deduct—Amount provided for East Indian Railway from debentures raised by Company . . .		662,100
Grant available .		5,838,600

The whole amount was shown under the head 48.—State Railways—Construction.

The Revised Estimate provided for a total expenditure of Rx. 3,903,400 under the same head, against which the actual expenditure incurred amounted to Rx. 3,632,005, thus falling short of the Revised Estimate by Rx. 271,395 and of the Budget provision by Rx. 2,206,595.

199. The amounts provided for Railway Construction this year and next are—Revised Estimate, 1898-99, Rx. 5,151,400, and Budget Estimate, 1899-1900, Rx. 4,705,000. These figures include provision to the extent of Rx. 695,400 and Rx. 490,000, respectively, under the head 34.—Construction of Protective Railways. The distribution of the above totals is given in paragraph 28 of this Statement.

200. The distribution of the total expenditure on Railway Construction through State and Companies' agency in each of the three years from 1897-98 to 1899-1900, as given in paragraph 193, is as follows:—

	1897-98, Accounts.	1898-99, Revised.	1899-1900, Budget.
Expenditure in England.			
1. State Lines	809,010	788,000	681,000

5. Branch Lines on firm guarantee . Rx.	124,251	218,000	168,000
TOTAL INDIA .	5,393,322	5,672,300	5,178,900
TOTAL OF PROGRAMME .	8,701,274	9,158,300	8,822,700
To the above should be added the following amounts on account of expenditure on other Companies' lines and expenditure on Railway Construction from Provincial Revenues:—			
Other Branch Lines .	563,685	924,600	369,600
Railways outside of Government accounts	903,550	545,500	580,700
Provincial State Lines . .	3,792	4,200	3,600
GRAND TOTAL .	10,172,301	10,632,600	9,776,600

49.—Irrigation—Construction.

201. The figures are:—

Accounts, 1897-98.	Budget, 1898-99.	Revised, 1898-99.	Budget, 1899-1900.
Rx.	Rx.	Rx.	Rx.
692,431	750,000	692,200	850,000

The expenditure during the current year is likely to fall short of the Budget Estimate by Rx. 57,800 owing chiefly to delay in starting work on the Jhelum Canal. In order to meet the heavy demands for expenditure on this and other projects, the Budget grant for 1899-1900 has been fixed at Rx. 850,000.

50.—Miscellaneous Public Improvements.

Accounts, 1897-98.	Budget, 1898-99.	Revised, 1898-99.
Rx.	Rx.	Rx.
4,105	48,000	—4,100

202. As was explained in paragraph 185 of the Financial Statement of March 1898, this head was opened in the Accounts of 1897-98 to record the expenditure on the construction of certain jetties and landing-sheds at Chittagong in connection with the Assam-Bengal Railway. It has now been decided to classify this expenditure under the head "48.—Railways—Construction," and the expenditure of Rx. 4,105 recorded in 1897-98 has accordingly been written back in 1898-99.

Section VI.—Ways and Means.

HOME TREASURY.

203. The following table sets out the transactions of the Home Treasury as they appear in the Budget and Revised Estimate for 1898-99 and in the Budget for the coming year :—

	Budget, 1898-99.	Revised, 1898-99.	Budget, 1899-1900.
RECEIPTS.	£	£	£
Council Bills	16,000,000	19,000,000	17,000,000

Issues to Railway Companies on Capital Account—			
for discharge of debt	1,491,600	805,500	1,248,600
" expenditure	2,316,500	1,823,900	1,948,700
Remittances from India, net—			
(*a*) Railway Companies' Remittances	302,500	—62,700	736,000
(*b*) Family and other Remittances	191,300	225,600	263,800
Add—Closing Balance	2,242,854	4,304,444	2,817,344
TOTAL	33,335,854	33,363,944	28,526,044

204. In the Budget Estimate of 1898-99 the net disbursements of the Home Treasury, excluding Loans and Council Bills, were taken at £18,540,700. The intention then was to provide £16,000,000 of this by the sale of Bills on India, and to meet the balance, £2,540,700, by raising Sterling loans in England. According to the Revised Estimates the net disbursements, apart from the discount on the loan raised during the year by means of 2½ per cent India Stock, will be £17,642,600, so that if the sales of Council Bills had been restricted to £16,000,000, loan funds would have had to meet only £1,642,600, instead of £2,540,700 as originally contemplated. But the new loan of the year was

raised at a heavy discount, amounting to £702,300, on a total debt of £6,000,000; while, on the other hand, the Secretary of State has taken advantage of the improvement in the cash balances in India and of the favourable prospects of the season to raise his drawings in 1898-99 to £19,000,000. The larger balances thus made available have enabled the Secretary of State to reduce temporary borrowing on India Bills from £6,000,000 to £4,500,000, and the cash balance of the Home Treasury at the end of the year is now expected to exceed the opening balance by £1,770,200. Although, for the reasons explained above, the sale of Bills on India to the extent of £18,000,000 only would have been more than sufficient to cover the net disbursements of the Home Treasury in 1898-99, the Secretary of State has drawn a million in excess of this sum with the object of fully meeting the large mercantile demand for remittance arising from the brisk trade of the year. The drawings of 1899-1900 will be reduced by a corresponding amount.

1898-99. Sterling Loans.

205. In accordance with the intention announced in paragraph 194 of the last Financial Statement, India Stock for £6,000,000 was issued in July 1898. The new stock was issued at 2½ per cent: but owing to the unfavourable state of the money market at the time, the loan was taken up at the heavy discount of £11 9*s.* 7*d.* per cent. The total amount tendered was £22,385,300, and the minimum rate of accepted tenders was £88 5*s.* 6*d.* It is usual, when the amount of discount on a new loan is moderate, to charge off the whole amount against the Revenues of the year in which the loan is raised; but as in the present case the discount comes to the large sum of £702,300, it has been decided, in accordance with an arrangement sanctioned in 1886, to create a Sinking Fund for its discharge by annual payments for 50 years at an interest of 2½ per cent per annum. Accordingly, the money actually raised by the loan, namely, £5,297,700, is shown in the table in paragraph 203 as a receipt on account of the loan, and the annual payment to the Sinking Fund, amounting to about £7,000, is, as already explained in paragraph 121, shown as expenditure.

In accordance with the programme settled at the beginning of the year, 384,700*l.* of Oudh and Rohilkhand Railway 4 per cent Debenture Stock was discharged on the 6th May 1898, and 3,000,000*l.* India Debentures bearing interest at 3¼ per cent were also discharged on their expiry on 16th August 1898.

1898-99. Temporary Debt.

206. In March last it was intended to raise 6,000,000*l.* in 1898-99 by means of India Bills so as to replace an equivalent amount falling due in the year; but in consequence of the larger amount received for Bills of Exchange on India only 4,500,000*l.* of temporary debt had to be replaced, and the remainder was discharged by a reduction in the cash balances. Of the 4,500,000*l.* India Bills issued during the year, 2,500,000*l.* were issued in May 1898 and 2,000,000*l.* in September, both issues being for twelve months. The results of the loans were as follows:—

Month of Issue.	Amount tendered.	Amount accepted.	Average rate of interest per cent per annum.
	£	£	£ s. d.
May 1898	18,809,000	2,500,000	2 2 6
September 1898 . . .	7,175,000	2,000,000	2 12 0

Capital of Railway Companies.

207. The net issues to Railway Companies in England in 1898-99 are now estimated to be 597,600*l.* against 640,500*l.* entered in the Budget Estimate, showing a reduction of 42,900*l.* only. The following are the usual details:—

RECEIPTS.	Budget.	Revised.
	£	£
Subscribed Capital—		
(*a*) State Lines	1,335,100	1,151,800
(*b*) Guaranteed Lines	1,829,500	836,800
Miscellaneous	3,000	43,200
TOTAL .	3,167,600	2,031,800

	Budget.	Revised.
	£	£
ISSUES.		
For discharge of Debentures—		
(a) State Railways	825,100	600,000
(b) Guaranteed Lines	656,500	205,500
For Stores, Establishment Charges, etc.—		
(a) State Railways	865,300	759,700
(b) Guaranteed Lines	1,451,200	1,064,200
TOTAL .	3,808,100	2,629,400

Debentures of the Rohilkhand-Kumaon, Southern Mahratta, Madras, and Bombay, Baroda and Central India Railway Companies, aggregating £686,100, were renewed instead of being replaced by fresh Capital as was contemplated in the Budget programme. The Capital receipts from the Bombay, Baroda and Central India, the Great Indian Peninsula Railway, and the Madras Railway were less by 541,700*l.* than the original estimate. On the other hand, the Indian Midland and Bengal-Nagpur Railways raised 51,800*l.* more, making the net decrease in the amounts of new Capital 1,176,000*l.* as shown above. The item "Miscellaneous" includes 37,490*l.* received from the Bombay, Baroda and Central India Railway Company as contribution from the Fire Insurance Fund towards the cost of renewing Warren girders.

The estimates of the demands of the Companies for stores, establishment charges, etc., have proved too high except in the case of the Bengal Central, the Bengal-Nagpur, and the Burma Railways.

208. The following are the details of the remittance transactions of Railway Companies working State lines in India, to which advances of funds are made in England for the purchase of stores, etc., against adjustment in India by debit to the Railway Accounts :—

	Budget.	Revised.
	£	£
Advances for purchase of Stores—		
East Indian Railway	700,000	714,400
Rajputana-Malwa	65,000	70,600
South Indian Railway	65,000	47,300
Bengal and North-Western Railway .	75,000	107,000
	905,000	939,300
East Indian Railway Debentures . .	600,000	1,000,000
Transfer Fees, etc.	2,500	2,000
	602,500	1,002,000
Net Remittance from India . .	302,500	—62,700

The East Indian Railway has been authorised to raise 1,000,000*l.* instead of 600,000*l.* entered in the Budget Estimate, and the advances for purchase of stores are now expected to be largely in excess of the original estimates furnished by the several Companies.

Family and other Remittances.

209. The increase in the net payments on account of family and other remittances of £34,300 is the result of a number of large differences. The demands for Railway stores required by Native States have greatly exceeded the estimates sent from India, and the Revised Estimates also include 10,000*l.* estimated to be refunded to the Imperial Government in settlement of the expenses attending the employment of Native Indian Troops at Suakin. On the other hand, the repayments by Her Majesty's Government of expenses attending the employment of Indian Native Troops sent to Mombassa are expected to exceed the original estimate by 18,600*l.*

210. The net disbursements at the Home Treasury in 1899-1900, excluding Loans and Council Bills, are estimated at £18,487,100 against £18,540,700 in the Budget Estimate of 1898-99. As already stated in paragraph 204, the Secretary of State's present estimate of the drawings in 1898-99 will produce a large increase in his cash balances during the year, and this increase will be drawn upon to a considerable extent to meet the requirements of 1899-1900. It is therefore the present intention of the Secretary of State to draw during 1899-1900 £17,000,000 by Bills on India. *1899-1900. Home Treasury. Ways and Means.*

No increase in the Sterling debt in 1899-1900 is contemplated at present, nor is it proposed to issue any India Stock in the year; but India Bills falling due in 1899-1900 will be covered by fresh issues of a corresponding amount.

According to the programme now announced, the net disbursements of the Home Treasury will be met, in the year 1899-1900, by the sale of Bills on India to the amount of £17,000,000 and by a reduction in the cash balances of £1,487,100.

211. It should be understood that in stating the present intentions of the Secretary of State no sort of pledge is given that he will adhere to the programme.

INDIA.

212. The following is a summary of the Estimate of Ways and Means in India:—

	1898-99.		1899-1900.
	Budget.	Revised.	Budget.
RECEIPTS.	Rx.	Rx.	Rx.
1. Excess of Revenue over the Expenditure charged against it	26,298,400	28,196,200	28,808,000

OUTGOINGS.			
6. Excess Expenditure charged to Provincial Balances	116,800	—1,417,900	924,700
7. Expenditure not charged to Revenue	4,002,300	2,383,700	3,275,600
8. Rupee Debt discharged	325,000	245,200	190,000
9. Loans to Municipalities, etc., net	—62,200	—262,500	248,800
10. *Issues on Capital Account to Railway Companies, net*	1,468,800	873,300	781,300
11. Council Bills—*Sterling Amount*	16,014,500	18,695,200	17,152,100
Exchange	8,945,500	9,371,800	8,952,600
Add—Closing Balance	16,208,952	17,072,043	16,679,443
TOTAL	47,019,652	46,960,843	48,204,543

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

1898-99. General Summary.

213. The excess of revenue in India over the expenditure charged against it was taken in the Budget Estimate of 1898-99 at Rx. 26,298,400, and it was assumed that it would be possible to pay Rx. 24,960,000 on account of Council Bills during the year with the help of a rupee loan of Rx. 3,000,000 and with a reduction in the cash balances of Rx. 513,400. The early cessation of warlike operations on the frontier, the partial failure of the opium crop which reduced the payments to cultivators, and a satisfactory improvement in Railway and other revenues so far improved the cash balances as to enable Government to reduce the rupee loan of the year to Rx. 1,200,000 without curtailing the drawings of the Secretary of State in the early part of the year. As the year advanced, a steady increase of the revenue and large lapses in the grants for Capital expenditure added constantly to the balances and rendered it possible to meet without difficulty payments for Council Bills considerably in excess of the Budget Estimate. It is now estimated that the revenue in excess of expenditure will amount to Rx. 28,196,200; that the balances of Provincial Governments and Local Funds will be increased by Rx. 1,417,900 instead of being reduced by Rx. 116,800 as anticipated in the Budget; and that the Capital expenditure of Government not charged to Revenue will be Rx. 1,618,600 less than the original estimate. The net result of these and other variations is that in spite of the proposed rupee loan having been reduced by Rx. 1,800,000, Rx. 28,067,000 will be paid on account of Council Bills, and the year will close with a cash balance of Rx. 17,072,043, being Rx. 1,089,600 in excess of the opening balance of the year.

Rupee Loan of 1898-99.

214. It was announced in paragraph 200 of the last Financial Statement that a new loan of Rx. 3,000,000 would be raised in India in 1898-99. But owing to the scarcity of loanable Capital, due partly to famine and plague and partly to the Exchange Banks having remitted their surplus balances to England, the prospects of raising such a large amount in the Indian market were unfavourable. As a review of the Ways and Means in June 1898 showed that owing to a general improvement in revenue prospects a loan of Rx. 1,200,000 might be sufficient, it was decided to borrow that amount only. The state of the market made it impossible to attempt a 3 per cent loan, and the loan was therefore raised at 3½ per cent as in 1897-98.

The loan of Rx. 1,200,000 was issued on 30th July 1898, and tenders for it were received on 24th August 1898. The unfavourable state of the money market affected the result, and the loan was raised at a discount of R5-3½ annas per cent.

1899-1900. Main features.

215. The Revenue Account for 1899-1900 as now made up closes with a surplus of Rx. 3,932,600. The Capital expenditure on Railways and Canals not charged to Revenue must of necessity be provided for either from the surplus revenue, or by reducing the cash balances, or by contracting a loan. In 1899-1900 the requirements for Capital expenditure are—

	Rx.
(1) Government expenditure in India . .	3,275,600
(2) Government expenditure in England (£ 682,100 converted at 15¾d. the rupee)	1,039,400
(3) Net disbursements to Railway Companies in India .	1,355,600
(4) Net disbursements to Railway Companies in England (£475,700 converted at 15¾d. the rupee) . . .	724,900
TOTAL .	6,395,500

Of the total sum of Rx. 6,395,500 thus required in England and in India for the purpose of Capital expenditure during 1899-1900, £1,187,100 or

Rx. 2,266,100 has already been rendered available in the manner explained in paragraph 210 above by the increase in the Secretary of State's balances resulting from the larger drawings of Council Bills during the current year, and the remainder Rx. 4,129,400 will be more than covered by the surplus revenue estimated at Rx. 3,932,600 and an estimated reduction in the cash balances in India of Rx. 392,600. Accordingly no new rupee loan will be required in India for the purpose of Capital expenditure in 1899-1900.

Apart from the revenue surplus mentioned above, there will be a net receipt on account of Unfunded Debt—chiefly Savings Bank deposits—of Rx. 521,900, and Rx. 603,900 (included in "Other items" in the table in paragraph 212) out of the Famine Insurance Grant of Rx. 1,500,000 will be available for appropriation in reduction of debt. Against these important receipts there will be taken the expenditure of Provincial Governments from accumulated balances (Rx. 924,700), the payments for rupee debt discharged (Rx. 190,000), and the loans by Government (Rx. 248,800). The payments of Council Bills in 1899-1900 as entered in the Estimates will be Rx. 26,104,700 including exchange, or Rx. 1,144,700 more than the corresponding figure in the Budget Estimates of 1898-99.

216. As above stated, no rupee loan in India will be required in 1899-1900, and it is not the present intention of the Government of India to raise any such loan in the year. Full liberty is, however, reserved as usual to alter the programme, as now announced, to any extent that may be considered desirable.

Savings Banks, etc.

217. The following table gives the details of the transactions of Savings Banks during the last few years and the estimated transactions for 1898-99 and 1899-1900:—

YEAR.	Net additions to deposits, cash.	Interest.	Total addition.
1890-91	250,700	279,700	530,400
1891-92	517,900	306,200	824,100
1892-93	548,900	339,400	888,300
1893-94	179,900	368,000	547,900
1894-95	—84,500	297,000	212,500
1895-96	247,700	338,500	586,200
1896-97	—581,100	340,600	—234,500
1897-98	—657,100	327,000	—330,100
1898-99, Budget	156,700	327,500	484,200
1898-99, Revised	—90,300	325,700	235,400
1899-1900, Budget	126,500	336,600	463,100

218. The Budget Estimate of 1898-99 anticipated a small addition of Rx. 156,700 to the net deposits, but according to the present estimates there will be a net withdrawal of Rx. 90,300 apart from interest. This result is attributed to the low price ruling for Government securities throughout the greater part of the year having encouraged small investors to withdraw their money from Savings Banks and buy Government paper. The price of 3½ per cent Government securities is now above par, and in preparing the Budget Estimates for 1899-1900 allowance has been made for a small addition to the net deposits of Rx. 126,500.

Loans by Government for local purposes.

219. The transactions during the year 1898-99 under the head of Loans by Government are now expected to result in a net receipt of Rx. 262,500 against Rx. 62,200 entered in the Budget Estimate, an increase in the receipts of Rx. 200,300. This increase is made up of an increase in the recoveries of Rx. 174,400 and a decrease in the advances of Rx. 25,900. As is usually the case, the allotments asked for by Provincial Governments on behalf of local

authorities could not be fully utilised by reason of delays in maturing the schemes of improvement for which the loans were required. The amounts so lapsing are largest in the North-Western Provinces and Oudh.

The recoveries were also larger than the original estimates, chiefly in the Central Provinces and the North-Western Provinces.

Provision has been made in the Budget Estimate of 1899-1900 for net issues on account of loans to the extent of Rx. 248,800 made up of allotments of advances aggregating Rx. 989,600 and recoveries of past loans, Rx. 740,800. The following are the figures of gross recoveries and issues for the six years ending 1899-1900:—

	Issues.	Recoveries.
1894-95	686,806	512,267
1895-96	744,789	506,246
1896-97	1,337,194	542,638
1897-98	1,466,739	958,153
1898-99, Revised	771,700	1,034,200
1899-1900, Budget	989,600	740,800

It will be observed that the large issues of the later years of the period have been to a great extent met by large recoveries which in their turn were rendered possible by the liberal scale on which certain classes of loans were given in years of scarcity. The estimates for next year include a large provision for loans to agriculturists and cultivators in the Punjab required partly for the relief of distress apprehended in the Hissar District, but chiefly in connection with the Chenab Canal Colonisation Project from which a substantial increase of revenue is expected. Allowance has been made for plague loans as far as they can be foreseen at present. A sum of Rx. 100,000 representing the Capital cost of the Umaria Colliery is also included in the figures as a loan to the Rewa Durbar. The Colliery will be transferred to the Durbar with effect from 1st April 1899, and pending recovery of the cost the amount is written off the Capital Account of Railways by transfer to the Loan Account.

Cash Balance.

220. The year 1899-1900 is estimated to close with a cash balance in the Indian Treasuries of Rx. 16,679,443, which is less than the opening balance of the year by Rx. 392,600.

J. WESTLAND.

CALCUTTA;
March 20, 1899.

W. H. DOBBIE,
Deputy Comptroller General.

A. F. COX,
Comptroller General.

H. H. RISLEY,
Offg. Secretary to the Government of India.

FORT WILLIAM,
FINANCE AND COMMERCE DEPARTMENT;

Memorandum by the Honourable Major-General Sir Edwin Collen, K.C.I.E., on Military Expenditure.

The estimates with which the Military and Marine Department of the Government of India is concerned, are—

I—Indian Military Estimates.

II—Home (India) Military Estimates.

III—Military Works Estimates.

IV—Marine Estimates.

2. They will be dealt with in this memorandum in the order given above.

I.—Indian Military Estimates.

Revised Estimates, 1898-99.

Comparison—Revised for 1898-99, and Budget for 1898-99.

3. The revised Indian Military Estimates for 1898-99, compared with the budget for the year, show a net saving of Rx. 520,800 caused by an increase in receipts of Rx. 2,200 and a decrease in expenditure of Rx. 518,600.

4. The more important causes which have led to the decrease in expenditure are as under:—

(a) There is a decrease of Rx. 344,300 on account of military operations and an increase of Rx. 53,200 on account of special services, thus giving a net decrease of Rx. 291,100 on account of military operations and special services. The decrease on account of military operations is mainly due to the large expenditure on account of field operations on the North-West Frontier, which was anticipated when the budget was framed, not having been incurred, owing to the cessation of those operations earlier than was expected, and also to various changes in the strength and organisation of the forces which were mobilised. On the other hand, the increase on account of special services is chiefly caused by the augmented garrisons in the Malakand and Tochi Valley not having been reduced on as early a date as was anticipated.

(b) Another cause of decrease, amounting to Rx. 65,000, was the fall in the prices of food supplies for men and animals.

(c) There was also a decrease of Rx. 41,200 on account of exchange compensation allowance, owing to exchange having been favourable during the year.

(d) Again, savings accrued owing to the authorised strength of British infantry being short by one battalion for a part of the year (Rx. 36,700); to the employment of the 1st Bengal Infantry at Mauritius, and to the retention for service in East Africa of the 27th Bombay Infantry and the head-quarters wing of the 4th

Bombay Rifles for longer periods than were anticipated. The Military Estimates were relieved of expenditure on account of the two latter items to the extent of Rx. 18,000 and Rx. 15,400, respectively, the charges having been borne by Her Majesty's Imperial Government. The Military Estimates were further relieved of expenditure to the extent of Rx. 24,100 on account of the pay and allowances of officers whose services were placed at the disposal of the Civil Department for plague duty.

(*e*) A lapse of Rx. 20,000 has also occurred in the budget for 1898-99, as the orders of the Secretary of State on the question of increasing the establishment of Commissariat-Transport officers could not be given effect to in that year.

(*f*) In addition to the foregoing, the following are the chief causes which contributed towards reducing expenditure :—

(*i*) Under Grant 1 (*Army and Garrison Staff*) there are savings amounting to Rx. 14,500 owing chiefly to absence of officers on furlough.

(*ii*) Under Grant 3 (*Regimental Pay, Allowances and Charges*) there are savings to the extent of Rx. 29,000, owing to fluctuations in the strength of the troops.

(*iii*) Under Grant 4 (*Commissariat Establishments, Supplies and Services*) the savings aggregate Rx. 28,500, and are due to smaller purchases of malt-liquor owing to decreased consumption (Rx. 14,000) ; and to less expenditure on other accounts.

(*iv*) Under Grant 10 (*Ordnance Establishments, Stores and Camp Equipage*) the savings aggregate Rx. 20,000 owing chiefly to fluctuations in establishments and smaller purchases of camp equipage and other stores.

5. The total decrease in expenditure was, however, to some extent counterbalanced by certain increases, the more important of which are the following :—

(*a*) Special bounties and advances of deferred pay were paid to a limited number of men of certain British regiments serving in India, to induce them to extend their service with the colours. This causes an increase to the extent of Rx. 31,900.

(*b*) Judging from the experience of the first nine months there will be larger expenditure to the extent of Rx. 15,000 on account of the ordinary conveyance of troops and stores.

(*c*) Owing to the existence of plague in India, it has been found necessary to give additional grants-in-aid, to certain cantonments in the Bombay Command, to meet expenditure on plague operations.

(*d*) Under Grant 9 (*Medical Establishments, Supplies and Services*) there is larger expenditure to the extent of Rx. 10,000 chiefly in the purchase of medical supplies.

Estimates, 1899-1900.

Comparison—Budget for 1898-99, and Estimate for 1899-1900.

6. The estimates for 1899-1900, in the net, amount to Rx. 16,095,700, or Rx. 1,155,100 less than the budget for 1898-99. This is due to a decrease in receipts of Rx. 16,400 and in expenditure of Rx. 1,171,500.

7. In comparing the estimates of next year with the budget for the current year, it will be found that the decrease in *receipts* is mainly due to less issues on payment of commissariat supplies being anticipated than in the current year owing to the cessation of field operations.

8. The decrease in *expenditure* is accounted for as follows:—

(*a*) A saving of Rx. 1,176,500 occurs in the provision for military operations and special services.

(*b*) In consequence of the higher rates of exchange adopted for the estimates of 1899-1900, a saving of Rx. 120,000 is anticipated in the pay of British troops and of Rx. 20,800 in exchange compensation allowance.

(*c*) A saving, amounting to Rx. 60,000, is due to an anticipated fall in the prices of food supplies for men and animals as compared with the prices adopted for the current year's budget.

(*d*) Again, savings to the extent of Rx. 21,200 will accrue owing to the cost of the 1st Bengal Infantry while stationed at Mauritius being borne by Her Majesty's Government.

(*e*) Another cause of saving, resulting directly from the cessation of field operations, is that the provision for expenditure on account of non-effective services is reduced by Rx. 22,500 as regards extra pensionary allowances, and by Rx 14,500 for war medals.

(*f*) In addition to the foregoing, the following reductions in expenditure are anticipated:—

(*i*) Under Grant 3 (*Regimental Pay, Allowances and Charges*) savings to the extent of Rx 45,000 are anticipated owing to probable fluctuations in strength and other causes.

(*ii*) Under Grant 4 (*Commissariat Establishments, Supplies and Services*) savings, amounting to Rx. 32,800, are expected, owing to (1) smaller purchases of malt-liquor (Rx. 12,800); (2) to the special grant (Rx. 10,000) made in the preceding year for purchase of transport animals to complete the authorised complement of mobilisation animals not having been repeated; and (3) to smaller provision (Rx. 10,000) as against Rx. 20,000 in 1898-99 having been made for additional officers for the Commissariat-Transport Department

(*iii*) Under Grant 6 (*Clothing Establishments, Supplies and Services*) reduced expenditure of about Rx. 17,400 is anticipated, owing to smaller purchases of certain articles being necessary.

(*iv*) Under Grant 10 (*Ordnance Establishments, Stores. and Camp Equipage*) there will be savings, aggregating Rx. 10,300, due chiefly to anticipated variations in establishments, and also to a smaller provision having to be made for the conversion of the equipment of the batteries of the field army to that suitable for the 15-pounder projectiles.

9. The foregoing decreases in expenditure will, however, be partly counterbalanced by certain increases, of which the following are the more important:—

(*i*) Increased provision to the extent of Rx. 114,600 has been made for messing allowance to the British Army. In this connection it may be mentioned that, as explained in my memorandum of last year, the details connected with the measures to be adopted in India, in furtherance of the improvements made in the position of the non-commissioned officers and men of the British Army in all parts of Her Majesty's dominions, were not settled when the budget for 1898-99 was closed; provision, therefore, was made therein for only Rx. 200,000. During the currency of that year the matter was, however, finally settled, and with the sanction of the Secretary of State certain measures were adopted in India with effect from the 1st June 1898. These measures involve the abolition of deferred pay, and the grant of a gratuity on discharge or transfer to the Army Reserve; also the grant of messing allowance of $2\frac{1}{4}$ annas per diem in addition to usual pay and extra-duty pay, and the free issue of groceries, for which the soldier had up to that time been required to pay 9 pies per diem. I may mention that the soldiers who were in the service at the time these changes were introduced had the option of accepting them, or continuing under the arrangements they were intended to supersede. These considerations and the fact that expenditure for the whole, instead of a part, of a year has to be provided for, account for the increase in the provision for this allowance in the estimate of next year.

(*ii*) Provision to the extent of Rx. 39,500 has been made for providing the mobilisation equipment of the additional corps (line of communications) included among the extra units of the field army; and of Rx. 37,600 for maintaining a reserve of compressed fodder to facilitate mobilisation requirements. A sum of Rx. 18,400 has also been provided for the supply of camel saddles for the 3rd and 4th Divisions and extra units of the field army.

(*iii*) A sum of Rx. 20,700 has been provided for the re-establishment of Cantonment Hospitals.

(*iv*) There will also be increased expenditure to the extent of Rx. 17,200 due to the raising of an additional Native mountain battery.

(*v*) Increased provision, amounting to Rx. 16,800, has also been made on account of the ordinary movements of troops and stores, as it is anticipated that the reliefs next year will be heavier than they were this year.

(*vi*) Larger provision to the extent of Rx. 14,000 has been made for camps of exercise.

(*vii*) Another cause of increased expenditure, amounting to Rx. 13,800, is the return of the head-quarters wing of the 4th Bombay Rifles and the anticipated return from Mombassa early next year of the 27th Bombay Infantry, the cost of which during its absence from India has been borne by Her Majesty's Imperial Government.

(*viii*) There will also be larger expenditure to the extent of Rx. 10,000 on account of medical supplies and services.

(ix) The expenditure side of the budget estimate for next year is also increased by reason of a smaller deduction in India to adjust excess provision in the Home Estimate—Rx. 48,300.

10. A statement is appended showing the net amounts under each of the 20 Grants for effective and non-effective services, and for military operations:—

	Strength.

* The bulk of subscriptions of officers to Indian Military Service Family Pensions is received in India, while most of the expenditure is incurred at home. The receipts in India, therefore, exceed the expenditure in India, and hence, as the figures in the above statement are net, there must be a minus entry.

† In my memorandum on military expenditure last year the heading "Military Operations" did not appear, although it did appear in the Financial Statement, the charges being included in my memorandum under Grant 14. The figure adopted above differs from that in the Financial Statement for last year, by reason of a change in classification involving a redistribution between ordinary charges and warlike operations.

II.—Home (India) Military Estimates.

Revised Estimates, 1898-99.

Comparison—Revised for 1898-99, and Budget for 1898-99.

11. The second of the estimates with which the Military Department is concerned is the Home estimate for army effective and non-effective charges. The Home Budget Estimates for 1898-99 provided for a gross expenditure of £4,469,300, while in the Revised Estimates provision has been made to the extent of £4,324,100.

12. The saving of £145,200 in the Revised, as compared with the Budget Estimate for 1898-99, is chiefly due to decrease in the payments for ordnance stores, owing, to a great extent, to the reduction of demands made by India. It is also due to reduced payments on account of the furlough allowances of officers of the Indian Service, and of the pay and pensions of non-effective and retired officers of the Indian Service. These decreases are, however, partly counter-balanced by larger payments having been made to the War Office in settlement of their claims for 1897-98 on account of the effective and non-effective service of the British forces serving in India, than were anticipated when the Budget Estimate was framed.

13. There is also an increase of £10,400 on account of receipts in the Revised, as compared with the Budget Estimates for 1898-99, due chiefly to larger receipts being anticipated on account of the Indian Troop Service, and in the value of articles in possession of regiments on their transfer from the Indian to the British establishment.

14. The net figures of the revised, therefore, show a saving of £155,600 on those of the Budget Estimate for 1898-99 due, as explained above, to a decrease in expenditure of £145,200 and an increase in receipts of £10,400.

Estimates, 1899-1900.

Comparison—Budget for 1898-99, and Estimate for 1899-1900.

15. The receipts and expenditure for 1899-1900 are as follows:—

	Receipts.	Expenditure.	Net expenditure.
	£	£	£
Effective	51,900	1,996,300	1,944,400
Non-effective	15,500	2,496,800	2,481,300
Total ...	67,400	4,493,100	4,425,700

16. Compared with the budget for 1898-99, larger receipts to the extent of £18,100 are anticipated in 1899-1900, owing to the same causes as those which have led to the figures on account of receipts being increased in the Revised Estimate for 1898-99. The total gross expenditure for 1899-1900 is, however, higher by £23,800 than the amount provided in the budget for the preceding year, owing chiefly to larger amounts being provided for payment to the War Office on account of the effective and non-effective services of the British forces serving in India, as the amounts adopted on this account in the budget of the preceding year were too low. These increases in expenditure are partly counter-balanced by provision for one transport for trooping service less than in the preceding year having been made, and by reduced expenditure being anticipated on account of pay and pensions of non-effective and retired officers of the Indian Service.

17. The gross charges on account of effective services include payments to the War Office in respect of the British forces serving in India, amounting, as estimated in the coming year, to £730,000, as against £721,000 in the estimates for 1898-99. These charges are based on the capitation rate of £7-10 for each man borne on the establishments of the British forces in India, with the addition of the charge for deferred pay issued to British soldiers on discharge or transfer to the reserve. In connection with the deferred pay, it may be mentioned that during the current financial year it was decided to abolish this concession and to substitute for it a gratuity, the effect of which will be to ultimately reduce military expenditure at Home. The other items included in the gross effective charges are furlough allowances and pay during the voyage of British forces serving in India (£108,000); furlough allowances of officers of the Indian Service (£230,000); Indian Troop Service (£239,600); passage of officers and troops otherwise than in transport (£19,000); miscellaneous (£19,000); and stores for India (£629,700).

The gross charges on account of non-effective services are made up of the retired pay, etc., of the British forces for service in India (£554,000); pay of the non-effective Colonels of Royal Artillery (£24,800); while the pay and pensions of non-effective and retired officers of the Indian Service amount to £1,800,000, the miscellaneous pensions to £86,000, and the Indian Military Service Family Pensions to £32,000.

18. The net expenditure for 1899-1900 is more by £5,700 than that for the preceding year; and, as explained above, this is due to an increase of £18,100 in receipts and an increase of £23,800 in gross expenditure.

19. Subsequent to the estimate of 1899-1900 being closed, it was decided to defer the supply from England of certain stores to the value of £11,093 for which provision was included in those estimates. This over-provision in the Home Estimates has been adjusted by a corresponding deduction in the Indian Estimates with the result that, as compared with the net expenditure of 1898-99, there will be a saving in 1899-1900 of £5,393 in the Home Expenditure.

20. The figures of actual expenditure in 1897-98, of the *Budget* and *Revised Estimates* for 1898-99, and of the *Estimate* for 1899-1900, are given below in detail for convenience of comparison :—

	Accounts, 1897-98.	Budget Estimate. 1898-99.	Revised Estimate. 1898-99.	Estimate, 1899-1900.
EFFECTIVE.	£	£	£	£
Payments to War Office in respect of British Forces serving in India	729,719	721,000	744,400	730,000
Furlough Allowances and Pay during voyage of British Forces serving in India ...	98,390	108,000	112,000	108,000
Furlough Allowances of officers of the Indian Service	195,800	230,000	202,000	230,000
Indian Troop Service	228,944	267,600	284,600	260,600
Passage of officers and troops otherwise than in transports	17,737	19,000	12,000	19,000
Miscellaneous	31,651	20,000	19,500	19,000
Stores for India	527,141	627,900	522,900	629,700
Total ...	1,829,382	1,993,500	1,897,400	1,996,300
NON-EFFECTIVE.				
Payments to War Office for Retired Pay, etc., of British Forces for service in India ...	506,847	517,000	527,500	554,000
Pay of non-effective Colonels of Royal Artillery	24,518	24,800	24,200	24,800
Pay and pensions of non-effective and retired officers of the Indian Service ...	1,771,591	1,820,000	1,760,000	1,800,000
Miscellaneous pensions, etc.	84,443	84,000	84,500	86,000
Indian Military Service Family Pensions ...	27,446	30,000	30,500	32,000
Total ...	2,414,845	2,475,800	2,426,700	2,496,800
Total, Effective and Non-Effective ...	4,244,227	4,469,300	4,324,100	4,493,100

21. The following table shows, in detail, the expenditure for stores (including freight) from 1893-94 to 1899-1900 :—

	ACCOUNTS.					Revised Estimate, 1898-99.	Estimate, 1899-1900.
	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.		
	£	£	£	£	£	£	£
Clothing	200,699	210,107	210,613	158,825	177,184	169,500	193,400
Ordnance and Miscellaneous	547,202	323,141	235,850	290,835	269,377	289,700	352,200

North-West Frontier Field Operations ...	...	...	...	...	...	..	5,300
Total ...	805,259	578,043	495,157	523,811	527,141	522,900	629,700

III.—Military Works Estimates.

Excluding English expenditure and exchange, the budget estimate for 1898-99 amounted to Rx. 1,135,800; the revised estimate of expenditure amounted to Rx. 1,113,700. There has, therefore, been less expenditure in India of Rx. 22,100.

The budget estimate for 1899-1900, excluding English expenditure and exchange, amounts to Rx. 1,299,600, or Rx. 185,900 more than that of 1898-99. The difference is due to an extra grant of Rx. 14,500 for the Barrack Department duties in the Madras Command, now taken over by the Military Works Department, and to a provision of Rx. 150,000 for defence works on the North-West Frontier.

The heads of the Military Works estimate are in round figures:—

	Rx.
For original works, including works in progress and those to be commenced	400,800
,, repairs	349,000
,, establishment	298,000
,, Barrack Department establishment, supplies, and tools and plant	86,000

The new works, 168 in number, including 63 in progress and 105 not commenced, comprise fourteen water-supply works on which Rx. 47,300 is to be spent, and Rx. 22,100 for coast and inland fortifications, the balance being made up of drainage works, hospitals, barracks, and Ordnance, Commissariat, Marine, and Remount requirements. Many of these new works are of a minor character, or are renewals. The demands are very large, and no fewer than 354 works cannot be provided for. If they had been provided for it would have meant an addition of Rx. 910,000 to the budget.

The laborious task of re-constructing the organization for the performance of the military works services has been completed, and I hope that the new arrangements will come into force at an early date.

IV.—Marine Estimates.

Revised Estimates, 1898-99.

Comparison—Revised for 1898-99, and Budget for 1898-99.

The net figures of the Budget Estimate of the Royal Indian Marine for 1898-99 were Rx. 142,500, the Revised Estimate stands at Rx. 123,200, showing a decrease of Rx. 19,300. This decrease in the net expenditure is caused by excess receipts amounting to Rx. 17,500, and a reduction in expenditure to the extent of Rx. 1,800.

The excess under receipts is chiefly due to large recoveries from the Home Government in connection with the employment of Royal Indian Marine vessels on Imperial Service.

The increases in expenditure (aggregating Rx. 8,400) are chiefly due to smaller recoveries for stores issued to, and works executed for, other departments

The decreases in expenditure (aggregating Rx. 10,200) are principally due to savings in matters of establishments and up-keep; reduced expenditure on repairs to Her Majesty's ships in Indian seas and Royal Indian Marine vessels at outstations; smaller payments of exchange compensation allowance; temporary vacancies and other items.

Taking the increase against the decrease, there is a net decrease of Rx. 1,800, and adding these figures to the increased receipts, Rx. 17,500, the result is a decrease of Rx. 19,300 in the Revised as compared with the Budget Estimate.

Estimates, 1899-1900.

Comparison—Budget for 1898-99, and Estimate for 1899-1900.

The net figures of the Marine Estimate for 1899-1900 are Rx. 136,950 against Rx. 142,500, the figures of the budget for 1898-99 showing a decrease of Rx. 5,550. This decrease is caused by an increase in receipts, amounting to Rx. 7,900, due to anticipated recoveries in connection with the employment of the *Clive* on Imperial Service, counterbalanced by increased expenditure to the extent of Rx. 2,350.

General Remarks.

Having reviewed the estimates with which the Military and Marine Department of the Government of India is concerned, I would now offer the following remarks in connection with the work of the Army Departments under the administrative control of the Military Department.

The past year has happily been one during which the army of India has enjoyed a much-needed rest, but the experiences of the year 1897-98 have shown certain weak points in the military system, and every department has been engaged in considering what remedies shall be applied, while the whole question of the military position on the North-West Frontier has been examined.

The deficiencies in the transport service have also been engaging attention, and a strong Committee under the presidency of Lieutenant-General G. E. L. Sanford, was formed to consider the organisation of that important service. The Committee has submitted a valuable and elaborate report and their recommendations are now under our immediate consideration. The question of improving the ambulance transport has been taken up, and the proposals of a Committee have been submitted. Another weakness that made itself conspicuous during the late campaigns was the deficiency in mountain artillery. We have received the Secretary of State's permission to raise an additional battery.

A decision has been arrived at regarding the gauge of frontier railways; the Nowshera-Dargai line will be pushed on the 2-foot 6-inch gauge; and we have formulated proposals for providing a stock of the plant required for field service tramways and railways.

Another subject to which we have given our attention is that of house accommodation in cantonments. As is well known, difficulties have frequently occurred in obtaining house accommodation in cantonments for officers of the army, and the existing rules on the subject having been found inadequate, it has been considered expedient to make better provision for that purpose by means of legislation. A bill was introduced on the 4th November 1898. The memorials

from house-owners and the opinions of local Governments and Administrations are being carefully considered.

I have already alluded to the proposed re-organisation of the transport. Last year I mentioned that the insufficiency of the existing complement of commissariat-transport officers had been brought specially to notice in the late campaigns. After very full consideration a large increase to the establishment was recommended. The Secretary of State for India has sanctioned an immediate increase of twelve officers and has called for further information to enable him to decide what further addition is necessary.

With a view to supply the hospitals and British troops with pure milk, steps are being taken to improve the management of dairies generally, and to work dairy and grass farms in conjunction. The supply of grass to the mounted branches has been, in recent years, a matter for anxious consideration, but I hope that we are now in a fair way to attain something like success. An experimental training class for British non-commissioned officers and men in scientific grass farming has been opened at Allahabad, and other measures are being taken to generally improve the supervision of grass farms, and to make them paying concerns. The rules for the provision of grass lands for the horses of Native cavalry in the Bengal and Punjab Commands have been extended to the Native cavalry in the Bombay Command.

Considerable progress has been made in various matters connected with the manufacture and supply of munitions of war. Proposals have been made for the establishment of a factory for the manufacture of cordite on a large scale. This will enable us to be independent of England for our cordite supply and will effect a considerable economy. A site has been decided upon at Jubbulpore for the establishment of a Central Gun-Carriage Factory for all India. The three existing factories at Madras, Bombay, and Fatehgarh cannot be kept up to date economically, and the establishment of a central factory will effect a saving in the cost of establishments. The Harness and Saddlery Workshops in the Bombay Arsenal have been closed, and the work transferred to Madras. In dealing with the working of the Ordnance Department during 1897-98 in my last year's memorandum, I referred to the fact that in order to provide a central authority for the expeditious and economical supply of stores to the arsenals and depots in India, the whole of the ordnance factories in this country had been placed under the direct control of the Director-General of Ordnance in India. I would now add that as a necessary sequel to this arrangement a central office for dealing with the audit and accounts of these factories has been ordered to be formed with effect from the 1st April 1899. Pole draught is being substituted for shaft draught in batteries of horse and field artillery in India. Horse artillery batteries are also being equipped to take cordite cartridges with 12-pr. projectiles, while the field batteries are being altered to carry 15-pr. projectiles with cordite cartridges. It has been decided to carry out the re-armament of British cavalry in India with the Lee-Enfield Magazine carbine, and the artillery with the Martini-Enfield carbine as funds become available.

The equipment of additional corps of the field army for duty on the lines of communication under the plan of mobilisation will be proceeded with in 1899-1900.

The provision of remounts for the army is always a matter of the greatest importance. Various improvements and economies have been effected, and on the whole it may be claimed that satisfactory Australian and country-bred remounts are issued to the army. With a view to developing mule-breeding in India, the purchase of additional donkey stallions from Cyprus was sanctioned, and we have engaged to take a certain number of stallions annually. The increasing difficulty of obtaining donkey stallions from the continent renders it imperative that other sources of supply should be opened up.

There is no more important question than that of the sanitary condition of the army. A great deal remains to be done, but year by year we are making improvements, endeavouring to find out defects and how to remedy them. More troops are stationed in the hills during the hot weather, barracks rebuilt or renewed, and a supply of good water provided at an increasing number of stations. Investigations have been specially made into the sources of the water-supply at various places, and the most stringent precautions have been taken locally to protect the men, as far as possible, from impure water. In the Native Army a considerable progress has been made in re-building the lines; but there are still many lines which ought to be renewed. Valuable sanitary work has been done by the officers appointed for the purpose, and special investigations have been made at those stations which have been particularly afflicted by enteric disease; and water-supply and drainage schemes have been pushed on. It is hoped that the establishment of cantonment hospitals will do much to mitigate the severity of a certain class of diseases. Owing to the conservancy arrangements in cantonments in the Bombay Command being of an unsatisfactory nature, measures are being taken for gradually introducing into that Command the system which has proved successful in the Bengal and Punjab Commands. Funds have been specially provided for the improvement of the sanitary condition of the important military station of Quetta.

Marine Department.

During the past year the work in the dockyards at Bombay and Kidderpore (Calcutta) has been normal, notwithstanding the difficulties which the occurrence of plague in the former place gave rise to. The vessels of the Royal Indian Marine have been employed in the usual trooping service, which has extended to Mauritius and Durban. Experiments have been made, with some success, in sending convalescents for a sea trip during the trooping voyages. Two vessels of the Indian Marine have been many years in the service, and, although at present efficient, arrangements will have to be made to replace them before many years elapse.

EDWIN H. H. COLLEN,

The 20th March 1899. *Major-General.*

Memorandum by the Honourable Sir Arthur Trevor, K.C.S.I., on the conclusions of the Conference of 1898 on Railway extensions in India.

PRESIDENT:
His Excellency the Viceroy. (The Earl of Elgin).

MEMBERS:
The Honourable Sir James Westland, K.C.S.I.
The Honourable Major-General Sir E. H. H. Collen, K.C.I.E.
The Honourable Sir Arthur Trevor, K.C.S.I.
Mr. F. R. Upcott, Secy. to the Govt. of India, P. W. Dept.
Mr. A. R. Becher, Accountant General, P. W. Dept.

SECRETARY:
Captain W. J. McEshinny, R.E., Offg. Under-Secy. to the Govt. of India, P. W. Dept. (Railway Branch).

The Railway Conference of 1898 met at Viceregal Lodge, Simla, on the 15th and 16th August 1898, and was constituted as noted in the margin. A representative of the Revenue and Agricultural Department was not included on the Committee this year, as with the exception of a group of light lines in the Madras Presidency, which are not urgent and the projects for which are incomplete, there were no famine lines brought forward that had not already been discussed in former years.

2. Twenty-three new projects were considered, of which five were set aside, one was recommended for construction by a Native State, and the remaining seventeen were held over as not yet ripe for a decision.

The line recommended for construction is the Tonk Branch, 10 miles in length and estimated to cost Rx. 40,000. It will connect Tonk with the Jeypore-Chambal Railway.

3. Of lines held over or set aside at the Conference of 1897, and neither hitherto included in the programme nor brought under negotiation outside the programme, two have now been recommended for construction by, or on the responsibility, direct or indirect, of, Government, one by a Branch Line Company, and two for construction without assistance by Native States and private enterprise.

The lines in question are shown below:—

No.	Name.	Approximate length.	Approximate cost.	Locality and agency.
	(a) By or on the responsibility, direct or indirect, of Government.	Miles.	Rx.	
1	Nowshera-Mardan . . .	40	117,600	Punjab. As part of the North Western railway.
2	Midnapur-Jherria . . .	122	1,221,200	Southern Bengal. As part of the Bengal Nagpur railway.
	(b) Open to Branch Line Companies.			
1	Chandipur-Taki . . .	39	172,000	Bengal. Branch of Bengal Central railway.
	(c) Reserved for Native States.			
1	Shoranur-Cochin . . .	64	917,700	Madras. Branch of Madras railway.
	(d) By private enterprise.			
1	Ammáyanayakanur-Kuruvanath .	75	500,000	Madras. Branch of South Indian railway.

4. Of the two lines recommended for construction by, or on the responsibility of, Government, No. 1, the Nowshera-Mardan, has been estimated for, and provision has also been made in the ensuing programme of railway construction for its commencement.

No. 2, the Midnapore-Jherria, has been accepted for early commencement of construction for the reason that it will open out all the coal-fields at present demanding railway facilities, and at the same time provide a valuable connection for the traffic between Upper India and the east and south coasts of India. The line, which will also have a famine protective value, has been provided for within the programme.

The Chandipur-Taki Railway has been accepted for construction without any Government guarantee, and arrangements are being made by the Promoters for carrying out the survey and preparation of the detailed project by the agency of the Bengal Central Railway Company. The Shoranur-Cochin railway has also been accepted for construction by the Native State of Cochin without any Government guarantee, while the formation of an independent Company to construct the Ammáyanayakanur-Kuruvanath as a tramway without a guarantee under the provisions of the Indian Tramways Act, XI of 1886, has been agreed to, subject to certain conditions.

5. As has been explained on former occasions, the extent to which it is possible to give effect to the recommendations of the Conference in regard to Capital Expenditure on railways other than such as are made by Branch Line Companies under the terms of Government of India Resolution No. 514 R. C., dated 17th April 1896, or by Native States or private Promoters without financial assistance, has been governed up to the end of the year now closing by the limitations of a programme covering the three years, 1896-97 to 1898-99. This programme provided for a total expenditure of Rx. 29,660,000, against which we expect to spend the following amounts:—

	Rx.
In 1896-97 (Actuals)	8,658,800
„ 1897-98 („)	8,145,500
„ 1898-99 (Revised Estimate)	8,387,500
TOTAL .	25,191,800

The Budget Estimate for 1898-99 was prepared for Rx. 10,788,900, but owing to the late arrival of English stores consequent on the engineering strikes in England and other causes, the impossibility of working to the original programme was recognized some time ago, and the Revised Estimate has been reduced accordingly to the sum of Rx. 8,387,500 above shown.

For the three years, 1899-1900 to 1901-1902, on which we are about to enter, it has been thought advisable that we should work on a somewhat less ambitious programme, providing about 6 crores a year for new lines and extensions as against nearly 8½ crores under the previous programme. The chief object of this reduction is to give time for the earnings to overtake the expenditure. The forecast which has been prepared and approved by the Secretary of State works out accordingly to Rx. 20,322,100, distributed as under:—

	Rx.
1899-1900	6,772,700
1900-1901	6,728,400
1901-1902	6,821,000
TOTAL .	20,322,100

The additional amount, approximately Rx. 750,000 in each year, which it will be observed has been provided, is due to the inclusion in programme limits from this year of the open line Capital expenditure of the three guaranteed companies and the anticipated expenditure by branch line companies financed on the basis of a firm guarantee instead of a rebate, which items have hitherto been dealt with outside the programme.

The sum set down for expenditure during 1899-1900 is Rx. 6,772,700. In consequence, however, of the heavy lapse, amounting to Rx. 2,401,400, on the grant for 1898-99, to which reference has already been made and which was in a great measure due to short outlay in England consequent on the failure of contractors to complete orders placed with them for stores, it has been agreed, with the concurrence of the Secretary of State, to add a sum of Rx. 1,060,000, representing a portion of this lapse to the grant for 1899-1900, and a further sum of Rx. 1,090,000 subsequently reduced to Rx. 990,000 has been provisionally added under certain conditions with the concurrence of Finance Department, subject to Secretary of State's approval. With this addition the total amount available for expenditure on construction of Railways during 1899-1900 will stand at Rx. 8,822,700.

This sum has been distributed for expenditure on Railways as under :—

	Rx.
34.—Construction of Protective Railways	490,000
48.—State Railways Construction	3,465,000
Capital of Indian Railway Companies	2,841,900
Branch Line Companies	168,000
Guaranteed Railways and Extensions	1,107,800
East Indian Railway Company's debentures	750,000
Total amount available	8,822,700

6. Statement A appended to this memorandum gives the programme as modified up to date, and shows also the progress made with such of the lines accepted by Government on the recommendation of the Conference for early construction as have been brought within the programme. The distribution of the amount it shows as available for expenditure during 1899-1900 and subsequent years will, of course, be liable to modification according to circumstances.

7. Statements B and C show how matters stand in regard to lines recommended for early construction at the cost of Branch Line Companies, Native States, etc., outside the programme, and either actually taken in hand or under consideration and negotiation with a view to construction; and statement D summarises the actual and anticipated progress of railway construction generally for the two years, 1898-99 and 1899-1900.

A. C. TREVOR

Appendix A.

Statement showing the expenditure actually incurred and the estimated further expenditure to be incurred on railways to end of 1901-1902.

APPENDIX B.

Statement showing Railways recommended since 1895-96 for early construction outside the programme by the agency of—

(i) Branch Line Companies,

(ii) Native States,

(iii) Railway Companies to which free land and minor concessions are given, which have actually been commenced or arranged for, omitting those shown in last year's Appendix B as completed.

Railway.	Length.	Estimated or approximate cost.	Remarks.
	Miles.	Rx.	
(I) By Branch Line Companies.			
(a) Lines shown as under construction in 1897-98.			
Segowlie-Ruksaul	18	99,800	Completed and opened to traffic.
Open	18	99,800	
South Behar	79	1,129,407	Under construction by the agency of the East Indian Railway Company. More than ¾ths finished.
Tapti Valley (Surat-Nandurbar-Amalner)	156	1,400,139	Under construction by the agency of the Bombay, Baroda and Central India Railway Company. More than ¾ths finished. First section to Vyara opened to traffic.
*Hurdwar-Dehra	32	300,000	Under construction by the State for the Branch Line Company. Tunnels completed and nearly half of line finished.
*Brahmaputra-Sultanpur	60	342,700	Under construction by the agency of the Eastern Bengal Railway. Nearly half finished.
Mymensingh-Jamalpur Jamalpur-Jagganathganj	54	205,500	Ditto More than ¾ths finished. First section to Jamalpur opened to traffic.
Under Construction	381	3,377,746	
(b) Recommended lines shown as under consideration or negotiation in 1897-98.			
Narwana-Kaithal Branch	23	100,000	Completed and opened to traffic.
Open	23	100,000	
Chandipur-Taki	39	172,000	Concession granted pending arrangements for financing the project and preparation of necessary survey and estimate of cost.
Amritsar-Tarn Taran-Sarhali	25	150,000	Concession granted. Commencement of work not yet authorised pending subscription of capital and submission of the detailed project.
	64	322,000	
(c) New projects since put forward.			
Nil.			
Total (I)	486	3,899,546	
(II) By Native States.			
(a) Lines shown as under construction in 1897-98.			
Wadhwan-Dhrangadhra	21	66,200	Completed and opened to traffic.
Cooch Behar Town Extension	3	15,000	Opened to traffic.
Open	24	81,200	

* Under new arrangements these two lines will be included in programme from next year.

APPENDIX B—*concld.*

Railway.	Length.	Estimated or approximate cost.	REMARKS.
(*a*) *Lines shown as under construction in 1897-98*—contd.	Miles.	Rx.	
Birur Shimoga Branch	38	185,000	Under construction by the Mysore Durbar. Nearly ¾ths finished.
Hyderabad-Godavari Valley	390	2,988,200	Under construction by the Nizam's Guaranteed State Railways Company. More than half finished.

		354·43
TOTAL		(u) 21,198·08

(a) Although for convenience classed amongst State railways, this line is the property of the Bengal Central Railway Company.
(b) Worked by the Indian Midland Railway Company.
(c) Worked by the Bombay, Baroda and Central India Railway Company.
(d) Worked by the Great Indian Peninsula Railway Company.
(e) Although forming an integral part of the East Coast State railway, this line is shown separately as it is worked by the Nizam's Guaranteed State Railways Company.
(f) Worked by the Madras Railway Company.
(g) Including the Kotri-Rohri and Mushkaf-Bolán railways and 6·12 miles of military line not used for public traffic.
(h) Worked by the North Western State railway.
(i) Excluding the Bezwada extension, *vide* foot-note (e).
(j) Worked by the East Indian Railway Company.
(k) Including 2·19 miles, Trimulgherry troop siding, constructed but not used for ordinary public traffic.
(l) Although for convenience classed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.
(m) Worked by the Southern Mahratta Railway Company.
(n) Worked by the South Indian Railway Company.
(o) Excluding 3·66 miles of the Lucknow-Bareilly railway between Daliganj and Aishbagh.
(p) Including 4·60 miles of Bhavnagar Dock estates and Junágad quarry lines.
(q) Worked by the Bhavnagar-Gondal-Junágad-Porbandar railway.
(r) Including 3·99 miles of Bedi-Bandar Dock estate sidings.
(s) Constituted a railway from the 19th May 1898. Previously omitted.
(t) Worked by the Eastern Bengal State railway.
(u) Including the mileage of the Cherra-Companyganj railway, which is treated as a steam tramway for administrative purposes only. This line was damaged by floods and was open up to 30th April 1895 only. It was reopened for goods traffic from 23rd December 1898.
(v) Including 2·30 miles from Belgachhi to the Ganges constructed but not worked. This length was open for traffic from the 1st to the 8th October 1897.
(w) Includes the Gauhati-Jamuna Mukh section, 71·73 miles, temporarily closed to traffic from 13th June 1897 on account of damages done by earthquake.

2. And the mileage under construction or sanctioned for construction on the same date was 4,295·66 miles(e), as follows:—

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies . . .	708·41	
(ii) State lines worked by the State . . .	672·38	
(iii) Guaranteed companies .	134·71	
(iv) Assisted companies . .	293·20	
(v) Lines owned by native states and worked by companies	76·00

(*a*) Although for convenience classed amongst State railways, this line is the property of the Bengal Central Railway Company.
(*b*) Worked by the Indian Midland Railway Company.
(*c*) Worked by the Bombay, Baroda and Central India Railway Company.
(*d*) Worked by the Great Indian Peninsula Railway Company.
(*e*) Although forming an integral part of the East Coast State railway, this line is shown separately as it is worked by the Nizam's Guaranteed State Railways Company.
(*f*) Worked by the Madras Railway Company.
(*g*) Including 6·12 miles of military line not used for public traffic, the Mushkaf-Bolán railway and the Kotri-Rohri chord line.
(*h*) Worked by the North Western State railway.
(*i*) Excluding the Bezwada extension, *vide* foot-note (*e*).
(*j*) Worked by the East Indian Railway Company.
(*k*) Including 2·19 miles, Trimulgherry troop siding, constructed but not used for ordinary public traffic.
(*l*) Although for convenience classed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.
(*m*) Worked by the Southern Mahratta Railway Company.
(*n*) Worked by the South Indian Railway Company.
(*o*) Worked by the Assam Railways and Trading Company.
(*p*) Including 4·60 miles of Bhavnagar Dock estates and Junágad quarry lines.
(*q*) Worked by the Bhavnagar-Gondal-Junágad-Porbandar railway.
(*r*) Treated as a steam tramway for administrative purposes only. Temporarily closed to traffic from 1st May 1898 on account of damages done by floods. Reopened for goods traffic on 23rd December 1898.
(*s*) Worked by the Eastern Bengal State railway.
(*t*) Excluding 3·66 miles of the Lucknow-Bareilly railway between Daliganj and Aishbagh.
(*u*) Worked by the Bengal and North-Western Railway Company.

* Correction of mileage.

Summary.

The Financial Statement opens by referring to the very rapid recovery of the country from the effects of famine as evidenced by the returns of Trade and of Revenue.

The Accounts of 1897-98 have been already published. They close with a deficit of Rx. 5,360,000 as compared with Rx. 5,280,000 estimated last year.

The Revised Estimates for 1898-99 show a surplus of Rx. 4,760,000, being a large increase on the Estimates of last March, which anticipated a surplus of Rx. 890,000 only. This surplus is, however, reduced to Rx. 4,060,000 by charging against it various grants in aid of Provincial Governments, as will be afterwards explained. The improvement in the Estimates is mostly due to a gain under Exchange of Rx. 1,070,000, sixteen pence having been realized on the Secretary of State's remittances; to better revenue, Rx. 1,330,000, almost every Revenue head including Opium having shown an improvement; to very favourable returns in India from Railways, Rx. 850,000, and to savings of Rx. 430,000, on the provision in India for warlike operations by earlier withdrawal of the troops. Most of the Expenditure heads show a saving, but plague is responsible for an excess of Rx. 330,000 over Estimate.

The Budget Estimates for next year are made up at an exchange of 15¾ pence, which is justified on the ground that, though 16 pence may reasonably be anticipated, the Indian practice is to avoid sanguine estimating. At this rate the Estimates show a surplus of Rx. 3,930,000. Compared with 1898-99, considerable improvement is expected in Opium Revenue, as prices are favourable, but under other Revenue heads the returns expected fall short of the current year; Railways are doing very well, and are estimated to give net return in India Rx. 230,000 better than current year; Rx. 560,000 is provided for plague expenditure, but very little for war expenditure.

The Famine Insurance Grant is taken in both years at Rx. 1,500,000.

The Government have no remissions of taxation to propose, both because it is considered desirable first to make up for the deficits of the past two famine years, and also to maintain as strong a position as possible in view of expected measures of currency reform.

The Secretary of State has, during the current year, drawn 19 millions sterling at an average rate close on 16 pence, being the largest drawings on record. Rx. 2,620,000 of gold has also been received in India in exchange for silver.

Next year he proposes to draw for 17 millions sterling; he does not estimate for any borrowing or discharge of debt, though his high cash balance may be utilized in repaying debt.

No borrowing in India is estimated to be necessary. On Railway Construction Rx. 9,160,000 will have been spent this year, and Rx. 8,820,000 is estimated for next year. The intention of Government to reduce rate of progress of Railway Construction has been modified owing to necessity of completing work left undone last year by reason of Engineers' strike delaying the supply of stores from England. An addition of Rx. 100,000 is made to the usual annual grant of Rx. 750,000 for Irrigation.

The Statement then reviews the working of the system of Provincial finance in the eight provinces for the last seven years, drawing attention especially to the effect upon them of famine and plague expenditure and earthquake in Assam. Grants aggregating Rx. 430,000 are made to Bombay, Madras, Bengal, and Assam to cover charges arising from these calamities, and in view of the generally

favourable condition of Imperial finance further grants aggregating Rx. 700,000 are made in general aid of the Provincial Governments, besides Rx. 190,000 for plague expenditure next year in Madras and Bombay.

The Statement concludes with a review of the past twenty years' finance, based on recently published figures, in which it is shown that the annual standard of ordinary revenue has improved by about Rx. 13,800,000,—the account of Debt Services and Railway and Irrigation Earnings by about Rx. 3,720,000, total improvement Rx. 17,520,000. This improvement has been absorbed by the following causes: loss of Opium Revenue Rx. 3,680,000, Exchange Rx. 4,730,000, Army Services Rx. 5,470,000, Administration Upper Burma Rx. 450,000, charges of Provincial Civil Administration, Rx. 3,780,000.

The Statement, while setting out a very favourable condition of finance, points out that some of the favourable elements are temporary only; and draws from the extremely rapid recovery of the financial position the warning that the possibility of sudden reversal of the tide of prosperity (which the failure of a single month of seasonal rainfall has proved sufficient to effect) can never be left out of account in the administration, and especially the financial administration of India.

Government of India Notifications, Appointments, Promotions, etc.

LEGISLATIVE DEPARTMENT.

NOTIFICATIONS.

Calcutta, the 24th March, 1899.

No. 8.—Whereas by Resolution passed by the Secretary of State for India in Council on the 24th day of July, 1877, the provisions of section 1 of the Government of India Act, 1870 (33 Vict., c. 3), were declared applicable to the territories under the administration of the Chief Commissioner of Coorg.

And whereas the said Chief Commissioner of Coorg has proposed to the Governor General in Council a draft of the following Regulation, together with the reasons for proposing the same;

And whereas the Governor General in Council has taken the draft and reasons into consideration, and has approved of the draft and the same has received the assent of the Governor General on the 21st day of March, 1899;

In pursuance of the direction contained in the said section, the said Regulation is now published in the Gazette of India:—

REGULATION NO. I OF 1899.

THE COORG LAND AND REVENUE REGULATION, 1899.

CHAPTER XII.

SUPPLEMENTAL PROVISIONS.

The Coorg Land and Revenue Regulation, 1899.

(Chapter I.—Preliminary.—Sections 1-3) (Chapter II.—Revenue-officers.—Sections 4-6.)

A Regulation to amend and declare the Law in force in Coorg in respect of the Land and Revenue.

WHEREAS it is expedient to amend and declare the law in force in Coorg with respect to the making and maintenance of records-of rights in land, the assessment and collection of land-revenue, and other matters relating to land and the liabilities incident thereto; It is hereby enacted as follows:—

CHAPTER I.

PRELIMINARY.

Title, extent and commencement.

1. (*1*) This Regulation may be called the Coorg Land and Revenue Regulation, 1899.

(*2*) It extends to the territories for the time being administered by the Chief Commissioner of Coorg; and

(*3*) It shall come into force on such day as the Chief Commissioner may, by notification, appoint in this behalf.

Repeal.

2. (*1*) On and with effect from the commencement of this Regulation, the enactments mentioned in the first schedule, in so far as they apply to, or are in force in, the said territories, and all rules and orders in force there relating to any of the matters hereinafter provided for, shall be repealed.

(*2*) Any enactment or document referring to any enactment or to any rule or order hereby repealed shall, as far as may be, be construed as referring to this Regulation or to the corresponding portion thereof.

Definitions.

3. In this Regulation, unless there is anything repugnant in the subject or context,—

(*1*) "Revenue-officer" means a person having authority under this Regulation to discharge any of the functions of a Revenue-officer:

(*2*) "village-officer" means any officer employed in or about the business of the revenue or of the surveys, assessment, accounts or records connected therewith, but does not include a "Revenue-officer:"

(*3*) "land" includes benefits to arise out of land and things attached to the earth or permanently fastened to anything attached to the earth, and also shares in, or charges on, the revenue or rent of estates or other defined portions of territory:

(*4*) "estate" means any village or other area—

(*a*) for which a separate record-of-rights has been framed, or

(*b*) which the Chief Commissioner may, by general rule or special order, declare to be an estate:

(*5*) "holding" means any area which has been separately assessed to land-revenue, or would have been so assessed if the land-revenue had not been released, compounded for or redeemed:

(*6*) "holder" or "landholder" signifies the person who is in possession of a holding or any share or portion thereof or in the enjoyment of any part of the profits thereof and who is bound by law, contract or local usage to pay land-revenue direct to the Government, but does not include a tenant:

(*7*) "tenant" means a person who holds land under another person and is, or but for a special contract would be, liable to pay rent for that land to that other person:

(*8*) "survey-mark" includes any erection, whether of earth, stone or other material, and also any hedge, vacant strip of ground or other object, whether natural or artificial, set up, employed or specified by a Revenue-officer, in order to designate the boundary of any land:

(*9*) "publication," "published," "notification" and "notified" refer to publication or notification in the Coorg District Gazette:

(*10*) "revenue" includes land-revenue, cesses and mohatarfa, and every other sum payable to the Government in accordance with law, contract or local usage in respect of the occupancy of land, or the use of its products, or the supply of water to it for irrigation: and

(*11*) "moveable property" includes growing crops and ungathered products of land.

CHAPTER II.

REVENUE-OFFICERS.

Classes of Revenue-officers.

4. There shall be four classes of Revenue-officers, namely:—

(*a*) the Chief Commissioner,

(*b*) the Commissioner,

(*c*) the Assistant Commissioner, and

(*d*) the Subedar.

Chief Controlling Revenue-authority.

5. The chief controlling authority in all matters connected with the land-revenue is vested in the Chief Commissioner subject to the control of the Governor General in Council, and all other Revenue-officers shall be subordinate to him.

The Commissioner.

6. (*1*) There shall be a Commissioner of Coorg (hereinafter referred to as "the Commissioner"), who shall exercise the powers and discharge the duties conferred or imposed on him under this Regulation or the rules thereunder, or under any other law for the time being in force, and, so far as is consistent therewith, all such other powers or duties of appeal, superintendence and control over the officers subordinate to him as may be prescribed by the Chief Commissioner.

(*2*) The Commissioner shall be appointed by the Governor General in Council,

The Coorg Land and Revenue Regulation, 1899.

(Chapter II.—Revenue-officers.—Sections 7-12.) (Chapter III.—Appeal, Review and Revision.—Sections 13-15.)

Assistant Commissioners.

7. There shall be such number of Assistant Commissioners as the Governor General in Council may from time to time sanction. They shall be appointed by the Governor General in Council, and shall be subordinate to the Commissioner, and shall perform such duties as the Commissioner may from time to time direct.

Taluqs.

8. (1) There shall be such taluqs, and each taluq shall consist of such nads and estates, as may be notified by the Chief Commissioner.

(2) The present taluqs, nads and estates shall remain as they are for the purposes of this Regulation until altered by the Chief Commissioner.

Subedars.

9. The chief officer entrusted with the local revenue-administration of a taluq shall be called a Subedar. He shall be appointed by the Commissioner with the previous sanction of the Chief Commissioner, and shall be subordinate to the Commissioner. His duties and powers shall be confined to the limits of his taluq and shall be such as may be expressly imposed or conferred upon him by this Regulation or the rules thereunder, or by any other law for the time being in force, or as may be imposed upon or delegated to him by the Commissioner under the general or special orders of the Chief Commissioner.

Power to make rules regarding appointment, removal and duties of Subedars.

10. The Chief Commissioner may make rules for the appointment, removal and duties of Subedars.

Conferment of powers of Revenue-officer.

11. (1) The Chief Commissioner may, by notification, confer on any person—

(a) all or any of the powers of the Commissioner under this Regulation, or

(b) all or any of the powers with which an Assistant Commissioner or a Subedar may be invested thereunder,

and may, in like manner, withdraw any powers so conferred.

(2) A person on whom powers are conferred under sub-section (1) shall exercise those powers within such local limits and in such classes of cases as the Chief Commissioner may direct, and, except as otherwise directed by the Chief Commissioner, shall for all purposes connected with the exercise thereof be deemed to be a Commissioner, Assistant Commissioner or Subedar, as the case may be.

(3) If any of the powers of the Commissioner under this Regulation are conferred on an Assistant Commissioner or a Subedar, they shall, unless the Chief Commissioner by special order otherwise directs, be exercised by him subject to the control of the Commissioner.

Powers of Revenue-officers.

12. Except where the class of the Revenue-officer by whom any function is to be discharged is specified in this Regulation, the Chief Commissioner may, by notification, determine the functions to be discharged under this Regulation by any class of Revenue officers.

CHAPTER III.

APPEAL, REVIEW AND REVISION.

Appeals.

13. Save as otherwise provided by this Regulation, an appeal shall lie from an original or appellate order of a Revenue-officer as follows, namely :—

(a) to the Commissioner when the order is made by an Assistant Commissioner or by a Subedar ;

(b) to the Chief Commissioner when the order is made by the Commissioner :

Provided that, when an original order is confirmed on first appeal, a further appeal shall not lie.

Limitation for appeals.

14. Save as otherwise provided by this Regulation, the period of limitation for an appeal under the last foregoing section shall run from the date of the order appealed against and shall be as follows, that is to say :—

(a) when the appeal lies to the Commissioner —thirty days :

(b) when the appeal lies to the Chief Commissioner—ninety days.

Review by Revenue-officers.

15. (1) A Revenue-officer may either of his own motion or on the application of any party interested review, and on so reviewing modify, reverse or confirm, any order passed by himself or by any of his predecessors in office :

Provided as follows :—

(a) when a Revenue-officer of a class below that of Commissioner proposes to review any order, passed whether by himself or by any of his predecessors in office, he shall first obtain the sanction of the Commissioner ;

(b) an application for the review of an order may be summarily rejected, if it is not made within ninety days from the passing of the order, unless the applicant satisfies the Revenue-officer that he had sufficient cause for not making the application within that period ;

(c) an order shall not be modified or reversed unless reasonable notice has been given to the parties affected thereby to appear and be heard in support of the order ; and

(d) an order against which an appeal has been preferred, shall not be reviewed.

(2) No appeal shall lie from an order refusing to review, or confirming on review, a previous order.

The Coorg Land and Revenue Regulation, 1899.

(Chapter III.—Appeal, Review and Revision.—Sections 16-17. Chapter IV.—Procedure.—Sections 18-23.)

Computation of periods of limitation for appeals and applications for review.

16. In the computation of the period for an appeal from, or an application for the review of, an order under this Regulation, the limitation therefor shall be that prescribed by the Indian Limitation
7. Act, 1877.

Power to call for records and revise proceedings of Revenue-officers.

17. (*1*) The Chief Commissioner or the Commissioner may at any time call for the record of any case pending before, or disposed of by, any Revenue-officer subordinate to him.

(*2*) If in any case it shall appear to the Chief Commissioner or the Commissioner that any decision or order or proceeding in a case so called for should be modified, annulled or reversed, he may pass such order thereon as he deems fit:

Provided that he shall not under this section pass an order modifying, annulling or reversing any order or proceeding of a subordinate Revenue-officer affecting any question of right between private persons without giving those persons an opportunity of being heard.

CHAPTER IV.

PROCEDURE.

Power to make rules as to procedure.

18. (*1*) The Chief Commissioner may make rules consistent with this Regulation for regulating the procedure of Revenue-officers in cases in which a procedure is not prescribed by this Regulation.

(*2*) Such rules may provide, among other matters, for the mode of enforcing orders of ejectment from, and delivery of possession of, immoveable property, and rules providing for those matters may confer on a Revenue-officer all or any of the powers in regard to contempts, resistance and the like, which a Civil Court may exercise in the execution of a decree whereby it has adjudged ejectment from, or delivery of possession of, such property.

(*3*) Subject to any rules made under this section, a Revenue-officer may refer any case which he is empowered to dispose of under this Regulation, to any other officer for investigation and report, and may decide the case on the report of such other officer.

Subordination of Revenue-officers.

19. In all official acts and proceedings every Revenue-officer shall, in the absence of any express provision of law to the contrary, be subject, as to the place, time and manner of performing his duties, to the direction and control of the officer to whom he is immediately subordinate.

Power of Revenue-officer to summon persons.

20. (*1*) A Revenue-officer may summon any person whose attendance he considers necessary for the purpose of any business before him as such.

(*2*) Every person so summoned shall be bound to appear at the time and place mentioned in the summons in person or, if the summons so allows, by his recognized agent or a legal practitioner.

(*3*) Every person attending in obedience to a summons shall be bound to state the truth upon any matter respecting which he is examined or makes statements, and to produce such documents and other things relating to any such matter as the Revenue-officer may require.

Mode of service of summons.

21. (*1*) Every summons shall, if practicable, be served (*a*) personally on the person to whom it is addressed, or, failing him, on (*b*) his recognized agent, or on (*c*) an adult male member of his family usually residing with him.

(*2*) If service cannot be made as aforesaid, or if acceptance of service so made is refused, the summons may be served by posting a copy thereof on the usual or last known place of residence of the person to whom it is addressed, or, if that person does not reside in the taluq in which the Revenue-officer is employed and the case to which the summons relates has reference to land in that taluq, then by posting a copy of the summons on some conspicuous place on the land.

(*3*) If the summons relates to a case in which the persons having the same interest are so numerous that personal service on all of them is not reasonably practicable, it may, if the Revenue-officer so directs, be served by delivery of a copy thereof to such of those persons as the Revenue-officer nominates in this behalf and by proclamation of the contents thereof for the information of the other persons interested.

(*4*) A summons may, if the Revenue-officer so directs, be served on the person named therein by post, either in addition to, or in substitution for, any other mode of service.

Mode of serving notices.

22. (*1*) Every notice or copy of a notice issued by a Revenue-officer for service on any person shall be served in the manner provided in the last foregoing section.

(*2*) No such notice shall be deemed void on account of any error in the name or designation of any person referred to therein, unless when such error has produced substantial injustice.

Penalty for failure to attend in certain cases.

23. Whoever, being required by a summons, notice, order or proclamation proceeding from a Revenue-officer to attend at a certain time and place within the limits of the nad in which he ordinarily resides, fails to comply with such requisition, shall be liable, at the discretion of the Revenue-officer, to fine which may extend to fifty rupees.

The Coorg Land and Revenue Regulation, 1899.
(Chapter V.—Parpattigars and Village-officers.—Sections 24-27.) (Chapter VI.—Records-of-rights and Annual Records.—Sections 28-31.)

CHAPTER V.

PARPATTIGARS AND VILLAGE-OFFICERS.

Power to make rules respecting parpattigars and village-officers.

24. (*1*) The Chief Commissioner may make rules to regulate the appointment, duties, emoluments, punishment, suspension and removal of parpattigars and village-officers.

(*2*) When the Chief Commissioner undertakes to pay the village-officers in any local area from the revenue realized in that local area, a rule under sub-section (*1*) may direct that from every person, to whom the revenue of any land in that local area has been, in whole or in part, released or assigned, or who has redeemed or compounded for the same, there shall be levied upon the revenue which has been, or, but for such release, assignment, redemption or composition, would have been assessed on such land, as a contribution towards the payment of such village-officers, a rate not exceeding the rate at which the village-officers' cess imposed under the next following section falls upon the revenue of the land within the local area; and, in any case in which revenue is collected on account of such land by any Revenue-officer for any such person, such officer may deduct that rate from the amount payable by him to that person.

Village-officers' cess.

25. (*1*) The Chief Commissioner may, by notification, impose on all or any estates a cess, to be called the village-officers' cess, upon all landholders therein from and after such day as the Chief Commissioner may in the notification appoint in this behalf.

(*2*) The proceeds of the cess shall be devoted to the preparation and maintenance of land-records, to the remuneration of village-officers, and to defraying other expenses directly connected with the supervision of village-officers and the performance of their duties.

Limit of cess.

26. (*1*) The village-officers' cess shall be levied at such rate or rates, not exceeding two annas for every rupee of the revenue, as shall be determined by the Chief Commissioner with the previous sanction of the Governor General in Council.

(*2*) In the case of revenue-free lands or lands held wholly or partially free from assessment, such as jagir, jama, jodi, umbli and banes, the cess shall be levied on the full assessment which such lands would pay if they were not inams or otherwise privileged.

(*3*) The Chief Commissioner may make rules consistent with the provisions of section 26, sub-section (*2*), for the collection, control and expenditure of the village-officers' cess.

Restriction on attachment or assignment of emoluments.

27. (*1*) The emoluments of a parpattigar or village-officer shall not be liable to attachment in execution of a decree of any Civil Court.

(*2*) An assignment of, or charge on, or an agreement to assign or charge, any such emoluments shall be void.

CHAPTER VI.

RECORDS-OF-RIGHTS AND ANNUAL RECORDS.

Exclusion of certain lands from the operation of this Chapter.

28. (*1*) Nothing in this Chapter shall apply to land which is occupied as the site of a town or village and is not assessed to land-revenue.

(*2*) A Revenue-officer may, for the purposes of this section, define the limits of any such land

Making or revising of record-of-rights for each estate.

29. (*1*) There shall be a record-of-rights for every estate.

(*2*) When it appears to the Chief Commissioner that a record-of-rights for an estate does not exist, or that the existing record-of-rights for an estate requires special revision, the Chief Commissioner shall by notification direct that a record-of-rights be made, or that the record-of-rights be specially revised, as the case may be.

(*3*) The notification may direct that records-of-rights shall be made or specially revised for all or any estates in any local area.

(*4*) A record-of-rights made or specially revised for an estate under this section shall be deemed to be the record-of-rights for the estate, but shall not affect any presumption in favour of the Government which has already arisen from any previous record-of-rights.

Contents of record-of-rights.

30. The record-of-rights for an estate shall include the following documents, namely:—

(*a*) statements showing, so far as may be practicable,—
   (*i*) the persons who are land-holders, tenants or assignees of land-revenue in the estate, or who are entitled to receive any of the rents, profits or produce of the estate, or to occupy land therein;
   (*ii*) the nature and extent of the interests of those persons, and the conditions and liabilities attaching thereto;
   (*iii*) the rent, land-revenue, rates, cesses or other payments due from and to each of those persons and to the Government;

(*b*) a map of the estate; and

(*c*) such other documents as the Chief Commissioner may prescribe.

Annual record.

31 (*1*) The Commissioner shall cause to be prepared by the shanbog of each estate, yearly or at such other intervals as the Chief Commissioner may prescribe, an edition of the record-of-rights amended in accordance with the provisions of this Chapter.

(*2*) Such edition of the record-of-rights shall be called the annual record for the estate, and shall comprise the statements mentioned in section 30, clause (*a*), and such other documents (if any) as the Chief Commissioner may prescribe.

The Coorg Land and Revenue Regulation, 1899.

(Chapter VI.—Records-of-rights and Annual Records.—Sections 32-39.)

(3) For the purposes of the preparation of the annual record, the Commissioner shall cause to be kept up by the shanbog of each estate a register of mutations and such other registers as the Chief Commissioner may prescribe.

Report of acquisition of right as land-holder or assignee of land-revenue to shanbog, and recording of such right.

32. (1) Any person acquiring by inheritance, purchase, mortgage, gift or otherwise, any right in an estate as a land-holder or assignee of land-revenue shall report his acquisition of the right to the shanbog of the estate.

(2) If the person acquiring the right is a minor or otherwise disqualified, his guardian or other person having charge of his property shall make the report to the shanbog.

(3) The shanbog shall enter in his register of mutations every report made to him under sub-section (1) or sub-section (2), and shall also make an entry therein respecting the acquisition of any such right as aforesaid which he has reason to believe to have taken place, and of which a report should have been made to him under one or other of those sub-sections and has not been so made.

(4) A Revenue-officer shall from time to time inquire into the correctness of all entries in the register of mutations and into all such acquisitions as aforesaid, coming to his knowledge, of which, under the foregoing sub-sections, report should have been made to the shanbog and entry made in that register, and shall in each case make such order as he thinks fit with respect to the entry in the annual record of the right acquired.

(5) Such an entry shall be made by the insertion in the annual record of a description of the right acquired, and by the omission from that record of any entry in any record previously prepared, which by reason of the acquisition has ceased to be correct.

Making that part of the annual record which relates to other persons.

33. The acquisition of any interest in land other than a right referred to in sub-section (1) of the last foregoing section shall,—

(a) if it is undisputed, be recorded by the shanbog in such manner as the Chief Commissioner may by rules made in this behalf prescribe; and,

(b) if it is disputed, be entered by the shanbog in the register of mutations and dealt with in the manner prescribed in sub-sections (4) and (5) of the last foregoing section.

Determination of disputes.

34. (1) If during the making, revision or preparation of any record, or in the course of any inquiry under this Chapter, a dispute arises as to any matter of which an entry is to be made in a record or in a register of mutations, the Revenue-officer may, of his own motion or on the application of any party interested, but subject to the provisions of the next following section and after such inquiry, as he thinks fit, determine the entry to be made as to that matter.

(2) If in any such dispute the Revenue-officer is unable to satisfy himself as to which of the parties thereto is in possession of any property to which the dispute relates, he shall ascertain, by summary enquiry, who is the person best entitled to the property, and shall by order direct that that person be put in possession thereof, and that an entry in accordance with that order be made in the record or register.

(3) A direction of a Revenue-officer under sub-section (2) shall be subject to any decree or order which may be subsequently passed by any Court of competent jurisdiction.

Restrictions on variations of entries in records.

35. Entries in records-of-rights or in annual records, except entries made in annual records by shanbogs under section 33, clause (a), with respect to undisputed acquisitions of interests referred to in that section, shall not be varied in subsequent records otherwise than by—

(a) the making of entries in accordance with facts admitted or found by inquiry under the last foregoing section to have occurred;

(b) the making of such entries as are agreed to by all the parties interested therein or are supported by a decree or order binding on those parties;

(c) the making, where necessary, of new maps.

Mutation-fees.

36. (1) The Chief Commissioner may fix a scale of fees for all or any classes of entries in any record or register prescribed under this Chapter and for copies of any such entries.

(2) A fee in respect of an entry shall be payable by the person in whose favour the entry is made.

Penalty for neglect to report any acquisition of right referred to in section 32.

37. Any person neglecting to make the report required by section 32 within three months from the date of his acquisition of a right referred to therein shall be liable, at the discretion of the Commissioner, to a fine not exceeding five times the amount of the fee which would have been payable according to the scale fixed under the last foregoing section if the acquisition of the right had been reported immediately after its accrual, or ten rupees, whichever is the greater.

Obligation to furnish information necessary for the preparation of records.

38. Any person whose rights, interests or liabilities are required to be entered in any record prescribed under this Chapter shall be bound to furnish, on the requisition of any Revenue-officer or shanbog engaged in compiling the record, all information necessary for the correct compilation thereof.

Presumption in favour of entries in records-of-rights and annual records.

39. Every entry made in a record-of-rights in accordance with the law for the time being in force, or in an annual record in accordance with the provisions

The Coorg Land and Revenue Regulation, 1899.

(Chapter VI.—Records-of-rights and Annual Records.—Sections 40-41. Chapter VII.—Government Rights in Land, and Encroachments on Public or Government Lands.—Sections 42-46).

of this Chapter and the rules thereunder, shall be presumed to be true until the contrary is proved or a new entry is lawfully substituted therefor.

Suit for declaratory decree by person aggrieved by an entry in a record.

40. Whoever considers himself aggrieved as to any right of which he is in possession by an entry in a record-of-rights or in an annual record, may institute a suit against any person denying, or interested to deny, his title to such right for a declaration of his right under Chapter VI of the
7. Specific Relief Act, 1877.

Power to make rules respecting records and other matters connected therewith.

41. The Chief Commissioner may make rules—

(a) prescribing the language in which records and registers under this Chapter are to be kept;

(b) prescribing forms for such records and registers, and the manner in which they are to be prepared, signed and attested;

(c) for the survey of land so far as may be necessary for the preparation and correction of such records and registers;

(d) for the conduct of inquiries made by Revenue-officers under this Chapter; and,

(e) generally, for the guidance of Revenue-officers and village-officers in matters pertaining to records and registers mentioned or referred to in this Chapter.

CHAPTER VII.

GOVERNMENT RIGHTS IN LAND, AND ENCROACHMENTS ON PUBLIC OR GOVERNMENT LANDS.

All public roads, etc., and all lands which are not the property of others, belong to Government.

42. All public roads or thoroughfares, the bridges, ditches, dykes and fences on or beside the same, beds of rivers, streams, nallas and tanks, and all canals and water-courses, and all standing and flowing water, and all lands wherever situated, which are not the property of individuals or of aggregates of individuals legally capable of holding property, except in so far as any rights of such individuals may be established in or over the same and save as may be otherwise provided by any law for the time being in force, are, and are hereby declared to be, with all rights in or over the same or appertaining thereto, the property of the Government; and it shall be lawful for the Commissioner to dispose of such property as aforesaid in such manner as may be authorized by the Government, subject always to the rights of way and all other rights of the public or individuals legally subsisting.

Summary eviction in case of encroachments upon public roads, etc., and Government land.

43. (1) When any public road or thoroughfare, or any bridge, ditch, dyke or fence on or beside the same, or the bed of any river, stream, nalla, tank, canal or water-course, or any land, the property of the Government, has been unauthorizedly occupied by any person, the Commissioner may, after due inquiry has been made and recorded by a Revenue-officer and provided that the unauthorized occupation is of less than twelve years' standing, summarily evict the occupier and confiscate any crop he may have raised on the land, and, if not removed by him after such written notice as the Commissioner may deem reasonable, take possession of any building or other construction the occupier may have erected on the land and dispose of it as he may deem proper.

(2) The proceedings of the Commissioner under sub-section (1) shall be subject to any decree or order which may be subsequently passed by any Court of competent jurisdiction.

Relinquishment and re-occupation of lands.

44. (1) Any land-holder or, where there are more land-holders than one, such land-holders, may, by giving written notice to a Revenue-officer, relinquish his or their entire holding to the Government.

(2) Such relinquishment shall take effect from such date as the Chief Commissioner may by rule direct, and the notice must be given not less than one month before such date.

(3) Any person desirous of taking up land which has been relinquished under sub-section (1), must obtain the permission in writing of a Revenue-officer, and the Commissioner may summarily evict any person from such land if no such permission has been obtained by him.

Summary eviction in case of alienation of certain lands.

45. Except with the permission of the Commissioner recorded in each case in writing under the general or special orders of the Chief Commissioner, the alienation of lands of which the land-revenue has been wholly or partly assigned or released, by sale, gift, mortgage or otherwise, is prohibited, and the Commissioner may summarily evict any person from such lands if so alienated, and take possession of them on behalf of the Government.

Procedure in cases of eviction from wrongful possession.

46. (1) When under either of the three last foregoing sections or under any other law for the time being in force the Commissioner evicts any person wrongfully in possession of land, such eviction shall be made in the following manner, namely:—

(a) by serving a notice on the person in possession, requiring him within such time as may appear reasonable after receipt of the said notice to vacate the land, and,

(b) if such notice is not obeyed, by removing or deputing a subordinate to remove any person who may refuse to vacate the same.

(2) If the officer removing any person under sub-section (1) is resisted or obstructed by any person, the Commisioner shall hold a summary inquiry into the facts of the case, and if satisfied that the resistance

The Coorg Land and Revenue Regulation, 1899.

Chapter VII.—Government Rights in Land, and Encroachments on Public or Government Lands.—Section 47. Chapter VIII.—Assessment.—Sections 48-54.)

or obstruction was without any just cause, and that such resistance and obstruction still continue, may, without prejudice to any proceedings to which such person may be liable under any law for the time being in force for the punishment of such resistance or obstruction, issue a warrant for the arrest of the said person, and on his appearance commit him to close custody in the office of any Revenue-officer or send him with a warrant in the form set forth in the second schedule, for imprisonment in the civil jail of the district for such period, not exceeding thirty days, as may be necessary to prevent the continuance of such obstruction or resistance.

Rights of Government in mines, etc.

47. (1) Unless it is otherwise expressly provided by the terms of any grant made, or of any other instrument of transfer executed, by the Government, the right to all mines, minerals and quarries and to all earth-oil and gold washings and sandalwood trees in all lands and to all subsoil rights in banes lands, and the right to take from all lands stones or material for repair of public roads, shall vest in the Government, and the Government shall have all the powers necessary for the proper enjoyment or disposal of such right.

(2) If, for the purpose of the exercise of any of the rights referred to in this section, either by the Government or by any person acquiring such rights from the Government, any land in the holding or enjoyment of others is required, such land may be acquired in accordance with the provisions of the Land Acquisition Act, 1894; and whenever, in the exercise of any of the rights aforesaid, any damage is caused to any land-holder by the disturbance of the surface of such land, and such land-holder and the Government are unable to agree as to the amount of compensation to be paid to the former in respect of such damage, the amount shall be determined in accordance with the said provisions.

CHAPTER VIII.

ASSESSMENT.

Liability of all land to assessment.

48. (1) All land, to whatever purpose applied and wherever situate, is liable to the payment of land-revenue to the Government, except such land as has been wholly exempted from that liability by special contract with the Government or by the provisions of any law for the time being in force.

(2) The holder of every holding shall be liable for the payment of the land-revenue assessed thereon; and, where there are two or more holders of the same holding, the Commissioner shall decide who shall be primarily liable for the land-revenue.

(3) Land may be assessed to land-revenue notwithstanding that that revenue, by reason of its having been assigned, released, compounded for or redeemed, is not payable to the Government.

Notification of intended re-assessment, and instructions as to principles of assessment.

49. (1) A general re-assessment of the land-revenue shall not be undertaken without the notification of the previous sanction of the Governor General in Council.

(2) In granting such sanction the Governor General in Council may prescribe such principles of assessment and give such other instructions as he thinks fit.

Mode of determining assessment.

50. (1) The assessment shall be made by a Revenue-officer.

(2) Before making the assessment the Revenue-officer shall report his proposed method of assessment for the sanction of the Chief Commissioner in such form as the Chief Commissioner may prescribe.

Announcement of assessment.

51. (1) When the Revenue-officer has obtained the sanction of the Chief Commissioner to his proposed method of assessment, he shall make an order determining the assessment proper for each holding, and announce it in such manner as the Chief Commissioner may prescribe.

(2) At the time of announcing the assessment the Revenue-officer shall also declare the date from which it is to take effect, and, subject to the other provisions of this Regulation, it shall take effect accordingly.

Application for reconsideration of assessment.

52. (1) Any land-holder assessed to land-revenue under the foregoing provisions may, within thirty days from the date of the announcement of the assessment, present a petition to the Revenue-officer for reconsideration of the amount, form or conditions of the assessment.

(2) Where the land-revenue is assigned, the assignee thereof may, within thirty days from the date aforesaid, present a like petition to the Revenue-officer.

(3) The order passed by the Revenue-officer on the petition shall set forth his reasons for granting or refusing it.

Confirmation and duration of assessment.

53. (1) No assessment of the land-revenue shall be considered final until it has been confirmed by the Chief Commissioner.

(2) The Chief Commissioner may modify the assessment of any holding at any time before it is confirmed by him.

(3) The Chief Commissioner shall, when confirming an assessment under this section, fix the period for which the assessment is to be in force:

Provided that the previous sanction of the Governor General in Council to the period so fixed shall first be obtained.

Assessment to remain in force until new assessment takes effect.

54. Notwithstanding the expiration of the period fixed for the continuance of an assessment under sub-section (3) of the last foregoing section, the

The Coorg Land and Revenue Regulation, 1899.

(Chapter VIII.—Assessment.—Section 55. Chapter IX.—Collection of Land-revenue and other Demands.—Sections 56-61.)

assessment shall remain in force till a new assessment takes effect.

Special assessments.

55. (*1*) Special assessments may be made by Revenue-officers in any of the following cases, namely :—

(*a*) when land-revenue which has been released or assigned is resumed ;

(*b*) when waste-lands are sold, leased or granted by the Government ;

(*c*) when the assessment of any land has been annulled ;

(*d*) when, in the opinion of the Chief Commissioner, assessments of land-revenue require revision in consequence of the action of water or sand or of calamity of season or from any other cause ;

(*e*) when revenue due to the Government on account of pasture or other natural products of land, or on account of mills, fisheries or natural products of water, or on account of any of the other rights described in section 47 has not been included in an assessment made under the foregoing provisions of this Chapter ; or

(*f*) when water the right to which vests in the Government or which has been available in consequence of the construction, improvement or repair of any irrigation or other work by the Government, is made use of by land-holders and other persons for the irrigation of land.

(*2*) The Chief Commissioner may make rules for the guidance of Revenue-officers in making such special assessments.

(*3*) The foregoing provisions of this Chapter with respect to general assessments, shall, subject to such modifications thereof as the Chief Commissioner may, by rules under the last foregoing sub-section, prescribe, regulate the procedure of Revenue-officers in making such special assessments.

CHAPTER IX.

COLLECTION OF LAND-REVENUE AND OTHER DEMANDS.

Security for the revenue.

56. (*1*) The land-revenue for the time being assessed on a holding shall be the first charge upon the rents, profits and produce thereof, and of any other holding in the possession of the same holder.

(*2*) Except with the previous consent of the Commissioner, the rents, profits or produce of a holding shall not be liable to be taken in execution of a decree or order of any Court until the land-revenue chargeable against the rents, profits or produce and any arrear of land-revenue due in respect of the holding have been paid.

Time for payment of revenue.

57. Revenue shall be paid to the Commissioner, or to an officer empowered by the Commissioner in this behalf, on or before the day on which it falls due according to the kistbandi or other engagement, or, where no particular day is fixed, then within the time when the payment falls due according to local usage :

Provided that the Chief Commissioner may, by notification, alter and fix the amount of the several kists or instalments and the dates at which they are to become payable.

Rules to regulate collection, remission and suspension of land-revenue.

58. (*1*) The Chief Commissioner may make rules consistent with this Regulation to regulate the collection, remission and suspension of land-revenue, and may by such rules determine the circumstances and terms in and on which assigned land-revenue may be collected by the assignee.

(*2*) Where land-revenue due to an assignee is collected by a Revenue-officer, there shall be deducted from the sum collected such a percentage on account of the cost of collection as the Chief Commissioner may by rule in this behalf prescribe.

(*3*) A suit for an arrear of assigned land-revenue shall not be entertained unless there is annexed to the plaint at the time of the presentation thereof a document under the hand of the Commissioner specially authorizing the institution of the suit.

Certified account to be evidence as to arrear.

59. A statement of account certified by a Revenue-officer shall be conclusive proof of the existence of an arrear of land-revenue, of its amount and of the person who is the defaulter.

Arrear of revenue.

60. (*1*) When an instalment or a part of an instalment of revenue is not paid on or before the day prescribed by or under section 57, the Commissioner may at once levy the instalment or the part of the instalment, as the case may be, in addition to such charge by way of penalty and as costs of process as may be authorized by rules made by the Chief Commissioner, with the previous sanction of the Governor General in Council, in this behalf.

(*2*) Any sum leviable under sub-section (*1*) shall, for the purposes of this Chapter, be deemed to be an arrear, and the land-holder from whom it is leviable, to be a defaulter.

Recovery of arrears.

61. An arrear may be recovered by any one or more of the following processes, namely :—

(*a*) by serving a written notice of demand on the defaulter ;

(*b*) by serving a summons on the defaulter requiring him, in default of payment of the arrear on or before a day to be specified in the summons, to appear before, and explain the default to, the Commissioner or the Subedar of the

The Coorg Land and Revenue Regulation, 1899.
(Chapter IX.—Collection of Land-revenue and other Demands.—Sections 62-67.)

taluq in which the arrear accrued, as the summons may direct;

(*c*) by the arrest and imprisonment of the defaulter;

(*d*) by distraint and sale of any moveable property belonging to the defaulter, or of the growing crops or ungathered products of the land in respect of which the arrear is due, whether those crops or products do or do not belong to the defaulter;

(*e*) by attachment, or by attachment and sale, of any land or other immoveable property belonging to the defaulter.

Time for issue of process.

62. (*1*) A notice of demand may be issued on or after the day following that on which the arrear becomes leviable.

(*2*) Except by the special written order of the Commissioner, a summons under clause (*b*), or a warrant of arrest under clause (*c*), or a process of distraint or attachment under clause (*d*) or clause (*e*), of the last foregoing section shall not be issued for the recovery of an arrear unless a notice of demand for the arrear or for some part thereof has been served on the defaulter at least seven days previously.

Form and service of notice of demand.

63. (*1*) A notice of demand shall be in writing signed by the officer issuing it and shall set forth—

(*a*) the name of the defaulter;

(*b*) the land in respect of which the arrear is due;

(*c*) the amount of the arrear and particulars thereof;

(*d*) the time allowed for payment of that amount; and

(*e*) a warning to the defaulter that, if he fails to pay the amount within that time, he shall be liable, as a defaulter, to have his moveable property distrained and his land or other immoveable property attached.

(*2*) The time set forth in the notice as the time allowed for payment of the arrear shall be fixed with reference to the distance of the land in respect of which the arrear is due from the place at which the payment is to be made.

(*3*) A notice of demand shall be served by delivering a copy to the defaulter or to some adult male member of his family at his usual place of residence, or to his authorized agent, or by posting a copy thereof on some conspicuous part of his last known place of residence or on some conspicuous part of the land in respect of which the arrear is due.

Summons to defaulter.

64. (*1*) At any time after the expiration of seven days from the date of the service of a notice of demand, or sooner, if the Commissioner makes a special written order in this behalf, a summons may be issued to a defaulter requiring him, in default of payment of the arrear on or before a day to be specified in the summons, to appear before, and explain the default to, the Commissioner or the Subedar of the taluq in which the arrear accrued, as the summons may direct.

(*2*) The summons shall set forth the matters stated in section 63, sub-section (*1*), clauses (*b*) and (*c*), and shall be served in the manner prescribed for the service of a notice of demand.

Arrest and imprisonment of defaulter.

65. (*1*) In any case in which a defaulter summoned to appear before the Commissioner under the last foregoing section fails to appear, the Commissioner may issue a warrant directing an officer named therein to arrest the defaulter and bring him before him.

(*2*) When a defaulter appears before the Commissioner under this or the last foregoing section, the Commissioner may keep him under personal restraint for a period not exceeding ten days, and then, if the arrear is still unpaid, may send him with a warrant, in the form set forth in the third schedule, to the officer in charge of the civil jail, directing him to confine the defaulter in the jail for such period, not exceeding one month from the date of the order, as the Commissioner may think fit.

Distraint and Sale of Moveable Property.

Time for making distraint.

66. When the arrear has not been paid in pursuance of the terms of the notice of demand and no arrangement for securing the payment thereof has been entered into to the satisfaction of the Commissioner, or of an officer empowered by the Commissioner in this behalf, the Commissioner, or an officer empowered by the Commissioner in this behalf, may order the distraint and sale of such moveable property as is described in section 61, clause (*d*).

Procedure in distraint.

67. (*1*) An order under the last foregoing section shall set forth—

(*a*) the matters stated in section 63, sub-section (*1*), clauses (*b*) and (*c*), and

(*b*) a warning to the defaulter that such property as may be distrained will be brought to sale under this Chapter unless the arrear is discharged.

(*2*) A copy of the order signed by, or on behalf of, the officer making it shall be given to the distrainer and shall be his authority for making the distraint, unless, before it is made, the defaulter pays the arrear to him or satisfies him that the arrear has been paid to the Government.

(*3*) As soon as may be after the making of a distraint, and at the latest within three days thereafter, the distrainer shall serve on the defaulter a copy of the order with an endorsement thereon specifying the property which has been distrained, and the place where that property is.

The Coorg Land and Revenue Regulation, 1899.

(Chapter IX.—Collection of Land-revenue and other Demands.—Sections 68-78.)

(4) The copy so endorsed shall be served on the defaulter in the manner prescribed for the service of a notice of demand.

(5) When the copy of the order has been so served, the distrainer shall transmit an inventory of the property distrained to the nearest officer empowered under this Chapter to sell distrained property, in order that the property may be publicly sold for the discharge of the arrear.

Withdrawal of distraint on tender of arrear.

68. Where a defaulter tenders to the distrainer payment of the arrear after the distraint of his property and before the sale thereof, the distrainer shall receive the arrear and forthwith release the property.

Disposal of distrained crops.

69. (1) When a distrainer attaches growing crops or ungathered products of land, he may cause them to be sold when fit for reaping or gathering, or may, in his discretion, cause them to be reaped or gathered in due season and stored in proper places until they are sold.

(2) In the latter case the expense of reaping or gathering and storing the crops or products shall be defrayed by the owner upon his redeeming them, or from the proceeds of the sale in the event of the crops or products being sold.

Distraint of crops of a tenant.

70. (1) When growing crops or ungathered products belonging to a tenant have been distrained for the recovery of an arrear, the tenant may pay the arrear and deduct the amount thereof from any rent due from him then or afterwards, to the defaulter.

(2) When crops or products belonging to a tenant have been sold, the tenant may deduct the value thereof from any rent due from him, then or afterwards, to the defaulter in respect of the land on which the crops or products were grown.

Treatment of distrained property.

71. (1) A distrainer shall not work distrained cattle or suffer them to be worked, or make use of distrained goods or effects or suffer them to be made use of.

(2) Necessary food for distrained cattle shall be provided by the distrainer, and the cost thereof shall be defrayed by the owner upon his redeeming the cattle, or from the proceeds of the sale in the event of the cattle being sold.

Responsibility for distrained property.

72. (1) Where distrained cattle or goods are lost or damaged by reason of necessary precautions for their due preservation not having been taken, or of their having been worked or made use of, as the case may be, in contravention of the last foregoing section, the amount of the loss or damage shall, on the application of the owner of the property, be determined by the Commissioner and be recoverable by him under this Chapter as an arrear from the officer whose neglect or act occasioned the loss or damage, and the amount when recovered shall be paid to the person injured.

(2) An order refusing an application under sub-section (1), or determining on such an application the amount of any loss or damage, shall, subject to the result of any appeal preferred to the Chief Commissioner within thirty days from the date of the order, be final.

Distraint not to be excessive.

73. The property distrained shall be, as nearly as possible, proportionate to the amount of the arrear.

Protection of necessary cattle, seed-grain and implements from distraint.

74. (1) Such cattle, seed grain and agricultural implements as may be required by the defaulter for the purpose of cultivation shall be exempt from distraint.

(2) If a question arises whether or not any cattle, seed-grain or implements should be held to be exempt from distraint under sub-section (1), it shall be referred to the Commissioner, whose decision thereon shall be final.

Time for making distraint.

75. Distraint shall be made after sunrise and before sunset.

Fraudulent transfer of property to prevent distraint.

76. (1) Where a defaulter makes a fraudulent transfer of property for the purpose of preventing distraint for an arrear, any Civil Court of competent jurisdiction shall, upon the application of the distrainer and proof of the fraudulent nature of the transfer, cause the property to be delivered up to the distrainer.

(2) Nothing in sub-section (1) shall be construed to bar a prosecution under the Indian Penal Code.

Land-revenue demand first charge on the land.

77. The title of the Government to the revenue due in respect of any land and to any charge leviable in respect thereof under section 60 shall be held to prevail over any claim to growing crops or ungathered products on the land, or any claim to any crops or products reaped or gathered on the land during the year in respect of which an arrear is due or any claim to the proceeds of any such growing or reaped crops or ungathered or gathered products in the possession or under the control of the defaulter or of any Court, whether the claim to the crops or products, or to the proceeds thereof, is founded upon a sale, mortgage, decree, or otherwise howsoever.

Penalty for forcibly or clandestinely taking away distrained property.

78. (1) Where it is proved to the satisfaction of a Civil Court of competent jurisdiction that distrained property has been forcibly or clandestinely taken away, the Court may, upon the application of the distrainer, cause the property to be restored to him.

(2) Nothing in sub-section (1) shall be construed to bar a prosecution under the Indian Penal Code.

The Coorg Land and Revenue Regulation, 1899.

(Chapter IX.—Collection of Land-revenue and other Demands.—Sections 79-86.)

Forcing of houses by distrainer.

79. The distrainer may force open any stable, cow-house, granary, godown, out-house or other like building, and may enter any dwelling-house of which the outer door is open, and break open the door of any room in that dwelling-house for the purpose of distraining property belonging to a defaulter and deposited therein:

Provided that the distrainer shall not, except as provided in the next following section, break open or enter any apartment which is appropriated for the residence of women and by the usage of the country is considered private.

Forcing of outer doors and female apartments by distrainer.

80. (*1*) Where a distrainer is of opinion that the property of a defaulter is deposited in a dwelling-house of which the outer door is shut, or within an apartment which is appropriated for the residence of women and by the usage of the country is considered private, the distrainer shall represent his opinion to the officer in charge of the nearest police-station.

(*2*) On such representation, the officer in charge of the station shall send to the spot a police-officer, in whose presence the distrainer may break open the outer door of the dwelling-house.

(*3*) The distrainer may also in the presence of the police-officer sent to the spot under sub-section (*2*), after requiring the removal of women from an apartment which is appropriated for their residence and by the usage of the country is considered private, and after furnishing means for their removal in a suitable manner, enter the apartment for the purpose of distraining the defaulter's property deposited therein; but the property, if found, shall be immediately removed from the apartment, which shall thereupon be left free for the former occupants.

Punishment for unlawful entry.

81. If, in contravention of the last foregoing section, a distrainer breaks open the outer door of a dwelling-house or enters an apartment which he has reason to believe is appropriated for the residence of women and by the usage of the country considered private, he shall be punishable with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees.

Proclamation of sale.

82. (*1*) The officer empowered under this Chapter to sell distrained property shall cause to be posted on the outer door of the defaulter's house or at the place where the property was distrained, an inventory of the property to be sold, with a notice specifying the place where, and the day and hour on and at which, the property is to be sold, and shall cause proclamation of the intended sale to be made by posting a copy of the inventory and notice on the village meeting-place, or by beat of drum or other customary mode at the place where the arrear accrued and at such other place or places (if any) as the Commissioner, or an officer empowered by the Commissioner in this behalf, may think fit.

(*2*) Unless the property distrained is, in the opinion of the officer empowered as aforesaid, perishable, the sale shall not take place till after the expiration of fifteen days from the day on which the inventory and notice were posted on the outer door of the defaulter's house or at the place where the property was distrained.

Mode of sale.

83. (*1*) At the appointed time the property shall be put up in one or more lots as the officer conducting the sale deems advisable, and shall be sold to the highest bidder.

(*2*) Where the purchase-money exceeds the amount of the arrear, the surplus shall be paid to the defaulter.

Payment of purchase-money.

84. (*1*) The property shall be paid for in ready money at the time of sale or as soon after as the officer conducting the sale appoints, and the purchaser shall not be permitted to take away any part of the property until he has paid the purchase-money in full.

(*2*) Where the purchaser fails to pay the purchase-money as required under sub-section (*1*), the property shall be re-sold, and the defaulting purchaser shall be liable for any loss arising, as well as for the expenses incurred, on the re-sale.

(*3*) Such loss and expenses as aforesaid may be recovered from the defaulting purchaser as if they were an arrear under this Chapter.

(*4*) Where the property on the re-sale is sold for a higher price than at the former sale, the balance shall be credited to the defaulter.

Attachment and Sale of Defaulter's Immoveable Property.

Time of making attachment.

85. When the arrear has not been paid in pursuance of the terms of the notice of demand and no arrangement for securing the payment thereof has been entered into to the satisfaction of the Commissioner, or of an officer empowered by the Commissioner in this behalf, the Commissioner, or an officer empowered by the Commissioner in this behalf, may order the attachment of the defaulter's land or other immoveable property.

Procedure in attachment.

86. (*1*) The attachment shall be made by posting a notice thereof on some conspicuous part of the property.

(*2*) The notice shall set forth—

(*a*) the matters stated in section 63, sub-section (*1*), clauses (*b*) and (*c*);

(*b*) a description of the property attached; and

(*c*) a warning to the defaulter that, unless the arrear is paid on or before a day to be specified in the notice, the property will be liable to be brought to sale.

(*3*) The attachment shall be further notified by beat of drum on the property and by posting a copy of the notice on a conspicuous place in the

The Coorg Land and Revenue Regulation, 1899.

(Chapter IX.—Collection of Land-revenue and other Demands.—Sections 87-95.)

nad office and publishing the notice, if the Commissioner so directs, in the local official Gazette.

Power to assume management of attached property.

87. (1) The Commissioner or other officer ordering the attachment may, at the time of the attachment or at any time during the attachment, assume the management of the property attached.

(2) In that case the Commissioner shall appoint an agent with a proper establishment to manage the property, and shall give the agent a certificate of appointment, with written instructions under his signature, and the expenses of management shall be defrayed out of the income of the property:

Provided that, where the property is too inconsiderable to admit of its being charged with the expense of maintaining an agent and his establishment, it shall be committed to the care of such officer as the Commissioner may appoint, and that officer shall be subject to all the provisions of this Chapter with respect to agents.

Notice of assumption of management.

88. Notice of the assumption of management shall forthwith be served on the defaulter in the manner prescribed for the service of a notice of demand, and shall be notified by beat of drum on the property and by posting a copy of the notice to the defaulter on a conspicuous place in the nad office and publishing the notice, if the Commissioner so directs, in the local official Gazette.

Duties of managing agent.

89. (1) The agent shall during the continuance of the management collect the rents and profits due, or accruing due, upon the property.

(2) The agent shall also keep accounts of all his receipts and disbursements, and shall submit the accounts and pay over the balance to the Commissioner, or to an officer empowered by the Commissioner in this behalf, monthly or whenever he is required by the Commissioner or by such officer to do so, and the defaulter shall be at liberty to inspect the accounts at all reasonable times and to take copies thereof at his own expense without payment of any fee.

Liability of agent to prosecution or suit.

90. The defaulter may proceed by prosecution or suit against the agent in respect of any criminal or illegal act done by him to the injury of the defaulter or his property, and tenants shall have the same remedies against the agent in respect of any act done by him as they would have had against the defaulter if the act had been done by the defaulter.

Effect of existing engagements between defaulter and tenants.

91. (1) Engagements made between the defaulter and his tenants shall, subject to the provisions of sub-section (2), be binding upon the Government during the attachment.

(2) Engagements so made—

(a) collusively with a view to defeat or delay the effect of the attachment, or

(b) by way of lease at rates lower than the usual rates and not in good faith for the erection of factories or buildings or for the purpose of bringing waste-land into cultivation, or

(c) after the attachment,

shall be void as against the Government if the Commissioner so declares:

Provided that any person aggrieved by a declaration of the Commissioner under this sub-section may institute a suit against the Government to establish the validity of the engagement, and that all charges and incumbrances upon property which has been attached, shall be postponed to the payment of the revenue and expenses consequent on the accrual of any arrear thereof.

Payments by tenants.

92. Payments made by tenants before the date of the promulgation of the notice of the assumption of management to the defaulter, or to any person on his behalf, on account of rent or profits actually due at the time when the payments were made, shall be valid as against the Government; and all such payments made after the date of the promulgation of that notice, or falling due after but made before that date, shall be void as against the Government, which may recover, as arrears of rent, the full amount of the payments from the tenants by whom they were made, leaving such tenants to sue the defaulter in a Civil Court.

Withdrawal of attachment on liquidation of arrear.

93. All sums received from the property attached, after payment of the current revenue and expenses of management, shall be carried to the credit of the defaulter in discharge of the arrear due at the time of the assumption of management; and, as soon as the arrear has been so liquidated, the attachment shall be withdrawn and a full account rendered to the defaulter of all receipts and disbursements during its continuance.

Release of property by person interested.

94. Any person claiming an interest in property which has been or is about to be attached for the recovery of an arrear, may obtain its release by paying the arrear, and, where the property has been attached and expenses of management have been incurred, those expenses, and any such payment, if made by a tenant, may be deducted from any rent then or afterwards due from him to the defaulter, and, if made by a mortgagee or other incumbrancer, shall constitute a debt from the defaulter to him and be a charge upon the property, but shall only take priority over other charges according to the date at which the payment was made.

Power of Commissioner to order sale of attached property.

95. If the Commissioner is of opinion that immoveable property attached under this Chapter, whether or not management thereof has been assumed, should be sold, he may order the sale, and thereupon the provisions of the next following sections shall apply.

The Coorg Land and Revenue Regulation, 1899.

(Chapter IX.—Collection of Land-revenue and other Demands.—Sections 96-103.)

Mode of sale.

96. (*1*) The sale of the property shall be by public auction to the highest bidder.

(*2*) The time and place of sale shall be fixed by the Commissioner, or by an officer empowered by the Commissioner in this behalf, and the time may be either before or after the expiration of the year in which the arrear accrued.

(*3*) The Commissioner or officer aforesaid may from time to time postpone the sale.

Notice of sale.

97. (*1*) Before the sale the Commissioner, or an officer empowered by the Commissioner in this behalf, shall issue a notice thereof in English and in Kanarese, stating whether the property is to be sold for the recovery of an arrear due in respect thereof or for the recovery of any other sum than such an arrear, and specifying the name of the defaulter, the amount of the arrear and the period in respect of which the arrear is due, the position and extent of the property and of the buildings (if any) thereon, the amount of the revenue assessed on the property or on its several parts, and the time, place and conditions of sale.

(*2*) The notice shall be posted for one month at least before the sale on a conspicuous place in the Commissioner's office, the taluq office and the nad office, and on some conspicuous part of the property.

(*3*) In the case of a coffee-estate exceeding fifty acres in extent, and in any other case in which it may appear to the Commissioner to be desirable, a notice of the intended sale shall also be published at least one month before the sale in the Coorg District Gazette or in one or more of the newspapers having a circulation in Coorg.

Payment of purchase-money.

98. (*1*) A sum equal to fifteen per cent. of the purchase-money of the property shall on the day of the sale be deposited by the purchaser with the officer conducting the sale; and, where the remainder of the purchase-money is not paid within thirty days from that day, the sum so deposited shall be liable to forfeiture by order of the Commissioner, and may, by a like order, be applied in reduction of the arrear for the recovery of which the sale was held.

(*2*) Where the purchaser refuses or omits to deposit the sum, or to complete within thirty days from the day of the sale the payment of the remaining purchase-money, the property shall be resold at the risk and expense of the recusant or defaulting purchaser, and the loss (if any) and expense which may attend his refusal or omission may be recovered from him as if they were an arrear under this Chapter.

(*3*) Where the property on the re-sale is sold for a higher price than at the former sale, the increase shall be credited to the defaulter.

Agents to name their principals.

99. (*1*) Any person bidding at a sale may be required by the officer conducting the sale to state whether he is bidding on his own behalf or as an agent, and in the latter case to produce a written authority signed by his principal.

(*2*) If the person does not comply with the requisition, his bid may be rejected.

Tender of arrear up to sunset of last office day before sale.

100. (*1*) The defaulter, or any person acting on his behalf or claiming an interest in the property, may, at any time before sunset on the last office-day preceding the day fixed for the sale, pay to the officer who is to conduct the sale the full amount of the arrear and of the expenses of management (if any), and thereupon the sale shall be stayed.

(*2*) Any such payment made by a tenant, or by a mortgagee or other incumbrancer, shall be deemed to be a payment made under section 94.

Report of sale to Commissioner.

101. Every sale of immoveable property under this Chapter shall be reported to the Commissioner by the officer conducting it.

Application to set aside sale.

102. (*1*) At any time within thirty days from the date of the sale application may be made to the Commissioner to set aside the sale on the ground of some material irregularity or mistake or fraud in publishing or conducting it.

(*2*) But, except as provided in the next following section, a sale shall not be set aside on the ground of irregularity or mistake unless the applicant proves to the satisfaction of the Commissioner that he has sustained substantial injury thereby.

(*3*) If the application be allowed, the Commissioner shall set aside the sale and direct a fresh one.

Order confirming or setting aside sale.

103. (*1*) After the expiration of thirty days from the date of the sale, if such application as is mentioned in the last foregoing section has not been made, or if such application has been made and rejected, the Commissioner shall make an order confirming the sale; and, if such application has been made and allowed, the Commissioner shall make an order setting aside the sale:

Provided that, if the Commissioner has reason to think that the sale ought to be set aside notwithstanding that no such application has been made, or on grounds other than those alleged in any application which has been made and rejected, he may, after recording his reasons in writing, set aside the sale.

(*2*) An order of the Commissioner setting aside a sale under this section shall be final.

(*3*) An order of the Commissioner confirming a sale under this section shall be final—

(*a*) on the expiration of thirty days from the date thereof, if an appeal therefrom is not preferred to the Chief Commissioner within that period;

(*b*) on the disposal of an appeal so preferred when the appellate order of the Chief Commissioner confirms the order of the Commissioner.

The Coorg Land and Revenue Regulation, 1899.
(Chapter IX.—Collection of Land-revenue and other Demands.—Sections 104-111.)

Refund of purchase-money on setting aside of sale.

104. Whenever a sale of property is set aside, the purchaser shall be entitled to receive back his purchase-money.

Fresh notice after postponement or on re-sale.

105. A sale made after a postponement, and a re-sale consequent on a purchaser's default under section 98 or on the setting aside of a sale, shall be made after the issue and promulgation of a fresh notice in the manner hereinbefore prescribed for the sale.

On sale becoming absolute, possession and certificate to be granted to purchaser.

106. (1) After an order of the Commissioner confirming a sale has become final in manner aforesaid, the Commissioner shall put the purchaser into possession of the property sold, and shall grant him a certificate to the effect that he has purchased that property.

(2) Till the purchaser is put into possession, the property shall remain under attachment.

(3) The certificate granted under sub-section (1) shall be deemed to effect a valid transfer of the property, but need not be registered as a conveyance.

(4) Any suit brought against the certified purchaser on the ground that the purchase was made on behalf of another person not the certified purchaser shall be dismissed with costs.

(5) The person named in the certificate as the purchaser of any immoveable property shall be liable for all instalments of revenue falling due in respect of the property after the order confirming the sale has become final.

Application of proceeds of sale.

107. (1) When the purchaser has been put into possession of the property sold, the proceeds of the sale shall be applied in the first place to the payment of any arrears due to the Government from the defaulter on the day on which the order confirming the sale became final, whether those arrears are of revenue or of sums recoverable as arrears of revenue, and the surplus (if any) shall be paid to the person whose property has been sold, or, if the property was owned by more than one person, then to those persons either collectively or according to the extent of their respective interests, as the Commissioner thinks fit.

(2) The surplus shall not, except under an order of a Court, be paid to any creditor of a person whose property has been sold.

Effect on incumbrances of sale of property for an arrear due in respect thereof.

108. (1) Subject to the provisions of this section with respect to engagements made between the defaulter and his tenants, immoveable property brought to sale under this Chapter for the recovery of an arrear due in respect thereof shall be sold free of all incumbrances, and all grants and contracts previously made by any person other than the purchaser in respect of the property shall become void as against the purchaser.

(2) The provisions of section 91 with respect to the validity or invalidity, as against the Government, of such engagements as are referred to in that section shall, so far as they can be made applicable, apply, as against the purchaser, to such engagements as have been made between the defaulter and his tenants:

Provided that an engagement, which has not before the sale been declared under that section to be void, shall not be liable to be set aside otherwise than by suit at the instance of the purchaser.

Effect on incumbrances of sale of property for a sum other than an arrear due in respect thereof.

109. When immoveable property is brought to sale under this Chapter for the recovery of any other sum than an arrear due in respect thereof, the interests of the defaulter alone therein, as those interests existed immediately before the attachment of the property was notified, shall be sold, and no incumbrances created, or grants or contracts made, by him in good faith before the notification of the attachment shall be rendered invalid by the sale.

Effect of sale on lands held revenue-free or at favourable rates.

110. When jama or umbli land, or other land held wholly or partially free of revenue, is sold under this Chapter, whether for the recovery of an arrear due in respect thereof or for the recovery of any other sum, the privileges attaching to the tenure of the land with respect to the assessment of land-revenue shall be extinguished by the sale:

Provided that in the case of land the revenue of which is assigned to a temple or other institution, the assignment to the temple or institution shall not be affected thereby.

Provisions with respect to rent and profits of property sold.

111. (1) The person named in a certificate as purchaser of any immoveable property shall be entitled to any rent or profits falling due in respect of the property after the day on which the order confirming the sale has become final, notwithstanding that payment thereof may have been made on or before that day.

(2) So long after that day as any demand of the Government against the defaulter or the property remains unsatisfied, the Government shall be entitled to any arrears of rent or profits which fell due in respect of the property on or before that day.

(3) When all such demands have been satisfied, the defaulter shall be entitled to such of those arrears as may then be outstanding, and may recover them by any process, except attachment of crops or products, which may be used by a landholder for the recovery of arrears of rent or profits.

(4) The defaulter shall also be entitled to any balance of the rents or profits of the property which, after satisfaction of all such demands as aforesaid, may remain in the possession of the Government after the day on which the order confirming the sale has become final.

The Coorg Land and Revenue Regulation, 1899.

(Chapter IX.—Collection of Land-revenue and other Demands.—Sections 112-116 Chapter X.—Surveys and Boundaries.—Sections 117-122.)

Sale of part only of property.

112. Subject to the foregoing provisions of this Chapter, the whole or any part of the immoveable property of a defaulter may be sold in discharge of an arrear:

Provided that, where the property consists of a farm which is readily divisible into compact blocks, no more of the property shall be sold than may be sufficient to discharge the arrear with expenses of management (if any).

Postponement of sale on tender of security.

113. (1) If a defaulter tenders security, the Commissioner, or an officer empowered by the Commissioner in this behalf, may accept it, and postpone the sale of the defaulter's immoveable property upon such conditions and till such time as the Commissioner or such officer may appoint.

(2) In the event of default being made in the performance of any of those conditions, the Commissioner or such officer as aforesaid may, after the issue and promulgation of a fresh notice as required by section 105, sell the property and proceed against the defaulter or his surety or both for the recovery of any balance of the arrear and the expenses of management (if any).

General.

Mode of enforcing payment by sureties.

114. All the remedies prescribed by this Chapter in the case of a defaulter may be employed against his surety, and the Commissioner, or an officer empowered by the Commissioner in this behalf, may enforce those remedies simultaneously with, or either previously or subsequently to, their enforcement against the principal:

Provided that no more than the arrear and the expenses of management (if any) shall be realized from both.

Recovery of fees and other dues.

115. Fees, fines, costs and other charges, including the village-officers' cess, payable under this Regulation or the rules thereunder, and all moneys falling due to the Government under any grant, lease or contract which provides that they shall be so recoverable, may be recovered in the same manner as an arrear of revenue under this Chapter.

Receipts for revenue.

116. (1) Every person making a payment of revenue shall be entitled to a receipt therefor signed by the Commissioner or by an officer empowered by the Commissioner in this behalf.

(2) The receipt shall state the name of the person making the payment and the subject-matter in respect of which the payment is made, and, in the case of land-revenue, shall describe the land on which the revenue was due and set forth the names of the persons entered in respect thereof in the settlement account.

CHAPTER X.

SURVEYS AND BOUNDARIES.

Rules for demarcation of boundaries and erection of survey-marks.

117. (1) The Chief Commissioner may make rules as to the manner in which the boundaries of all or any estates in any local area are to be demarcated, and as to the survey-marks to be erected within those estates.

(2) Rules under this section may prescribe, among other matters, the form of survey-marks and the material to be used in their construction.

Power of Revenue-officers to define boundaries.

118. (1) A Revenue-officer may, for the purpose of framing any record or making any assessment under this Regulation, or on the application of any person interested, define the limits of any estate, village, holding, field or other portion of an estate, and may, for the purpose of indicating those limits, require survey-marks to be erected or repaired.

(2) In defining the limits of any land under sub-section (1) the Revenue-officer may cause survey-marks to be erected on any boundary already determined by, or by order of, any Court, Survey-officer, Revenue-officer or Forest-settlement-officer, or restore any survey-mark already set up by, or by order of, any Court or any such officer.

Cost of erection and repair of survey-marks.

119. Survey-marks shall be erected and kept in repair by, or at the cost of, the persons interested in the land for the indication of the limits of which they are required:

Provided that the Chief Commissioner may in any case direct that the cost of erection shall be borne by the Government or paid out of the proceeds of the village officers' cess.

Recovery of cost incurred by the Government.

120. If the persons interested in the land fail to erect or repair a survey-mark within thirty days from the date of their being required by a Revenue-officer to do so, the Revenue-officer may cause it to be erected or repaired, and may apportion the cost among the persons interested in the land in such manner as he deems just, certifying the same to the Commissioner.

Power of Revenue-officer to enter on land for purposes of survey and demarcation.

121. Every Revenue-officer and every person acting under the orders of a Revenue-officer may, in the discharge of any duty under this Regulation, enter upon and survey land and erect survey-marks thereon and demarcate the boundaries thereof and do all other acts necessary for the proper performance of that duty.

Surveys for purpose of preparing records.

122. (1) When any land is being surveyed in pursuance of rules under section 41, clause (c), a Revenue-officer directing the survey may, by notice of proclamation, require all persons having rights or interests in the land to indicate within a specified

The Coorg Land and Revenue Regulation, 1899.

(Chapter X.—Surveys and Boundaries.—Sections 123-126. Chapter XI.—Arbitration.—Sections 127-131.)

time, by temporary marks of a kind to be described in the notice or proclamation, the limits of those rights or interests.

(*2*) If a person to whom such notice or proclamation as aforesaid is addressed fails to comply with the requisition, he shall be liable, in the discretion of the Revenue-officer, to fine which may extend to ten rupees.

Provision of flag-holders and chainmen for those surveys.

123. (*1*) For the purposes of the survey of any land in pursuance of rules under section 41, clause (*c*), the land-holders interested shall be bound to provide fit persons to act as flag-holders and chainmen.

(*2*) If the land-holders fail to provide such persons or to provide them in sufficient number, the Revenue-officer may employ such persons as he considers necessary and apportion the cost among the land-holders interested in such manner as he deems just, certifying the same to the Commissioner.

Professional surveys.

124. (*1*) If it is necessary to make a survey by other agency than that of Revenue-officers or village-officers, the Chief Commissioner may publish a notification stating—

(*a*) the local area to be surveyed and the nature of the survey;

(*b*) the names or official designations of the officers by whom the survey is to be made; and

(*c*) the kind of survey-marks to be erected by those officers.

(*2*) From the date of such notification the officers specified therein and the persons acting under their orders shall have, for the purposes of the survey, the powers conferred on Revenue-officers by section 121.

Penalty for destruction, injury or removal of survey-marks.

125. (*1*) If any person wilfully destroys or injures, or without lawful authority removes, a survey-mark lawfully erected, he may be ordered by a Revenue-officer to pay such fine, not exceeding fifty rupees for each mark so destroyed, injured or removed, as may, in the opinion of the Revenue-officer, be necessary to defray the expenses of restoring the same and of rewarding the person (if any) who gave information of the destruction, injury or removal.

(*2*) The imposition of a fine under this section shall not bar a prosecution under section 434 of the Indian Penal Code.

Report of destruction or removal of, or injury to, survey-marks.

126. Every village-officer of an estate shall be legally bound to furnish a Revenue-officer with information respecting the destruction or removal of, or any injury done to, any survey-mark lawfully erected on the estate.

CHAPTER XI.

ARBITRATION.

Power to refer to arbitration.

127. (*1*) A Revenue-officer may, with the consent of the parties, refer to arbitration any dispute arising before him in any matter under this Regulation.

(*2*) The Commissioner may, without the consent of the parties, refer to arbitration any dispute arising before him under this Regulation with respect to—

(*a*) any matter of which an entry is to be made in any record or register under Chapter VI; or

(*b*) the limits of any estates or of any holding, field or other portion of an estate; or

(*c*) the property to be divided at a partition or the mode of making a partition.

Order of reference and contents thereof.

128. (*1*) In referring a dispute to arbitration a Revenue-officer shall make an order of reference, and specify therein the precise matter submitted to arbitration, the number of arbitrators which each party to the dispute is to nominate, the period within which arbitrators are to be nominated, and the period within which the award is to be delivered.

(*2*) The number of arbitrators which each party may nominate shall be the same and shall not exceed two.

(*3*) If, from any cause, arbitrators are not nominated, or an award is not delivered, within the period fixed therefor in the order of reference, the Revenue-officer may from time to time enlarge that period, or may cancel the order of reference.

Nomination of arbitrators.

129. (*1*) When an order of reference has been made, the parties may each nominate the number of arbitrators specified in the order, and the Revenue-officer shall nominate one other arbitrator.

(*2*) The Revenue-officer may, for reasons to be recorded by him, make an order disallowing any nomination made by either party and requiring the party to make another nomination within a time to be specified in the order.

(*3*) An order under sub-section (*2*) shall be final.

Substitution of arbitrators by parties.

130. If an arbitrator nominated by a party dies, desires to be discharged, or refuses or becomes incapable to act, the party may nominate another person in his stead.

Nomination and substitution of arbitrators by Revenue-officers.

131. In any of the following cases, namely:—

(*a*) if either of the parties fails to nominate an arbitrator under section 129, sub-section (*1*), within the period fixed in the order of reference, or

The Coorg Land and Revenue Regulation, 1899.

(Chapter XI.—Arbitration.—Sections 132-135. Chapter XII.—Supplemental Provisions.—Sections 136-139.)

(*b*) if the nomination of an arbitrator has been disallowed under section 129, sub-section (*2*), and another arbitrator is not nominated within the time specified in the order under that sub-section, or having been so nominated his nomination is also disallowed, or

(*c*) if a party entitled to nominate an arbitrator in the place of another arbitrator under section 130 fails to nominate him within one week from the date of the communication to him of a notice requiring him to make the nomination, or

(*d*) if an arbitrator nominated by the Revenue-officer dies, desires to be discharged, or refuses or becomes incapable to act,

the Revenue-officer may nominate a person as arbitrator.

Process for appearance before arbitrators.

132. (*1*) The Revenue-officer shall, on the application of the arbitrators, issue the same processes to the parties and witnesses whom the arbitrators desire to examine, as he may issue in any proceeding under this Regulation before himself.

(*2*) Every such party or witness shall be bound to appear before the arbitrators in obedience to a process issued under sub-section (*1*), either in person or by agent, as the arbitrators may require.

(*3*) Every person attending in obedience to such process shall be bound to state the truth upon any matter respecting which he is examined or makes statements, and to produce such documents and other things relating to any such matter as may be specified in the process.

Award of arbitrators and presentation thereof.

133. (*1*) The arbitrators shall make an award in writing under their hands concerning the matters referred to them for arbitration and state therein their reasons therefor, and any arbitrator dissenting from the award made by a majority of the arbitrators shall state the grounds of his dissent.

(*2*) The arbitrators shall present the award to the Revenue-officer in person, unless that officer permits them to present it by agent.

Procedure on presentation of award.

134. (*1*) When the award has been received, the Revenue-officer shall, if the parties are present, consider forthwith any objections which they may have to make thereto, and, if they are not present, fix a date for the consideration thereof.

(*2*) Where a date has been fixed for the consideration of an award, the Revenue-officer shall on that date, or on any subsequent date to which an adjournment may be made, hear any objections which the parties may have to make to the award.

(*3*) The Revenue-officer may also, if he thinks fit, question the arbitrators as to the grounds of their award.

Effect of award.

135. (*1*) The Revenue-officer may accept, modify or reject the award, recording his reasons for doing so in his decision respecting the dispute which was referred to arbitration.

(*2*) If the reference to arbitration was made with the consent of the parties and if the Revenue-officer accepts the award, his decision shall be final.

(*3*) If the reference to arbitration was made without the consent of the parties, or if the Revenue-officer modifies or rejects the award, an appeal shall lie from his decision as if arbitrators had not been appointed.

CHAPTER XII.

SUPPLEMENTAL PROVISIONS.

Execution of orders of Civil and Criminal Courts by Revenue-officers.

136. Orders issued by any Civil or Criminal Court for the attachment, sale or delivery of any land or interest in land, or for the attachment or sale of the produce of any land, shall be addressed to the Commissioner or such Revenue-officer as the Commissioner may appoint in this behalf, and be executed by the Commissioner or such officer as aforesaid in accordance with the provisions of the law applicable to the Court issuing the orders and with any rules consistent therewith made by the Chief Commissioner.

Attachment of assigned land-revenue.

137. (*1*) Notwithstanding anything in any other enactment for the time being in force, an order issued by any Court for the attachment of assigned land-revenue shall require the person by whom the revenue is payable, to pay it to a Revenue-officer and the Revenue-officer to hold it subject to the further orders of the Court.

(*2*) A payment to a Revenue-officer under sub-section (*1*) shall be an effectual discharge to the person making it.

Confiscation of assignment in default of service.

138. If a land-holder bound to render service in consideration of his holding land wholly or partially free of revenue fails to render such service to the satisfaction of the Commissioner, the Commissioner may determine the portion of the land-revenue which is represented by the service in respect of which the land-holder is in default, and, with the previous sanction of the Chief Commissioner, recover that portion as if it were an arrear of land-revenue due in respect of the land for the land-revenue whereof the service was substituted.

Recovery of cost of assessing assigned land-revenue.

139. (*1*) When land of which the land-revenue has been assigned in whole or in part, is re-assessed, the assignee shall be liable to pay such share of the cost of making the re-assessment as the Chief Commissioner may determine to be just.

The Coorg Land and Revenue Regulation, 1899.

(Chapter XII.—Supplemental Provisions.—Sections 140-143.)

(2) Such share may be recovered by the Commissioner by deduction of the amount thereof from the land-revenue due to the assignee.

Papers kept by village-officers to be deemed public documents.

140. (1) Any record or paper which a village-officer is required by law or by any rule under this Regulation to prepare or keep shall be deemed to be the property of the Government.

(2) A village-officer shall, with respect to any such record or paper in his custody, be deemed for the purposes of the Indian Evidence Act, 1872, to be a public officer having the custody of a public document which any person has a right to inspect.

Costs.

141. A Revenue-officer may give and apportion the cost of any proceeding under this Regulation in such manner as he thinks fit:

Provided that, if he orders that the cost of any such proceeding shall not follow the event, he shall record his reasons for the order.

Restrictions on Revenue-officers bidding at auctions or trading or acquiring land.

142. No Revenue-officer or person employed in a revenue-office shall—

(a) purchase, or bid for, either in person or by agent, in his own name or in that of another, or jointly or in shares with others, any property which any Revenue-officer has ordered to be sold; or,

(b) in contravention of any rules made by the Chief Commissioner in this behalf, engage in trade or acquire otherwise than by inheritance any right or interest in land within the territories to which this Regulation extends.

Power to make rules.

143. (1) The Chief Commissioner may, in addition to the other rules which may be made by him under this Regulation, make rules, not inconsistent with this Regulation or with any other enactment for the time being in force,—

(a) prescribing the fees to be charged for the service and execution of processes issued by Revenue-officers, the mode in which those fees are to be collected, the number of persons to be employed in the service and execution of those processes, and the remuneration and duties of those persons;

(b) regulating the procedure in cases where persons are entitled to inspect records of revenue-offices, or records or papers in the custody of village-officers, or to obtain copies of the same, and prescribing the fees payable for searches and copies;

(c) prescribing forms for such books, entries, statistics and accounts as the Chief Commissioner may think necessary to be kept, made or compiled in revenue-offices or submitted to any authority;

(d) declaring what shall be the language of those offices, and determining in what cases persons practising in those offices shall be permitted to address the presiding officers thereof in English;

(e) permitting and regulating the partition of interests in land, carrying out such partition and giving any directions consequent thereon; and,

(f) generally, for carrying out the purposes of this Regulation.

(2) Rules made by the Chief Commissioner under sub-section (1), clause (e), shall not take effect until they have been sanctioned by the Governor General in Council.

Rules to be made after previous publication.

144. Every power to make rules under this Regulation is subject to the control of the Governor General in Council, and to the condition, except in the case of rules under section 143, sub-section (1), clause (c), of the rules being made after previous publication.

Bar of suits in certain matters.

145. Except as otherwise provided by this Regulation, no suit shall be brought in any Civil Court in respect of any of the following matters, namely:—

(i) the limits of any land which has been defined by a Revenue-officer as land to which this Regulation does or does not apply;

(ii) any claim to compel the performance of any duties imposed by this Regulation or by any other enactment for the time being in force on any Revenue-officer as such;

(iii) any claim to the office or emoluments of parpattigar or village-officer, or in respect of any injury caused by exclusion from such office, or to compel the performance of the duties or a division of the emoluments thereof;

(iv) any notification directing the making or revision of a record-of-rights;

(v) the framing of a record-of-rights or annual record, or the preparation, signing or attestation of any of the documents included in such a record;

(vi) the correction of any entry in a record-of-rights, annual record or register of mutations;

(vii) any notification of a general assessment having been sanctioned by the Governor General in Council;

(viii) the claim of any person as to liability for an assessment of land-revenue or of any other revenue under this Regulation;

(ix) the amount of land-revenue to be assessed on any holding under this Regulation;

(x) the amount of, or the liability of any person to pay, any other revenue to be assessed under this Regulation, or any cess, charge or rate to be assessed on any holding under this Regulation or under any other enactment for the time being in force;

(xi) any claim to hold free of revenue or at favourable rates any land, mills, fisheries or natural products of land or water;

The Coorg Land and Revenue Regulation, 1899.

(Chapter XII.—Supplemental Provisions.—Section 145.) (The First Schedule.—Enactments repealed. The Second Schedule.—Form of Warrant to be issued by the Commissioner under Section 46.) (The Third Schedule.—Form of Warrant to be issued by the Commissioner under Section 65.)

(*xii*) any claim connected with or arising out of the collection of the land-revenue by the Government or the enforcement by the Government of any process for the recovery thereof;

(*xiii*) any claim to set aside on any ground, other than fraud, a sale for the recovery of an arrear of land-revenue or any sum recoverable as an arrear of land-revenue;

(*xiv*) the amount of, or the liability of any person to pay, any fees, fines, costs or other charges imposed under this Regulation;

(*xv*) any claim for the partition of an estate or holding or any question as to the allotment of land or the distribution of land-revenue on partition, or any other question connected therewith not being a question as to the title to the property of which partition is sought; and

(*xvi*) any claim arising out of the liability of an assignee of land-revenue to pay a share of the cost of collecting or re-assessing such revenue, or arising out of the liability of an assignee to pay out of assigned land-revenue, or of a person who would be liable for land-revenue, if it had not been released, compounded for or redeemed, to pay on the land-revenue for which he would but for such release, composition or redemption be liable, such a percentage for the remuneration of a village-officer as may be prescribed by rules for the time being in force under this Regulation.

THE FIRST SCHEDULE.

No. 9.—Whereas by Resolution passed by the Secretary of State for India in Council on the 26th day of February, 1886, the provisions of section 1 of the Government of India Act, 1870 (33 Vict., C. 3), were declared to be on and with effect from the 1st March, 1886, applicable to Upper Burma, with the exception of the Shan States;

And whereas the Lieutenant-Governor of Burma has proposed to the Governor General in Council a draft of the following Regulation, together with the reasons for proposing the same;

And whereas the Governor General in Council has taken the draft and reasons into consideration, and has approved of the draft and the same has received the Governor General's assent on the 22nd day of March, 1899;

In pursuance of the direction contained in the said section, the said Regulation is now published in the Gazette of India :—

REGULATION NO. II OF 1899.

A Regulation to further amend the Upper Burma Towns Regulation, 1891.

WHEREAS it is expedient to further amend the Upper Burma Towns Regulation, 1891; It VI of 1891. is hereby enacted as follows :—

Short title and commencement.

1. (1) This Regulation may be called the Upper Burma Towns Regulation, 1899; and

(2) It shall come into force at once.

Amendment of section 7A, Regulation VI, 1891, as amended by Act XIII, 1898.

2. In section 7A, sub-section (1), of the Upper Burma Towns Regulation, 1891, as amended by the Burma Laws Act, 1898, for the word "village" the word "town" shall be substituted and shall be deemed to have been substituted on and with effect from the commencement of the said Burma Laws Act, 1898. VI of 1891. XIII of 1898.

H. W. C. CARNDUFF,

Offg. Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Calcutta, the 23rd March, 1899.

No. 660.—In exercise of the power conferred by section 7 of the Indian Explosives Act, 1884 (IV of 1884), the Governor General in Council is pleased to make the following rule conferring certain powers on the Chief Inspector of Explosives with the Government of India:—

Rule.

The Chief Inspector of Explosives with the Government of India may, in any part of British India,—

(a) enter, inspect and examine any place, carriage or vessel in which an explosive is being manufactured, possessed, used, sold, transported or imported under a license granted under the Indian Explosives Act, 1884 (IV of 1884), or in which he has reason to believe that an explosive has been or is being manufactured, possessed, used, sold, transported or imported in contravention of that Act, or of the rules under that Act;

(b) search for explosives therein;

(c) take samples of any explosives found therein on payment of the value thereof; and

(d) seize, detain, remove and, if necessary, destroy or otherwise render harmless any explosive found therein in respect of which he has reason to believe that the provisions of the said Act or of the rules under that Act have been contravened:

Provided as follows:—

(1) Whenever the said Chief Inspector of Explosives seizes, detains or removes any such explosive, he shall report the fact to the District Magistrate.

(2) The said Chief Inspector of Explosives shall not destroy or otherwise render harmless any such explosive without the previous

sanction of the District Magistrate, unless the matter appears to him urgent and fraught with serious public danger; and in such cases he shall take and keep a sample of the explosive, and shall, if required, give a portion of the sample to the person owning the explosive or having the same under his control at the time of seizure, and shall report the circumstances to the District Magistrate.

The 24th March, 1899.

No. 666.—In exercise of the powers conferred by section 4 of the Indian Arms Act, 1878 (XI of 1878), the Governor General in Council is pleased to direct that the following further amendment shall be made in the Notification of the Government of India in the Home Department, No. 518, dated the 6th March 1879, as already amended by the notification hereinafter mentioned:—

Clauses of Notification No. 518, dated the 6th March, 1879.	Amending Notification.	Amendment now directed.
Paragraph IV . .	No. 2639, dated the 3rd October, 1888.	For the amending Notification the following is substituted :— In exercise of the powers conferred by section 4 of the Indian Arms Act, 1878, and in continuation of Home Department Notification No. 508, dated the 1st March 1888, the Governor General in Council is pleased to extend sections 5, 7, 14, and 16 of the said Act to all saltpetre and lead (except sheet lead used for the purpose of packing tea and saltpetre in quantities under one pound weight when used by goldsmiths for the purposes of their trade) throughout Burma.

No. 668.—Mr. S. C. Hill, of the Indian Educational Service, is appointed to officiate as Officer in charge of the Records of the Government of India and *ex-officio* Assistant Secretary to the Government of India in the Home Department during the absence on furlough of Mr. G. W. Forrest, or until further orders.

MINT.

RESOLUTION.

No. 1404-*A*.

The 24th March 1899.

READ—

Notification by the Government of India in the Finance and Commerce Department, No. 664, dated the 13th February 1891.

RESOLUTION.—In paragraph 2 (3) of the Notification read in the preamble, it is laid down that when any rupee or half-rupee purporting to be coined and issued under the authority of the Government of India is tendered to any officer authorised to act under section 16 of the Indian Coinage Act, 1870, and the officer has reason to believe it to have lost by reasonable wearing more than 2 per cent in weight, he shall receive such rupee or half-rupee at its full nominal value, but shall immediately cut or break it.

It has, however, in practice been found difficult to decide whether a loss exceeding 2 per cent has been caused by fraud or by reasonable wear. A series of experiments conducted at the Indian Mints has proved that, during a period of 55 years, the normal life of a coin, reasonable wear will ordinarily reduce the weight of a rupee by 2 per cent, that is, 3·6 grains, and that a loss amounting to so much as 10 grains has always been the result of fraud.

2. In order to secure the withdrawal from circulation of light-weight coins, the Government of India will in future refrain from presuming the existence of fraud in all cases where the loss does not exceed $6\frac{1}{4}$ per cent, that is, $11\frac{1}{4}$ grains in the case of a rupee and $5\frac{5}{8}$ grains in the case of a half-rupee, but any loss in excess of that will be taken to indicate with certainty that the coin has been fraudulently reduced.

3. Under paragraph 2 (1) of the Notification of the 13th February 1891, silver coins reduced in weight otherwise than by reasonable wear must be cut and returned to the tenderer, who, in the present circumstances of the currency, would sustain a considerable loss, though often innocent of the fraud and ignorant of it. In order to minimise this loss, His Excellency the Governor General in Council is pleased to rule that officers who are authorised to cut coin shall, if the tenderer prefers it, instead of returning the cut coin, pay for it at the following rates :—

Rupees and half-rupees weighing not less than $\frac{15}{16}$ths of their proper weight shall be accepted at their nominal value and withdrawn from circulation at Government cost; those weighing between $\frac{15}{16}$ and $\frac{7}{8}$ shall be accepted, respectively, at 14 annas and 7 annas each; those between $\frac{7}{8}$ and $\frac{13}{16}$ at 13 annas and $6\frac{1}{2}$ annas each, respectively; and those between $\frac{13}{16}$ and $\frac{3}{4}$ at 12 annas and 6 annas each, respectively.

4. Where, however, the deficiency in weight amounts to more than 25 per cent, the tenderer will be held to have been so culpably careless that no concession will be made, and he will be left to bear the loss arising from the cutting of the coin which is imposed upon him by the law.

5. The above ruling will apply to dealings with the public who tender individual short-weight rupees and half-rupees. Light-weight coins found in remittances from Treasuries and Presidency Banks will be accepted on the same conditions as regards loss of weight, that is to say, coins which have lost not more than $6\frac{1}{4}$ per cent will be accepted at their full nominal value and those which have lost more than 25 per cent will be cut and rejected. But the allowance for loss of weight within those limits will be at the rate of one rupee a tola on the total weight of all such coins found in the remittance, and not at a fixed rate for each coin.

6. Minimum weights of $\frac{15}{16}$, $\frac{7}{8}$, $\frac{13}{16}$, $\frac{3}{4}$, $\frac{15}{32}$, $\frac{7}{16}$, $\frac{13}{32}$, and $\frac{3}{8}$ tola a piece will be supplied by the Mints to the Treasury Officers through the Accountants General, the cost being charged as contingent expenditure of the Mints.

ORDER.—Ordered, that this Resolution be communicated to all Local Governments and Administrations; to the Comptroller and Auditor General, and to the Mint Masters, Calcutta and Bombay.

Ordered also, that the Resolution be published in the *Gazette of India* for general information.

H. H. RISLEY,

Offg. Secy. to the Govt. of India.

MILITARY DEPARTMENT.

Fort William, the 24th March, 1899.

No. 320.—*16th Regiment of Bengal Cavalry—*

Jemadar Amir Singh, appointed on probation in G. G. O No. 1345 of 1896, is confirmed in that rank, with effect from the 15th January, 1897.

COMMANDS.

DISTRICT.

No. 321.—Colonel (Brigadier-General) St. J. F. Michell, Assistant Quarter-Master-General, Head Quarters, Punjab Command, officiating in command of the Assam District, is confirmed as a District Commander of the 2nd class in the Bengal Command, with the temporary rank of Brigadier-General while so employed, *vice* Brigadier General R. M. Clifford, who has vacated. Dated 28th February, 1899

Colonel G. Henry, British Service, to officiate in command of a 2nd class District in the Bengal Command, with the temporary rank of Brigadier-General while so employed, *vice* Brigadier-General A. J. F. Reid. Dated 4th March, 1899.

FURLOUGH AND LEAVE.

No. 322.—Captain F. G. Cardew, Indian Staff Corps, 10th Regiment of Bengal (The Duke of Cambridge's Own) Lancers, Assistant Secretary to the Government of India, Military Department, has been granted by the Secretary of State for India an extension of leave (p. a.) for seven days.

PENSIONS.

WARRANT OFFICERS.

No. 323.—Sub-Conductor William Weldon, Ordnance Department, Bengal, has been transferred to the pension establishment.

PROMOTIONS.

No. 324.—The following promotions are made, subject to Her Majesty's approval:—

INDIAN STAFF CORPS.

Second Lieutenants to be Lieutenants.

John Hugh Watson—3rd January, 1899.
Charles Edward Bruce—4th February, 1899.

No. 325.—The promotion of Lieutenant E. W. C. Ridgeway, notified in G. G. O. No. 1002 of 1898, is hereby antedated to the 22nd April, 1898.

ORDNANCE DEPARTMENT.

No. 326.—*Madras Command*—

Sub-Conductor Henry Harris to be Conductor, and Store Sergeant Robert Stone to be Sub-Conductor, with effect from the 3rd March, 1899, *vice* Conductor Henry Peel, retired.

NATIVE ARMY.

No. 327.—*21st (Punjab) Regiment of Bengal Infantry*—

Havildar Muhammad Alam to be Jemadar, *vice* Muhammad Buta, transferred to the pension establishment, with effect from the 1st November, 1898.

No. 328.—*1st Battalion, 3rd Gurkha (Rifle) Regiment*—

Jemadar Lachhman Nagarkoti to be Subadar, and Havildar Chandar-bir Mal to be Jemadar, *vice* Ranjit Rana, transferred to the pension establishment;

Jemadar Moti Gurung to be Subadar, and Havildar Sanman Nagarkoti to be Jemadar, *vice* Sarbdhoj Rana, transferred to the pension establishment;

with effect from the 1st February, 1899.

No. 329.—*16th Regiment of Madras Infantry*—

Subadar Karim Khan to be Subadar Major, Jemadar Rahim Khan to be Subadar, and Havildar Major Kadir Sharif to be Jemadar, *vice* Muhammad Kasim, transferred to the pension establishment, with effect from the 21st January, 1899.

No. 330.—*12th Regiment of Bombay Infantry*—

Havildar Budha Singh to be Jemadar, *vice* Gopal Jadow, transferred to the 16th Regiment of Bombay Infantry, with effect from the 27th November, 1898.

No. 331.—*24th (Baluchistan; Duchess of Connaught's Own) Regiment of Bombay Infantry*—

Havildar Achhar Singh to be Jemadar, *vice* Momim Khan, transferred to the pension establishment;

Color Havildar Sulaiman Shah to be Jemadar, *vice* Mobin Khan, transferred to the Zhob Levy Corps;

with effect from 13th January, 1899.

PUNJAB FRONTIER FORCE.

No. 332.—*2nd (or Hill) Regiment of Sikh Infantry*—

Havildar Lachhman to be Jemadar, *vice* Mahtab Singh, transferred to the pension establishment, with effect from the 16th January, 1899.

RETIREMENTS.

No 333.—Major-General Charles Lewis Prendergast, General List, Infantry, Bengal, has been permitted by the Secretary of State for India to retire from the service, with effect from the 11th February, 1899, subject to Her Majesty's approval.

No. 334.—G. G. O. No. 1072 of 1897 notifying the resignation of the service of Lieutenant E. F. Harding, Indian Staff Corps, 23rd (or Wallajahbad) Regiment of Madras (Light) Infantry, is cancelled.

REWARDS.

GOOD CONDUCT MEDALS.

No. 335.—The undermentioned Naick of the Madras Command is granted the medal with gratuity for long service and good conduct for the year ending 31st March, 1900, under the provisions of Clause 115, India Army Circulars, 1888, and Article 334, Army Regulations, India, Volume I, Part II:—

Medal inscribed "For Long Service and Good Conduct" with gratuity.

No. 340, Naick Narayan Singh, 30th Regiment (5th Burma Battalion) of Madras Infantry.

VOLUNTEER CORPS.

PROMOTIONS AND RESIGNATIONS.

No. 336.—*Behar Light Horse*—

Major Robert Wilson, V.D., resigns his commission, with effect from the 15th February 1899.

No. 337.—*Hyderabad Volunteer Rifles*—

Lieutenant Gerald Goodhall Wright, to be Captain, *vice* Watts, transferred to the Supernumerary List.

Second Lieutenant John Edmund Tyers, to be Lieutenant, *vice* Evans, promoted.

Second Lieutenant John Dunbar Macrae, to be Lieutenant, *vice* Wright, promoted.

No. 338.—*Southern Mahratta Railway Rifles*—

Second Lieutenant David Alexander Thomson resigns his commission.

MILITARY WORKS DEPARTMENT.

PROMOTIONS.

No. 339.—The following promotions and reversions are made in the Engineer Establishment of the Military Works Department, with effect from the dates specified :—

Names.	From	To	Nature of promotion, etc.	With effect from
Captain E. A. Edgell, R.E.	Executive Engineer, 3rd grade, permanent, and 2nd grade, sub. *pro tem.*	Executive Engineer, 2nd grade.	Permanent .	8th November, 1898.
Captain S. G. Rivett-Carnac, R.E.	Executive Engineer, 4th grade.	Executive Engineer, 3rd grade.	Permanent .	8th November, 1898.
Lieutenant A. H. D. Riach, R.E.	Assistant Engineer, 1st grade, and Executive Engineer, 4th grade, sub. *pro tem.*	Executive Engineer, 4th grade.	Permanent .	8th November, 1898.
Captain L. P. Chapman, R.E.	Executive Engineer, 3rd grade.	Executive Engineer, 2nd grade.	Sub. *pro tem.*	8th November, 1898.
Captain J. F. H. Carmichael, R.E.	Executive Engineer, 4th grade.	Executive Engineer, 3rd grade.	Sub. *pro tem.*	8th November, 1898.
Lieutenant G. H. Griffith, R.E.	Assistant Engineer, 1st grade, and Executive Engineer, 4th grade, temporary.	Executive Engineer, 4th grade.	Sub. *pro tem.*	8th November, 1898.
Major J. A. Tanner, D.S.O., R.E.	Executive Engineer, 2nd grade.	Executive Engineer, 1st grade.	Permanent .	28th November, 1898.
Captain W. Ewbank, R.E.	Executive Engineer, 3rd grade.	Executive Engineer, 2nd grade.	Permanent .	28th November, 1898.
Captain J. P. Blakeway, R.E.	Attached . . .	Executive Engineer, 3rd grade.	Permanent .	28th November, 1898.

P. J. MAITLAND, *Major-Genl.*,
Secretary to the Government of India.

MILITARY DEPARTMENT.

NOTIFICATION.

Calcutta, the 24th March, 1899.

Under clause 53 of the Regulations appended to the Regimental Debts Act of 1893, it is notified that a report of the death of the undermentioned Commissioned Officer on the date specified, was received in the Military Department between the 18th and the 24th March 1899 :—

Corps.	Rank and Name.	Date of decease.	Place of decease.	Testate or Intestate.	REMARKS.
Royal Artillery . .	Major C. de Jersey . .	18th March 1899	Madras .	...	...

Statement of Deposits on account of Estates between the 18th and the 24th March 1899.

On whose account.	Rank.	Corps.	Date of decease.	Testate or Intestate.	Total unclaimed amount deposited.	Amount paid in India.	Date to which claims will be received.
					R a. p.		
Herbert Wharry (a).	Major .	Indian Staff Corps, Commissariat-Transport Department.	23rd September 1898.	No Will found.	2,124 14 8	...	23rd May 1899.

P. J. MAITLAND, *Major-Genl.*,
Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Calcutta, the 17th March, 1899.

No. 109.—With reference to Public Works Department Notification No. 5, dated 6th January, 1899, Mr. J. G. Maclean, Traffic Inspector, continued to officiate as Assistant Traffic Superintendent, North Western Railway, up to the afternoon of the 16th December, 1898.

No. 110.—Mr. W. H. P. Sherman, Chief Engineer, 3rd class, State Railways, on furlough, is permitted to retire from the service, with effect from the 5th April, 1899, under Articles 703 and 712 (*c*), Civil Service Regulations.

The 21st March, 1899.

No. 119.—Mr. F. B. Wathen, Transhipment Superintendent, is appointed to officiate as Assistant Traffic Superintendent, Eastern Bengal State Railway, until further orders.

F. R. UPCOTT,
Secretary to the Government of India.

The 16th March, 1899.

No. 108.—Mr. R. W. Rowland, Executive Engineer, 3rd grade, Punjab, was permitted to retire from the service, with effect from the afternoon of the 11th February, 1899, under Article 712, Civil Service Regulations.

The 17th March, 1899.

No. 111.—Mr. E. W. Oates, Superintending Engineer, 1st class, Burma, is permitted to retire from the service, with effect from the afternoon of the 12th March, 1899, under Article 712 (*c*) of the Civil Service Regulations.

The 20th March, 1899.

No. 112.—Mr. D. B. Horn, Superintending Engineer, 3rd class, Bengal, is appointed to officiate as Chief Engineer and Secretary to that Government in the Public Works Department, Irrigation Branch, with effect from the forenoon of the 9th March, 1899, during the absence on privilege leave of Colonel A. D. McArthur, R.E., or until further orders.

Mr. K. H. Stephen, Executive Engineer, 1st grade, Bengal, is appointed to officiate as a Superintending Engineer, *vice* Mr. D. B. Horn.

No. 113.—The second Christian name of Mr. F. T. Coode, Assistant Engineer, 3rd grade, North-Western Provinces and Oudh, is *Trevenen,* and not as published in Public Works Department Notification No. 460, dated 18th October, 1898.

The 21st March, 1899.

No. 114.—Mr. E. C. Trotter, Deputy Examiner of Accounts, is transferred from the office of the Examiner, Public Works Accounts, Bengal, to that of the Examiner, Telegraph Accounts.

No. 115.—With reference to Public Works Department Notification No. 270, dated 13th July, 1897, the services of Mr. H. G. Billings, Executive Engineer, 3rd grade, are replaced at the disposal of the Government of Burma.

No. 116.—With reference to Public Works Department Notification No. 251, dated 29th June 1897, the services of Rai Bahadur Preonath Ghose, Executive Engineer, 2nd grade, State Railways, are replaced at the disposal of the Director of Railway Construction.

No. 117.—The following is published for general information:—

No. 246 C. W. I.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT—CIVIL WORKS IRRIGATION.

Simla, the 21st March 1899.

Review of the Revenue Report of Irrigation Works in the Bombay Presidency (excluding Sind) for 1897-98.

READ—

Letter No. 59 I., dated 21st January 1899, from the Government of Bombay, forwarding the above, and the Resolution of the Local Government reviewing it.

OBSERVATIONS.—The greater portion of the Capital Outlay was incurred in

starting work, for the purposes of famine relief, on three tank projects which have been sanctioned as Protective Works, the amount spent on them being R1,90,447. On the old works in operation the expenditure amounted to only R37,950 as compared with R85,993 in the previous year. The Minor Works accounted for very little of this outlay, the expenditure on the Gokak Canal, 1st Section, which is now nearly complete, being only R4,349. The total expenditure against Capital Account for all works amounted to R2,21,177 as compared with R98,625 expended in 1896-97. This raised the total Capital Outlay at the end of the year to R2 65,81,047.

2. The area irrigated from all works amounted to 273,283 acres, and exceeded that of the previous year, which was the highest on record, by 10,448 acres. Of this total 126,516 acres were irrigated by works for which Capital Accounts are kept, the principal contributor being as usual the Nira Canal, a Protective Work, which irrigated 47,574 acres, or more than a third of the total. In the case of this canal the increase was entirely in the kharif crops, of which the area irrigated was nearly double that of the previous year. This increase must have been of great value during a season of severe famine.

There was, however, a falling off in the area irrigated by most of the Productive Works, the Lakh Canal in particular having watered only 950 acres as compared with 1,674 acres last year. Taking all the Productive Works together, the area exceeded the record area of the previous year by 3,245 acres.

The Minor Works, Imperial and Provincial, irrigated 1,670 acres more than in 1896-97, the three works on which the improvement is most noticeable being the Ojhar Canal and Matoba and Bhadalvâdi Tanks.

The area irrigated by works for which only Revenue Accounts are kept amounted to 146,767 acres, or 1,941 in excess of the area of the previous year.

3. Of works for which Capital Accounts are kept, the working expenses of the year amounted to R4,03,898 as compared with R3,59,944 in the previous year and R3,20,071, the average of the last five years. As compared with 1896-97, there is an increase of about R17,825 in establishment charges, of which not more than R5,000 is attributable to increased collections. There was an increase also in the charges for works and repairs due mainly to silt clearances and other works being undertaken that would afford employment to famine labour.

The direct establishment charges on these canals, exclusive of collection fees, vary considerably, but appear to be increasing. The figures for four years are as below:—

	R
1894-95	1,48,362
1895-96	1,24,108
1896-97	1,65,273
1897-98	1,77,210

The increase during the last two years is attributed to the fact that under the system of distribution of establishment charges an undue share of the cost of the establishments in the Imperial or Irrigation districts has been charged against the canals. This is probably the case, but apart from the difficulty of proposing a more equitable method of distribution there are objections to altering the present system as long as the Irrigation Works are treated in the accounts as Imperial. The long table given in paragraph 15 (*a*) of the report is of little value in connection with this subject, and is not required by the Government of India.

Of the works for which only Revenue Accounts are kept, the expenditure fell to R1,75,011 from R2,56,815 in the previous year. This decrease was due mainly to the reduction of the amount expended under the head Maintenance and Repairs, from R83,159 in 1896-97 to R35,997 in the year under review.

4. The financial results of the works in operation for which Capital Accounts are kept may be summarised as follows:—

	Capital Outlay to end of year.	Net Revenue.	Return on Capital Outlay.
	R	R	Per cent.
Protective Works	77,43,417	55,318	0·71
Productive Works	1,09,10,421	1,39,531	1·28
Minor Works	74,36,695	37,060	0·50

The average return on works of all classes was thus 0·9 per cent.

Of the two Protective Works in operation the Nira Canal shows a marked improvement on the results of the previous year. The net revenue rose from R15,967 to R74,011, and the return on Capital Outlay from 0·28 per cent. to 1·3 per cent. The returns from Mhasvad Tank, on the other hand, are not so favourable. The working expenses were R34,091 as compared with R14,670 in 1896-97, this large increase being caused by the repairs being carried out by famine labour, and the gross revenue fell short of the working expenses by R18,693.

The Productive Works paid a return of 1·28 per cent. as compared with 1·45 per cent. in 1896-97, the falling off being due partly to the increase in the working expenses and partly to the large balance, R 1,18,745, of the assessed revenue unrealized at the close of the year.

5. On all works the uncollected balance amounted to the large sum of R1,58,293, rather more than 24 per cent. of the total demand.

Last year the outstandings also amounted to 24 per cent. of the demand, and the Government of India directed the attention of the Local Government to the subject. The delay in recovery is stated in the Report to be generally due to lateness in preparing the demand statements owing to deaths and desertions on account of plague, and to the impoverishment of the rayats on account of famine. Some allowance must no doubt be made for the effects of plague, but the occupiers of irrigated lands are placed in an exceptionally strong position in a famine year, when prices are unusually high, and should be in a position to meet the demand more punctually.

6. From Works for which only Revenue Accounts are kept the gross receipts were slightly larger than in the previous year, while the reduction in the working expenses, as has already been stated, was considerable. The result was a satisfactory increase of net revenue from R3,04,183 to R3,89,786.

7. In spite of the increase of 8,512 acres in the area irrigated by Major Works, the assessments of the year show a decrease of R24,086. This is due to a smaller percentage of sugarcane and other high rated crops. The decrease in the area under such crops is attributed to the inability of the cultivators to obtain the usual advances in the absence of money-lenders from Poona owing to plague. The water that was rendered available by the reduction of the cane area was however utilised in the irrigation of lower rated food crops, the area under *bajri* exceeding that of the previous year by more than 15,000 acres. In ordinary years these canals are mainly dependent on the high rated crops for their revenue, but the cultivation of such crops appears to have only temporarily fallen off, and it is a matter of satisfaction rather than otherwise that in a famine year their place should have been taken by a larger area of the cheaper food crops, even though this may have involved a reduction in the total amount of the revenue assessed.

It has long been recognised that these irrigation works are never likely to prove directly remunerative, and there is no indication in the present report that any great improvement may be expected in their financial position. It is, however, satisfactory to find that during a year of exceptional drought these works have not failed, as has sometimes been anticipated, but that, on the contrary, the area irrigated by them has exceeded any previously recorded, so that their protective value has never been greater than during the year under review.

8. The report was received on the 24th January 1899, and the Government of India desire to express their appreciation of the efforts which have been made to expedite its submission.

ORDER—Ordered, that copies of this Review and of the Report be forwarded to the Revenue and Agricultural Department for information.

Ordered, also, that copies of the Review be forwarded to the Government of Bombay, and to the Local Governments and Administrations in the Public Works Department, noted on the margin, for information.

The Governments of Madras, Bengal, the North-Western Provinces and Oudh, the Punjab, and Burma.
The Chief Commissioners of the Central Provinces and Coorg.
The Agents to the Governor General in Central India, Rajputana and Baluchistan.

Ordered, further, that this Review be published in the *Gazette of India*, and that copies of the Review be forwarded to Her Majesty's Secretary of State for India.

No. 118.—The following is published for general information :—

No. 247 C. W. I.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT—CIVIL WORKS IRRIGATION.

Simla, the 21st March 1899.

Review of the Revenue Report of Irrigation and Navigation Works in Bengal for 1897-98.

READ—

The Revenue Report of Irrigation Works in Bengal for 1897-98, and the Resolution thereon by the Government of Bengal, No. 19 I. A, dated the 7th January 1899.

OBSERVATIONS.—The actual expenditure during the year against capital account amounted to R5,39,232, of which R4,39,638 were expended in practically completing the canalization of the Bhangore Khall of the Calcutta and Eastern Canals. On the Irrigation Works the largest amount expended was R65,112 on the Orissa canals in the restoration of a flood embankment. Some small works chargeable to the capital account were executed on the Sone and Midnapur canals, but the writing off of more than a lakh of rupees against suspense account and tools and plant brought down the net expenditure of the year on all works to R4,32,213.

2. The total area irrigated from all works was 727,292 acres, and, though less than the 830,761 acres irrigated in 1896-97, was 84,696 acres in excess of the average of the last nine years.

The Major Works contributed 701,253 acres towards the total, and 433,445 acres of this area were watered from the Sone canals. Compared with the figures of 1896-97, the area irrigated by the Sone canals shows a falling off of 121,711 acres, or nearly 22 per cent.; but the abnormally deficient rainfall in that year makes a comparison with it of little value. The area, on the other hand, compares favourably with the irrigation of years previous to 1896-97, being 40,522 acres in excess of the average of 5 years ending with 1895-96.

The Orissa canals irrigated 195,602 acres, surpassing all previous records, the highest of which was 188,587 in 1896-97, while the Midnapur canal with 72,206 acres did better than last year, though not so well as in any of the four years 1890 to 1894.

The areas of the principal crops irrigated by all the canals were as follows :—

	Acres.
Rice	574,632
Wheat	28,215
Barley	15,927
Sugarcane	31,749

The estimated value of all the crops irrigated exceeds 282½ lakhs of rupees, the value per acre being R38·85. The average rate levied for the use of water was R1·88 or one-twentieth of the value of the crop.

3. For the Major Works the working expenses amounted to R14,37,681. Though somewhat in excess of the expenditure of the two previous years, they were not above the normal. For the three Irrigation Systems the expenditure was equivalent to R1·9 per acre irrigated as compared with R1·6 in 1896-97 and R2·3 the average of the previous nine years.

On Minor Works there was a satisfactory reduction of working expenses, especially in the case of the Orissa Coast Canal.

On all works, Irrigation as well as Navigation, the working expenses amounted to 67·4 per cent. of the gross revenue realized during the year.

4. The financial results of the Bengal canals of which Capital Accounts are kept in operation during the year, may be summarised as follows :—

	Capital outlay to end of year.	Net revenue.	Return on capital outlay.
	R	R	Per cent.
Major works	6,41,74,359	7,34,501	1·14
Minor works	1,16,19,016	2,36,017	2·03

The gross revenue derived from Major Works amounted to R21,72,182, exceeding last year's receipts, which were then the highest on record, by nearly 3 lakhs. This large increase was due in a great measure to the large rabi irrigation from the Sone canals of the previous year the assessments on which were collected in 1897-98, but there was also a satisfactory increase in the gross receipts collected on the Orissa canals, the figures being R5,51,924 against R4,72,947 of the previous year, due entirely to the increase in the kharif irrigation.

As a result of the large gross revenue derived from Major Works, the net revenue rose from R1,23,389 in 1895-96 and R5,35,498 in 1896-97 to R7,34,501 in the year under review, while the average for the nine years ending 1896-97 amounted to R1,42,495 only.

The Government of India welcome the improvement shown by these figures. Under Minor Works there was also a satisfactory increase in the net revenue, though this was due to a reduction in the working expenses, the gross receipts having fallen from R5,45,047 and R5,27,013 in 1895-96 and 1896-97 respectively to R5,14,213 in 1897-98.

5. The Government of India notice with satisfaction the improvement in the financial working of the Hijili Tidal canal and the Orissa Coast canal, but it is observed that the increase in the receipts on both canals is due to fewer interruptions of traffic by closures than to an increase in the number or tonnage of boats plying, there being in fact a slight decrease under both heads. There was a satisfactory decrease in working expenses on all the purely Navigation works, which amounted in the aggregate to R78,854.

GENERAL REMARKS.

6. The results of the working of Bengal canals during 1897-98 are on the whole very satisfactory, although the rainfall was plentiful and generally well distributed and the seasons therefore not favourable to irrigation. The area irrigated was above the normal, and the Local Government concludes that the cultivators on the canal areas have come to realize the great value to their crops of an unfailing water-supply. The working expenses were not excessive, though they continued high on the Orissa canals, and the net revenue from all the canals was largely in excess of any previous record. The continued decrease in the cost of silt and weed clearances on the Sone canals is noted with satisfaction. The work of collection was performed very efficiently, and the fact that 99·87 per cent. and 99·79 per cent. of the total demand were collected on the Sone and Orissa canals respectively is evidence of the care bestowed on this branch of the administration and reflects great credit on those responsible for it. The steady decrease in the number of cases in which resort was had to the certificate procedure for realising water rates is also a matter for congratulation. The experiments on the outturn of crops on irrigated lands are now, it is understood, made systematically under a code of rules, and the recorded outturns may therefore be accepted as trustworthy.

7. The Government of India desire to record their appreciation of the results attained during the year, and of the services rendered by Colonel McArthur and the officers named in the concluding paragraph of the Local Government's Resolution and by the officers of the Irrigation Department by whom they were assisted.

ORDER.—Ordered, that copies of this Review and of the Report be forwarded to the Revenue and Agricultural Department for information.

Ordered also, that copies of this Review be forwarded to the Government of Bengal for information and guidance, and to the Local Governments and Administrations in the Public Works Department, noted on the margin, for information.

The Governments of Madras, Bombay, the North-Western Provinces and Oudh, the Punjab, and Burma.
The Chief Commissioners, Central Provinces, Assam, and Coorg.
The Residents at Hyderabad and Mysore.
The Agents to the Governor General in Central India, Rajputana, and Baluchistan.

Ordered further, that this Review be published in the *Gazette of India*, and that copies of this Review and of the Report and the Resolution by the Government of Bengal be forwarded to Her Majesty's Secretary of State for India.

The 24th March 1899.

A. F. COX,
Comptroller-General.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 23rd March 1899.

NOTIFICATIONS.

No. 1050 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, during the week ending 18th March 1899:—

No. 85 of 1899.—Roland H. Gahagan, of Messrs. Geo. Gahagan and company, engineers, 271 Bellasis road, Byculla, Bombay. *An improved boundary fencing.*

No. 86 of 1899.—Reginald Belfield, electrician, of 32 Victoria street, Westminster, in the county of London. *Improvements in electric brakes.*

No. 87 of 1899.—Peter Donaldson, superintendent of the Presidency Jail, Calcutta. *An improved water flush.*

No. 88 of 1899.—Walter Edward Kimber, engineer, of 28 Nugget street, Johannesburg, in the South African Republic. *Improvements in machines for sharpening rock drills, rock drilling machine bits, and the like.*

No. 89 of 1899.—Joseph Morewood Dowsett, surveyor, of Worple road, Wimbledon, in the county of Surrey. *Improvements in the fastenings of fishplates of railways and tramways.*

No. 90 of 1899.—The "Era" Incandescent Oil Lamp company, limited, manufacturers, of 1 Palmer street, Westminster, in the county of London. *Improvements in burners for incandescence oil lamps.*

No. 91 of 1899.—The "Era" Incandescent Oil Lamp company, limited, manufacturers, of 1 Palmer street, Westminster, in the county of London. *Improvements in burners for incandescence oil lamps.*

No. 92 of 1899.—Fritz Hasselmann, architect, of Kurgarten, Nymphenburg, near Munich Bavaria. *Improvements in treating wood and other vegetable fibres for preserving, water-proofing and the like.*

No. 93 of 1899.—William Fennell, analytical chemist and Portland Cement works manager of Landons gardens, Poonamallee road, Madras. *The production of a building cement.*

No. 1051 P.—AN application for leave to file an amended specification in respect of the undermentioned invention has been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, during the week ending 18th March 1899:—

No. 232 of 1898.—René Lehuraux, student of St. Joseph's college, North Point, Darjeeling, and resident of the French settlement of Chandernagore. *An improvement in the construction of door frames, and the manner of fixing the same.*

No. 1052 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the department of land-records and agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of

one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 329 of 1898.—The Automatic Gas Lighting and Extinguishing company, limited (Hoare and Kennedy's patent), of 14 Lombard Chambers, St. George's Terrace, Perth, Western Australia. *An improved method of and apparatus for automatically lighting and extinguishing gas jets.* (Specification filed 10 March 1899.)

No. 338 of 1898.—Paul Eugene Meinrad Jamain, manufacturer of pharmaceutical preparations, of 19 Rue des Roses, Dijon (cote d'Or), in the republic of France. *Improvements in apparatus for compressing pharmaceutical and other powders for the manufacture of tabloids.* (Specification filed 10 March 1899.)

No. 344 of 1898.—Frank Swales, veterinary dentist, of 56 Cathcart road, Brompton, London. *An improved hook, more especially intended for use as a curb hook.* (Specification filed 10 March 1899.)

No. 345 of 1898.—Riccardo Arno, electrical engineer and professor, of 15 Piazza Statuto, Turin, in the Kingdom of Italy. *Improvements in electric motors.* (Specification filed 10 March 1899.)

No. 351 of 1898.—Maurice Mary Joseph Owen O'Conor, captain in the Third Connaught Rangers, of Inisfale island, Drumshambo, in the county of Leitrim, Ireland. *Improvements in apparatus for use in ascertaining the position of submerged wrecks and other bodies, and in raising the same to the surface, and for use as a floating dock.* (Specification filed 10 March 1899.)

No. 352 of 1898.—George Archibald Lowry, mechanical engineer, of 1124 Monadnock buildings, 260 Dearborn street, Chicago, county of Cook, state of Illinois, U. S. A. *The manufacture of a bale of fibrous material.* (Specification filed 10 March 1899.)

No. 363 of 1898.—Samuel George Jameson, pattern maker, of Wellington road, and William Hampson, engineer, of Swan hill, both in Brisbane, in the colony of Queensland. *An improved enumerating machine.* (Specification filed 10 March 1899.)

No. 365 of 1898.—Charles Kingston Welch, engineer, of Park house, Coventry, England. *Improvements in or relating to tyres for wheels.* (Specification filed 10 March 1899.)

No. 366 of 1898.—Charles Kingston Welch, engineer, of Park house, Coventry, England. *Improvements in metallic wheel reins.* (Specification filed 10 March 1899.)

No. 393 of 1898.—Askin Morrison Nicholas, mining manager, of Bulong, in the colony of Western Australia. *An improved rotating filtering apparatus, principally applicable for the separation of gold and silver bearing solutions from tailings, slimes and the like.* (Specification filed 10 March 1899.)

No. 408 of 1898.—Arthur Henry Wallis, senior partner, of Messrs. Manton and company, gun and rifle manufacturers, residing at No. 1 Mangoe lane, Calcutta. *Improvements in ice, sugar and other like tongs.* (Specification filed 10 March 1899.)

No. 421 of 1898.—Robert Vile Thompson, engine fitter, of 450 Elizabeth street, Melbourne, Charles Albert Horton, engineer, of 575 Sidney road, Brunswick, near Melbourne, and William Murphy, gentleman, of "Seaforth," Bond street, Caulfield, near Melbourne, all in the colony of Victoria. *An improved driving gear for bicycles and other machines driven or propelled by crank mechanism.* (Specification filed 10 March 1899.)

No. 430 of 1898.—Horace Gabriel Heimann, assistant, in the Great Eastern Hotel company, limited, residing at 67 Wellesley street, Calcutta. *Improvements in punkah-pulling machines.* (Specification filed 10 March 1899.)

No. 1053 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 39 of 1889.—James Gresham. *Improvements in apparatus for applying sand or other substances to prevent the slipping of the driving wheels of locomotives.* (From 20 March 1899 to 20 March 1900.)

No. 298 of 1889.—Sir William Thomson. *Improvements in valves for water, steam or other liquids or gases.* (From 15 March 1899 to 15 March 1900.)

No. 332 of 1891.—William Tatham. *Improvements in or applicable to machinery for preparing and spinning fibrous materials, having reference to the drawing of the slivers or rovings.* (From 14 March 1899 to 14 March 1900.)

No. 53 of 1894.—Amyas Morse. *For securing the safe working of facing points and signals, called "Morse's point and signal locking bar."* (From 5 June 1899 to 5 June 1900.)

No. 319 of 1894.—James Gresham and Harry Edward Gresham. *Improvements in injectors and connected apparatus for feeding steam boilers with water.* (From 25 March 1899 to 25 March 1900.)

No. 1054 P.—WHEREAS the inventor of the undermentioned invention has failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888 the fee hereinafter mentioned, it is hereby notified that under the provisions of section 8, sub-section (*2*), of the said Act, the exclusive privilege of making, selling, and using the said invention in British India and of authorizing others so to do has ceased :—

No. 195 of 1893.—Mahboobalum, son of Muhammad Saiyid. *A water pump, called "Mahboobay-alum pump."* (Specification filed 18 December 1894.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for the above invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy, respectively.

Attention is requested to the rules made by the Government on the 10th October, 1895, in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitor's room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified ; or, if the tenth day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

S. C. HILL,

Offg. Secy. under the Inventions and Designs Act, 1888.

Rangoon, Moulmein, Tavoy, Mergui, Penang and Singapore.	27th "	Ditto.
Rangoon and Moulmein . .	25th "	Ditto.
Ditto ditto . .	1st Apl.	Ditto.
Akyab, Kyaukpyu and Sandoway.	25th Mar.	Ditto.
Ditto ditto . .	1st Apl.	Ditto.
Ditto ditto . .	27th Mar.	Per land route *viâ* Chittagong.
Ditto ditto	A. M. At 5-30 28th "	Ditto.
Port Blair	30th "	Per Steamer *Shahjehan*.
South African Ports . . .	27th "	Per Steamer *Umsinto*.
Mauritius, Réunion, Mayotte, Nossi Be, Delagoa Bay, Natal, and Cape Colony.	27th "	*Viâ* Tuticorin and Colombo.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been usually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles will be cleared for the evening Mails without late fee at the following hours, *viz.*:—

For the Bombay Mail *viâ* Jubbulpore carrying also Mails for Ceylon at 6 P.M.

For Darjeeling and Assam at 3-25 P.M. without late fee, and 3-50 P.M. with late fee ¼ anna.

For the Punjab at 7-30 P.M.

Late letters bearing a fee of ¼ anna will be received for the Bombay Mail *vid* Jubbulpore up to 6-30 P.M. and for other Mails from 7-30 to 8 P.M., and from 8-0 to 8-45 P.M. with a late fee of 1 anna for the Punjab Mails only.

Late registered articles will be received between the following hours:—

For Offices served by the Bombay Mail *vid* Allahabad and Jubbulpore from 5 P.M. to 6-15 P.M.
For Offices served by the Punjab Mail from 6 P.M. to 7 P.M.
For Offices served by the Goalundo Mail from 6 P.M. to 7 P.M.
For Offices served by the Khulna Mail from 6 P.M. to 7 P.M.

The late fee on each registered letter will be two annas, which must be prepaid in stamps on the letter.

Articles for Burma and for Port Blair by Sea are received without late fee up to 7-30 P.M., after which hour they are received fully prepaid and bearing an extra stamp of ¼ anna up to 8 P.M.

On the latest safe day of despatch of the Mail for the Australasian Colonies *vid* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6 P.M., and late letters and papers fully prepaid will be received up to 6-30 P.M.

On the day of despatch of the Mail for Europe (Thursday), the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 6-30 P.M., and late letters and papers fully prepaid will be received up to 6-45 P.M. Late registered articles will be received from 5 to 6 P.M. On other days the letter-box for Foreign articles will be cleared for the last time without the late fee at 6 P.M., and late letters and papers will be received up to 6-30 P.M. for despatch by any Foreign Mails *vid* Tuticorin, Madras, or Bombay the same night and up to 8-30 P.M., late letters and papers up to 9 P.M., for any Foreign Mails despatched by Sea. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

P. J. GORMAN,

Offg. Presidency Postmaster, Calcutta.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Agricultural Department.

UPPER CLASS.

Session 1899-1900.

The session of the Agricultural Department of the Civil Engineering College, Sibpur, will open on Monday, the 5th June.

Candidates for admission should apply to the Principal before the 15th April, 1899.

For admission to the Upper Agricultural class an applicant must have one of the following qualifications:—

(*i*) He must have passed the F. E. Examination of the Calcutta University, and be under 23 years of age.

(*ii*) He must have passed the B. A. Examination of the Calcutta University by the B. Course or possess other sufficient educational qualifications, be under 23 years of age, and, in addition, have received a nomination from the Bengal Government.

(*iii*) He must have had a general education qualifying him to follow the instruction in the Upper Agricultural Class, and must also receive a nomination from Government for admission as a special student. To be eligible for a nomination under this rule, a candidate must either have landed property of his own, or be recommended by some influential landholder who desires to train him to take part in the management of his estate, or he must otherwise satisfy Government that he intends to make practical use of his agricultural training. Students entering under this rule will be termed special agricultural students. They will not be subject to any maximum limit of age, but will not be entitled to the privileges conferred on passed students under Rules 11 and 12, even though they should obtain fully signed diplomas in due course after passing the necessary examinations.

Applications for admission must be in the prescribed form, copies of which may be had from the principal.

Rules 11 and 12 referred to are as follows:—

(11) Two appointments annually are assigned to students holding a fully signed diploma —one in the Provincial Executive Service and one in the Subordinate Executive Service. The right of selection for these appointments will rest with Government, and the students who gained the highest marks at the examination for diplomas will not necessarily be selected.

(12) Holders of fully signed agricultural diplomas who do not get the guaranteed appointments referred to in Rule 11, but who wish to compete for the examination for admission to the Provincial, Subordinate Executive and Opium Services, may submit their names through the Principal to Government for nominations. These applications for nominations will be considered, provided the applicants appear to His Honor the Lieutenant-Governor to be otherwise suitable for admission to these services.

LOWER CLASS.

The lower course of study will be open to students of the Sibpur College who have completed their second year in the apprentice department and to teachers sent from Training Schools with the sanction of the Director of Public Instruction, Bengal.

Further particulars will be supplied on application to the Principal.

A. MACDONELL,

Offg. Principal, Civil Engineering College.

SIBPUR,

The 16th March 1899.

POSTAL NOTICE.

The British Protectorate of Zanzibar having signified its willingness to participate in the scheme for Imperial Penny Postage, the following rates of postage will now be charged in respect of letters sent by the post to that Protectorate:—

For a letter the weight of which does not exceed half an ounce . . one anna.

For every additional half ounce or fraction of that weight . . . one anna.

A. U. FANSHAWE,

Dir. Genl. of the Post Office of India.

CALCUTTA;

The 18th March, 1899.

POSTAL NOTICE.

Insurance of Foreign letters.

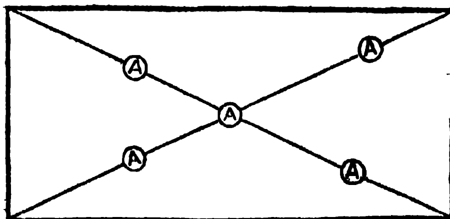
On and after the 1st April 1899, insurance will be available for Foreign registered letters containing papers of value, such as Bank-notes, Bonds, Coupons, Securities, etc., addressed to any of the countries mentioned below. Post-cards, packets of "Printed papers," "Business papers" or sample packets cannot be insured.

Argentine Republic.
Austria-Hungary.
Belgium.
Bosnia-Herzegovina.
Brazil.
Bulgaria.
Chili.
Denmark and the Danish Colonies.
Dominican Republic.
Egypt.
France and the French Colonies.
Germany and the German Protectorates.
Greater Republic of Central America.
Italy.
Luxemburg.
Netherlands.
Norway.
Portugal and the Portuguese Colonies.
Regency of Tunis.
Roumania.
Russia.
Servia.
Spain.
Sweden.
Switzerland.
Turkey.

2. The maximum amount for which a letter can be insured will be £120. Letters, however, may not be insured at branch offices for any sum higher than £25.

3. The insurance fee in addition to the postage and registration fee, will be as follows:—

	Annas.
When the amount insured does not exceed £5	6
For every sum of £5 or fraction thereof, of insured value . . .	6



4. The prepayment of the insurance fee will be compulsory and must be made in postage stamps affixed to the letter. As few stamps as possible must be used to prepay the postage and insurance fees. The stamp must not be folded over the edge of the cover, and when more stamps than one are used, they must be affixed with spaces between them.

5. A receipt will be granted to the sender of a Foreign insured letter. He may also, as in the case of a registered letter, obtain an acknowledgment of receipt signed by the addressee, on payment of a fixed fee of 2 annas.

6. A letter should not be insured for a value higher than its real value. In the case of a fraudulent declaration of this nature, the sender will forfeit all claim to compensation.

7. Insured letters may not contain coin, anything made of gold or silver, precious stones, jewellery or any article liable to customs duty in the country of destination. If they are found to contain any of these articles, they will not be forwarded.

8. Every letter tendered for insurance must be enclosed in a strong cover, which must be securely fastened and sealed with fine wax, in such a way that it cannot be opened without either breaking the seals or leaving obvious traces of violation. Envelopes with black or coloured borders must not be used. Seals must be placed over each flap or seam of the cover of a packet; and if the packet is tied round with string or tape, a seal must be placed on the ends where they are tied. The seals on an ordinary envelope should be placed as shown below:—

9. All the seals on a letter must be of the same kind of wax, and must bear distinct impressions of the same private device. Coins must not be used for sealing, and the device must not consist merely of straight, crossed, or curved lines which could readily be imitated.

10. Insured letters addressed to initials or in pencil will not be accepted for transmission.

11. The amount of insured value must be written by the sender both in words and figures at the top of the address side of the cover, thus—"Insured for one hundred and twenty pounds (£120)." No alteration or erasure of the inscription will be allowed. If a mistake is made, the entry must be completely obliterated and an entirely new one made by the sender.

12. Compensation not exceeding the insured value will be granted to the sender, or at his request, to the addressee of an insured letter, for any actual loss or damage to the letter while in postal custody. The sender of a lost insured letter will also be entitled to a return of the postage paid, but in no case will the insurance fee be refunded.

13. Compensation may, however, be withheld:—

(a) When the loss or damage has been caused by the fault or negligence of the sender or arises from the nature of the article.

(b) When there has been fraud on the part of the sender.

(c) When the addressee does not apply for compensation within 12 months from the date of posting.

(d) On any ground on which a common carrier might in like case claim exemption from legal liability.

14. The Post Office ceases to be responsible when the owner of an insured letter has taken delivery against a clear receipt.

15. When an insured letter is redirected from one country to another, a fresh insurance fee will be payable for such transmission. This fee will be collected from the addressee on delivery.

16. As all the routes available for ordinary letters are not available for insured letters, the latter may be longer in transit than the former.

A. U. FANSHAWE,
Director General of the Post Office of India.

CALCUTTA;
The 17th March 1899.

GOVERNMENT CINCHONA FEBRIFUGE.

Cinchona Febrifuge can be purchased by all Government officers, and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates —per four-ounce tin, *R2-8*; per eight-ounce tin, *R5*; per pound tin, *R10*. The general public can be supplied by the Superintendent, Botanic Garden, *for cash only*, at the under-noted rates: per four-ounce tin, *R3*; per eight-ounce tin, *R6*; per pound tin, *R12*. This medicine is also sold by the principal European and Native druggists in Calcutta. Postage, four annas per four-ounce tin, eight annas per eight-ounce tin, and twelve annas per pound tin, in addition to the foregoing rates.

سنكونا فبري فيوج يعني تپ بهگانے والي سنكونا *

سنكونا فبري فيوج كلكته كے بوتانكل كاردن يعنے كمپنى باغ كے سپرنٹندنت صاحب سے هر ايک ملازم سركاري اور ايك مشت چهه پوند تك لينے والا هر آدمى حسب نرخ ذيل خريد كرسكتا هى :— يعنے چار اونس والا تين بقيمت دو روپيه آتهه آنه ؛ آتهه اونس اولا تين بقيمت پانچ روپيه ؛ ايك پوند والا تين بقيمت دس روپيه *

عام آدميون كو يهه دوا بوتانكل كاردن يعنے كمپنى باغ كے سپرنٹندنت صاحب سے بقيمت نقد حسب نرخ ذيل مل سكتى هى - يعنے چار اونس والا تين بمقيمت تين روپيه ؛ آتهه اونس والا تين بقيمت چهه روپيه ؛ ايك پوند والا تين بقيمت باره روپيه *

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1898, the price of this Quinine will be as follows:—

1-pound tin,	R17,	or, post-free,	R17-12.
½ "	R8-8,	"	R9-0.
¼ "	R4-4,	"	R4-12.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be

free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৮ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য লইবে, যথা—

১ এক পৌণ্ড টিন	১৭,	বা ডাকমাশুল বিনা	১৭৸০
॥ আধ ,, ,,	৮৷০	,,	৯,
। শিকি ,, ,,	৪৷০	,,	৪৸০

পরিক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে, এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনাডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials,	R2-6.
,,	II.	Masonry,	R1-4.
,,	III.	Carpentry, (1889),	R1-4.
,,	IV.	Earthwork (1892),	R1-4.
,,	V.	Tools and Plant (never published).	

VOLUME II.*

Section	VI.	Buildings. (In the Press.)	
,,	VII.	Bridges,	R4-4.
,,	VIII.	Roads,	R1-8.
,,	IX.	Railways (1891),	R1-4.
,,	X.	Irrigation Works.	(Under revision.)

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R7

,, II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. **Surveying** (by Major Firebrace, R.E.) (6th edition, with Curve Table). R3.

XIII. **Drawing** (by Lieut. R. Pulford, R.E.). † R8.

XIIIa. **Drawing, First Principles of Geometrical** (by do.) (4th edition). R1-4.

XIV. **Simp'e Applied Mechanics, Parts I and II in one** (in the Press).

Simple Applied Mechanics, Part II (1st edition). 8a.

XV. **Examples of Estimating.** Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition). R3-12.

* Date of Edition on sale.

† Originally published at R15, reduced to R8.

XVI. **Earthwork Estimating, with Practical Tables and Diagrams.** By Major A. M. Brandreth, R.E. Say R1.

XVII. **Specimens of Printing used in the College Drawing Course and Entrance Examinations.** 6a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Shelly's Workshop appliances. R1-8.

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

Notes on Chemistry of Building Materials. R2-0.

Tate's Mechanism. R1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunnya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet, 12a.; mounted on cloth and bound. R1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. 12a.

Tyndall's Hand-Book of Specifications. R5.

The Indian Engineer's Pocket Book. (In the Press.)

Wooden Bridges and Designs By Rai Kunhya Lal. (In the Press.)

Blasting under Water (2nd edition). 10a.

Waugh's Instructions for Topographical Surveying R1.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6a.

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width, very useful for Projects. R1-8.

SCIENCE BOOKS.

Wilson's Inorganic Chemistry. R2-0.

4. Comedy of Errors,
5. Merchant of Venice, } Each 4a.

Graphic Hydraulic Diagrams for channels in earth, giving Discharges and mean Velocities for varying bed widths, depths, and slopes. By R. G. Kennedy, Executive Engineer. R7-8.

PLANS OF STATIONS.

Lithographed Plans of the Cantonments and Regimental Lines in the different Military Stations of India. Drawn to a uniform scale, and prepared between 1864 and 1868 for the Government of India, P. W. Department. (Useful for Executive Engineers' and Superintending Engineers' Offices.)
Bengal, 51 Plans.
Madras, 99 Plans.
Bombay, 91 Plans.
N.-W. Provinces, 104 Plans.
Oudh, 21 Plans.
Rajputana, 4 Plans.
British Burma, 19 Plans.
Central Provinces. } Each 5a.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly, Nos. 1 to 5), bound R2.
Quarterly, Nos. 1, 2, 3, 4, and 5
Vol. II, Quarterly, Nos. 6 and 7,
" **VI,** " **Nos. 24 and 25,**
" **VII,** " **Nos. 26, 27, 28, and 29,**
Extra No., April 1870. } 8a. each, exclusive of packing and postage.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI. 8a. each, exclusive of packing and postage.
Quarterly Number 41A of Vol. X. 8a. each, exclusive of packing and postage.
Cloth covers for Volumes of 1st and 2nd Series, at 4a. each.

* Calendar for 1892 includes question papers for entrance to Engineer and Upper Subordinate Classes only.
† These include question papers for entrance to Engineer and Upper Subordinate Classes and Superior Accounts Branch, Public Works Department.

(THIRD SERIES.)

Quarterly Nos. 13 and 15, at 8a. each, exclusive of packing and postage.
Index to Professional Papers and loose Papers, 1st and 2nd Series, at 2a each, and loose papers, 3rd Series, 3a. each, exclusive of packing and postage.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.
Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of admission to the different classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I. S. C.*,
Principal, Thomason Civil Engineering College, Roorkee.

NOTICE.

It is notified, for information of Military and Civil officers, that services of Shams-ul-Ulama, Shaikh Mahmud Gilani, Persian Instructor, and Mr. R. F. Azoo, Arabic Instructor, have been specially retained by Government for giving instruction to candidates intending to present themselves for examinations in Arabic and Persian before the Board of Examiners. Gentlemen requiring their tuition should communicate with them at the office of the Board of Examiners.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 20th March, 1899, and is hereby promulgated for general information:—

ACT NO. XIII OF 1899.

An Act to consolidate and amend the Law relating to Glanders and Farcy.

WHEREAS it is expedient to consolidate and amend the law relating to glanders and farcy; It is hereby enacted as follows:—

Short title, extent and commencement.

1. (1) This Act may be called the Glanders and Farcy Act, 1899.

(2) It extends to the whole of British India; and

(3) It shall come into force at once.

Definition of "diseased."

2. (1) In this Act, unless there is anything repugnant in the subject or context, "diseased" means affected with glanders or farcy or any other dangerous epidemic disease among horses which the Governor General in Council may, by notification in the Gazette of India, specify in this behalf.

(2) The provisions of this Act relating to horses shall apply also to asses and mules.

Application of Act to local areas by Local Government.

3. The Local Government may, by notification in the local official Gazette, apply this Act, or any provision of this Act, to any local area, to be specified in such notification, within the Province.

Local Government to appoint Inspectors.

4. (1) When this Act has been so applied to a local area, the Local Government may, by notification in the local official Gazette, appoint such persons as it thinks fit to be Inspectors under this Act and to exercise and perform, within the whole of the local area or such portions thereof as it may prescribe, the powers conferred and the duties imposed by this Act on such officers.

(2) Every person so appointed shall be deemed to be a public servant within the meaning of the Indian Penal Code. XLV of 1860.

Power of entry and search.

5. Within the local limits for which he is so appointed, any such Inspector as aforesaid may, subject to such rules as the Local Government may make in this behalf, enter and search any field, building or other place for the purpose of ascertaining whether there is therein any horse which is diseased.

Power of seizure.

6. Within such limits as aforesaid, the Inspector may seize any horse which he has reason to believe to be diseased.

Horse to be examined by Veterinary Practitioner.

7. (1) On any such seizure as aforesaid, the Inspector shall cause the horse seized to be examined as soon as possible by such Veterinary Practitioner as the Local Government may appoint in this behalf:

Provided that, when the Inspector is also a Veterinary Practitioner so appointed, he may make the examination himself.

(2) For the purposes of the examination, the Veterinary Practitioner may submit the horse to any test or tests which the Local Government may prescribe.

Horse to be destroyed if found diseased: otherwise restored.

8. (1) If the Veterinary Practitioner certifies in writing that the horse is diseased, the Inspector shall cause the same to be immediately destroyed:

Provided that, in the case of any disease other than glanders or farcy, horses certified to be diseased as aforesaid may, subject to any rules which the Local Government may make in this behalf, be either destroyed or otherwise treated or dealt with as the Veterinary Practitioner may deem necessary.'

(2) If, after completing the examination, the Veterinary Practitioner does not certify that the horse is diseased, the Inspector shall at once deliver the same to the person entitled to the possession thereof.

When horse diseased, place where it has been to be disinfected, etc.

9. (1) When any diseased horse has been in any building, shed or other enclosed place, or in any open lines, the Inspector may issue a notice to the owner of the building, shed, place or lines, or to the person in charge thereof, directing him to have the same disinfected and the internal fittings thereof, or such other things found therein or near thereto as the Local Government may by rule prescribe, destroyed.

(2) On the failure or neglect of such owner or other person as aforesaid to comply with the notice within a reasonable time, the Inspector shall cause the building, shed, place or lines to be disinfected and the fittings or other things to be destroyed, and the expense (if any) thereby incurred may be recovered from the owner or other person as if it were a fine.

Owner or person in charge of diseased horse to give notice.

10. The owner or any person in charge of a diseased horse shall give immediate information of the horse being diseased to the Inspector or to such authority as the Local Government may appoint in this behalf.

Prohibition against removal, without license, of horse which has been with diseased horse.

11. No person in charge of any horse which has been in the same field, building or place as, or in contact with, a diseased horse, shall remove such horse except in good faith for the purpose of preventing infection, or under a license to be granted by the Inspector and subject to the conditions of the license.

Vexatious entries, searches and seizures.

12. (1) Whoever, being an Inspector appointed under this Act, vexatiously and unnecessarily enters or searches any field, building or other place, or seizes or detains any horse on the pretence that it is diseased, shall be punishable with imprisonment for a term which may extend to six months, or with fine which may extend to five hundred rupees, or with both.

(2) No prosecution under this section shall be instituted after the expiry of three months from the date on which the offence has been committed.

Penalty for refusing to comply with notice under section 9, or for moving horse contrary to section 11.

13. Whoever refuses or neglects to comply with any notice issued by the Inspector under section 9, or removes any horse in contravention of section 11, shall be punishable with imprisonment for a term which may extend to one month, or with fine which may extend to fifty rupees, or with both.

Power to make rules.

14. (1) The Local Government may make rules to carry out the purposes and objects of this Act.

(2) In particular and without prejudice to the generality of the foregoing power, such rules as aforesaid may—

(a) regulate entries, searches and seizures by Inspectors under this Act;

(b) regulate the use of tests and the isolation of horses subjected thereto, and provide for recovering the expense of detaining, isolating and testing horses from the owners or persons in charge thereof as if it were a fine;

(c) regulate the destruction or treatment, as the case may be, of horses certified under section 8 to be diseased, and the disposal of the carcases of diseased horses;

(d) regulate the disinfecting of buildings and places in which diseased horses have been, and prescribe what things found therein or near thereto shall be destroyed; and

(e) regulate the grant of licenses under section 11 and the conditions on which those licenses shall be granted.

(3) All rules under this section shall be published in the local official Gazette, and, on such publication, shall have effect as if enacted by this Act.

(4) In making any rule under this section, the Local Government may direct that a breach of it shall be punishable with imprisonment for a term which may extend to one month, or with fine which may extend to fifty rupees, or with both.

Appointment of same person to be both Inspector and Veterinary Practitioner.

15. Any Veterinary Practitioner may be appointed by the Local Government to be both Inspector and Veterinary Practitioner for all or any of the purposes of this Act or of any rule thereunder.

Protection to persons acting under Act.

16. No suit, prosecution or other legal proceeding shall lie against any person for anything which is, in good faith, done or intended to be done under this Act.

Repeal.

17. The enactments mentioned in the schedule are hereby repealed to the extent specified in the fourth column thereof.

THE SCHEDULE.

ENACTMENTS REPEALED.

(See section 17.)

Year.	No.	Short Title.	Extent of repeal.
1879	XX	The Glanders and Farcy Act, 1879.	The whole Act.
1891	XII	The Repealing and Amending Act, 1891.	So much as relates to Act XX of 1879.
1896	XV	The Glanders and Farcy Act (1879) Amendment Act, 1896.	The whole Act.

Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 20th March, 1899, and is hereby promulgated for general information :—

ACT NO. XIV OF 1899.

An Act to further amend the Indian Tariff Act, 1894.

WHEREAS it is expedient to further amend the Indian Tariff Act, 1894; It is hereby enacted as follows :—

Short title and commencement.

1. (*1*) This Act may be called the Indian Tariff Amendment Act, 1899; and

(*2*) It shall come into force at once.

Addition of new section 8A after section 8, Act VIII, 1894.

2. After section 8 of the Indian Tariff Act, 1894, the following section shall be added, namely:—

Additional import duty on bounty-fed articles.

"8A. (*1*) Where any country, dependency or colony pays or bestows, directly or indirectly, any bounty or grant upon the exportation therefrom of any article and the article is chargeable with duty under the provisions of this Act, then, upon the importation of any such article into British India, whether the same is imported directly from the country of production or otherwise, and whether it is imported in the same condition as when exported from the country of production or has been changed in condition by manufacture or otherwise, the Governor General in Council may, by notification in the Gazette of India, impose an additional duty equal to the net amount of such bounty or grant, however the same be paid or bestowed.

"(*2*) The net amount of any such bounty or grant as aforesaid shall be, from time to time, ascertained, determined and declared by the Governor General in Council, and the Governor General in Council may, by notification in the Gazette of India, make rules for the identification of such articles and for the assessment and collection of any additional duty imposed upon the importation thereof under sub-section (*1*)."

Act not to apply in certain cases.

3. This Act shall not apply to any imported article the bill of lading for which was signed and given before the commencement of this Act.

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to consolidate and amend the law of Bankruptcy and Insolvency in British India was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 20th March, 1899 :—

WE, the undersigned, Members of the Select Committee to which the Bill to consolidate and amend the law of Bankruptcy and Insolvency in British India was referred, have considered the Bill, and have now the honour to submit this our Report.

2. The Bill was introduced on the 20th May, 1886, and was referred to a Select Committee on the same day. The Select Committee, however, did not apparently meet till the 5th March, 1892, and, after holding one meeting, seem to have discontinued the consideration of the measure.

3. We have come to the conclusion that the Bill in its present form should be abandoned and struck off the list of pending business. Although it closely follows the provisions of the English Act of 1883, and although it would be convenient to have the substantive law of bankruptcy the same both in England and in India, we think that the procedure of eh English Statute is much too complicated to suit Indian conditions. In particular, the Bill proposes to introduce two proceedings which would be novel in this country, and would create unnecessary difficulties. In the first place, the interposition of a "receiving order," with all the legal complications attendant on it, between the bankruptcy petition and the adjudication is undesirable here. In the second place, the provisions regarding special assignees, who in practice are never appointed in India, involve a large number of checks and counter-checks which are not wanted where the administration is in the hands of a permanent official and officer of the Court. Other illustrations might be given, but these may suffice to show the advisability of not proceeding further with the measure as now before the Council.

4. The publication ordered by the Council was made as noted below :—

H. W. C. CARNDUFF,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 20th March, 1899:—

No. 3 OF 1899.

A Bill to provide for the Regulation and Inspection of Mines.

WHEREAS it is expedient to provide for the regulation and inspection of mines; It is hereby enacted as follows:—

Preliminary.

Short title, extent and commencement.

1. (1) This Act may be called the Indian Mines Act, 1899.

(2) It extends to the whole of British India; and

(3) It shall come into force on the first day of , 1899.

Saving of Regulation XII, 1887.

2. Nothing in this Act shall be construed to affect the provisions of the Upper Burma Ruby Regulation, 1887. XII of 1887.

Definitions.

3. In this Act, unless there is anything repugnant in the subject or context,—

(a) "agent," when used in relation to a mine, means any person appointed as the representative of the owner in respect of the mine or of any part thereof, and as such superior to a manager appointed under this Act; [Cf. 50 & 51 Vict., c. 58, s. 75.]

(b) "child" means a person under the age of fourteen years; [Cf. XV of 1881, s. 2.]

(c) a person is said to be "employed" in a mine who works therein, whether for wages or not, in any mining operation, or in cleaning or oiling any part of any machinery used in the mine, or in any other kind of work whatsoever incidental to, or connected with, mining operations; [Cf. ibid.]

(d) "mine" includes every shaft in the course of being sunk, and every level and inclined plane in the course of being driven for commencing or opening any mine or for searching for or proving minerals, and all the shafts, levels, planes, works, machinery, tramways and sidings, both below ground and above ground, in and adjacent to and belonging to the mine; [Cf. 35 & 36 Vict., c. 77, s. ...]

(d) "owner," when used in relation to a mine, means any person who is the immediate proprietor or lessee or occupier of the mine or of any part thereof, and does not include a person who merely receives a royalty, rent or fine from the mine, or is merely the proprietor of the mine subject to any lease, grant or license for the working thereof, or is merely the owner of the soil, and not interested in the minerals of the mine; but any contractor for the working of a mine or any part thereof shall be subject to this Act in like manner as if he were an owner, but so as not to exempt the owner from any liability; [Cf. 50 & 51 Vict., c. 58, s. 75.]

(e) "prescribed" means prescribed by rules made under this Act; and

(f) "shaft" includes pit. [Cf. 50 & 51 Vict., c. 58, s. 75.]

Inspectors.

Inspectors.

4. (1) The Governor General in Council shall, by notification in the Gazette of India, appoint a person to be Inspector of Mines throughout British India. [Cf. XV of 1881, s. 3.]

(2) The Local Government may, in its discretion, by notification in the local official Gazette, appoint such persons as it thinks fit to be Inspectors of Mines within such local areas as it may assign to them respectively.

(3) Every Inspector of Mines appointed under sub-section (2) shall, in the performance of his duties, be subordinate to the Inspector of Mines appointed under sub-section (1) in such respects and to such extent as may be prescribed by the Governor General in Council.

(4) Every Inspector of Mines appointed under this section shall be deemed to be a public servant within the meaning of the Indian Penal Code, and shall be subordinate to such authority as the Governor General in Council or the Local Government, as the case may be, may direct. XLV of 1860.

Powers of District Magistrate.

5. The District Magistrate may exercise such of the powers and perform such of the duties of an Inspector of Mines appointed under section 4, sub-section (2), as the Local Government may, by general or special order, direct. [Cf. ibid, s. 2.]

Powers of Inspectors of Mines.

6. An Inspector of Mines may, anywhere within British India or within the local area for which he is appointed, as the case may be,— [Cf. ibid., s. 4]

(a) make such examination and inquiry as

he thinks fit in order to ascertain whether the provisions of this Act are observed in the case of any mine;

(*b*) enter, with such assistants (if any) as he thinks fit, inspect and examine any mine and any part thereof at all reasonable times by day or by night, but not so as unreasonably to impede or obstruct the working of the mine;

(*c*) examine into, and make inquiry respecting, the state and condition of any mine or any part thereof, the ventilation of the mine, the sufficiency of the special rules for the time being in force in the mine and all matters and things connected with or relating to the safety of the persons employed in or about the mine;

(*d*) order that any person shall not be employed in, or admitted to, a mine where he has ground for believing that such employment or admission would, by reason of the age or sex of such person, be in contravention of this Act;

(*e*) do all other things required of him by this Act and exercise such other powers as may be necessary for carrying this Act into effect.

[Cf. 50 & 51 Vict., c. 58, s. 41, § 2.]

Facilities to be afforded to Inspectors.

7. Every owner, agent or manager of a mine shall furnish every Inspector of Mines, on requisition, with the means necessary for making any entry, inspection, examination or inquiry in relation to the mine under this Act.

[Cf. 11 of 1896, s. 17.]

Information acquired to be deemed official secrets within meaning of Act XV, 1889.

8. (*1*) All copies of, and extracts from, registers or other records appertaining to any mine, and all other information acquired by an Inspector of Mines, or by any one assisting him, in the inspection of any mine under this Act, shall be regarded as strictly confidential and shall be deemed to be official secrets.

(*2*) If any such person discloses to any one, other than an officer to whom such Inspector is subordinate, any such official secret as aforesaid without the previous consent in writing of the Local Government, he shall be guilty of a breach of official trust, and shall be punishable in the manner provided by section 4 of the Indian Official Secrets Act, 1889. XV of 1889.

(*3*) The restriction imposed by section 5 of the last-mentioned Act shall not apply to a prosecution for a breach of official trust under this Act.

Operatives.

[Cf. 50 & 51 Vict., c. 58, s. 4.]

Employment and admission of children in or to mines.

9. (*1*) No child shall be employed below ground in any mine if he is under the age of ten years.

(*2*) No child shall be allowed below ground in any mine if he is over the age of four, and under the age of ten, years.

Prohibition by Inspectors of Mines of employment of women and children in mines.

10. Subject to the control of the Local Government or of such authority as the Local Government may appoint in this behalf, any Inspector of Mines may, by order in writing and for reasons to be stated therein, prohibit the employment of women or children, or of both, in any mine or part thereof, or on any particular kind of labour above ground or below ground, when such employment is, in his opinion, dangerous for, or unsuited to, women or children, as the case may be.

[Cf. ibid, ss. 5-8, 11-15.]

Rules as to employment in mines.

11. (*1*) Subject to the provisions of section 9, the Governor General in Council may, for the whole or any part of British India, and each Local Government, with the previous sanction of the Governor General in Council, may, for the whole or any part of the Province, by notification in the Gazette of India or the local official Gazette, as the case may be, make, in respect of all mines or of particular classes of mines, rules—

(*a*) prohibiting, restricting or regulating the employment of women or children below ground or on particular kinds of labour;

(*b*) limiting the number of hours in any one week or in any one day for which women or children may be employed, or allowed to be, for the purpose of employment, below ground;

(*c*) requiring the owners or agents to maintain, in such form as the Governor General in Council or the Local Government, as the case may be, it may think fit, registers of the women and children (if any) employed and of their respective employments; [Cf. XV of 1881, s. 9.]

(*d*) prescribing the method of determining the wages of the persons employed, where such wages depend on the quantity of work done, and regulating the size or capacity of the measures by which such quantities are to be ascertained; and

(*e*) fixing the time and place for the payment of wages earned and regulating the conditions under which deductions may be made therefrom.

(*2*) All rules made under this section shall be published in the local official Gazette, and, on such publication, shall have effect as if enacted in this Act.

[Cf. ibid, ss. 5, 6.]

Medical certificates and proof of age.

12. (*1*) The Civil Surgeon, or such other person practising medicine or surgery as the Local Government may appoint in this behalf for any local area, shall, at the request of any person employed or desirous of being employed in a mine situate in such local area, or of the parent or guardian of such person, and on payment by such person of the prescribed fee (if any), examine such person and grant him a certificate in writing stating whether his age, as nearly as can be ascertained from such examination, is above or below four, ten or fourteen years, as the case may be.

(*2*) A certificate granted under sub-section (*1*) shall, for the purposes of this Act, be admissible as evidence of the age of the person referred to therein.

(*3*) Where an act would, if a person were under four, ten or fourteen years of age, as the case may be, be an offence against this Act, and such person is, in the opinion of the Court, apparently under that age, it shall lie on the accused to prove that the person is not under that age.

Mining Operations and Duties and Responsibilities of Owners, Agents and Managers.

13. For every mine the owner or agent shall appoint a manager, who shall have the prescribed qualifications.

Appointment of manager.

[Cf. 50 & 51 Vict., c. 58, s. 59; XV of 1881, s. 17.]

14. (1) The owner, agent and manager of every mine shall be responsible that all operations carried on in connection therewith are conducted in accordance with the provisions of this Act.

Duties and responsibility of owners, agents and managers.

(2) In the event of any contravention of, or failure to comply with, any of the provisions of this Act on the part of any person whomsoever, the owner, agent and manager shall each be guilty of an offence against this Act, unless he proves that he had taken all reasonable means, by publishing and to the best of his power enforcing the said provisions, to prevent such contravention or non-compliance, and that such contravention or non-compliance occurred without his knowledge or consent.

[Cf. 50 & 51 Vict., c. 58, s. 42.]

15. (1) If, in any respect which is not provided against by any express provision of this Act, any Inspector of Mines finds that any mine or any part thereof, or any matter, thing or practice in or connected with the mine, or with the control, management or direction thereof, is dangerous to human life or safety, or defective so as to threaten, or tend to, the bodily injury of any person, he may give notice in writing thereof to the owner, agent or manager of the mine, and shall state in the notice the particulars in which he considers the mine or part thereof or the matter, thing or practice, to be dangerous or defective, and require the same to be remedied within a specified time, and shall also report the same to such officer or authority as the Governor General in Council or the Local Government may, by general or special order, appoint in this behalf:

Notice by Inspector of Mines of causes of danger not expressly provided against.

Provided that, if the owner, agent or manager of the mine objects to remedy the matter complained of in the notice, he may, within twenty days after the receipt of the notice, send his objection in writing, stating the grounds thereof, to such officer or authority as aforesaid, and that thereupon the said officer or authority shall, by order in writing, refer the matter to a Committee constituted as hereinafter provided.

(2) Nothing in this section shall affect the powers of a Magistrate under section 144 of the Code of Criminal Procedure, 1898. V of 1898.

[Cf. ibid.]

16. (1) Every Committee to which a reference is made under section 15, shall consist of—

Constitution of Committee of reference.

(a) one or more persons nominated by the officer or authority appointed under section 15, sub-section (1), and a like number of persons nominated by the owner, agent or manager of the mine concerned; and

(b) a president nominated by such officer or authority as aforesaid.

(2) If the owner, agent or manager fails, wholly or in part, to exercise his right of nomination under sub-section (1), clause (a), such officer or authority as aforesaid shall nominate the number of persons necessary to constitute the Committee.

(3) The Committee constituted as aforesaid shall, as soon as may be, hold an inquiry into the matter to which the order of reference relates, and shall hear and record such information on the subject as the owner, agent or manager or the Inspector of Mines may desire to place before it.

(4) The said Committee shall have all the powers of a Civil Court for the purpose of enforcing the attendance of witnesses and compelling the production of documents; and every person required by the Committee to furnish any information before it shall be deemed to be legally bound to do so within the meaning of section 176 of the Indian Penal Code. [Cf. I of 1894, ss. 9 14, (2).] XLV of 1860.

(5) The Committee holding an inquiry under this section shall make a report to the Local Government through such officer or authority as aforesaid, and the Local Government shall thereupon pass such orders in the matter as it may think fit.

[Cf. XV of 1881, s. 14.]

17. The owner, agent or manager of a mine shall, within one month after the commencement of mining operations, give notice in writing to the Inspector of Mines appointed under section 4, sub-section (2), for the local area in which the mine is situate, of the address to which he desires his letters to be directed, the nature of the mining operations to be conducted, the name of the person under whom they are to be conducted, and the kind and amount of the moving power to be used.

Notice of commencement of work in a new mine.

[Cf. ibid, s. 13.]

18. When any accident occurs in a mine causing loss of life or bodily injury whereby the person injured is prevented from returning to his work in the mine during forty-eight hours next after the occurrence, the owner, agent or manager of the mine shall give such notice of the accident to such authorities in such form and within such time as may be prescribed.

Notice to be given of accidents.

[Cf 50 & 51 Vict., c. 58, s. 45.]

19. (1) When in any mine an accident has caused loss of life or bodily injury to any person, the Governor General in Council or the Local Government may direct that a formal inquiry into the causes of, and circumstances attending, the accident be held, and may appoint a competent person to hold the inquiry, and may also appoint any person or persons possessing legal or special knowledge to act as assessor or assessors in holding the inquiry.

Power for the Government to order formal inquiry into accidents.

(2) The person or persons so appointed shall have all the powers of a Civil Court for the purpose of enforcing the attendance of witnesses and compelling the production of documents; and every person required by such person or persons as aforesaid to furnish any information shall be deemed to be legally bound to do so within the meaning of section 176 of the Indian Penal Code. XLV of 1860.

(3) The person or persons holding an inquiry under this section shall make a report to the Local Government, stating the causes of the accident and its circumstances, and adding any observations which he or they may think fit to make.

[Cf. ibid, s. 46.]

20. The Local Government may cause any report submitted under section 16 or section 19 to be published at such time and in such manner as it may think fit.

Publication of reports.

Rules.

21. (1) The Governor General in Council may for the whole or any part of British India, and each Local Government, with the previous sanction of the Governor General in Council, may for the whole or any part of the Province, by notification in the Gazette of India or the local official Gazette, as the case may be, make rules for carrying out the purposes and objects of this Act in respect of all mines or any classes of mines.

Power for Government to make rules.

(2) In particular and without prejudice to the generality of the foregoing power, such rules may—

(a) regulate the duties and powers of Inspectors of Mines in respect of the inspection of mines under this Act;

(b) prescribe the duties of owners, agents and managers of mines and of all persons acting under them;

(c) prescribe the qualifications of managers and of all persons acting under them;

(d) regulate the manner of ascertaining, by examination or otherwise, the qualifications of managers and persons acting under them, and the granting and renewal of certificates of competency;

(e) provide for the making of inquiries into charges of misconduct or incompetency on the part of managers and persons acting under them, and for the suspension and cancellation of certificates of competency;

(f) fix the fees (if any) to be paid in respect of such examinations and the grant and renewal of certificates as aforesaid;

(g) prescribe the matters in respect of which notices, returns and reports shall be furnished by owners, agents and managers, the forms of such notices, returns and reports and the particulars to be contained in them;

(h) prescribe the plans (if any) to be kept by owners, agents and managers, and the manner and places in which they are to be kept for purposes of record;

(i) regulate, subject to the provisions of the Indian Explosives Act, 1884, and the rules thereunder, the storage and use of explosives;

(j) regulate the procedure to be observed in inquiries held under this Act;

(k) provide for the safety of the persons employed in mines, their means of entrance thereinto and exit therefrom, the number of shafts or outlets to be furnished, the fencing of outlets and passages, and the care of all machinery (including steam-boilers);

(l) provide for the water-supply, sanitation and conservancy of mines;

(m) provide for the safety of the roads and working-places in mines;

(n) provide for the ventilation of mines and the action to be taken in respect of noxious gases;

(o) require and regulate the use of safety lamps in mines;

(p) provide against the accumulation of water in mines;

(q) regulate the procedure on the occurrence of accidents in mines and the supply of medical appliances and comforts for the benefit of persons injured therein; and

(r) provide for the safety of the public and the protection of public property and works from injury in respect of any mine, whether the mine is being worked or not.

(3) The power to make rules conferred by this section is subject to the condition of the rules being made after previous publication.

(4) All rules made under this section shall be published in the Gazette of India or in the local official Gazette, as the case may be, and, on such publication, shall have effect as if enacted in this Act.

22. (1) The owner, agent or manager of a mine may, and, if at any time required by an Inspector of Mines, shall, frame and transmit to such Inspector of Mines as aforesaid a draft of such special rules, not being inconsistent with this Act or any rules for the time being in force under section 11 or section 21, for the control and guidance of the persons acting in the management of, or employed in or about, the mine as he may deem necessary to prevent accidents and provide for the safety, convenience and discipline of the persons employed in or about the mine.

Power for owners, etc., to make special rules.

(2) Such draft, together with a notice intimating that any objection or suggestion in respect thereof may be submitted in writing by any person employed in the mine to the said Inspector of Mines for consideration, shall, during not less than thirty days before it is transmitted to the said Inspector of Mines, be posted up in legible characters in some conspicuous place in the mine for the information of the persons employed therein, and a certificate to the effect that this has been done shall be transmitted to the said Inspector of Mines, together with two copies of the draft signed by the owner, agent or manager transmitting the same.

(3) Where the owner, agent or manager and the said Inspector of Mines are unable to agree as to the special rules proposed, the said Inspector of Mines shall refer the draft for settlement to such officer or authority as the Local Government may, by general or special order, appoint in this behalf.

(4) Where the special rules proposed have been agreed to by the owner, agent or manager and the said Inspector of Mines and the draft of the rules so agreed to has been signed by them, or, in a case of disagreement, such officer or authority as aforesaid has settled the rules, the Inspector shall forward them to the Local Government for approval, together with a copy of any objections or suggestions in respect thereof received by him.

(5) The special rules, when approved by the Local Government, with such modifications (if any) as it may think fit, shall be published in like manner as is provided in sub-section (2) respecting the publication of the draft, and, on such publication, shall have effect as if enacted in this Act:

Provided that the Local Government may at any time, by order in writing, which shall be published in like manner as aforesaid, rescind, in whole or in part, any rules so made, and that

thereupon such rules shall cease to have effect accordingly.

Penalties.

Penalties for offences. 23. (1) Whoever—

(a) obstructs an Inspector of Mines in the discharge of his duties under this Act, or refuses or neglects to furnish him with the means necessary for making any entry, inspection, examination or inquiry thereunder in relation to any mine; or

(b) counterfeits, or knowingly makes a false statement in, any certificate or in any official copy of a certificate granted under this Act; or

(c) knowingly uses as true any such counterfeit or false certificate; or

(d) makes or produces or uses any false declaration, statement or evidence for the purpose of obtaining, for himself or for any other person, a certificate or the renewal of a certificate, or any employment under this Act; or

(e) contravenes any provision of this Act for the breach of which no penalty is otherwise provided, where the act done has resulted in loss of life or serious bodily injury to any person;

shall be punishable with imprisonment for a term which may extend to three months, or with fine which may extend to five hundred rupees, or with both.

(2) Whoever—

(a) alters or falsifies any plan or register or record required to be maintained by this Act; or,

(b) being the owner, agent or manager of a mine, omits to give notice of an accident in the mine or to furnish any prescribed returns; or

(c) makes or delivers any such report or return containing a statement which is not, to the best of his knowledge or belief, true;

shall be punishable with fine which may extend to five hundred rupees.

(3) Whoever—

(a) employs or allows to be employed in or about a mine, or allows to enter a mine or part of a mine, any person in contravention of this Act; or

(b) allows any child or woman to perform any work forbidden by, or to work in contravention of, this Act; or

(c) fails to comply with any requisition or order made under this Act; or,

(d) being the owner, agent or manager of a mine, fails to maintain correctly, or to produce, any prescribed plan; or,

(e) being the owner, agent or manager of a mine, fails to propose a draft of rules therefor in accordance with the requisition of an Inspector of Mines; or

(f) contravenes any provision of this Act or rule thereunder, for the breach of which no penalty is otherwise provided;

shall be punishable with fine which may extend to two hundred rupees, and, in the case of a continuing breach under clause (c) or clause (e) of this sub-section, with a further fine which may extend to fifty rupees for every day during which the breach is proved to have been persisted in after the date of the receipt by him of the order or requisition referred to in such clause.

Miscellaneous.

Limitation of prosecutions. 24. No Court shall take cognizance of any offence against this Act unless complaint thereof is made within six months of the date on which the offence is alleged to have been committed.

Cognizance of offences. 25. No Court inferior to that of a Magistrate of the first class or Sub-divisional Magistrate shall try any offence against this Act.

Reference to Committee in lieu of prosecution in certain cases. 26. If the Court trying any case instituted on the complaint of an Inspector of Mines under this Act is of opinion that the case is one which should, in lieu of a prosecution, be referred to a Committee, it may stay all further criminal proceedings, discharge the accused, and report the matter to the officer or authority appointed by the Local Government under section 15, sub-section (1), and such officer or authority may thereupon refer it to a Committee to be dealt with in the manner provided by the said section and section 16.

Decision of question whether a mine is under this Act. 27. If any question arises as to whether any mine is a mine within the meaning of this Act, the Local Government may decide the question, and a certificate, signed by a Secretary to the Local Government, shall be conclusive on the point. [Cf. 50 & 51 Vict., c. 58, s. 71.]

Power to exempt from operation of Act. 28. The Governor General in Council may, by notification in the Gazette of India, exempt from the operation of the whole or any part of this Act any local area, or any mine or class of mines, or any person or class of persons.

Application of Act to Crown mines. 29. This Act shall apply to mines belonging to the Crown. [Cf. XV of 1881, s. 19.]

STATEMENT OF OBJECTS AND REASONS.

THE object of this measure is for the regulation of work in, and the inspection of, mines in India. The Government has at present no legal power to inspect mines, to require notice to be given of the occurrence of mining accidents, to enforce proper precautions in the working of mines for the better avoidance of accidents and the protection of the miners, or to regulate the employment of women and children on underground work or in respect of work which is dangerous or unsuited to their age or sex.

2. In England these objects are secured by two elaborate Statutes, entitled respectively the Metalliferous Mines Regulation Act, 1872, and the Coal Mines Regulation Act, 1887, and similar legislation exists in other countries in which there is mining on a considerable scale. The need for an Act here has been recognized for some time past by Her Majesty's Government at home and by the Government of India, and the present Bill is founded on the Report of a Committee which was convened in Calcutta by the Government in 1895, and which, after visiting various mines in Bengal and taking evidence from mine-owners, managers and others, prepared the draft of a Bill and of detailed rules to be made under its provisions. The Committee's Report and their draft have been considered by the several Local Governments and by Companies and persons interested in the mining industry, and in framing the present Bill due advertence has been had to the suggestions and criticisms received from these sources.

3. It is proposed that the Bill shall extend to the whole of British India and to all classes of mines. It is recognised that different classes of mines require different regulations, and that precautions and appliances may be necessary in mines of one class which may be dispensed with in others; and it is considered that this difference of treatment can be most conveniently secured by statutory rules. Power is accordingly taken in clause 21 of the Bill to make rules on all matters concerning the regulation of mines, and such rules may be made applicable either to all mines or to any classes of mines, and to the whole, or to any part, of British India. Following the principle of the English Statutes, power is further taken in clause 22 to allow special rules to be made for any particular mine in order to provide for matters which are not dealt with by the general rules. And in clause 28 power is taken to exempt from the operation of the proposed Act any local area, or any mine or class of mines, or any person or class of persons. It is considered that these provisions will enable the Government to adjust the enactment in its practical working to the very varying circumstances of the mining industry in different parts of the country and to the different kinds of mines to which it will apply.

4. Clauses 4 to 7 of the Bill deal with the appointment of Inspectors of Mines and with their powers of entry and inspection. There is already an Inspector of Mines for the whole of British India, appointed by the Government of India, although he is at present without statutory powers of any description. The Bill makes the continuance of this office obligatory, and also provides for the appointment, as may be necessary, of Provincial Inspectors and for regulating their subordination to the Imperial Inspector. Power is also taken to invest the District Magistrate with all or any of the powers of an Inspector. The powers given to Inspectors by section 6 follow in the main the provisions of the English law.

5. Clauses 9 to 12 deal with the employment in, and admission of children to, mines, and enable rules to be made for prohibiting, restricting or regulating the employment of women and children below ground, or on particular classes of labour; for limiting the number of hours in any week or in any one day during which women and children may be employed; for prescribing the method of determining the wages of miners, where such wages depend on the quantity of work done; and the like. The regulations adopted in the final protocol of the Berlin International Labour Conference of 1890, which was attended by delegates of the Governments of Europe on the invitation of the Imperial German Government, contained the following, among other, propositions:—(1) that children below the age of fourteen years in northern countries, or below that of twelve in southern countries, should not be admitted to underground work in mines; (2) that women should not be allowed to work underground; (3) that children below fourteen years should not work more than six hours a day and should be excluded from unhealthy or dangerous occupations, or should be admitted to them only under protective conditions; and (4) that the working-hours of women should be limited by law and further restricted in respect of particularly unhealthy or dangerous occupations. With reference to these recommendations, which carry the weight of an International Conference, to the law on the subject in England, and to the special labour conditions existing in India, it is proposed in the Bill to prohibit the employment below ground of children under the age of ten years, and the admission below ground of children between the ages of four and ten. The object of the latter provision is to allow very small children to remain during the hours of work with their parents or relatives, if the latter work underground. With regard to women and to children between the ages of ten and fourteen years, it is not proposed to go farther than to take power by

rule to prohibit, restrict or regulate their employment underground if in any class of mine this is found to be expedient. There is evidence that the moral objections felt in other countries to the employment of women underground are not applicable to the conditions existing in India, where the woman works in the company of her husband on the family gang system; and it has been strongly urged that the exclusion of women absolutely from underground work would be felt by them and their husbands as a hardship, and that, where the mine is safe, the workings are at no great depth and there is no heavy machinery running, the objections on the score of health and safety to their employment are small. On the other hand, there are mines, or parts of mines, or kinds of underground work, from which women ought to be excluded, and it is proposed to deal with such cases by rule. With regard to the regulation of the employment of children between the ages of ten and fourteen years of age, attention is called to the definition of "child" in clause 3 of the Bill.

6. Clauses 13 to 20 deal with the responsibilities and duties of owners, agents and managers, with enquiries into accidents, and with the appointment of committees of reference in cases where notice of causes of danger, not expressly provided against by the proposed Act or by rules made under it, are given by an Inspector to the owner or agent with the object of requiring preventive measures to be taken. The provisions of the English Statutes on these matters have been adapted to Indian requirements. Clause 26, it may be observed, provides a procedure whereby a Criminal Court, if it finds a question of mining practice in dispute, may stay all criminal proceedings and move the Local Government to refer the matter to a committee of reference.

7. Power has been taken in sub-clauses (*c*), (*d*) and (*e*) of sub-section (2) of clause 21 to make rules for prescribing the qualifications of managers and persons acting under them, for ascertaining their qualifications by examination or otherwise, and for granting and withdrawing certificates. It is considered that this difficult matter of requiring mines to be managed by "certificated" managers can best be dealt with by rules.

8. In sub-clause (*r*) of the same sub-section power has been taken to provide for the safety of the public and the protection of public property and works from injury in respect of any mine. It is considered that the Government ought, for example, to have power to require the open workings of abandoned mines to which the public have access, to be properly fenced in, and to insist on notice being given whenever underground workings approach within a prescribed distance of a railway or other public work, and thereupon to take the necessary steps to ensure safety. The question of giving protection to railways against risk from undermining has been repeatedly brought to the notice of the Government of India. Throughout the greater part of British India subjacent minerals are the property of the State, and, where this is the case, power to regulate their being worked by lessees so as not to injure railways or other public works already practically exists. But in places where minerals are not the property of the State unless they have been specially acquired, the existing law is imperfect as to the power of the State or of the railway administration concerned to obtain notice of approaching workings, or to make inspections for the purpose of ascertaining whether the line is being undermined. The Land Acquisition (Mines) Act, 1885 (XVIII of 1885), provides some protection in the case of land acquired under its provisions for public purposes after 1885 when such land is about to be, or is actually being, undermined; but its provisions in respect of notice and inspection are held not to apply to land acquired before 1885, or to the case in which the safety of a railway is threatened by underground workings which, without being prosecuted actually under railway land, are brought dangerously close to its border. A railway has a legal right in such cases to "lateral support," and a cause of action arises when such right is assailed. But this is not sufficient to ensure the safety of a railway or of the public travelling by it.

PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House, Calcutta, on Monday, the 20th March, 1899.

PRESENT:

His Excellency Baron Curzon of Kedleston, P.C., G.M.S.I., G.M.I.E., Viceroy and Governor General of India, *presiding*.
His Honour Sir John Woodburn, K.C.S.I., Lieutenant-Governor of Bengal.
His Excellency General Sir W. S. A. Lockhart, G.C.B., K.C.S.I., Commander-in-Chief in India.
The Hon'ble Sir J. Westland, K.C.S.I.
The Hon'ble Mr. M. D. Chalmers, C.S.I.
The Hon'ble Major-General Sir E. H. H. Collen, K.C.I.E., C.B.
The Hon'ble Sir A. C. Trevor, K.C.S.I.
The Hon'ble Mr. C. M. Rivaz, C.S.I.
The Hon'ble M. R. Ry. Panappakkam Ananda Charlu, Vidia Vinodha Avargal, Rai Bahadur, C.I.E.
The Hon'ble Mr. J. J. D. LaTouche, C.S.I.
The Hon'ble Rai Bahadur Pandit Suraj Kaul, C.I.E.
The Hon'ble Mr. Gangadhar Rao Madhav Chitnavis, C.I.E.
The Hon'ble Mr. Allan Arthur.
The Hon'ble Mr. P. M. Mehta, C.I.E.
The Hon'ble Nawab Mumtaz-ud-daula Muhammad Faiyaz Ali Khan.
The Hon'ble Mr. J. K. Spence, C.S.I.
The Hon'ble Mr. G. Toynbee.
The Hon'ble Mr. D. M. Smeaton, C.S.I.
The Hon'ble Mr. J. D. Rees, C.I.E.
The Hon'ble Maharaja Rameshwara Singh Bahadur of Darbhanga.
The Hon'ble Nawab Bahadur Sir Khwaja Ahsanullah, K.C.I.E.

FINANCIAL STATEMENT FOR 1899-1900.

The Hon'ble SIR JAMES WESTLAND introduced and explained the Financial Statement for 1899-1900. He said:—

"PART I.

"INTRODUCTION.

"In presenting my Financial Statement of March 1898 I alluded to the

calamities of famine, war, pestilence, and earthquake which had fallen upon us during the year then closing, and I went on to refer to the promise of brighter times introduced by the abundant harvest of 1897. The recovery of the country has been more rapid than any of us anticipated at the time I allude to; another good harvest has been gathered, and although the plague still casts a shadow over the land, the general condition of the people as evidenced by the Returns of Trade and of Revenue is prosperous, and the famine of 1896 and 1897 is now little more than a memory, its effects being obliterated by the return of prosperous seasons. I cannot, however, pass from the subject without deriving from it one lesson which it seems to me to afford—namely, that the margin between prosperity and adversity in India must be a very narrow one, for if we have learned that one bountiful harvest suffices to restore the country after a wide-spread and severe famine, we have learned also that the failure of the seasonal rains in a single month of the year is sufficient to set back a full tide of prosperity; and that this is a possibility which in the administration of India, and in its financial administration especially, we dare not leave out of account.

"2. In the two calamitous years of which I told the history last March, namely, 1896-97 and 1897-98, I had to shew that the accounts of the Empire were in deficit to the aggregate amount of, as nearly as possible, seven crores of rupees (Rx. 6,988,100 since increased to Rx. 7,064,233). In the two succeeding years (those of which I present the estimates to-day) I am glad to say that this deficit has been, or will be, more than covered, for so complete is the reversal of last year's position that in passing from 1897-98 to 1898-99 we pass from a deficit of Rx. 5,359,211 to a surplus of Rx. 4,759,400, and in my Budget Estimates for next year I anticipate a surplus of Rx. 3,932,600. I lay these figures before the Council at the very commencement of my Statement, as I have no doubt they are anxious to know, as soon as possible, the general drift of the figures which I now proceed to explain in greater detail.

"Accounts of 1897-98.

"3. The Accounts of 1897-98 were, as usual, published in the first half of January, and the results then shown compare as follows with the anticipations formed in March 1898:—

	Revenue.	Expenditure.	Deficit.
	Rx.	Rx.	Rx.
Estimated in March 1898	96,561,500	101,844,600	5,283,100
Actual Accounts	96,442,004	101,801,215	5,359,211
Accounts { Better + / Worse — }	—119,496	+43,385	—76,111

" The differences on the whole were very small, as the accounts under each of the heads of Revenue and Expenditure closely followed the Revised Estimate. Indeed, had it not been that we determined after the close of the year to make certain grants (aggregating Rx. 88,100) to the Provincial Governments of Bombay and of Bengal in further reimbursement to them of their famine expenditure, the difference in the whole account between Revised Estimate and Actuals would have been only Rx. 12,000.

"Revised Estimates of 1898-99.

"4. In the Budget Estimate for 1898-99 I estimated the results of the year to be a surplus of Rx. 891,400. But we now find that mainly through abundant revenue, military economies on the North-West Frontier, and very favourable exchange, the result of the year will be a surplus, as I have already stated, of Rx. 4,759,400. I shall explain afterwards that on a review of the financial position of the several Local Governments, whose balances have been exhausted by famine and plague, and who have still to meet pressing demands for expenditure while the expansion of their revenues has for a time been set back by the calamities referred to, we have decided to make them grants in aid of their resources, out of the surplus that has accrued to us on the Imperial account. The total amount of these grants is Rx. 700,000, and thus the surplus of the year is reduced from Rx. 4,759,400 to Rx. 4,059,400. The money may be described as expenditure brought to account by anticipation, that is to say, it goes at present merely to swell Provincial balances, and when actually spent on the

purposes in consideration of which it is granted, it has not again to be charged against the surplus of the year, but passes through the Provincial adjusting entry.

"5. The detail of the differences between the Revised Estimates for 1898-99, as now presented, and the amounts taken in the Budget Estimates prepared twelve months ago are set out in the following statement:—

"Estimates of 1898-99.

	Budget.	Revised.	Revised Better.	Revised Worse.

Surplus .	891,400	4,059,400	3,168,000	

(a) Including interest and receipts under Civil Works.

(b) This entry in the Indian portion of the accounts is a *minus* one, as the interest passed to the charge of Railway and Irrigation is greater than the whole amount of interest payable in India.

"6. The first point to note is that, except for a small falling-off under Stamps and Registration, every one of the Revenue heads shews better results than anticipated in the Budget Estimates. The improvement under Land Revenue is mostly in Burma and the North-Western Provinces. In Opium we have got much better prices in Bengal than we estimated for, namely, Rx. 4,164,000 against Rx. 3,900,000, and in Bombay the low rate of the pass-duty, as compared with previous years, has led to a revival of the export which last year shewed a very considerable decline. The increase in Salt Revenue, which now produces 9 crores against the 8½ which it gave us in the two famine years, is a satisfactory

indication of the improvement in the condition of the people, and the Customs Revenue continues to increase as trade continues to flourish.

"7. Post Office and Telegraph shew a falling-off, due in the latter case partly to the cessation of hostilities on the North-Western Frontier, but chiefly to the more extensive use of deferred telegrams which are now delivered by hand, and in the former case to reduction of rates of postage. We calculate that by the increase, from one tola to one-and-a-half, of the unit of weight for inland postage we diminish the annual revenue by Rx. 60,000, and by adopting the Imperial Penny Postage (for India, one anna) we give up Rx. 40,000. A considerable portion of this last item will be recovered for us by an arbitration given in our favour, in respect of the distribution, between the English and the Indian Post Offices, of the subsidy charges payable to the Peninsular and Oriental Company and by reductions of the scale of charge in respect of continental transit.

"8. Under Railways—Net Earnings—we have received Rx. 778,100 more than we estimated, the important items being—

		Rx.
1. North-Western	Better	410,000
2. Great Indian Peninsula	Better	416,000
3. Bombay, Baroda and Central India	Better	210,000
4. Rajputana-Malwa	Better	70,000
5. Eastern Bengal	Worse	110,000
6. Southern Mahratta	Worse	80,000
7. South Indian	Worse	50,000
8. Madras	Worse	55,000
9. Assam-Bengal	Worse	31,000
Net of the above	Better	780,000

"The improvement is due generally to large exports of grain consequent on good winter crops, and in one case to postponement of works of repair and renewal.

"The Plague is responsible for the falling-off on the Railways in Southern India.

"An inferior jute crop and the postponement of jute deliveries in Calcutta was the cause of the worse result on the Eastern Bengal State Railway, and inclusion in the Working Expenses of the revenue share of repairs of earthquake damages caused the reduction on the Assam-Bengal Railway.

"9. On the expenditure side, the first considerable improvement is under Opium, and is due to our failure to obtain as good a crop as we hoped. We have been able to recommence the building up of our Reserve, but the good season for which for many years we have waited has not yet come, and the produce still remains short of our standard. There has also been a considerable saving in the expenditure of the Salt Departments, and fair amounts in the other Revenue Departments. The Civil Departments shew the usual considerable savings in their Budget Estimates, but the amount has been more than swallowed up in the expenditure caused by Plague. The head "Medical" alone shews an excess over estimate of Rx. 327,800, most of which is in Bombay, and all of which for practical purposes falls on the Imperial Account, for the Provincial Governments are not able to bear the expenditure without assistance in the form of grants from Imperial.

"10. The Army expenditure in India (ordinary) is less by Rx. 84,300 than estimated in the Budget, and of the Budget provision of Rx. 1,458,000 in India for Warlike Operations only Rx. 1,023,700 has been spent, the Military authorities having, from the very beginning of the year, found it practicable to reduce the forces maintained on the North-West Frontier.

"Rate of Exchange.

"11. The rate of exchange taken for the purpose of the Budget Estimate last March was $15\frac{3}{8}$ pence (or rather £1 = R15·6), that being the rate actually realized in 1897-98. At the opening of the year 1898-99 the current rate was $15\frac{13}{16}$ or $15\frac{7}{8}$, but under the influence of a strong demand in April and May (in each of which months the Secretary of State sold two millions sterling of Council Bills) it quickly rose to 16 pence and over. This demand was due mainly to unusually large exports of Rice, Wheat, and Seeds, the figures of which for the five principal months of export are shown in the following table:—

Exports (Value in Rupees) of Rice and Wheat (including Flour) and Seeds by Sea from British India during February to June 1896, 1897, and 1898.

		February.	March.	April.	May.	June.
Rice	1896	2,30,79,157	2,35,35,019	1,28,19,258	87,78,324	1,05,82,552
	1897	2,05,74,378	2,26,73,146	85,42,095	74,73,502	72,22,085
	1898	2,11,33,697	2,39,73,430	1,74,35,984	1,39,93,271	1,00,28,152
Wheat	1896	13,68,050	14,41,371	20,32,888	27,38,742	21,72,359
	1897	3,28,052	1,83,882	3,47,801	5,03,124	6,14,133
	1898	9,99,271	55,10,941	1,09,23,719	2,85,78,798	2,28,64,833
Seeds	1896	68,45,149	96,72,087	1,08,31,633	1,27,32,470	1,10,86,314
	1897	25,08,515	30,02,053	43,92,610	1,09,06,210	85,56,518
	1898	58,76,128	74,23,872	88,45,785	1,25,27,552	1,16,97,108
Total all three.	1896	3,12,92,356	3,46,48,477	2,56,83,779	2,42,49,536	2,38,41,225
	1897	2,34,10,945	2,58,59,081	1,32,82,506	1,88,82,836	1,63,92,736
	1898	2,80,09,096	3,69,08,243	3,72,05,488	5,50,99,621	4,45,90,093

"12. The position thus gained at the beginning of the year has never been lost, and the rate has continually fluctuated about 16 pence, now a little over it and now a little under it. In the latter half of the year the rate has never been below $15\frac{15}{16}$ pence. The drawings have now for some time stood at Rx. 700,000 a week, and we expect when the year closes to have remitted by Council Bills £19,000,000 equal to Rx. 28,540,000, giving, as nearly as possible, an average rate of sixteen pence. The Revised Estimates for 1898-99 are accordingly made up at this rate.

"13. For next year I have made the modest estimate of $15\frac{3}{4}$*d.* I fully anticipate we shall realize, as this year, something closely approaching to 16 pence, but our continual practice in India is to avoid sanguine estimating, and following this principle I am loth to take a figure which may have the taint of being, under existing circumstances, the best possible.

"14. It may be noted that not only are the remittances of the current year the largest on record (there being hitherto only one year, 1881-82, in which they exceeded £18 millions), but we have in addition to these remittances received in India in exchange for silver at the rate of Rs. 15 per £ sterling, Rx. 2,616,400 of gold which we now hold as part of the currency reserve in addition to Rx. 255,400 similarly held on 1st April 1898.

"Budget Estimates, 1899-1900.

"15. The Budget Estimates of Revenue and Expenditure for the coming year 1899-1900 made up at this rate of exchange shew a surplus of Revenue of Rx. 3,932,600. It will be best perhaps to explain the figures by comparing them

with the Revised Estimate for the current year, as exhibited in the Statement in paragraph 5 above.

" **Budget Estimates of 1899-1900 compared with the Revised Estimates of 1898-99.**

(a) Including Interest and Receipts under Civil Works.

" 16. Under Revenue heads in India the collection of arrears of Land Revenue still goes on, but we do not expect next year quite so much as in the current year. Under Salt and Customs we expect a slight advance over the Budget Estimates of 1898-99, but have not estimated to receive so great an advance over these as we shall certainly receive in the current year. The current prices of Opium warrant our estimating for a considerable increase in the revenue under this head.

" 17. Under Railways the estimates are for a small advance in net earnings. The details are as follow :—

	Budget, 1898-99. Rx.	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
State Railways—Gross . .	19,382,600	19,695,800	20,237,100
Working Charges	9,770,500	9,876,600	10,047,000
Net . .	9,612,100	9,819,200	10,190,100
Guaranteed Railways—Net .	2,424,000	2,995,000	3,192,500
TOTAL NET .	12,036,100	12,814,200	13,382,600

"18. The Great Indian Peninsula Railway contributes Rx. 130,000, the Madras Railway Rx. 65,000, and the East Indian Railway Rx. 60,000 of the improvement shewn in Budget, and we expect the Eastern Bengal and Southern Mahratta Railways to recover from their low figures of 1898-99. The increasing mileage of the East Coast Railway will also bring in better returns; on the other hand, there are heavy renewals on the North-Western Railway to be provided for. Under Civil Departments we have to provide for considerable additions to Police expenditure (partly due to Plague); and we have also made fairly ample estimates for Plague expenditure, the charges under "Medical" in India being as follows:—

	Total.	Including Plague Expenditure.
	Rx.	Rx.
1894-95	1,003,438	...
1895-96	1,020,077	...
1896-97	1,065,158	19,000
1897-98	1,328,952	297,000
1898-99, Revised	1,542,900	508,900
1899-1900, Budget	1,678,100	354,200 + 209,500

" The last-mentioned Rx. 209,500 is shewn separately, because it is in the nature of a reserve in the "India" Section of the Accounts, and if actually spent, it will not pass under "Medical" in the Imperial Portion of the Accounts, but be dealt with as a transfer.

" 19. We have increased the total provision for Military Works to Rx. 1,322,300, against expenditure in 1897-98 and 1898-99 of about Rx. 1,168,385 and Rx. 1,197,600, the purpose of the increase being to meet charges likely to fall upon us in respect of places of defence and similar works on the North-West Frontier.

" 20. The Military Estimates shew large savings in India as compared with the current year, the India figures being—

	Ordinary Expenditure.	Warlike Operations.	Total.
	Rx.	Rx.	Rx.
1896-97	17,243,137	18,206	17,261,343
1897-98	16,514,547	3,847,992	20,362,539
1898-99, Budget	16,625,800	1,458,000	18,083,800
1898-99, Revised	16,541,500	1,023,700	17,565,200
1899-1900, Budget	16,873,400	38,900	16,912,300

"No Remission of Taxation.

" 21. In view of the surpluses as shewn in the Revised and Budget Estimates, the Government of India have carefully considered the question whether they should propose, at present, any remission of existing taxation. The conclusion to which they have come is that any such proposal would be premature, and this mainly on two grounds. The first is that we have, as it were, to make up for arrears. As stated in my opening paragraph, we have had in the past two years deficits aggregating Rx. 7,064,233, and we ought to regard ourselves as under an obligation to recover our position by accumulating counterbalancing surpluses. The second and weightier reason is that we have in contemplation, as is well known, certain extremely important measures of currency reform, which are under the consideration of a Committee sitting at the India Office in London. Whatever the advice of that Committee may be, we consider we are bound to prepare for any measures that may result from it by preserving as strong a financial position as possible, and we consider we would act unwisely if we were to reduce our financial strength by remitting existing taxation and run the risk of finding ourselves, by our own action, less free than we would otherwise be to undertake any measures of currency reform that may seem desirable.

"Railway Construction.

" 22. I have, in former Financial Statements, referred to the policy recently established of laying down a programme of Railway Construction for three years in advance. The first of these programmes was for the three years ending

31st March 1899. This programme was at first intended to include an expenditure of 27 crores of rupees, but was afterwards extended to 29⅝ crores. Latterly, however, financial difficulties have obliged us somewhat to curtail the expenditure, and we expect to expend against the programme of 29⅝ crores the following amounts :—

	Rx.
In 1896-97 (actuals)	8,658,800
„ 1897-98 („)	8,145,500
„ 1898-99 (Revised Estimate)	8,387,500
TOTAL .	25,191,800

"23. I leave to my Hon'ble Colleague Sir A. Trevor the task of stating in detail the results of the expenditure. It is sufficient here to set them out in the most general form (the figures of the Railways of Native States and of other Railways that lie outside our accounts being omitted) :—

	Standard Gauge.	Metre Gauge.	Special Gauges.	Total.
March 31, 1896—				
Mileage open	10,430	6,842	36	17,308
„ under construction .	1,490	1,086	...	2,576
TOTAL .	11,920	7,928	36	19,884
March 31, 1899—				
Mileage open	11,728	7,522	36	19,286
„ under construction .	814	971	77	1,862
TOTAL .	12,542	8,493	113	21,148

"24. I divide the Railway Construction in the present estimates, for convenience sake with reference to our accounts, into four categories, namely :—

First.—State Railway Construction; money found by Government, but also by debentures in the case of the East Indian and Assam-Bengal Railway Companies.

Second.—Construction by Assisted and Working Companies out of funds raised by them or in some cases advanced by Government to them. Also Branch Line Companies under a firm guarantee.

Third.—Open line capital and new construction by the old Guaranteed Companies.

Fourth.—Construction by Companies outside the accounts of the Government, and also construction by Branch Line Companies on rebate terms.

" The above classification slightly differs from that of last year's Statement, as under new arrangements every portion of the above comes within the programme, except the fourth category, *viz.*, Company construction outside the accounts of Government, and Branch Line Companies not under firm guarantee.

" 25. The Estimates of Capital construction for the two years 1898-99 and 1899-1900 now stand as follows, the figures for programme expenditure in the

Revised Estimate of 1898-99 being modified so as to correspond with the new classification :—

	Revised Estimate, 1898-99.	Budget Estimate, 1899-1900.
FIRST CATEGORY—STATE RAILWAYS—	Rx.	Rx.
Funds available by Famine Grant	695,400	490,000
Grant under—		
48.—State Railway Construction	2,882,200	3,465,000
East Indian Railway Company's Debentures	1,573,800	750,000
TOTAL	5,151,400	4,705,000
SECOND CATEGORY—ASSISTED COMPANIES	3,155,300	3,009,900
THIRD CATEGORY—OLD GUARANTEED COMPANIES	851,600	1,107,800
TOTAL "PROGRAMME"	9,158,300	8,822,700
Add—FOURTH CATEGORY (outside programme)	1,470,100	950,300
TOTAL	10,628,400	9,773,000

N.B.—The Chittagong Port Works, connected with the Assam-Bengal Railway, shown in last year's Statement as Miscellaneous Public Improvements, are now included as "Railway Construction."

"26. Having now carried to a fairly successful issue this policy of temporary activity in railway construction, we think it wise, both from a railway and from a financial point of view, to curtail for a time the rate of progress of railway construction. The nine or ten crores a year sanctioned in 1897 was not meant to be permanently adopted, and we deem it desirable now to allow a short time for the earning capacity of the lines recently constructed to develop itself, before again undertaking special burdens in the direction of capital outlay upon railways.

"27. For these reasons we deemed it advisable to fix about 20 crores as the limit of our expenditure for the next three years; and a programme was accordingly prepared for expenditure as follows:—

	Rx.
1899-1900	6,772,700
1900-1901	6,728,400
1901-1902	6,821,000
TOTAL	20,322,100

but we have had to alter these figures for the following reason. In the Budget Estimates of 1898-99, we proposed to spend under the first three years' programme a sum of Rx. 10,788,900 in the year 1898-99, but the inability of the workshops in England to meet the demands which were made upon them by ourselves and the various constructing companies has reduced the expenditure of 1898-99 to Rx. 8,387,500. Many of the orders, however, will be completed and paid for in 1899-1900, and we have therefore to provide, under the new three years' programme, in 1899-1900 not only the intended Rx. 6,772,700, but a considerable amount in addition, which may be regarded as arrears of the old programme handed on to the new one. The amount estimated for is therefore Rx. 8,822,700.

"28. The following are the entries under the first category (State Railways):—

	Revised, 1898-99.	Budget, 1899-1900.
Expenditure by State Agency—		
Open lines—	Rx.	Rx.
North Western	228,300	212,300
Oudh and Rohilkhand	95,700	72,800
Eastern Bengal	150,500	257,200
East Coast	60,000	40,000
Warora Colliery	—6,300	—2,100
Umaria Colliery	—7,100	—100,000
Stores transactions	—15,800	—7,500
TOTAL	505,300	472,700

	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
Lines under construction—		
Rae Bareli-Benares	54,400	4,000
Bhatinda-Ferozepur Conversion	64,700	...
Mari-Attock	142,500	25,000
Jullundur-Hoshiarpur—(Land)	—100	...
Ghaziabad-Moradabad	238,000	332,600

TOTAL	1,419,300	1,706,000
Lines under construction—		
Assam-Bengal — Land, Part I	22,000	20,000
Assam-Bengal — Construction, Part II	1,134,400	762,000
Assam-Bengal — Chittagong Jetties	46,000	18,000
Hajipur-Katihar Extension	250,000	200,000
Madura-Paumben	...	100,000
Tinnevelly-Quilon	...	70,000
TOTAL	1,452,400	1,170,000
Lump deduction on account of probable lapse	250,000	...
Reserve	...	162,600
TOTAL FROM IMPERIAL FUNDS	5,151,400	4,705,000

"29. The items in the second category (Assisted Companies) are:—

	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
Bengal-Nagpur	1,861,000	1,770,000
Indian Midland	203,000	165,000
Burma Railways	700,000	800,000
Bengal Central	78,100	40,000
Lucknow-Bareilly	15,300	6,900
Southern Mahratta	44,900	40,000
Mysore	35,000	20,000
Hardwar-Dehra	150,000	88,000
Brahmaputra-Sultanpur	68,000	80,000
TOTAL	3,155,300	3,009,900

"30. The estimate under the third category (old Guaranteed Companies) provides for :—

	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
Open Line Capital—		
Great Indian Peninsula	73,600	74,000
Madras	20,100	60,000
Bombay, Baroda and Central India	459,100	410,000
Extensions—		
Calicut-Cannanore	70,600	200,400
Amalner Palgaon-Chalisgaon Dhulia	228,200	363,400
TOTAL	851,600	1,107,800

"31. The principal projects classed under the fourth category and outside the "programme" are :—

	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
Bengal Dooars Extensions	40,000	200,000
Bengal and North-Western Railway Extensions	445,000	365,000
Tapti Valley	650,000	230,000
South Behar	204,000	77,500
Smaller Branch Lines	131,100	77,800
TOTAL	1,470,100	950,300

"Capital Expenditure on Irrigation.

"32. The amount of Rx. 750,000 has hitherto been provided for expenditure on Irrigation. In 1899-1900 a further amount of Rx. 100,000 is provided under this head. The grant for 1898-99 which was of the usual amount, Rx. 750,000, has not been fully worked up to, owing chiefly to the approaching completion of the Chenab Canal and partly to it not having been found possible to start work on the Jhelum Canal in the early part of the year.

"33. The principal works under this head are at present :—

	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
Mandalay Canal	90,000	100,000
Fatehpur Branch of the Lower Ganges Canal	63,600	42,600
Chenab Canal	151,500	80,000
Jhelum Canal	36,200	210,000
Jamrao Canal	142,200	133,900
Other Projects	208,700	283,500
TOTAL	692,200	850,000

"Remittance and Debt.

"34. The following account shews in a shortened form the requirements of the Secretary of State; the figures are drawn up so as to shew separately the trans-

actions on account of Government, and the transactions arising out of the operations of Railway Companies:—

	Revised, 1898-99.	Budget, 1899-1900.
Requirements on Government Account—	£	£
Excess of expenditure on Revenue Account	16,091,200	16,324,500
Expenditure not charged to Revenue .	791,100	682,100
Net payments on Remittance Accounts, etc	225,400	268,800
Total Requirements	17,107,700	17,275,400
Transactions of Railway Companies—		
Net receipts on account of Capital . .	2,183,100	1,970,000
Payments for Stores, etc.	2,718,000	3,181,700
Net Outgoings .	534,900	1,211,700
Net Funds required .	17,642,600	18,487,100

"35. The following figures shew the manner in which the above requirements have been or are to be financed:—

	Revised. 1898-99.	Budget, 1899-1900.
	£	£
By Council Bills (net Remittance) . .	19,000,000	17,000,000
By addition to Permanent Debt . .	1,912,800	...
Less reduction of Temporary Debt . .	—1,500,000	...
By reduction of Cash Balance . .	...	1,487,100
Deduct—Addition to Cash Balance .	—1,770,200	...
	17,642,600	18,487,100

"36. In last year's Financial Statement I mentioned that the Secretary of State intended, besides renewing £6,000,000 outstanding temporary debt, to raise £6,000,000 permanent debt. This amount was raised in July in the form of India 2½ per cent stock, but it was issued at a considerable discount (namely at a rate of £88 10*s.* 5*d.* per cent), and produced only £5,297,700 in cash. With the money he discharged permanent debt to the extent of £3,384,900, so that the net amount raised by addition to sterling debt was £1,912,800. The Secretary of State has decided that the discount on the loan, *viz.*, £702,300, shall not be charged upon the revenues of the year, but shall be discharged by a Sinking Fund at the rate of interest borne by the loan, *viz.*, 2½ per cent, lasting over 50 years. There are already one or two Sinking Funds of the kind in connection with the sterling debt; £12,622 being the total charge appearing in the Accounts of 1897-98. The amount added by the new Sinking Fund is about £7,000.

"37. The heavy drawings of the year, by Council Bills, enabled the Secretary of State to improve upon his intention of renewing the £6,000,000 outstanding temporary debt, and he renewed only £4,500,000 of it. The remainder of the excess of drawings went towards increase of the Cash Balance, which is estimated to stand, on 31st March 1899 at the unusually high figure of £4,304,400.

"38. For next year, 1899-1900, the Secretary of State estimates to draw £17,000,000 by Council Bills, and though he does not estimate for any increase or decrease in either permanent or temporary debt, he considers that in view of the high balances which his Estimates, both Revised and Budget, show, he may find it possible to pay off some of the outstanding temporary debt.

"39. In March last we estimated that we would have to raise a rupee loan of Rx. 3,000,000 in India, but as the time approached for our doing so, we found both that improved revenues had added to our resources, and the market was not favourable for so large a loan. We therefore limited our proposed loan to an amount of Rx. 1,200,000 under 3½ per cent conditions, and this amount was

raised on August 24th at an average rate of R94 12½ annas per cent. The price remained about this figure for some months, but has recently advanced to over par.

"40. We reckon that in India we shall be able next year to meet all the demands upon our Treasuries without raising any new debt, but it must be understood that all these announcements about the amount of contemplated remittances and loans are subject to the usual reservation of entire liberty to the Secretary of State to alter his plans as he may find occasion.

" PROVINCIAL FINANCE, 1892 to 1899.

(The tabulated figures in this part are hundreds of Rx., that is, two ciphers are omitted.)

" 41. The progress of Provincial Finance is easiest studied by considering separately :—

First.—The amount of net Revenue, of which a definite portion settled by the terms of the "Contract" is at the disposal of the Provincial Government for its expenditure on Civil Administration.

Second.—The modification of this Provincial share of net Revenue, caused by special arrangements, different in each Province, in connexion with certain portions of Irrigation and Railway Administration, involving in some cases a small net outlay and in some a small net revenue.

Third.—The appropriation of the funds thus obtained towards the Provincial Expenditure, and especially the relation between the increase of expenditure and the increase of available funds.

"42. The first figures to be set out are, therefore, the totals of the net revenues, that is, the revenues less expenditure directly charged against them. They are as follow, the figures being quite independent of any considerations as between Imperial and Provincial :—

" *Total Ordinary Revenues*—

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.
Central Provinces .	1,248,6	1,244,0	1,231,2	1,171,3	1,252,9	1,089,5	1,048,5	1,322,9	1,398,7
Burma (*a*) . .	3,643,3	...	...	...	...	...	3,948,2	4,147,0	4,012,8
Assam . . .	814,0	842,9	962,5	992,1	1,003,4	1,015,3	995,8	1,047,3	1,047,3
Bengal . . .	7,081,6	7,325,2	7,445,8	7,606,9	7,714,8	7,823,5	7,835,9	7,998,8	8,058,9
North-Western Provinces and Oudh .	7,677,8	7,716,1	7,778,9	7,589,1	7,866,2	6,655,6	7,264,8	8,419,1	8,470,1
Punjab . . .	3,060,1	3,133,8	3,261,1	3,223,5	3,290,5	3,224,3	3,409,8	3,561,8	3,530,4
Madras . .	6,817,1	7,106,2	7,469,2	7,645,6	7,719,3	7,478,8	7,863,2	8,015,5	7,988,0
Bombay (*b*) . .	5,412,1	5,489,1	5,646,1	5,550,6	6,018,2	5,367,0	5,625,2	5,950,2	5,943,0

(*a*) The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.
(*b*) The figures relating to alienated Land Revenue, an entry peculiar to Bombay, are omitted from both sides.

"43. The next statement shews the portion of these revenues which, according to the Provincial contract in each case, is credited to Provincial Account. The figures stand as follows, and it may be noted that the revision of the contract made with effect from 1897-98 onward, was such as to cause little change in the total of the Provincial share, except in the two Provinces of Bengal and Madras where it was reduced by Rx. 90,000 and Rx. 130,000 respectively, and in the North-Western Provinces where it was increased by about Rx. 120,000, namely, the cessation of a temporary reduction of Rx. 50,000, and a direct addition of about Rx. 70,000. (The figures are as they stand before the addition of the contributions from Imperial entered at the end of the table in paragraph 47 and

the special grants-in-aid and expenditure therefrom of which mention is made in paragraphs 65 and 66 below) :—

" *Provincial Share of Revenues—*

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.
Central Provinces .	653,3	652,5	647,2	623,9	649,6	598,9	566,1	713,1	750,8
Burma (*a*) . .	2,604,1	...	...	...	...	...	2,768,5	2,891,8	2,822,5
Assam . . .	477,1	500,3	549,7	556,4	566,9	575,9	564,3	626,0	626,3
Bengal . . .	2,767,1	2,899,4	2,941,4	3,049,2	3,102,6	3,160,9	3,552,1	3,517,5	3,549,3
North-Western Provinces and Oudh . .	2,235,8	2,254,4	2,284,9	2,218,7	2,309,8	1,959,7	2,101,5	2,719,2	2,729,1
Punjab . . .	1,382,6	1,414,0	1,451,2	1,449,0	1,476,8	1,483,5	1,571,3	1,631,2	1,611,6
Madras . .	2,368,7	2,491,0	2,587,9	2,653,5	2,676,7	2,627,1	2,588,5	2,655,7	2,632,4
Bombay . .	2,404,4	2,451,5	2,490,8	2,481,2	2,601,2	2,405,4	2,475,9	2,554,9	2,569,7

(*a*) The figure against Burma in the column " Contract, 1892 " represents the Contract of 1897.

" 44. I offer some comments on these two statements, shewing them in parallel columns :—

	Total Imperial *plus* Provincial.	Provincial Share only.
Central Provinces.	Fairly continuous progress—a small drop in 1894-95 due, as the details shew, to failure of Land Revenue—Recovery in 1895-96. Then a serious loss of Revenue in the two famine years 1896-97 and 1897-98. But complete recovery in the early future is anticipated.	The Province obtained in the earlier years little or no margin of revenue beyond that allowed for in the Contract of 1892, and in the famine years there was very great loss as compared with that standard. If the anticipations for 1898-99 and 1899-1900 are realized, it will be very fairly off.
Burma .	No figures are here shewn for the years preceding 1897-98, the accounts having been completely changed in that year by the incorporation of Upper and Lower Burma as a single Province of account. The revenue is considerably in excess of that which was taken as the standard for the framing of the Provincial Contract of 1897. The falling-off in 1899-1900 is under "Forests," and may perhaps be due only to cautious estimating.	Revenue considerably in excess of the standard taken for the contract.
Assam .	Revenue steadily progressive. The effect of the earthquake in 1897-98 is shewn only in a slight slackening of the rate of progress.	Has all along enjoyed a considerable excess of revenue—at present nearly 30 per cent (Rx. 170 to 190 thousands) over the contract figure of 1892. But of this amount Rx. 33,000 represent a special addition made to meet the South Lushai expenditure transferred to Assam.

	Total Imperial *plus* Provincial.	Provincial Share only.
Bengal .	Also shews a steady progressive revenue. Owing presumably to the famine the progress from 1896-97 to 1897-98 was rather less than in other years. The falling-off was mainly under "Excise," as Land Revenue in Bengal is little subject to variation in consequence of famine.	The accounts of the Province were greatly affected by the withdrawal from the Province in 1897 of the extremely progressive revenue of the Eastern Bengal Railway the share of Revenue substituted therefor not being so progressive. Combining the ordinary revenue and the Railway account the figures stand thus:— Standard of 1892 . . . 2,806,3 1892-93 . . . . 2,962,4 1893-94 . . . . 3,011,0 1894-95 . . . . 3,193,2 1895-96 . . . . 3,235,7 1896-97 . . . . 3,328,0 1897-98 . . . . 3,297,8 1898-99 . . . . 3,238,7 1899-1900 . . . 3,267,0 which certainly may be called fairly progressive, the figures of the last two years being due in part, it may be hoped, to caution in estimating. The new contract, commencing from 1897-98, involved a reduction of about Rx. 90,000 in the Provincial share.
North-Western Provinces.	A fairly progressive revenue till the famine year, then a tremendous falling-off in Land Revenue (1896-97). Partial recovery in 1897-98 and in the following two years very high figures due to recovery of famine arrears.	The unequal operation of the Irrigation account and the change effected in it in 1897 renders it necessary to combine the figures for this Province as in the case of Bengal. They stand thus— Standard of 1892 . . . 2,215,4 1892-93 . . . . 2,265,2 1893-94 . . . . 2,314,5 1894-95 . . . . 2,234,1 1895-96 . . . . 2,170,3 1896-97 . . . . 2,160,2 1897-98 . . . . 2,432,4 1898-99 . . . . 2,641,5 1899-1900 . . . 2,632,2 The story of these figures is shortly this,—At first a little improvement over the standard taken for settlement. In 1895-96 a failure of irrigation revenue, 1896-97 famine, and consequent failure of revenue. Thereafter the rapid recovery of the Province and the realizations of famine arrears of revenue bring in ample resources. The new contract, commencing from 1897-98, increased the assets by about Rx. 120,000.
Punjab .	Steady progress as reckoned over the whole period, but a slight set back in the famine year.	The same as in the other column.
Madras .	Shews a very progressive Revenue, the advance being only temporarily interrupted by famine.	Rapid increase of revenue up till the famine year—from that time figure fairly steady, but not advancing. The Provincial share from 1897-98 onwards would stand about Rx. 130,000 higher but for the revision of contract which came into operation from that year.

	Total Imperial *plus* Provincial.	Provincial Share only.
Bombay .	An increase up to the famine year, then a considerable set back which has not yet been fully recovered.	The same remark as the first one in the case of Madras.

"45. The sets of figures which I next shew are those relating to the Irrigation and Railway portion of the Provincial contracts, which I have described as coming in in modification of the amount of ordinary revenue otherwise at the disposal of the several Governments. The amount of modification thus imposed has, except in two cases, only slightly changed during the period under review, and the figures are, therefore, of no great importance except in the cases referred to, namely, Bengal and the North-Western Provinces, and these have been dealt with above:—

* The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

"48. *Central Provinces.*—The expenditure up to the famine year rose 2 or 3 lakhs (Rx. 20,000 or 30,000) above the standard of 1892; and since, as already observed, there was no margin of revenue, this resulted in the exhaustion of the ample balance, Rx. 205,400 with which the Province started. The strain of the famine year reduced the balance (apart from direct famine expenditure) still further to a deficit of Rx. 52,600 in 1896-97, and a further deficit of Rx. 204,100 in 1897-98, both of which were made up by grants from the Imperial Exchequer. The Province started in 1898-99 without any balance at all, and it is now expected that there will be a deficit in the year of Rx. 11,200, which must again be made up by a grant from Imperial Revenues. In 1899-1990 its estimated expenditure is well within its means.

"The Province has taken practically no share of the cost of famine, which has been entirely Imperial—Rx. 1,640,245.

"49. *Burma.*—Has not spent up to the rate of its increase of revenue, and has in consequence an ample and increasing balance. It is arranging now to expend part of the amount in meeting certain demands for Provincial Public Works, and has also made other proposals for expenditure on the public services.

"50. *Assam.*—Had a comfortable balance, all along, of 10 lakhs (Rx. 100,000) more or less, keeping its increase of expenditure well up to, but not in excess of, its increase of revenue. The repair of earthquake damages imposed heavy charges in 1897-98 and 1898-99, which have largely exhausted the Provincial balance of Rx. 94,400 and absorbed also a grant of Rx. 160,000 by the Government of India; the balance being reduced for 31st March 1899 to about Rx. 25,000. In 1899-1900, after providing for absolutely necessary expenditure for Public Works and for the repair of earthquake damages, the estimates shew a deficit of Rx. 54,900.

"The expansion of ordinary expenditure has been very considerable during the period under review.

"51. *Bengal.*—The revenue of this Province, as above shewn, has afforded a margin for expansion of Provincial expenditure—namely, Rx. 2,806,300 in 1892 to (say) Rx. 3,300,000 in 1899-1900. The expenditure, however, was kept well in hand, so that the balance increased from Rx. 225,500 in March 1893 to Rx. 582,000 in March 1896. But this high balance sank to Rx. 92,200 two years later, as Rx. 518,400 out of it were spent in direct famine and plague charges. The ordinary expenditure in the two years now under estimate is taken at Rx. 3,141,600 and Rx. 3,272,000, which may be regarded as within the means of the Province, though it leaves a small deficit on the estimates of 1899-1900.

"The Imperial Exchequer incurred famine charges in Bengal up to a total of Rx. 576,821 (about half of the total), but did not otherwise contribute by grants-in-aid to the resources of the Province.

"The Province of Bengal has not had much plague expenditure to bear out of its own account, but we have made to it in 1898-99 a grant-in-aid of Rx. 20,000 which it will distribute to those Municipalities and Local Bodies whose funds have been most severely affected by expenditure on plague.

"52. *North-Western-Provinces.*—The Province had the advantage of starting in 1892 with a large balance still remaining on the credit side, but the rate of its annual expenditure was in excess of its annual revenue (having been found by reduction of balances), and when in the year before the famine a very favourable monsoon caused a failure of irrigation revenue (an important item in North-Western Provinces finance), the Province found its balance on March 31, 1896, reduced below the stipulated minimum of 20 lakhs (Rx. 200,000), and, as already said, a rate of current expenditure in excess of its current revenue by between 10 and 15 lakhs. During the strain of the famine year nothing could be done to amend this state of things, and the balance was overspent by Rx. 263,600, the amount being accordingly made up by grants-in-aid out of the Imperial Exchequer in the two years 1896-97 and 1897-98.

"Under these circumstances, the Province contributed nothing towards the direct famine expenditure, the whole of which, Rx. 2,064,025, was found out of Imperial resources.

"For 1898-99 it stands, as explained, without any balance to its credit, and its estimates stand as follows:—

	1898-99. Rx.	1899-1900. Rx.
Revenue Accounts	2,641,500	2,632,200
Expenditure Accounts	2,421,500 (*a*)	2,607,700 (*b*)
Results	+ 220,000	+ 24,500

(*a*) Includes Rx. 19,800, Plague. (*b*) Includes Rx. 20,800, Plague.

"The handsome surplus which comes in in 1898-99 is due to the recovery by the North-Western Provinces of the arrears of the revenue due in 1896-97 and 1897-98, in compensation for the loss of which Imperial made the grants-in-aid of Rx. 263,600 above alluded to. In the coming year, 1899-1900, the Govern-

ment, North-Western Provinces, propose to increase their scale of expenditure all round to a rate which they will not be able to maintain after the arrear collections (which add some lakhs to the present scale of revenue) are exhausted and the revenue falls back to its ordinary amount.

"In anticipation of this surplus of 1898-99 and 1899-1900 it was stipulated that the benefit of these arrear collections was (*quoad* the Provincial share) to be considered as not applicable to current expenditure, but to be reserved (to the extent of 75 per cent of it) for building up the exhausted Provincial balance. The Government, North-Western Provinces, have fulfilled this pledge, and are now appropriating these arrears to a temporary increase of expenditure bearing in mind the impending diminution in the amount of their annual income as compared with the figures of 1898-99 and 1899-1900.

"53. *Punjab.*—The Province has all along proceeded on fairly prosperous lines. The balances which were continually diminishing before the famine year are now on the rise, and the expenditure is within the amount of revenue available. The Province escaped any severe share in the calamities of 1896 and 1897, and the Imperial expenditure on famine was less than 3 lakhs (Rx. 30,000), the Province itself contributing about 12 lakhs (Rx. 120,000) or, including "Local," nearly 16.

"54. *Madras.*—The expanding revenues of this Province have carried it through its period of disaster. It contributed moderately, that is, a total of a little over 20 lakhs (Rx. 200,000), towards its famine expenditure, the Government of India having undertaken all the rest (*viz.*, Rx. 732,995) so as to leave the Province with an opening balance of Rx. 71,800 in 1898-99. The Government of India further propose to make a grant to Madras of the amount of direct famine and plague expenditure incurred by it in 1898-99, namely, Rx. 20,700, and to estimate for next year a similar grant of Rx. 64,100. They also grant a further sum of Rx. 30,000 in 1898-99, placing the amount at the disposal of the Local Government for grants-in-aid to such Municipalities and Local Bodies as have been most affected by plague expenditure. With its famine and plague expenditure thus made up the Province shows a fair surplus on its transactions of 1898-99, and a small deficit in 1899-1900.

"The detailed figures are:—

	1898-99. Rx.	1899-1900. Rx.
Revenue Accounts	2,655,700	2,632,400
Deduct—Railway and Irrigation Account	310,900	313,900
Net available Revenue	2,344,800	2,318,500
Proposed Expenditure, excluding Plague and Famine	2,266,300	2,331,200
Plague and Famine	20,700	64,100
TOTAL	2,287,000	2,395,300

"55. *Bombay.*—The continuous advance of the expenditure of the Province while the advance of the revenue was entirely set back by the famine year, has brought a strain upon the finances, irrespective of the direct effect of famine and plague expenditure. The figures may be set out as follows:—

	Revenue Account as modified by Irrigation and Railway figures. Rx.	Ordinary Expenditure Account. Rx.	Excess of Expenditure. Rx.	
1892 standard	2,409,500	2,409,500		
1892-93	2,410,100	2,434,000 }		
1893-94	2,475,200	2,455,700 }	6,200	
1894-95	2,480,000	2,526,500 }		
1895-96	2,604,900	2,560,200 }		
1896-97	2,403,200	2,588,900	185,700	
1897-98	2,483,600	2,605,400	121,800	
1898-99	2,560,800	2,534,600	26,200	(Excess of Revenue.)
1899-1900	2,578,400	2,604,700	26,300	(Excess of Expenditure.)

"The above figures exclude all direct Famine and Plague expenditure, and shew that the revenue and expenditure were in equilibrium for the first four years of the period under review, but that in the next two (the years of calamity), by reason of the falling-off in revenue, without an intermission of the increase in expenditure, the Provincial balance had to bear a reduction of Rx. 307,500.

"The actual condition of the account till the end of 1897-98 was as follows:—

		Rx.
Balance, March 31, 1892		407,000
Reduced by excess of ordinary expenditure—	Rx.	
1892-93 to 1895-96	6,200	
1896-97	185,700	
1897-98	121,800	
		313,700
		93,300
Further reduction by direct famine and plague expenditure not included in the above—		
1896-97	35,400	
1897-98	191,500	
		226,900
Net over-expenditure of balance till 31st March 1898 .		133,600
Cancelled by general grant-in-aid in 1897-98 of . . .		183,600
Leaving credit balance on 31st March 1898 of . .		50,000

"The Revised Estimates for Bombay for 1898-99 show:—

Revenues Account	2,554,900	Surplus on ordinary account Rx. 26,200.
Irrigation and Railway Account . . .	+5,900	
Expenditure Account, excluding Plague and Famine	2,534,600	
Plague and Famine Expenditure . . .	354,800	

"56. Putting the figures of the various provinces together, the following shews the facts up to March 31, 1898:—

Statement in Rx.	Famine and Plague Expenditure (direct). From Imperial sources.	From Provincial and Local sources.	Grants-in-aid by Imperial to Provincial.
Central Provinces	1,640,245	8,820	256,700
Burma	54,975	63,336	...
Assam	...	...	80,000 (a)
Bengal	576,821	553,951	...
North-Western Provinces . .	2,064,025	...	263,600
Punjab	27,502	157,920	...
Madras	732,995	228,601	...
Bombay	1,242,760	27,887	183,600

(a) For earthquake.

"57. The Government of Bombay, both in respect of its Provincial account and in respect of its Municipalities, have been very hardly pressed by plague expenditure. They have submitted to us an examination of the financial condition of their principal Municipalities, and we have agreed to their giving out of their general revenues relief to their Municipalities to the extent of Rx. 228,078, of which the greater part goes to the City Corporation. Including this grant from

their revenues, the Government of Bombay will have spent in direct charges of famine and plague—

	Famine. Rx.	Plague. Rx.	TOTAL. Rx.
1896-97	24,000	11,400	35,400
1897-98	...	191,500	191,500
1898-99	24,800	330,000	354,800
TOTAL .			581,700

"Out of the expenditure of the first two years, aggregating Rx. 226,900, the Provincial Government have met out of their ordinary revenues Rx. 43,300, and the balance Rx. 183,600 has been made up by special contributions by Imperial; in the same way its balance of Rx. 50,000, and Rx. 26,200, its surplus of 1898-99, fall far short of the charges Rx. 354,800 of 1898-99, and it is necessary for the Imperial Government to make a further grant-in-aid of Rx. 278,600 leaving the province, on April 1899, with an opening balance of *nil*. The total direct expenditure on plague and famine which has been borne by the province comes to Rx. 43,300 in the first two years and Rx. 76,200 in the last, or Rx. 119,500 in all.

"It is anticipated that Rx. 126,400 of Plague expenditure will be incurred in Bombay in 1899-1900, and an equal amount of grant-in-aid from Imperial to Provincial has been estimated for in that year.

"58. The grants shewn in the above paragraphs may be regarded as grants in the ordinary way of business, that is, grants made on the principle that in any case of extreme calamity, when Local aid has been exhausted, the charge must fall, as far as possible, on Provincial resources, and when they are exhausted the Imperial Government must bear the burden; and I think a liberal interpretation has been given to this Imperial responsibility, for we have taken over the direct Provincial expenditure on famine and plague of the two Provinces most affected by plague, without insisting upon their first defraying any part of it out of their own balances, and it is our desire at present to go still farther. On one or two past occasions, when Imperial finances have been subjected to great stress, we have called upon the Provincial Governments to give us aid out of their resources, and under present circumstances, when Imperial finance by the recovery of exchange and from other causes is prosperous, and Provincial finance has been sore smitten by the consequences of famine and plague, we consider that a portion of our surplus cannot be better employed than in restoring the financial condition of the various provinces and relieving them from the financial difficulties which accompany the emergence from a state of famine and plague, so as to enable them to carry on their ordinary administration and meet their ordinary administrative necessities.

"59. In the case of Bombay, though, as above described, we have made large grants towards the direct expenditure on famine and plague, yet the effect of these two calamities is still shewn in the falling-off in revenue and in indirect expenditure (on police and the like) which accompanies plague measures. We propose on these considerations to make to Bombay a grant of Rx. 150,000.

"60. Bengal has not been affected by plague expenditure to anything like the same extent as Bombay; but, on the other hand, its finances have suffered from the very large extent to which the famine expenditure was met from Provincial and Local resources. We propose to make to it a similar grant of Rx. 150,000. This is in addition to the assistance already undertaken to be given from Imperial sources towards the European General Hospital at Calcutta, and also in addition to Rx. 20,000 mentioned in paragraph 51.

"61. In Assam the only immediate difficulties arise in connection with earthquake damages. Towards this we have already given Rx. 160,000, and the Chief Commissioner has asked for Rx. 67,500 more. We propose now to close this account by a grant of Rx. 100,000.

"62. The accounts of the Central Provinces are weighted only in respect of the very small balance it at present possesses, and the Estimates of 1898-99, as

already stated, produces a deficit of Rx. 11,200; we propose to make it a grant of Rx. 50,000.

"63. The claim of Madras arises mainly in respect of the fact that, at the last revision of the Provincial contracts, a larger resumption of revenue was made from it than from any other province. We propose to make a grant to it of Rx. 100,000, besides the above mentioned grants for the Famine and Plague expenditure, namely, Rx. 50,700 in 1898-99 and Rx. 64,100 in 1899-1900.

"64. Burma in our opinion requires no assistance, nor, if we make a strict reckoning, do the North-Western Provinces or the Punjab. But the expenditure in these two provinces has been limited by the consideration of their general financial position, and they have also had to bear some expenditure, both direct and indirect, upon plague. We propose to give to the former a grant of Rx. 100,000, and to the latter a grant of Rx. 50,000.

"65. All these amounts will be granted in the accounts of the year 1898-99, and the same amount (less the excess expenditure in the Central Provinces, Assam, Bengal, Madras, and Bombay already provided for by the Provincial Governments in their estimates) will be entered in the Estimates of 1899-1900 as expenditure out of Provincial balances under the head of Civil Works,—not as an invitation to the several Local Governments to expend the amounts in that year, but as a permission to them to do so (by re-appropriation or otherwise), if on a consideration of their general financial position and of the necessity of keeping a balance in hand, they deem it advisable. The amounts thus entered include in the case of Bengal and Madras the payments they may make against the grants of Rx. 20,000 and Rx. 30,000 referred to in paragraphs 51 and 54. The Provincial Governments should, however, bear in mind that the grants now made are grants made once for all, and that it will be dangerous for them to take them as warranting any expenditure of a recurring character; also that the Government of India in making the grants admits against itself no liability to make good to Provincial Governments the loss or expenditure incurred by them in respect of the kinds of expenditure to which it has had regard in assessing the distribution of the grants; but admits merely that as in times of Provincial financial prosperity it has called upon the provinces to come to the aid of the general exchequer, so in times of Imperial financial prosperity it is reasonable and expedient that it should depart from a strict interpretation of its financial relations to the Provincial Governments and aid them when at the same time they have had, and have, special financial misfortunes pressing on them. Perhaps I may refer in this connexion to paragraphs 127, 128 and 129 of Major Baring's (Lord Cromer's) financial statement of 1883.

"66. These several free grants, as they may be called, are specially entered in the figures attached to the Financial Statement and are in addition to those entered at the end of the statement in paragraph 47. They are:—

	Rx.
Central Provinces	50,000
Assam	100,000
Bengal	150,000
North-Western Provinces	100,000
Punjab	50,000
Madras	100,000
Bombay	150,000
TOTAL	700,000

"67. We have made fairly ample provision next year, namely, Rx. 126,400 in connection with the estimates of Bombay, Rx. 64,100 in Madras, and Rx. 209,500 not yet appropriated, for expenditure on combating the plague, which we may not unlikely have to meet in the future out of Imperial resources as we have done in the past. But we are not prepared, in a general way, to pay, out of Imperial resources, all the direct expenditure which the plague may cause, or to

relieve Municipalities and other Local Bodies from the burden which necessarily falls upon them in respect of sanitary and medical expenditure caused by the approach or the advent of plague. Still less can we undertake to make up to Provincial Governments the excess expenditure which may have to be incurred under Police or in the other ordinary departments of Provincial Administration, or invite them to deal with ordinary administrative demands upon them with the same freedom which might be possible and even advisable, were we not all in the presence of a threatening calamity that necessitates our husbanding our resources as far as is possible.

" TWENTY YEARS' FINANCE.

"68. Following up a purpose which I set before myself in last year's Financial Statement, I published, contemporaneously with the Finance and Revenue Accounts of last year, a summary of these accounts for the twenty years ending March 31, 1898. The summary was necessarily a statement of figures only, with no attempt at criticism, and I desire here to give some continuous account of the results which the figures shew, and explain where our Revenue and Expenditure have during these twenty years increased or decreased. The plan I adopt is to take one set of figures as the standard of the Revenue and Expenditure at the beginning of the period (or rather, say, for the year 1879), and another set as representing the standard for 1896 (that is, before the famine burst on the land). These seventeen years may be taken as a period of practically continuous financial history.

"69. For the first of these two standards I take the average of the figures of 1878-79 and 1879-80. If we eliminate the war figures of these two years, which in a comparison such as the present ought to be excluded, we obtain the following figures:—

		1878-79. Rx.	1879-80. Rx.
Surplus or Deficit . . .		+ 2,134,098	− 1,227,893
War Expenditure, India . .		600,109	4,591,644
" England . .	£	76,110	174,480
Surplus if war be excluded . .		2,810,317	3,538,231

But we have still further to modify these figures by reason of the fact that they did not provide for the full famine liability of Rx. 1,500,000, the Famine Insurance being at the time in suspense, owing to the heavy war expenditure. This consideration adds Rx. 1,187,177 and Rx. 1,396,353 to the expenditure and reduces the surpluses to Rx. 1,623,140 and Rx. 2,141,878; or an average of Rx. 1,882,509.

" That is, if we exclude consideration of war expenditure, and if we take Rx. 1,500,000 as the proper annual measure of famine liabilities, we had in 1879 a surplus of revenue of Rx. 1,882,500.

" 70. To find the similar figure for 1896, I take the figures of the Budget of that year which may be taken as expressing the standard of Revenue and Expenditure at the time. They are as follows, namely:—

		Rx.
Revenue in India (Budget)		97,316,800
Expenditure, England, net (Budget)	£	15,735,300
Exchange (according to rate actually realized) .		10,222,300
India (Budget), less Rx. 20,000 war . .		69,368,500
Add—Amount wanting to make up Rx. 1,500,000 Famine Insurance . .		500,000
Total . . .		95,826,100
Surplus of Revenue		1,490,700

"71. We have therefore, comparing the standard of 1879 with that of 1896, a slightly worse position in the latter of the two years. I have made a careful analysis both of the increase of Revenue and of the increase of Expenditure between the two years, and I find it to be as follows:—

"Imperial Account.

	Rx.	Rx.	Rx.
Increase of Revenue under Salt, Customs, Tributes and Miscellaneous	...	3,810,000	
Imperial Share of Increase of Revenue under Revenues provincially administered	...	5,429,400	
Increase of net Revenues under Post Office, Telegraph, and Mint . .	...	457,400	
Improvements under Debt Services, Railways, and Irrigation (excluding consideration of exchange) . .	6,327,500		
Deduct—Loss by exchange charged against Railway Liabilities . .	2,608,300		
		3,719,200	
Famine Insurance reduced in account by transfer to the preceding head of charges for interest on Indian Midland and Bengal-Nagpur Railways .	...	401,500	
Cessation of Railway Construction out of Revenue	...	845,800	
Total available Improvement .	...	...	14,663,300
Absorbed as follows:—	Rx.	Rx.	Rx.
Deterioration of Opium Revenue .	...	3,679,800	
Addition to charges for exchange. (Rate diminished from 19·85 pence to 14·45 pence)	7,337,300		
Deduct—Amount taken to Railway Account	2,608,300		
		4,729,000	
Deficit on Civil Administration of Upper Burma	...	455,300	
Army Services: net Charges increased from Rx. 16,693,700 to Rx. 22,167,800 (irrespective of exchange)	...	5,474,100	
Charges under "Political" increased from Rx. 427,100 to Rx. 898,700 .	...	471,600	
Civil and Miscellaneous charges in India increased from Rx. 1,189,200 to Rx. 1,541,300	352,100		
Less—Savings by decrease under Assignments and Territorial Pensions and Stationery . . .	223,800		
		128,300	
Sterling Expenditure other than Army, Debt Services, and Railways increased (excluding exchange) from £2,486,400 to £2,920,200 . .	...	433,800	
Total .	...	...	15,371,900
Excess of demand over available means	...	...	708,600

"Provincial Account.

Increase of Provincial share of Revenue under Revenues provincially administered (*a*)	...	4,102,700	
Increase in net charges for Provincial Civil Administration from Rx. 14,374,900 to Rx. 18,160,800	...	3,785,900	
Balance of increase of Revenue not absorbed	...	...	316,800

(*a*) That is, ½ of Land Revenue and of Excise: ½ of Assessed Taxes, Forest, and Registration: ¾ of Stamps.

"The deterioration on Imperial Account, Rx. 708,600, less the improvement on Provincial Account, Rx. 316,800, gives a net deterioration of Rx. 391,800, namely, a reduction in the surplus of Revenue from the standard of Rx. 1,882,500 in 1879 to that of Rx. 1,490,700 in 1896.

"72. This list shews that the resources made available by increased revenue and careful administration have practically been absorbed by (1) Loss of Opium Revenue, (2) Increase of Exchange Charges, (3) Increase of Military Expenditure, (4) Increase of Political Expenditure, (5) Increase of Provincial Expenditure, *i.e.*, of charges of Civil Administration, (6) Net Charges on account of Upper Burma.

"73. On the first two of these no remark need be made here; they are misfortunes we have had to accept. The last may also be passed over without remark; the occupation of Upper Burma was a measure forced upon us by political necessity, apart from any question of finance. The Province will, we trust, shortly meet the expenses of its civil administration, but naturally it does not as yet fully pay its way. The other three heads call for special explanation.

"74. The subject of Military Expenditure is too vast to be entered on in detail. A general explanation of its increase was given by Sir Henry Brackenbury in the Budget Debate of 26th March 1896 and by Sir Edwin Collen on the same date in 1897. In respect of their military charges the Government of India feel the same necessity which presses upon all other Military Powers, and which has imposed upon even the most pacific nations increased burdens. Both our military system in its details and our general military and defensive policy are closely linked with those of England; and we cannot escape the necessity of increasing our defensive expenditure in the same way, though not perhaps to the same extent, that England does.

"75. In illustration of this point I present the following figures; the English ones are taken from the Statistical Abstract of the United Kingdom, 1882 to 1896, pages 10 and 11:—

	Defensive Expenditure, United Kingdom (a.)			Defensive Expenditure, India (b.)
	Army.	Navy.	Total.	Army and Military Works.
	£	£	£	Rx.
1882-83 .	15,133,451	10,259,853	25,393,304	16,928,587
1883-84 .	16,095,326	10,728,781	26,824,107	18,079,134
1884-85 .	18,600,338	11,427,064	30,027,402	16,955,165
1885-86 .	17,027,084	12,660,509	29,687,593	17,340,369
1886-87 .	18,429,272	13,265,401	31,694,673	19,413,293
1887-88 .	18,167,196	12,325,357	30,492,553	20,548,766
1888-89 .	15,919,738	12,999,895	28,919,633	20,305,140
1889-90 .	17,345,812	13,842,241	31,188,053	20,511,504
1890-91 .	17,550,023	14,125,358	31,675,381	20,821,160
1891-92 .	17,258,900	14,150,000	31,408,900	22,570,533
1892-93 .	17,541,700	14,302,000	31,843,700	23,705,932
1893-94 .	17,939,700	14,048,000	31,987,700	23,537,693
1894-95 .	17,899,800	17,545,000	35,444,800	23,966,973
1895-96 .	18,459,800	19,724,000	38,183,800	23,976,714
1896-97 .	18,269,800	22,170,000	40,439,800	24,384,447

(a) Excluding Expeditions and Naval Defence Fund.
(b) Excluding Special Defences and the following Expeditions: (1) Egypt, (2) Quetta, (3) Burma, (4) Chin-Lushai, (5) Chitral.

"76. The result of these figures is to shew that while the Defence Expenditure in the United Kingdom has increased by 59 per cent, that in India has increased by only 44 per cent, even including the increase due to the fall of exchange,

which affects Indian Military Expenditure in a special degree, owing to the large proportion of it that is measured by a sterling standard. The statement of expenditure in the United Kingdom is free from disturbance by this cause; while, on the other hand, the increase of Indian expenditure includes Rx. 2,526,000 directly due to this cause alone; and if this amount were excluded, the percentage of increase would be reduced to 29.

	£
Net English Expenditure . . .	4,000,000
British Soldiers' pay . . .	1,590,000
TOTAL .	5,590,000
	Rx.
Difference of exchange 19·85*d.* and 14·45*d.*	2,526,000

" 77. The two most recent measures causing considerable increase of Military Expenditure were the raising of the pay of native soldiers in 1895, and of that of British soldiers in 1898. The former of these concessions had been delayed on financial grounds for a length of time which all our military advisers considered to be open to objection. The second measure, the increase of British soldiers' pay, is the result of the determination of Her Majesty's Government on a question of general imperial policy.

" 78. Under the head of Political Expenditure, the increase measured by percentage is even more considerable; in amount it is Rx. 471,600. A few remarks will shew that this increase has been caused solely by the necessities of external policy. Two-fifths of the whole amount arises from the one item of Rx. 180,000 for the subsidy of His Highness the Amir of Afghanistan; and the Afghan Refugees cost at least Rx. 60,000 more. The period under consideration, moreover, has witnessed the rise and development of the Baluchistan Agency, which now accounts for Rx. 130,000 of the outlay charged under this head; the appointment of an Agent on the Perso-Afghan Frontier (Rx. 13,000); the occupation of the Gilgit and Chitral Frontier (Rx. 16,000); and considerable new expenditure, say, Rx. 40,000, in controlling the tribes and employing levies along the North-Western Frontier. The head "Political" contained also in 1896 Rx. 14,000 expended on the African Coast of the Gulf of Aden (the corresponding revenues are under Miscellaneous), and the scheme of Imperial Service Troops has caused a further increase of Rx. 22,000.

" 79. I pass to the figures shewn against Provincial (including Local) net expenditure, which has increased during the period under review from Rx. 14,374,900 to Rx. 18,160,800. These are the charges of Civil Administration generally, and under such heads increasing outlay is not only justifiable but inevitable, in every country in which civilization is not stationary or retrograding. The system of Provincial finance is based on the theory that the increase in the Provincial share of the Revenues can be set aside for increase of expenditure upon Civil Administration, and that, if the increase is kept within this limit, we have by this limitation, under ordinary circumstances, sufficiently taken into consideration the financial difficulties arising from falling exchange, from the necessities of Military and Political Expenditure, from wars and famines. We proceed, therefore, on the assumption that there is no objection to the Provincial share of the normal growth of Revenue being, as fast as it accrues, spent on administrative improvements. As has often been pointed out, a Provincial Government can do nothing with its money except spend it; it cannot, for example, utilize a surplus for remission of taxation.

" Conclusion.

" 80. The statement which I have laid before the Council exhibits, I think, a very favourable condition of Indian Finance. Some of these favourable elements are, I admit, temporary only, and due in a large measure to a specially active trade, others however are permanent and betoken the return of the prosperity and progress which I noted in my statement of March 1896, and which were so rudely interrupted by the outbreak of famine. The plague, though it is a great anxiety to both Imperial and Provincial Administrations, is, financially speaking, well within our power to cope with, and as the first responsibility for the measures taken in connexion with it rests with the Provincial Administrations, I have been particular to examine the position of the Provincial Financial Accounts, and trust

that the measures of relief and assistance sanctioned by the Government of India and set out in the statement will enable them to face the difficulties in which they are placed, though I take for granted they do not claim relief from their share in the anxieties which are inseparable from financial administration in India.

"I have the authority of His Excellency the President to state that the Budget Debate will be taken next Monday, and I would ask Hon'ble Members that if they desire to have any explanation regarding any figures alluded to in the Financial Statement they will find Mr. Risley and myself quite ready to give it. I hope they will ask for any information they may desire to have."

"The Hon'ble MAJOR-GENERAL SIR EDWIN COLLEN said:—"I have laid upon the table a memorandum explaining the Army and Marine Estimates. If in the course of the next week any of my Hon'ble colleagues desire information on the facts and figures contained in that memorandum, I shall be very glad to supply it, if they will indicate to me the point or points upon which that information is desired."

The Hon'ble SIR ARTHUR TREVOR said:—"I have only to repeat, on behalf of the Public Works Department, what my Hon'ble colleague Sir Edwin Collen has just said, in regard to the Army and Marine Estimates. If any Hon'ble Member has any question to ask with regard to the Public Works Department Statement which is appended to the Financial Statement, I shall be very glad to give any information that may be desired between this and next Monday."

The Hon'ble MR. CHALMERS presented the Report of the Select Committee on the Bill to amend and consolidate the law of Bankruptcy and Insolvency in British India. He said:—"What the Committee have done is this. They have considered this Bill, which has been pending for a very long time, and they have come to the conclusion that its provisions are too complicated for application to India, and they recommend that the present Bill now before the Council should be dropped."

GLANDERS AND FARCY BILL.

The Hon'ble MR. RIVAZ moved that the Report of the Select Committee on the Bill to consolidate and amend the law relating to Glanders and Farcy be taken into consideration. He said:—"When introducing this Bill I explained that its main object was to enlarge the powers of Inspectors appointed under the Glanders and Farcy Act in respect of entering into, and inspection of, stables and other places, with a view to the seizure of diseased horses The only material alteration in the Bill which has been proposed by the Select Committee is that provision has been made for enabling Local Governments to prescribe the application of the *mallein* or any other tests which may be discovered from time to time before the Veterinary Practitioner decides whether a horse is or is not diseased; but we have retained the provision of the present Act which compels the immediate destruction of any horse which is certified by the Veterinary Practitioner, after he has completed his examination, to be suffering from glanders or farcy. I do not think that I need make any further remarks on the Bill."

The motion was put and agreed to.

The Hon'ble MR. RIVAZ moved that the Bill, as amended, be passed.

The motion was put and agreed to.

INDIAN TARIFF ACT (1894) AMENDMENT BILL.

The Hon'ble SIR JAMES WESTLAND moved that the Bill to further amend the Indian Tariff Act, 1894, be taken into consideration. He said:—"When I moved on last Council day for leave to introduce this Bill, I was careful to explain it solely with reference to Indian conditions. There is one part

of the subject to which I did not then refer, but to which I shall now take the opportunity of referring. His Excellency the Viceroy has received a memorial from the sugar-planters of Mauritius. These sugar-planters are very naturally dismayed at the prospect of their being reduced by the operation of the bounties given in the countries of Europe to the conditions in which the sugar-industry is in the West India Islands. It is with reference to that that they make an appeal to the Viceroy to have legislation passed in this country of the character which is now before the Council. I think that the days are passed when under the pretence of absolutely free trade no consideration was given to any circumstances arising outside the country concerned. We now do admit a certain obligation to other countries, and especially to those with whom we are knit by the Imperial tie. We are especially interested in the sugar-cultivation of the Mauritius by reason of the fact that that sugar-cultivation is carried on very largely by labour imported from India. The greater part, I believe, of the inhabitants of the Mauritius are Indians, and as such are entitled to some measure of protection from this Council. The petition of the sugar-planters and merchants commences as follows:—

'The cultivation of sugarcane and the manufacture and sale of cane sugar are practically the sole industries of the inhabitants of Mauritius, and their welfare and even their livelihood depend upon the remunerative sale of the sugar produced.

'The sugar industry directly or indirectly gives employment and the means of subsistence to a population of about 380,000, of whom more than 260,000 are Indian immigrants or immediate descendants of natives of India.

'These Indian immigrants have come to Mauritius with the sanction and under the control and protection of the Imperial and the Indian Governments, secured by laws suggested, approved or imposed by both Governments, and therefore the Imperial and Indian Governments are jointly responsible with the Government of Mauritius for the welfare and means of subsistence of themselves and their descendants.'

"That perhaps carries things too far. However, as I pointed out, the sugar-cultivation in Mauritius is one which gives employment to a very large Indian population, and if our legislation, based as it is on interests which are purely Indian, and refer to this country alone, also helps to preserve the means of subsistence to such a large number of Indian immigrants, I think I may bring it before the Council as one additional reason in support of the Bill which was introduced last Council day. I am glad to think from the public notices which I have seen of the legislation now before the Council I am not called upon to defend it. It has been generally approved of, and I think my proper course is to wait in case objections are made to it before I say anything further in its defence."

The Hon'ble MR. MEHTA said:—"I confess I should have preferred that this Bill had been allowed to run the usual course which Bills in this Council run. I should have preferred if the Bill had been referred to a Select Committee. I say this for two reasons. In the first place, it seems to me that the matter is not quite so simple as my Hon'ble friend Sir James Westland said in introducing the Bill He has placed certain materials before the Council, but it seems to me that a certain amount of further investigation and verification is absolutely essential before the conclusions drawn by him can be accepted. It is true that a certain number of sugar-refineries in the country have been stopped, but I am not quite sure that the facts placed before us necessarily point to the importation of bounty-fed sugar as the sole or main cause of that result. It seems to me that further enquiry and investigation and verification of some of those figures and statistics should be really made before we commit ourselves to the legislation which is sought for. The second reason I have is that the matter is not so urgent as not to allow time for the appointment of a Select Committee. I quite admit, as the Hon'ble Sir James Westland has pointed out, that we must not wait until the sugar-industry in this country is destroyed, but I do not think he has made out a case for such urgency as to justify the course he has adopted in not referring the matter for consideration to a Select Committee. For these reasons it seems to me that it would have been more desirable if the Bill had been referred to a Select Committee."

The Hon'ble MR. GANGADHAR RAO MADHAV CHITNAVIS said:—" My Lord, I wish only to make one remark, and that is to express my cordial concurrence in the proposal which has been submitted to the Government by the Hon'ble the Finance Member. The existing state of things with regard to the sugar-industry of India is such that it is impossible to tolerate it any longer. The bounty-fed beet-sugar has nearly driven away cane-sugar from our markets, and one by one the raiyats are giving up cane-cultivation. And once a raiyat has given up cane-cultivation, he has practically done with it for ever. For it should be borne in mind that the raiyat plants canes and preserves their cuttings immersed in water for the next year's cultivation. A raiyat who has failed to preserve these cuttinge has either to purchase them— if at all procurable—at an enormous cost or to give up cane-cultivation altogether. Thus, should the existing state of things be allowed to continue, a time might come when the cultivation of cane will disappear altogether from this country.

"In the same manner the date-sugar having been driven away from the market by the bounty-fed beet, it is said that the raiyats in Bengal have ceased to grow date-trees. And, that being the case, it is apprehended that the manufacture of sugar from date-juice might disappear from Bengal in the course of a few years.

"When the indigenous manufacture of date and cane sugar has been thus destroyed in India, the European Governments will, of course, discontinue the bounty which they now give to the beet-sugar. What is more, the European manufacturers themselves will then be in a position to sell their inferior sugar at their own price. When things have been brought to this pass, it is likely that the Indians will make an effort to revive the cultivation of date and cane. But the European Governments referred to above might then resume the practice of giving bounty to the beet-sugar and thus once again destroy the sugar-industry of India. It will thus be seen that the only way of saving this purely agricultural country from a serious disaster is to levy a countervailing duty on all bounty-fed sugar.

"Of course it would be absurd to expect unanimity of opinion on such a measure as the Sugar Bill. There are people, well-meaning people too, who I know view it with alarm as being repugnant to the principles of free trade. But free trade can never prevent us from initiating legitimate, measures of self-defence. In my humble judgment it is the first duty of the Government of India to consider the interests of the people of India; and it is from that point of view that I look at this question; and, looking at it from that point of view, I can have no doubt that the course which the Government of India have determined to take is a just and right one, for the initiation of which the people will feel most grateful to Your Lordship."

The Hon'ble RAI BAHADUR P. ANANDA CHARLU said:—"At the first blush, it may look as though we are flying in the face of free trade principles. But, in reality, we are doing nothing of the kind. If our action were abnormal, it is only directed against steps which are themselves abnormal and which, while inflicting deeper and deeper injury on us, seem to admit of no other cure, in order to safeguard what are of vital interest to us. But, in truth, are we embarking on anything abnormal? In my humble judgment, we do no such thing.

"If the sugar whose importation is proposed to be subjected to countervailing duties were the outcome of natural resources and of normal conditions, it may perhaps be arguable whether, on commercial grounds, an exception could be taken to it on the ground of irreparable loss to us. It may be equally arguable whether, on commercial grounds, it is expedient to stem, by artificial means, a torrent which—as unerringly as does water—must find its proper level sooner or later. But the sugar in question is unnaturally produced. It is made capable of being sold as cheap as it is now, only by reason of bounty which bolsters it up—be that bounty in the shape of a prior advance by the States to stimulate manufacture or be it in the shape of remission or refund of taxation after the commodity has been produced, in order to quicken its circulation in the Indian and other unprotected markets, for the up-keep or welfare of which the bounty-giving Governments make no sacrifice or have no concern. Noting the tendency it has

created to alarmingly diminish the cane-cultivation in extensive tracts, solely and wholely devoted to it in this country, and the dreaded certainty of danger that our sugar manufactories will have soon to shut shop and pass out of their present prosperous existence, the day is not distant when locally-made sugar is sure to be a thing of the past or be relegated to the limbo of our other and numerous extinct industries. When that bitter cup is full to the brim, the imported sugar will increase by leaps and bounds, rule our markets absolutely without a rival, and its owners may dictate their own terms or drive the hardest bargains. Let us suppose—and the supposition is by no means unnatural --that the bounties which now prop up the manufacture in the foreign countries are withdrawn—be it from caprice or because no longer necessary or because wiser counsels prevail. The result will be that a well-established and thriving industry would have been, in the meantime, brought (at best) to the brink of ruin. The capital and labour, which are now working with excellent results, would be diverted from the production of commodities of extensive local consumption and sent adrift in problematic search of tentative re-investments in a spirit of timid experiment or hazardous enterprise, so foreign to the genius, nature and habits of the people of this country. It is easy to realise what will be the fate of even the present consumer when reduced to a condition of sole or virtual dependence on the tender mercies of that foreign producer. Viewed in this light alone, the present Bill is fraught with good to the consumer as well as the producer in this country. This is not all. I think that, unless, indeed, we rigidly define the term 'consumer' as an intensely and sordidly selfish being, the word has a wider significance in this country where spontaneous charity is enjoined on every individual as an inviolable and meritorious religious duty towards the poor and helpless within the fold, common to them and him. If, then, the consumer should regard himself, not merely as living for himself and his immediate kith and kin, but as one acting for and acted upon by the common good of his community, as distinguished from other communities, he could not help taking a far more comprehensive view of his position. He would then conceive his well-being as part and parcel of the well-being of the rest of his community and welcome some amount of hardship and sacrifice on his part without murmur. If, again, the present consumers are of the well-to-do classes as asserted, our position is all the more strong; for we must bear in mind that they must then realise a near and repeatedly-recurring future when they must come in, for their share of contribution, either in the shape of additional taxes or of large charities, in case the hosts of cane-growers and sugar-makers of the day are thrown out of employ or reduced to a state of starvation—as is but too likely in this land of periodic famines—and are thereby cast on their hands or on the State, which is the same thing. Having regard to their inherited nature or to this eventuality, which—be it repeated—is by no means improbable, the effect of this Bill, even if it should cause a rise in the price of sugar they use, would be to lay men of comparative competence under a species of indirect taxation for the benefit of their poor brethren, which they will not and ought not to grudge. These are among my reasons for advocating this measure with perfect loyalty to free trade doctrines.

"There is another ground—not an altogether inapt ground—in favour of this Bill. It is this, namely, that it is calculated to dispel the notion—more or less widespread and more or less groundless—that free trade has ruined the indigenous industries—a notion which cannot but lend an undesirable colour to the opinion entertained about the effects of the British rule. I regard it, therefore, not only as inaugurating an era in the fiscal legislation of the country and as being welcome on that account and on its own merits, but also as dispelling the above erroneous notion. There is no doubt, that with the advent of British sovereignty, the reign of free trade has synchronised in this country; and, with that reign, a taste has set in for British articles of clothing which began to flow in unchecked. But the truth ought not to be disguised that such is, after all, the fault of the altered tastes rather than of free trade. Certain new ideas of the decencies and comforts of life, which have followed in the wake of the civilization of the West, have weaned not a few from their old and traditional ways; but free trade, as such, has had nothing to do with that result. Exigencies that have arisen in consequence may have, as I think they did, intensified

the result, but it is difficult to see how that result could be helped or could be said to have been originated by it. For every one man or woman who fell in with and adopted the Western fashions, there are tens, if not hundreds, who have adhered to their old ways, in a perceptible degree. It is therefore illogical to say that because a large number of the well-to-do and the seekers of the fashion of the day have utilised the Western articles, the articles themselves or the natural facilities for their influx should be denounced or proscribed. Giving free trade the fullest swing, it seems to me that the local industries might well have thriven if the tastes of the people had, in the bulk, remained unvaried and unvariable. Take, for instance, the almost entire masses of the Hindu ladies. They have been untouched by the fashions of their Western sisters, and the species of manufacture which supplied their clothing have, I believe, continued to hold the ground. As surely would the manufacture of male clothing have continued its hold, if men too could be brought to display or develop a like tenacity to old habits. While for these reasons I regard the prevailing outcry against free trade as unreasonable while I recognise in the Bill before us a departure which marks a desirable epoch in our fiscal legislation, and which will prove a powerful solvent of doubts entertained about the operation of free trade doctrines, I cannot but share the feeling nor get rid of the impression that, just as the threatened ruin of the cane-growers and sugar-makers has laudably moved our Government towards this measure of preventive legislation, the urgent need exists to inaugurate measures, on similar lines, to meet the case of the millions of skilled workmen whose ruin is almost accomplished and whose instructed and inherited aptitude for delicate workmanship, menaced with extinction at every famine that comes round, presents a no less anxious and grave problem of the day.

"Claims of international commerce may be said to be in the way. I am not unaware of the motives, results and advantages laid to its credit. I nevertheless venture to think that it suffices to say just at present that the subject has not yet ceased to be controversial, and that, so far as this dependency of the British Sovereign is concerned, those motives, results and advantages are either too remote or too problematic to be efficacious. In the meantime let me allow that the claims of international commerce are indeed great. But the claims of a nation's prosperity and its freedom from utter impoverishment are even greater. The question may well be asked, whether the sustenance and prosperity of millions of lives, which run imminent risk of being either altogether lost or sensibly enfeebled, are not to be a primary object of every Government—a consideration paramount above commerce, international amity and all else. One may well entertain the grave doubt whether there is not, to the problem to be grappled with, a *political* as well as a *commercial* and an economical side, whether the European and the American Governments, which are not wanting in intelligence and which have persisted in non-free-trade principles in dealing with other States, side by side with a full recognition of free trade principles within their own territorial jurisdictions, do not, after all, act in tacit acknowledgment of some such distinction, and whether sufficiently long periods of such persistence have not elapsed to refute, by practical, concrete results the abstract theory that the policy is bound to prove suicidal.

"But these latter remarks are superfluous to set on its legs the Bill before us—a Bill which has indisputable merits of its own. The sole aim with which I have thrown out those observations is to hint at what seems to me a possible solution of a kindred problem of no less gravity; and I have done so, in the hope that what is but an academical debate to-day in relation to the Bill now on the anvil, will, before long, pass within the domain of practical politics, and that this Bill will prove but the harbinger of other measures to come, though they must needs be experimental, fragmentary and cautious at the outset."

The Hon'ble SIR JAMES WESTLAND said:—"In the remarks of the Hon'ble Mr. Mehta I think he has failed to observe the distinction between the functions of this Council and the functions of a Select Committee. The question whether this Bill is in principle required or not and whether we ought to provide

for the protection of the sugar-industry against existing adverse influences is, it seems to me, a question which the Council must decide for itself, and not a question which it should refer to a Select Committee. The business of a Select Committee rather comes in after the principle has been laid down and after the general tendency of the proposed legislation has been accepted, to see whether the proposed Bill is correct in point of form, or whether it cannot be altered and improved in respect of the subsidiary arrangements connected with it. The reason why no proposal has been made to refer this Bill to a Select Committee is that if the principle is adopted there is really very little work for the Select Committee to do. The Bill, as I said last Council day, has been framed on the basis and upon the wording of an Act which is actually operative for purposes to which we desire to apply this Bill. It has been carefully framed upon the experience of another legislature, and I think we may take it for granted that a further consideration of it by a Select Committee would not have altered it in point of form, or suggested any improvements in a matter so simple as that of giving powers to Government to impose duties of a certain class. Then, as regards the statement of the Hon'ble Mr. Mehta that he did not consider that the Bill was of a sufficiently urgent character to be brought up to be passed at this Council, I think I may reasonably refer him to the two speeches which have been delivered, one by the Hon'ble Mr. Chitnavis, himself an agriculturist and in close touch with all agricultural questions, and the other by the Hon'ble Mr. Charlu, who is a keen observer and reporter on all matters relating to social economy in India. I think the statements of those two gentlemen will have convinced the Council that after all there was some reason for regarding this measure as an urgent one and seeking to pass it before the session comes to an end. Nor do I think that it is altogether reasonable to refer to a Select Committee the question of whether the statistics which have been laid before the Council are correct. I have not stated these matters of my own knowledge. What I stated to the Council was taken from the official reports of the high officers who were instructed to enquire into the subject, which reports have been based upon very careful enquiries. These papers I quoted pretty fully last Council day, and I can only say that if any Hon'ble Member had desired to verify them still further, the fuller reports and details could easily have been placed at his disposal. I trust, therefore, that the Council will feel that the measure which is before them has been amply justified and will, on the motion which I shall presently make, be pleased to pass it into an Act."

The motion was put and agreed to.

The Hon'ble SIR JAMES WESTLAND moved that to the Bill the following clause be added, namely :—

"3. This Act shall not apply to any imported article the bill of lading for which was signed and given before the commencement of this Act."

Act not to apply in certain cases.

He said :—"I am afraid that the Hon'ble Mr. Mehta may now pounce upon me and say that my moving this amendment is evidence that the matter ought to have been laid before a Select Committee; but this really is no new matter. It is not brought before the Council for the first time. The Hon'ble Mr. Allan Arthur mentioned it at the last meeting, and I gave an undertaking that I should consider the subject with Mr. Allan Arthur and with his constituents, and be able to lay it before the Council for consideration when the Bill came up to be passed. In an ordinary measure for changing the duties imposed by the Tariff the law prescribes that the contracts which have been made before the change have to be modified with reference to that change. The principle upon which that provision in the law is based is that under ordinary circumstances the change of a tariff duty results in the change of the price of the article concerned more or less exactly by the amount of the duty imposed or taken off. If this were merely a revenue measure, if it were a measure merely for altering the rate of duty which is demanded at the ports upon sugar, I would be strongly averse to making any alteration in the existing provision of the law relating to current contracts for purchase or

sale of articles to be imported. I take it for granted that people who make contracts of the kind know what the law is relating to them and relating to the operation upon them of any subsequent alteration of duty. But the present measure is not one that has simply for its object the alteration of a duty. It is one that will have some effect upon the sugar-trade as a whole. No doubt the price will enhance. It has been enhanced, I believe, by a certain amount, but the price will not be enhanced by the same amount by which we alter the duties. The consequence is that where we now throw upon the forward seller of sugar the obligation to pay the customs-duty at the port, he may indeed pass it on to his purchaser, but at the same time this purchaser will not be enabled by a corresponding rise of price to recover it from his purchaser. Well, the form which the provision should take with respect to these contracts for future delivery has been very carefully considered by me in consultation with those most competent advisers,—the Committee of the Chamber of Commerce,—and the form in which the clause is proposed is a form which seems to them the best for the saving of existing contracts, namely, that sugar which has been put on board a steamer at a foreign port before the date of the commencement of this Act, that is to say, before to-day, shall not be affected by the imposition of these new duties. This will postpone for a short time the operation of the Act so far as concerns the protection of the sugar-industry, but it will relieve merchants from a good deal of uncertainty regarding their transactions and from what may be a good deal of unfairness in the operation of the law. Another form which was proposed was simply to exempt from the operation of the Act all sugar which was the subject of a contract made before the Act was introduced. It seemed to me there were strong objections to giving legislation that form, because it is a section of which the operation would not in regular course come to a close by any fixed time. We might have sugar imported a year hence, or two years hence, or even ten years hence, upon the basis of a contract already made. We cannot postpone the operation of the Act for such an indefinite time, or give to future importations, which, as I say, might extend over years, an advantage over other importations going on at the same time; whereas if the Council accepts the provision for security of current contracts, which I have laid before them, the result will be that after a very short time—I suppose a month at the outside—the whole of this temporary exemption will have ceased and all sugar imported into the country wil be under the operation of the Act."

The Hon'ble MR. ALLAN ARTHUR said:—"I think the amendment proposed by the Hon'ble Sir James Westland fairly meets the difficulties which, I pointed out at the last meeting of the Council, might arise in bringing this Bill into operation. I agree with the Hon'ble Member in regard to what he said as to the difficulty of exempting all contracts that were made before the passing of the Act from the operation of the Act, and I further think it would give the holders of such contracts a greater advantage than they can reasonably claim.

"The holders of contracts for sugar now at sea, *i.e.*, for which bills of lading are signed, will no doubt make a profit on their contracts. Beet-sugar has already risen 12 annas per maund, but as the dealers who hold such contracts probably also hold contracts for sugar which will be shipped after the passing of the Act, they will probably make a loss on these latter contracts, as it is improbable that the price of beet-sugar will advance to the full extent of the duty imposed. There will be a set-off, however, in the profit on the former contracts against the probable loss on the latter contracts, and, on the whole, I think the amendment meets the difficulties as well as they can be met."

The motion was put and agreed to.

The Hon'ble SIR JAMES WESTLAND moved that the Bill, as amended, be passed.

His Excellency THE PRESIDENT said:—"Before I put the question that this Bill be passed into law I should like to make a few observations with regard to it. I have been glad to notice the complete unanimity that has prevailed with

regard to the Bill in this Council—representative as it is of so many diverse and important interests. The Hon'ble Mr. Mehta indeed would have preferred that this Bill should have been referred to a Select Committee—a contention to which I think that an adequate reply was given by the Hon'ble Sir James Westland. I also understood him to urge that it might have been desirable that further enquiry should have taken place with respect to the subject-matter of this legislation. Well, I have always heard it made a reproach against the Indian Government that it is perpetually conducting enquiries, and very seldom acting upon them; and that reproach I, at any rate, during my time of administration here, desire to escape.

"The answer to my Hon'ble friend Mr. Mehta is that we have been conducting enquiries for a whole year past. We have received representations from every leading Chamber of Commerce in the country, and from most, if not all the important firms connected with this industry. We have addressed observations to, and received replies from, the Governments of all the provinces and districts of India concerned. We should have had, if my Hon'ble colleague's advice had been followed, to wait for the best part of another year before we introduced this legislation. We regarded the case as urgent, and we were not prepared to accept such a delay. At the same time I am glad to notice that the Hon'ble Mr. Mehta, although he delivered this criticism on a point of detail, did not withhold his assent, which I am certain that he is prepared to give, to the general principle of the measure. Then we have had on a previous occasion and again to-day a statement approving the Bill from the Hon'ble Mr. Allan Arthur, the distinguished representative of European mercantile interests in this capital, and finally we have had two speeches from the Hon'ble Mr. Chitnavis and the Hon'ble Mr. Ananda Charlu, which I take it we are entitled to regard as typical of the opinions that are held by those important sections of the Native community which they represent at this table. I am therefore, I think, justified in saying that at any rate within these walls complete unanimity has prevailed with regard to the principle of the Bill.

"This complete unanimity here reflects an almost equally complete unanimity outside. There are, it is true, certain interests and certain Chambers of Commerce—Bombay and Karachi I may name—in which those interests are strongly represented, which have not entirely concurred in the necessity for countervailing duties at this stage. Those representations are entitled to due consideration, but it is to be noted that they do not come from the areas where the sugarcane is grown, where the refineries exist, or where the real effect of the bounty system is felt. They represent in the main the interests neither of the producers nor of the consumers, but of the importing merchants. On the other hand, if I regard either the representations to which I have already referred, and which have been received by us from the Local Governments, or the reception which our proposals have met with alike in the English and the Native Press of India, I do not hesitate to say that few measures have ever passed through this Council with a greater weight of qualified and homogeneous opinion behind them.

"Now the first point that I desire to emphasise is this—that it is in the interests of India, and of India alone, that this legislation has been proposed by us, and that I have authorised the introduction of this Bill. It may be that our Bill may ultimately affect the action of other countries. It may more immediately touch the interests of certain of our own Colonies as well. The Hon'ble Sir James Westland in his speech to-day has alluded to the representations that we have received from the Colony of Mauritius, a Colony in which, in view of the enormous Indian population that is there engaged in labour, we here are bound to take a close interest, and whose welfare we should be glad, I am certain, consistently with our own, to subserve. It may be that this Bill will set an example of far-reaching significance. By some it may even be regarded as a factor in the Imperial problem. It is from such points of view that we may expect the measure to be examined, and perhaps criticised, in the British Parliament in London. I do not deprecate such examination, or such criticism, conscious that it will not weaken, but will rather strengthen, our

case. All I have to say here is that our conduct has not been determined by those considerations. We are exercising our own legislative competence, of our own initiative, though with the sanction and concurrence of the Secretary of State, to relieve India from an external competition, fortified by an arbitrary advantage, which can be shown to have already produced serious consequences upon our agriculture and manufactures, and which, if unarrested, is likely to produce a continuous and a dangerous decline.

"There is another point upon which I must, in passing, say a word. I have been glad to notice that no one in this Council has ventured upon the argument that we are guilty of an economic heresy in our proposal to meet bounties by a countervailing duty. Bounties are in themselves an arbitrary, and in my opinion a vicious economic expedient designed in exclusively selfish interests. They are inconsistent with free trade, because they extinguish freedom, and they reverse the natural currents of trade. To meet them by a countervailing duty is to redress the balance and to restore the conditions under which trade resumes its freedom. I do not think that we need pay much attention, therefore, to the mutterings of the high priests at free trade shrines. Their oracles do not stand precisely at their original premium. This is not a question of economic orthodoxy or heterodoxy; it is a question of re-establishing a fiscal balance which has been deflected for their own advantage and to our injury by certain of our foreign competitors.

" Moreover, if the utilitarian basis upon which the doctrines of free trade are supposed in the last instance to rest, *viz.*, that they regard the interests of the greater number, be examined, out of their own mouths would the prophets of those doctrines, in India at any rate, be condemned. For here we are dealing in the case of the sugar-industry with a population the vast majority of which are not consumers of a cheap imported article, but are themselves producers of the raw material, and in their capacity as consumers consume for the most part the article which they have themselves produced and worked up. In other words, the conditions that prevail in England are completely reversed. The majority in England consists of poor consumers to whom it is indispensable that the price of sugar should be low. The minority consists of capitalist producers. On the other hand, the majority in India consists of poor producers whose industry is at stake; the minority consists of well-to-do consumers of refined sugar who are not likely, in my judgment, to be affected seriously, if indeed they are at all affected, by enhanced prices resulting from our legislation, but who, if they were, could not claim that their interests should override those of the overwhelming majority of the population.

" Now I shall not recapitulate the figures which have been laid before you with so much ability and clearness by the Hon'ble Sir James Westland when he introduced the Bill at our last meeting; but let me remind you of the facts which have been established in this discussion. They are these:—firstly, that there has in the last few years been an enormous increase in the importation of beet-sugar into India from Germany and Austria—a fact which is unquestionably due to the loss by the American market of those countries in consequence of the imposition of countervailing duties by the Government of the United States in 1897; secondly, that in the same period the rupee price of sugar in this country has seriously fallen; thirdly, that there has been a contraction in nearly every part of India in the area under sugar-cultivation, the total reduction being estimated at as much as 13 per cent; fourthly, that there has been a widespread and a still unarrested closing of native refineries, a phenomenon which is capable of one explanation, and one alone; for while it may be argued that the decline in the total area under cultivation may be partially due to other causes such as famine and the low prices resulting from famine, that this is not the case in respect of the factories which have been closed is demonstrated by the fact that in districts where cultivation has increased, or remained stationary—in other words in districts which have remained unaffected by famine—the refineries nevertheless have been, and still are being, shut.

"From these facts it appears to me to be impossible to draw any other conclusion than that this decline in an Indian industry—in which I have seen it stated that two millions of people are employed and in which the value of the annual crop has been estimated at nearly twenty millions sterling—is due to the importation of beet-sugar at a price below the natural cost of production *plus* the cost of transport, in other words, to the unrestricted competition of a bounty-fed article.

"Now this is a state of affairs which neither the Government of India nor I, as the head of that Government, from whatever point of view we may regard it, can contentedly accept. If we look at it from the point of view of the agriculturist, we cannot sit still and look on while he is impoverished by the economic exigencies of Continental nations. If we regard it from the point of view of native manufactures, what would be the meaning and value of the speeches which I have made since I came to India about the encouragement of native enterprise, if I were to acquiesce in the tacit suppression of this promising branch of indigenous industry? We ought, on the contrary, I think, to stimulate and to encourage its development by every means in our power. Finally, if I approach the question from the point of view of the Government, while we should be strangely constituted if we could contemplate with equanimity the preventible growth of an agrarian and industrial grievance, which must sharply react upon the general prosperity of the people, we should also be poor stewards of our own estate if we were to acquiesce in a condition of affairs that must detrimentally affect both the land assessments and the canal returns, and in this way jeopardise the ultimate revenues of the State.

"These are the grounds—which I have endeavoured to state in their wider rather than in their narrower aspect—that have induced the Government of India to introduce this Bill, and that enable me confidently to recommend it to the acceptance of this Council and of the public."

The motion was put and agreed to.

INDIAN MINES BILL.

The Hon'ble MR. RIVAZ moved for leave to introduce a Bill to provide for the Regulation and Inspection of Mines. He said:—"The object of this Bill is to provide for the regulation of labour in, and for the general management and inspection of, mines in India. There is at present no law dealing with the subject on the Indian statute-book. The mining industry in India is of comparatively recent origin, but its progress in at least one province during the last fifteen years has been so rapid that the necessity for obtaining for the Government statutory powers of inspection of mines, for enforcing proper precautions in their working, and for assuring health and protection of life and limb to the operatives, has been repeatedly under the consideration of the Government. This obligation has been recognised in all countries in which mining operations on any considerable scale, with the risks inseparable from them, are carried on: and the hesitation of the Government of India to give it statutory form has been due not to any doubt as to the eventual necessity for legislation, but partly to a wish not to put difficulties of any kind in the way of a rising industry, and partly to the willingness evinced by those interested in the mining industry to permit their mines to be inspected by Government officials, and to the hope that precautions and improvements suggested on such inspections would in most cases be adopted without the coercion of law. It was also thought desirable to see how the Indian Factories Act worked in practice in a cognate sphere of industry, and to ascertain what degree of protection was really needed in this country for certain classes of operatives, and how far it could be given by law without unduly crippling manufacturing enterprise. This experience has been satisfactory. Protection has been given to factory operatives in various ways and the conditions of labour have been sensibly ameliorated, yet no unfair strain has been placed on the industry. Careful and considerate employers have no cause to fear the Inspectors' visits, and the labour regulations are as simple and moderate as are compatible with the health and well-being of the employés. The time has now come in the opinion

of the Government to take a similar step with regard to mines, to bring them under statutory inspection, and to enforce such rules of management and such labour conditions as a considerate and well-informed mine-owner already either adopts or is willing without compulsion to adopt.

"Five years ago, in order to satisfy itself as to the urgency for such legislation and to inform itself thoroughly as to the management and the labour conditions of Indian mines, the Government of India obtained from England a competent Inspector of Mines. Towards the close of 1894, Mr. Grundy submitted his first report, containing the results of his inspection of 67 mines, most of them collieries in Bengal. He showed that Indian mining was in many respects far below the standard reached in other countries, and far below what it ought to be in India. He found, to quote his exact words, that there was 'except in a very few mines an almost entire absence of such essential principles and practice of mining knowledge as ventilation, timbering, etc.' Ventilation, he said, was much neglected. Fire-damp was not properly tested. Used and unused shafts and machinery were often left unfenced. The winding machinery was not unseldom defective. In quite a number of mines no plans of the underground workings were maintained. Regular inspections of all underground working parts, with a view of testing for safety, were not carried out by the mine staff. Accidents were not properly and promptly reported. With regard to accidents he reported in 1896, after two years' further experience, that the accidents which he had investigated 'afforded ample proof that lives were lost that might have been saved, and that the reporting of accidents by the mine officials is one of the most necessary requirements of Indian mining.'

"These reports satisfied the Government that legislation was required and ought to be undertaken without delay; at all events, for the purpose of obtaining statutory powers to inspect and to make rules for the reporting of accidents, and for the technical management of mines. But the point on which the Government was doubtful was as to the necessity for placing restrictions on the employment of women and children employed in mines, or for regulating working hours, and the like. The provisions of the English Statutes are very precise. No boy under the age of twelve years, and no girl or woman of any age, may be employed in, or allowed to be, for the purpose of employment, in any mine below ground. The hours of employment below ground of boys over twelve and the intervals of rest during such employment are fixed. So likewise are the hours of employment above ground of boys, girls and women. These provisions generally correspond with the recommendations of the Berlin International Labour Conference of 1890, and although India, as it was not represented at the Conference, is not actually bound by the decisions of the delegates, it must obviously accord to them the very greatest consideration, and if it departs from them should do so only on the clearest evidence that they apply to social and labour conditions which do not exist in India. Now the Mining Inspector reported very fully and fairly on the subject of the underground employment of women and children in the mines inspected by him. He wrote with regard to the women to the following effect:—

'3. They generally work under circumstances in which they can enjoy the company and protection of their nearest relatives throughout a good part of the working shift. They work in gangs and families, and do not, as a rule, mix with any men other than relatives.

'4. Working in the mines provides them with labour that could not be got out of the mines, and for which they get a comparatively good rate of pay. And I did not find any distressing circumstances connected with the employment of females and children, but all appeared to be hearty and happy.

'5. A large majority of the females have little or no work to do at home; and, without their help in the mines, husbands and relatives would be put to great inconvenience and trouble in doing their work.

'6. Without the wages they earn, many families would become most miserably in want as compared with their present prosperity.

'7. When proper precautions are taken for proper ventilation and making the workings healthy, it is an advantage to them to be in the mines and out of the sun's heat during the hottest part of a summer's day, the mines being comparatively cool.

'8. Working in the mines has no more tendency to immorality than most other employments, but in a great number of cases it is of a protective nature.'

"But he added the important caution that there are parts of mines and kinds of work on which women ought not to be employed. With regard to children, he found only a very few boys under ten years of age employed in the mines, and he thought therefore that there would be little hardship in prohibiting their employment. But he pointed out that such prohibition would also prohibit the admission underground of all children under ten years, and that mothers found it convenient to take their babies into the mine with them.

"The Government of India accordingly decided to reserve these labour questions for further consideration, and to appoint a Committee to advise as to other matters on which legislation was necessary, and to draw up rules to be made under the proposed law. On this Committee the Bengal Chamber of Commerce, the Indian Mining Association, and the Native owners of coal-mines were represented. The Committee accomplished a very laborious and useful piece of work, for which the Government of India have already expressed their acknowledgments. They prepared the draft of a Mines Regulation Bill, which was for the most part of an enabling character, and very full drafts of rules proposed to be made under it. These rules will be of the very greatest service if the Bill which I have asked for leave to introduce, should become law. On receipt of the Committee's report the Government of India remitted it to Local Governments for opinion and discussion, and at the same time especially invited opinion on the two questions of prohibiting underground employment in the case of women and restricting it in the case of children.

"The Bill which I propose to introduce represents the Bill prepared by the Committee, recast somewhat in language to bring it more into accord with the technicalities of drafting, and altered in some matters of comparatively minor importance, in the light of the criticisms which have been received. The Bill, like the Committee's Bill, will apply to the whole of British India and to mines of all sizes and all classes. But any inconvenience likely to arise from its far-reaching extent is avoided by power being taken to exempt any local area or any mine or class of mines, from any or all of its provisions. The appointment and powers of Inspectors of Mines are provided for on the general lines of the English Statutes, and call for no special observations. Then come certain provisions with regard to operatives which find no counterpart in the Committee's Bill. The Bill provides that children shall not be employed underground unless of the age of ten or upwards, and that children between the ages of four and ten shall not be allowed to go underground. This is followed by clauses which enable the Government of India or the Local Government to make rules in respect of all mines or of particular classes of mines for prohibiting, restricting or regulating the employment of children up to the age of fourteen years or of women, and of limiting the hours of employment of women or children. These provisions follow in the main the final recommendations made by the Government of Bengal after a very careful survey of the subject, and they are considered by the Government of India to represent the smallest amount of protection which should be afforded by law to these classes of workers. The only positive prohibition is in respect of the underground employment of children under the age of ten. The Government of India recognise the fact that in very many mines women in India may be employed underground, on the family gang system common to the country and in association with their husbands, without any objection on the ground of morality or of physical health. But it cannot ignore the fact that where the system does not prevail, or where the mine is dangerous or very deep, or the work dangerous or very laborious, children below fourteen or women should not be so employed. In such cases rules prohibiting or restricting or regulating the employment of women and children would be made. The objection may be taken that this is leaving too much to the discretion of the Executive Government. The reply to that is that mining conditions vary so greatly in India, and the mining industry is in a state of such rapid development, that unless large discretionary powers are left to the Government, either the whole mining industry must be unnecessarily stretched on a Procrustean bed, or defenceless classes must go without protection. The latter alternative the Government of India is unable to assent to. As a condition of reducing the absolute statutory prohibitions to the minimum, the Government must keep in its hands a large rule-making power.

"I explain this point at length because the same considerations apply to the absence of explicit provisions elsewhere in the Bill regarding such hotly disputed matters as the classification of mines, the appointment of certificated managers, the construction of shafts and the like, and their proposed regulation by rules. If the Bill be passed, the first step will probably be to frame rules applicable primarily to coal-mines, and to coal-mines of different working capacities and degrees of development. When this is done, the particular requirements of metalliferous mines, of mica-mines, of stone-quarries, and so on, will be brought under review and regulated. In all cases the object will be, not to secure absolute uniformity of equipment and management, but in every case the necessary protection of the workmen. Regulations which are essential in the case of large mines would, unless relaxed, be ruinously burdensome to the small mines.'

"The central part of the Bill defines the responsibilities of owners, agents and managers, requires notice to be given of accidents, enables the Government to hold formal enquiry into cases of accident and to publish the results, and provides for the appointment of Committees of reference in cases in which the requisition of the Mining Inspector is considered by the mine-owner to be in excess of the requirements of the rules which apply to his mine. I need not dwell on these provisions, nor say more than that they have been framed with advertence to the more elaborate provisions of the English Statutes.

"The penalties prescribed in the Bill have been framed on the side of leniency rather than severity, and a valuable safeguard against criminal prosecutions when technical points of mine-working and management are in question is provided in clause 26, which enables the proceedings to be stayed and the case referred to a Committee of reference.

"The only other point on which I need touch is the power proposed to be taken in clause 21 to make rules 'to provide for the safety of the public and the protection of public property and works from injury in respect of any mine, whether the mine is worked or not.' The object of this power is stated at length in the Statement of Objects and Reasons accompanying the Bill, and though the precise form in which increased protection should be given by the Bill to the State and the public from the risk of injury from underground workings may be open to further consideration, there is no doubt that increased protection is urgently required, and that in some form or other it should be given.

"I must apologize for the length of these remarks, but the matters provided for in this Bill are of great importance, and it is desirable to afford a full explanation of the reasons for the proposed legislation. The Bill will be circulated for opinion in the usual manner, and it is intended to postpone its reference to a Select Committee until the next session of Council here in Calcutta. Ample opportunities will thus be afforded for its deliberate consideration by all interested in the matter."

The motion was put and agreed to.

The Hon'ble MR. RIVAZ introduced the Bill.

The Hon'ble MR. RIVAZ moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The motion was put and agreed to.

The Council adjourned to Monday, the 27th March, 1899.

H. W. C. CARNDUFF,

Offg. Secretary to the Government of India,

Legislative Department.

CALCUTTA;

The 24th March, 1899.

SUPPLEMENT TO

The Gazette of India.

No. 12. CALCUTTA, SATURDAY, MARCH 25, 1899.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

APPENDIX.

ACCOUNTS AND ESTIMATES.

SUPPLEMENT.

FINANCIAL STATEMENT FOR 1899-1900.

PART I.

INTRODUCTION.

In presenting my Financial Statement of March 1898 I alluded to the calamities of famine, war, pestilence, and earthquake which had fallen upon us during the year then closing, and I went on to refer to the promise of brighter times introduced by the abundant harvest of 1897. The recovery of the country has been more rapid than any of us anticipated at the time I allude to; another good harvest has been gathered, and although the plague still casts a shadow over the land, the general condition of the people as evidenced by the Returns of Trade and of Revenue is prosperous, and the famine of 1896 and 1897 is now little more than a memory, its effects being obliterated by the return of prosperous seasons. I cannot, however, pass from the subject without deriving from it one lesson which it seems to me to afford—namely, that the margin between prosperity and adversity in India must be a very narrow one, for if we have learned that one bountiful harvest suffices to restore the country after a widespread and severe famine, we have learned also that the failure of the seasonal rains in a single month of the year is sufficient to set back a full tide of prosperity; and that this is a possibility which in the administration of India, and in its financial administration especially, we dare not leave out of account.

2. In the two calamitous years of which I told the history last March, namely, 1896-97 and 1897-98, I had to shew that the accounts of the Empire were in deficit to the aggregate amount of, as nearly as possible, seven crores of rupees (Rx. 6,988,100 since increased to Rx. 7,064,233). In the two succeeding years (those of which I present the estimates to-day) I am glad to say that this deficit has been, or will be, more than covered, for so complete is the reversal of last year's position that in passing from 1897-98 to 1898-99 we pass from a deficit of Rx. 5,359,211 to a surplus of Rx. 4,759,400, and in my Budget Estimates for next year I anticipate a surplus of Rx. 3,932,600. I lay these figures before the Council at the very commencement of my Statement, as I have no doubt they are anxious to know, as soon as possible, the general drift of the figures which I now proceed to explain in greater detail.

Accounts of 1897-98.

3. The Accounts of 1897-98 were, as usual, published in the first half of January, and the results then shewn compare as follows with the anticipations formed in March 1898:—

	Revenue.	Expenditure.	Deficit.
	Rx.	Rx.	Rx.
Estimated in March 1898	96,561,500	101,844,600	5,283,100
Actual Accounts	96,442,004	101,801,215	5,359,211
Accounts { Better + / Worse — }	—119,496	+43,385	—76,111

The differences on the whole were very small, as the accounts under each of the heads of Revenue and Expenditure closely followed the Revised Estimate. Indeed, had it not been that we determined after the close of the year to make certain grants (aggregating Rx. 88,100) to the Provincial Governments of Bombay and of Bengal in further reimbursement to them of their famine expenditure, the difference in the whole account between Revised Estimate and Actuals would have been only Rx. 12,000.

Revised Estimates of 1898-99.

4. In the Budget Estimate for 1898-99 I estimated the results of the year to be a surplus of Rx. 891,400. But we now find that mainly through abundant revenue, military economies on the North-West Frontier, and very favourable exchange, the result of the year will be a surplus, as I have already stated, of Rx. 4,759,400. I shall explain afterwards that on a review of the financial position of the several Local Governments, whose balances have been exhausted by famine and plague, and who have still to meet pressing demands for expenditure while the expansion of their revenues has for a time been set back by the calamities referred to, we have decided to make them grants in aid of their resources, out of the surplus that has accrued to us on the Imperial account. The total amount of these grants is Rx. 700,000, and thus the surplus of the year is reduced from Rx. 4,759,400 to Rx. 4,059,400. The money may be described as expenditure brought to account by anticipation, that is to say, it goes at present merely to swell Provincial balances, and when actually spent on the purposes in consideration of which it is granted, it has not again to be charged against the surplus of the year, but passes through the Provincial adjusting entry.

5. The detail of the differences between the Revised Estimates for 1898-99, as now presented, and the amounts taken in the Budget Estimates prepared twelve months ago are set out in the following statement:—

Estimates of 1898-99.

	Budget.	Revised.	Revised Better.	Revised Worse.
ENGLAND.				
STERLING IN ENGLAND—				
Revenue . . . . £	188,300	232,500	44,200

NET EXPENDITURE CHARGED AGAINST REVENUE IN INDIA	60,301,500	60,743,700	...	442,200
Surplus .	891,400	4,059,400	3,168,000	

(a) Including interest and receipts under Civil Works.

(b) This entry in the Indian portion of the accounts is a *minus* one, as the interest passed to the charge of Railway and Irrigation is greater than the whole amount of interest payable in India.

6. The first point to note is that, except for a small falling-off under Stamps and Registration, every one of the Revenue heads shews better results than anticipated in the Budget Estimates. The improvement under Land Revenue is mostly in Burma and the North-Western Provinces. In Opium we have got much better prices in Bengal than we estimated for, namely, Rx. 4,164,000 against Rx. 3,900,000, and in Bombay the low rate of the pass-duty, as compared with previous years, has led to a revival of the export which last year shewed a very considerable decline. The increase in Salt Revenue, which now produces 9 crores against the 8½ which it gave us in the two famine years, is a satisfactory indication of the improvement in the condition of the people, and the Customs Revenue continues to increase as trade continues to flourish.

7. Post Office and Telegraph shew a falling-off, due in the latter case partly to the cessation of hostilities on the North-Western Frontier, but chiefly to the more extensive use of deferred telegrams which are now delivered by hand, and in the former case to reduction of rates of postage. We calculate that by the increase, from one tola to one-and-a-half, of the unit of weight for inland postage we diminish the annual revenue by Rx. 60,000, and by adopting the Imperial Penny Postage (for India, one anna) we give up Rx. 40,000. A considerable portion of this last item will be recovered for us by an arbitration given in our favour, in respect of the distribution, between the English and the Indian Post Offices, of the subsidy charges payable to the Peninsular and Oriental Company and by reductions of the scale of charge in respect of continental transit.

8. Under Railways—Net Earnings—we have received Rx. 778,100 more than we estimated, the important items being—

		Rx.
1. North-Western	Better	410,000
2. Great Indian Peninsula	Better	416,000
3. Bombay, Baroda and Central India	Better	210,000
4. Rajputana-Malwa	Better	70,000
5. Eastern Bengal	Worse	110,000
6. Southern Mahratta	Worse	80,000
7. South Indian	Worse	50,000
8. Madras	Worse	55,000
9. Assam-Bengal	Worse	31,000
Net of the above	Better	780,000

The improvement is due generally to large exports of grain consequent on good winter crops, and in one case to postponement of works of repair and renewal.

The Plague is responsible for the falling-off on the Railways in Southern India.

An inferior jute crop and the postponement of jute deliveries in Calcutta was the cause of the worse result on the Eastern Bengal State Railway, and inclusion in the Working Expenses of the revenue share of repairs of earthquake damages caused the reduction on the Assam Bengal-Railway.

9. On the expenditure side, the first considerable improvement is under Opium, and is due to our failure to obtain as good a crop as we hoped. We have been able to recommence the building up of our Reserve, but the good season for which for many years we have waited has not yet come and the produce still remains short of our standard. There has also been a considerable saving in the expenditure of the Salt Departments, and fair amounts in the other Revenue Departments. The Civil Departments shew the usual considerable savings in their Budget Estimates, but the amount has been more than swallowed up in the expenditure caused by Plague. The head "Medical"

alone shews an excess over estimate of Rx. 327,800, most of which is in Bombay, and all of which for practical purposes falls on the Imperial Account, for the Provincial Governments are not able to bear the expenditure without assistance in the form of grants from Imperial.

10. The Army expenditure in India (ordinary) is less by Rx. 84,300 than estimated in the Budget, and of the Budget provision of Rx. 1,458,000 in India for Warlike Operations only Rx. 1,023,700 has been spent, the Military authorities having, from the very beginning of the year, found it practicable to reduce the forces maintained on the North-West Frontier.

Rate of Exchange.

11. The rate of exchange taken for the purpose of the Budget Estimate last March was $15\frac{3}{8}$ pence (or rather £1 = R15·6), that being the rate actually realized in 1897-98. At the opening of the year 1898-99 the current rate was $15\frac{13}{16}$ or $15\frac{7}{8}$, but under the influence of a strong demand in April and May (in each of which months the Secretary of State sold two millions sterling of Council Bills) it quickly rose to 16 pence and over. This demand was due mainly to unusually large exports of Rice, Wheat, and Seeds, the figures of which for the five principal months of export are shown in the following table :—

Exports (Value in Rupees) of Rice and Wheat (including Flour) and Seeds by Sea from British India during February to June 1896, 1897, and 1898.

		February.	March.	April.	May.	June.
Rice .	1896 . .	2,30,79,157	2,35,35,019	1,28,19,258	87,78,324	1,05,82,552
	1897 . .	2,05,74,378	2,26,73,146	85,42,095	74,73,502	72,22,085
	1898 . .	2,11,33,697	2,39,73,430	1,74,35,984	1,39,93,271	1,00,28,152
Wheat .	1896 . .	13,68,050	14,41,371	20,32,888	27,38,742	21,72,359
	1897 . .	3,28,052	1,83,882	3,47,801	5,03,124	6,14,133
	1898 . .	9,99,271	55,10,941	1,09,23,719	2,85,78,798	2,28,64,833
Seeds .	1896 . .	68,45,149	96,72,087	1,08,31,633	1,27,32,470	1,10,86,314
	1897 . .	25,08,515	30,02,053	43,92,610	1,09,06,210	85,56,518
	1898 . .	58,76,128	74,23,872	88,45,785	1,25,27,552	1,16,97,108
Total all three.	1896 . .	3,12,92,356	3,46,48,477	2,50,83,779	2,42,49,536	2,38,41,225
	1897 . .	2,34,10,945	2,58,59,081	1,32,82,506	1,88,82,836	1,63,92,736
	1898 . .	2,80,09,096	3,69,08,243	3,72,05,488	5,50,99,621	4,45,90,093

12. The position thus gained at the beginning of the year has never been lost, and the rate has continually fluctuated about 16 pence, now a little over it and now a little under it. In the latter half of the year the rate has never been below $15\frac{15}{16}$ pence. The drawings have now for some time stood at Rx. 700,000 a week, and we expect when the year closes to have remitted by Council Bills £19,000,000 equal to Rx. 28,540,000, giving, as nearly as possible, an average rate of sixteen pence. The Revised Estimates for 1898-99 are accordingly made up at this rate.

13. For next year I have made the modest estimate of $15\frac{3}{4}d.$ I fully anticipate we shall realize, as this year, something closely approaching to 16 pence, but our continual practice in India is to avoid sanguine estimating, and following this principle I am loth to take a figure which may have the taint of being, under existing circumstances, the best possible.

14. It may be noted that not only are the remittances of the current year the largest on record (there being hitherto only one year, 1881-82, in which they exceeded £18 millions), but we have in addition to these remittances received in India in exchange for silver at the rate of Rs. 15 per £ sterling, Rx. 2,616,400 of gold which we now hold as part of the currency reserve in addition to Rx. 255,400 similarly held on 1st April 1898.

Budget Estimates, 1899-1900.

15. The Budget Estimates of Revenue and Expenditure for the coming year 1899-1900 made up at this rate of exchange shew a surplus of Revenue of Rx. 3,932,600. It will be best perhaps to explain the figures by comparing them with the Revised Estimate for the current year, as exhibited in the Statement in paragraph 5 above.

Budget Estimates of 1899-1900 compared with the Revised Estimates of 1898-99.

ENGLAND.	Revised, 1898-99.	Budget, 1899-1900.	1899-1900, Better than 1898-99.	1899-1900, Worse than 1898-99.

(a) Including Interest and Receipts under Civil Works.

16. Under Revenue heads in India the collection of arrears of Land Revenue still goes on, but we do not expect next year quite so much as in the current year. Under Salt and Customs we expect a slight advance over the Budget Estimates of 1898-99, but have not estimated to receive so great an advance over these as we shall certainly receive in the current year. The current prices of Opium warrant our estimating for a considerable increase in the revenue under this head.

17. Under Railways the estimates are for a small advance in net earnings. The details are as follow:—

	Budget, 1898-99.	Revised, 1898-99.	Budget, 1899-1900.
	Rx.	Rx.	Rx.
State Railways—Gross	19,382,600	19,695,800	20,237,100
Working Charges	9,770,500	9,876,600	10,047,000
Net	9,612,100	9,819,200	10,190,100
Guaranteed Railways—Net	2,424,000	2,995,000	3,192,500
TOTAL NET	12,036,100	12,814,200	13,382,600

18. The Great Indian Peninsula Railway contributes Rx. 130,000, the Madras Railway Rx. 65,000, and the East Indian Railway Rx. 60,000 of the improvement shewn in Budget, and we expect the Eastern Bengal and Southern Mahratta Railways to recover from their low figures of 1898-99. The increasing mileage of the East Coast Railway will also bring in better returns; on the other hand, there are heavy renewals on the North-Western Railway to be provided for. Under Civil Departments we have to provide for considerable additions to Police expenditure (partly due to Plague); and we have also made fairly ample estimates for Plague expenditure, the charges under "Medical" in India being as follows:—

	Total.	Including Plague Expenditure.
	Rx.	Rx.
1894-95	1,003,438	...
1895-96	1,020,077	...
1896-97	1,065,158	19,000
1897-98	1,328,952	297,000
1898-99, Revised	1,542,900	508,900
1899-1900, Budget	1,678,100	354,200 + 209,500

The last-mentioned Rx. 209,500 is shewn separately, because it is in the nature of a reserve in the "India" Section of the Accounts, and if actually spent, it will not pass under "Medical" in the Imperial Portion of the Accounts, but be dealt with as a transfer.

19. We have increased the total provision for Military Works to Rx. 1,322,300, against expenditure in 1897-98 and 1898-99 of about Rx. 1,168,385 and Rx. 1,197,600, the purpose of the increase being to meet charges likely to fall upon us in respect of places of defence and similar works on the North-West Frontier.

20. The Military Estimates shew large savings in India as compared with the current year, the India figures being—

	Ordinary Expenditure.	Warlike Operations.	Total.
	Rx.	Rx.	Rx.
1896-97	17,243,137	18,206	17,261,343
1897-98	16,514,547	3,847,992	20,362,539
1898-99, Budget	16,625,800	1,458,000	18,083,800
1898-99, Revised	16,541,500	1,023,700	17,565,200
1899-1900, Budget	16,873,400	38,900	16,912,300

No Remission of Taxation.

21. In view of the surpluses as shewn in the Revised and Budget Estimates, the Government of India have carefully considered the question whether they should propose, at present, any remission of existing taxation. The conclusion to which they have come is that any such proposal would be premature, and this mainly on two grounds. The first is that we have, as it were, to make up for arrears. As stated in my opening paragraph, we have had in the past two years deficits aggregating Rx. 7,064,233, and we ought to regard ourselves as under an obligation to recover our position by accumulating counterbalancing surpluses. The second and weightier reason is that we have in contemplation, as is well known, certain extremely important measures of currency reform, which are under the consideration of a Committee sitting at the India Office in London. Whatever the advice of that Committee may be, we consider we are bound to prepare for any measures that may result from it by preserving as strong a financial position as possible, and we consider we would act unwisely if we were to reduce our financial strength by remitting existing taxation and run the risk of finding ourselves, by our own action, less free than we would otherwise be to undertake any measures of currency reform that may seem desirable.

Railway Construction.

22. I have, in former Financial Statements, referred to the policy recently established of laying down a programme of Railway Construction for three years in advance. The first of these programmes was for the three years ending 31st March 1899. This programme was at first intended to include an expenditure of 27 crores of rupees, but was afterwards extended to 29⅔ crores. Latterly, however, financial difficulties have obliged us somewhat to curtail the expenditure, and we expect to expend against the programme of 29⅔ crores the following amounts :—

	Rx.
In 1896-97 (actuals)	8,658,800
„ 1897-98 („)	8,145,500
„ 1898-99 (Revised Estimate)	8,387,500
TOTAL .	25,191,800

23. I leave to my Honourable Colleague Sir A. Trevor the task of stating in detail the results of the expenditure. It is sufficient here to set them out in the most general form (the figures of the Railways of Native States and of other Railways that lie outside our accounts being omitted) :—

	Standard Gauge.	Metre Gauge.	Special Gauges.	Total.
March 31, 1896—				
Mileage open . . .	10,430	6,842	36	17,308
„ under construction .	1,490	1,086	...	2,576
TOTAL .	11,920	7,928	36	19,884
March 31, 1899—				
Mileage open . . .	11,728	7,522	36	19,286
„ under construction .	814	971	77	1,862
TOTAL .	12,542	8,493	113	21,148

24. I divide the Railway Construction in the present estimates, for convenience sake with reference to our accounts, into four categories, namely:—

First.—State Railway Construction; money found by Government, but also by debentures in the case of the East Indian and Assam-Bengal Railway Companies.

Second.—Construction by Assisted and Working Companies out of funds raised by them or in some cases advanced by Government to them. Also Branch Line Companies under a firm guarantee.

Third.—Open line capital and new construction by the old Guaranteed Companies.

Fourth.—Construction by Companies outside the accounts of the Government, and also construction by Branch Line Companies on rebate terms.

The above classification slightly differs from that of last year's Statement, as under new arrangements every portion of the above comes within the programme, except the fourth category, *viz.*, Company construction outside the accounts of Government, and Branch Line Companies not under firm guarantee.

25. The Estimates of Capital construction for the two years 1898-99 and 1899-1900 now stand as follows, the figures for programme expenditure in the Revised Estimate of 1898-99 being modified so as to correspond with the new classification:—

	Revised Estimate, 1898-99.	Budget Estimate, 1899-1900.
	Rx.	Rx.
FIRST CATEGORY—STATE RAILWAYS—		
Funds available by Famine Grant	695,400	490,000
Grant under—		
48.—State Railway Construction	2,882,200	3,465,000
East Indian Railway Company's Debentures	1,573,800	750,000
TOTAL	5,151,400	4,705,000
SECOND CATEGORY—ASSISTED COMPANIES	3,155,300	3,009,900
THIRD CATEGORY—OLD GUARANTEED COMPANIES	851,600	1,107,800
TOTAL "PROGRAMME"	9,158,300	8,822,700
Add—FOURTH CATEGORY (outside programme)	1,470,100	950,300
TOTAL	10,628,400	9,773,000

N.B.—The Chittagong Port Works, connected with the Assam-Bengal Railway, shown in last year's Statement as Miscellaneous Public Improvements, are now included as "Railway Construction."

26. Having now carried to a fairly successful issue this policy of temporary activity in railway construction, we think it wise, both from a railway and from a financial point of view, to curtail for a time the rate of progress of railway construction. The nine or ten crores a year sanctioned in 1897 was not meant to be permanently adopted, and we deem it desirable now to allow a short time for the earning capacity of the lines recently constructed to develop itself, before again undertaking special burdens in the direction of capital outlay upon railways.

27. For these reasons we deemed it advisable to fix about 20 crores as the limit of our expenditure for the next three years; and a programme was accordingly prepared for expenditure as follows:—

	Rx.
1899-1900	6,772,700
1900-1901	6,728,400
1901-1902	6,821,000
TOTAL	20,322,100

but we have had to alter these figures for the following reason. In the Budget Estimates of 1898-99, we proposed to spend under the first three years' programme a sum of Rx. 10,788,900 in the year 1898-99, but the inability of the workshops in England to meet the demands which were made upon them by ourselves and the various constructing companies has reduced the expenditure of 1898-99 to Rx. 8,387,500. Many of the orders, however, will be completed and paid for in 1899-1900, and we have therefore to provide, under the new three years' programme, in 1899-1900 not only the intended Rx. 6,772,700, but a considerable amount in addition, which may be regarded as arrears of the old programme handed on to the new one. The amount estimated for is therefore Rx. 8,822,700.

28. The following are the entries under the first category (State Railways) :—

	Revised, 1898-99.	Budget, 1899-1900.
Expenditure by State Agency—		
Open lines—	Rx.	Rx.
North Western	228,300	212,300
Oudh and Rohilkhand	95,700	72,800
Eastern Bengal	150,500	257,200
East Coast	60,000	40,000
Warora Colliery	—6,300	—2,100
Umaria Colliery	—7,100	—100,000

TOTAL	2,024,400	1,193,700
Expenditure by Agency of Companies—		
Open lines—		
East Indian including extensions	1,450,000	1,500,000
Rajputana-Malwa system	1,600	90,000
Tirhoot	157,000	40,000
Bhopal	5,400	10,000
Dhond and Manmad	5,500	16,000
South Indian	—200,000	50,000
Guntakal-Mysore Frontier	—400	...
Madras-Ennore	200	...
TOTAL	1,419,300	1,706,000

		Revised, 1898-99.	Budget, 1899-1900.
Lines under construction—		Rx.	Rx.
Assam-Bengal	Land, Part I	22,000	20,000
	Construction, Part II	1,134,400	762,000
	Chittagong Jetties	46,000	18,000
Hajipur Katihar Extension		250,000	200,000
Madura-Paumben		...	100,000
Tinnevelly-Quilon		...	70,000
TOTAL		1,452,400	1,170,000
Lump deduction on account of probable lapse		250,000	...
Reserve		...	162,600
TOTAL FROM IMPERIAL FUNDS		5,151,400	4,705,000

29. The items in the second category (Assisted Companies) are:—

	Revised, 1898-99.	Budget, 1899-1900.
	Rx.	Rx.
Bengal-Nagpur	1,861,000	1,770,000
Indian Midland	203,000	165,000
Burma Railways	700,000	800,000
Bengal Central	78,100	40,000
Lucknow-Bareilly	15,300	6,900
Southern Mahratta	44,900	40,000
Mysore	35,000	20,000
Hardwar-Dehra	150,000	88,000
Bhramaputra-Sultanpur	68,000	80,000
TOTAL	3,155,300	3,009,900

30. The estimate under the third category (old Guaranteed Companies) provides for:—

	Revised, 1898-99.	Budget, 1899-1900.
	Rx.	Rx.
Open Line Capital—		
Great Indian Peninsula	73,600	74,000
Madras	20,100	60,000
Bombay, Baroda and Central India	459,100	410,000
Extensions—		
Calicut-Cannanore	70,600	200,400
Amalner Palgaon-Chalisgaon Dhulia	228,200	363,400
TOTAL	851,600	1,107,800

31. The principal projects classed under the fourth category and outside the "programme" are:—

	Revised, 1898-99. Rx.	Budget, 1899-1900. Rx.
Bengal Dooars Extensions	40,000	200,000
Bengal and North-Western Railway Extensions	445,000	365,000
Tapti Valley	650,000	230,000
South Behar	204,000	77,500
Smaller Branch Lines	131,100	77,800
TOTAL .	1,470,100	950,300

Capital Expenditure on Irrigation.

32. The amount of Rx. 750,000 has hitherto been provided for expenditure on Irrigation. In 1899-1900 a further amount of Rx. 100,000 is provided under this head. The grant for 1898-99 which was of the usual amount, Rx. 750,000, has not been fully worked up to, owing chiefly to the approaching completion of the Chenab Canal and partly to it not having been found possible to start work on the Jhelum Canal in the early part of the year.

33. The principal works under this head are at present:—

	Revised, 1898-99 Rx.	Budget, 1899-1900. Rx.
Mandalay Canal	90,000	100,000
Fatehpur Branch of the Lower Ganges Canal	63,600	42,600
Chenab Canal	151,500	80,000
Jhelum Canal	36,200	210,000
Jamrao Canal	142,200	133,900
Other Projects	208,700	283,500
TOTAL .	692,200	850,000

Remittance and Debt.

34. The following account shews in a shortened form the requirements of the Secretary of State; the figures are drawn up so as to shew separately the transactions on account of Government, and the transactions arising out of the operations of Railway Companies:—

	Revised, 1898-99. £	Budget, 1899-1900. £
Requirements on Government Account—		
Excess of expenditure on Revenue Account	16,091,200	16,324,500
Expenditure not charged to Revenue .	791,100	682,100
Net payments on Remittance Accounts, etc	225,400	268,800
Total Requirements	17,107,700	17,275,400
Transactions of Railway Companies—		
Net receipts on account of Capital . .	2,183,100	1,970,000
Payments for Stores, etc. . . .	2,718,000	3,181,700
Net Outgoings .	534,900	1,211,700
Net Funds required*.	17,642,600	18,487,100

35. The following figures shew the manner in which the above requirements have been or are to be financed:—

	Revised. 1898-99.	Budget, 1899-1900.
	£	£
By Council Bills (net Remittance) . .	19,000,000	17,000,000
By addition to Permanent Debt . .	1,912,800	...
Less reduction of Temporary Debt . .	—1,500,000	...
By reduction of Cash Balance . .	...	1,487,100
Deduct—Addition to Cash Balance .	—1,770,200	...
	17,642,600	18,487,100

36. In last year's Financial Statement I mentioned that the Secretary of State intended, besides renewing £6,000,000 outstanding temporary debt, to raise £6,000,000 permanent debt. This amount was raised in July in the form of India 2½ per cent stock, but it was issued at a considerable discount (namely at a rate of £88 10*s*. 5*d*. per cent), and produced only £5,297,700 in cash. With the money he discharged permanent debt to the extent of £3,384,900, so that the net amount raised by addition to sterling debt was £1,912,800. The Secretary of State has decided that the discount on the loan, *viz.*, £702,300, shall not be charged upon the revenues of the year, but shall be discharged by a Sinking Fund at the rate of interest borne by the loan, *viz.*, 2½ per cent, lasting over 50 years. There are already one or two Sinking Funds of the kind in connection with the sterling debt; £12,622 being the total charge appearing in the Accounts of 1897-98. The amount added by the new Sinking Fund is about £7,000.

37. The heavy drawings of the year, by Council Bills, enabled the Secretary of State to improve upon his intention of renewing the £6,000,000 outstanding temporary debt, and he renewed only £4,500,000 of it. The remainder of the excess of drawings went towards increase of the Cash Balance, which is estimated to stand, on 31st March 1899 at the unusually high figure of £4,304,400.

38. For next year, 1899-1900, the Secretary of State estimates to draw £17,000,000 by Council Bills, and though he does not estimate for any increase or decrease in either permanent or temporary debt, he considers that in view of the high balances which his Estimates, both Revised and Budget, show, he may find it possible to pay off some of the outstanding temporary debt.

39. In March last we estimated that we would have to raise a rupee loan of Rx. 3,000,000 in India, but as the time approached for our doing so, we found both that improved revenues had added to our resources, and the market was not favourable for so large a loan. We therefore limited our proposed loan to an amount of Rx. 1,200,000 under 3½ per cent conditions, and this amount was raised on August 24th at an average rate of R94 12½ annas per cent. The price remained about this figure for some months, but has recently advanced to over par.

40. We reckon that in India we shall be able next year to meet all the demands upon our Treasuries without raising any new debt, but it must be understood that all these announcements about the amount of contemplated remittances and loans are subject to the usual reservation of entire liberty to the Secretary of State to alter his plans as he may find occasion.

PROVINCIAL FINANCE, 1892 to 1899.

(The tabulated figures in this part are hundreds of Rx., that is, two ciphers are omitted.)

41. The progress of Provincial Finance is easiest studied by considering separately:—

First.—The amount of net Revenue, of which a definite portion settled by the terms of the "Contract" is at the disposal of the Provincial Government for its expenditure on Civil Administration.

Second.—The modification of this Provincial share of net Revenue, caused by special arrangements, different in each Province, in connexion with certain portions of Irrigation and Railway Administration, involving in some cases a small net outlay and in some a small net revenue.

Third.—The appropriation of the funds thus obtained towards the Provincial Expenditure, and especially the relation between the increase of expenditure and the increase of available funds.

42. The first figures to be set out are, therefore, the totals of the net revenues, that is, the revenues less expenditure directly charged against them. They are as follow, the figures being quite independent of any considerations as between Imperial and Provincial:—

Total Ordinary Revenues—

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.
Central Provinces	1,248,6	1,244,0	1,231,2	1,171,3	1,252,9	1,089,5	1,048,5	1,322,9	1,398,7
Burma (*a*)	3,643,3	...	...	...	...	...	3,948,2	4,147,0	4,012,8
Assam	814,0	842,9	962,5	992,1	1,003,4	1,015,3	995,8	1,047,3	1,047,3
Bengal	7,081,6	7,325,2	7,445,8	7,606,9	7,714,8	7,823,5	7,835,9	7,998,8	8,058,9
North-Western Provinces and Oudh	7,677,8	7,716,1	7,778,9	7,589,1	7,866,2	6,655,6	7,264,8	8,419,1	8,470,1
Punjab	3,060,1	3,133,8	3,261,1	3,223,5	3,290,5	3,224,3	3,409,8	3,561,8	3,530,4
Madras	6,817,1	7,106,2	7,469,2	7,645,6	7,719,3	7,478,8	7,863,2	8,015,5	7,988,0
Bombay (*b*)	5,412,1	5,489,1	5,646,1	5,550,6	6,018,2	5,367,0	5,625,2	5,950,2	5,943,0

(*a*) The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

(*b*) The figures relating to alienated Land Revenue, an entry peculiar to Bombay, are omitted from both sides.

43. The next statement shews the portion of these revenues which, according to the Provincial contract in each case, is credited to Provincial Account. The figures stand as follows, and it may be noted that the revision of the contract made with effect from 1897-98 onward, was such as to cause little change in the total of the Provincial share, except in the two Provinces of Bengal and Madras where it was reduced by Rx. 90,000 and Rx. 130,000 respectively, and in the North-Western Provinces where it was increased by about Rx. 120,000, namely, the cessation of a temporary reduction of Rx. 50,000, and a direct addition of about Rx. 70,000. (The figures are as they stand before the addition of the contributions from Imperial entered at the end of the table in paragraph 47 and the special grants-in-aid and expenditure therefrom of which mention is made in paragraphs 65 and 66 below):—

Provincial Share of Revenues—

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.
Central Provinces	653,3	652,5	647,2	623,9	649,6	598,9	566,1	713,1	750,8
Burma (*a*)	2,604,1	...	...	...	...	...	2,768,5	2,891,8	2,822,5
Assam	477,1	500,3	549,7	556,4	566,0	575,9	564,3	626,0	626,3
Bengal	2,767,1	2,899,4	2,941,4	3,049,2	3,102,6	3,160,9	3,552,1	3,517,5	3,549,3
North-Western Provinces and Oudh	2,235,8	2,254,4	2,284,9	2,218,7	2,309,8	1,959,7	2,101,5	2,719,2	2,729,1
Punjab	1,382,6	1,414,0	1,451,2	1,440,0	1,476,8	1,483,5	1,571,3	1,631,2	1,611,6
Madras	2,368,7	2,491,0	2,587,9	2,653,5	2,676,7	2,627,1	2,588,5	2,655,7	2,632,4
Bombay	2,404,4	2,451,5	2,490,8	2,481,2	2,601,2	2,405,4	2,475,9	2,554,9	2,569,7

(*a*) The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

44. I offer some comments on these two statements, shewing them in parallel columns :—

	Total Imperial *plus* Provincial.	Provincial Share only.
Central Provinces.	Fairly continuous progress—a small drop in 1894-95 due, as the details shew, to failure of Land Revenue—Recovery in 1895-96. Then a serious loss of Revenue in the two famine years 1896-97 and 1897-98. But complete recovery in the early future is anticipated.	The Province obtained in the earlier years little or no margin of revenue beyond that allowed for in the Contract of 1892, and in the famine years there was very great loss as compared with that standard. If the anticipations for 1898-99 and 1899-1900 are realized, it will be very fairly off.
Burma .	No figures are here shewn for the years preceding 1897-98, the accounts having been completely changed in that year by the incorporation of Upper and Lower Burma as a single Province of account. The revenue is considerably in excess of that which was taken as the standard for the framing of the Provincial Contract of 1897. The falling-off in 1899-1900 is under "Forests," and may perhaps be due only to cautious estimating.	Revenue considerably in excess of the standard taken for the contract.
Assam .	Revenue steadily progressive. The effect of the earthquake in 1897-98 is shewn only in a slight slackening of the rate of progress.	Has all along enjoyed a considerable excess of revenue—at present nearly 30 per cent (Rx. 170 to 190 thousands) over the contract figure of 1892. But of this amount Rx. 33,000 represent a special addition made to meet the South Lushai expenditure transferred to Assam.
Bengal .	Also shews a steady progressive revenue. Owing presumably to the famine the progress from 1896-97 to 1897-98 was rather less than in other years. The falling-off was mainly under "Excise," as Land Revenue in Bengal is little subject to variation in consequence of famine.	The accounts of the Province were greatly affected by the withdrawal from the Province in 1897 of the extremely progressive revenue of the Eastern Bengal Railway the share of Revenue substituted therefor not being so progressive. Combining the ordinary revenue and the Railway account the figures stand thus:— Standard of 1892 . . . 2,806,3 1892-93 . . . . 2,962,4 1893-94 . . . . 3,011,0 1894-95 . . . . 3,193,2 1895-96 . . . . 3 235,7 1896-97 . . . . 3,328,0 1897-98 . . . . 3,297,8 1898-99 . . . . 3,238,7 1899-1900 . . . 3,267,0 which certainly may be called fairly progressive, the figures of the last two years being due in part, it may be hoped, to caution in estimating. The new contract, commencing from 1897-98, involved a reduction of about Rx. 90,000 in the Provincial share.

	Total Imperial *plus* Provincial.	Provincial Share only.
North-Western Provinces.	A fairly progressive revenue till the famine year, then a tremendous falling-off in Land Revenue (1896-97). Partial recovery in 1897-98 and in the following two years very high figures due to recovery of famine arrears.	The unequal operation of the Irrigation account and the change effected in it in 1897 renders it necessary to combine the figures for this Province as in the case of Bengal. They stand thus— Standard of 1892 . . . 2,215,4 1892-93 . . . 2,265,2 1893-94 . . . 2,314,5 1894-95 . . . 2,234,1 1895-96 . . . 2,170,3 1896-97 . . . 2,160,2 1897-98 . . . 2,432,4 1898-99 . . . 2,641,5 1899-1900 . . . 2,632,2 The story of these figures is shortly this,—At first a little improvement over the standard taken for settlement. In 1895-96 a failure of irrigation revenue, 1896-97 famine, and consequent failure of revenue. Thereafter the rapid recovery of the Province and the realizations of famine arrears of revenue bring in ample resources. The new contract, commencing from 1897-98, increased the assets by about Rx. 120,000.
Punjab .	Steady progress as reckoned over the whole period, but a slight set back in the famine year.	The same as in the other column.
Madras .	Shews a very progressive Revenue, the advance being only temporarily interrupted by famine.	Rapid increase of revenue up till the famine year—from that time figure fairly steady, but not advancing. The Provincial share from 1897-98 onwards would stand about Rx 130,000 higher but for the revision of contract which came into operation from that year.
Bombay .	An increase up to the famine year, then a considerable set back which has not yet been fully recovered.	The same remark as the first one in the case of Madras.

45. The sets of figures which I next shew are those relating to the Irrigation and Railway portion of the Provincial contracts, which I have described as coming in in modification of the amount of ordinary revenue otherwise at the disposal of the several Governments. The amount of modification thus imposed has, except in two cases, only slightly changed during the period under review, and the figures are, therefore, of no great importance except in the cases referred to, namely, Bengal and the North-Western Provinces, and these have been dealt with above:—

Railways and Irrigation Accounts—

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.

C

46. The next step is to examine the expenditure of the various Governments and observe how far they have kept the increase of it within the limits imposed by the increase of revenue. I shew separately the ordinary expenditure and the direct expenditure upon famine and plague.

47. The details are as follow, and the figures have to be compared with the general statement of available resources in the right column under paragraph 44 above :—

Expenditure Account—

	Contract, 1892.	1892-93.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.	1898-99, Revised.	1899-1900, Budget.

* The figure against Burma in the column "Contract, 1892" represents the Contract of 1897.

48. *Central Provinces.*—The expenditure up to the famine year rose 2 or 3 lakhs (Rx. 20,000 or 30,000) above the standard of 1892; and since, as already observed, there was no margin of revenue, this resulted in the exhaustion of the ample balance, Rx. 205,400 with which the Province started. The strain of the famine year reduced the balance (apart from direct famine expenditure) still further to a deficit of Rx. 52,600 in 1896-97, and a further deficit of Rx. 204,100

in 1897-98, both of which were made up by grants from the Imperial Exchequer. The Province started in 1898-99 without any balance at all, and it is now expected that there will be a deficit in the year of Rx. 11,200, which must again be made up by a grant from Imperial Revenues. In 1899-1900 its estimated expenditure is well within its means.

The Province has taken practically no share of the cost of famine, which has been entirely Imperial—Rx. 1,640,245.

49. *Burma.*—Has not spent up to the rate of its increase of revenue, and has in consequence an ample and increasing balance. It is arranging now to expend part of the amount in meeting certain demands for Provincial Public Works, and has also made other proposals for expenditure on the public services.

50. *Assam.*—Had a comfortable balance, all along, of 10 lakhs (Rx. 100,000) more or less, keeping its increase of expenditure well up to, but not in excess of, its increase of revenue. The repair of earthquake damages imposed heavy charges in 1897-98 and 1898-99, which have largely exhausted the Provincial balance of Rx. 94,400 and absorbed also a grant of Rx. 160,000 by the Government of India; the balance being reduced for 31st March 1899 to about Rx. 25,000. In 1899-1900, after providing for absolutely necessary expenditure for Public Works and for the repair of earthquake damages, the estimates shew a deficit of Rx. 54,900.

The expansion of ordinary expenditure has been very considerable during the period under review.

51. *Bengal.*—The revenue of this Province, as above shewn, has afforded a margin for expansion of Provincial expenditure—namely, Rx. 2,806,300 in 1892 to (say) Rx. 3,300,000 in 1899-1900. The expenditure, however, was kept well in hand, so that the balance increased from Rx. 225,500 in March 1893 to Rx. 582,000 in March 1896. But this high balance sank to Rx. 92,200 two years later, as Rx. 518,400 out of it were spent in direct famine and plague charges. The ordinary expenditure in the two years now under estimate is taken at Rx. 3,141,600 and Rx. 3,272,000, which may be regarded as within the means of the Province, though it leaves a small deficit on the estimates of 1899-1900.

The Imperial Exchequer incurred famine charges in Bengal up to a total of Rx. 576,821 (about half of the total), but did not otherwise contribute by grants-in-aid to the resources of the Province.

The Province of Bengal has not had much plague expenditure to bear out of its own account, but we have made to it in 1898-99 a grant-in-aid of Rx. 20,000 which it will distribute to those Municipalities and Local Bodies whose funds have been most severely affected by expenditure on plague.

52. *North-Western-Provinces.*—The Province had the advantage of starting in 1892 with a large balance still remaining on the credit side, but the rate of its annual expenditure was in excess of its annual revenue (having been found by reduction of balances), and when in the year before the famine a very favourable monsoon caused a failure of irrigation revenue (an important item in North-Western Provinces finance), the Province found its balance on March 31, 1896, reduced below the stipulated minimum of 20 lakhs (Rx. 200,000), and, as already said, a rate of current expenditure in excess of its current revenue by between 10 and 15 lakhs. During the strain of the famine year nothing could be done to amend this state of things, and the balance was overspent by Rx. 263,600; the amount being accordingly made up by grants-in-aid out of the Imperial Exchequer in the two years 1896-97 and 1897-98.

Under these circumstances, the Province contributed nothing towards the direct famine expenditure, the whole of which, Rx. 2,064,025, was found out of Imperial resources.

For 1898-99 it stands, as explained, without any balance to its credit, and its estimates stand as follows:—

	1898-99. Rx.	1899-1900. Rx.
Revenue Accounts	2,641,500	2,632,200
Expenditure Accounts	2,421,500 (a)	2,607,700 (b)
Results	+ 220,000	+ 24,500

(a) Includes Rx. 19,800, Plague. (b) Includes Rx. 20,800, Plague.

The handsome surplus which comes in in 1898-99 is due to the recovery by the North-Western Provinces of the arrears of the revenue due in 1896-97 and 1897-98, in compensation for the loss of which Imperial made the grants-in-aid of Rx. 263,600 above alluded to. In the coming year, 1899-1900, the Government, North-Western Provinces, propose to increase their scale of expenditure all round to a rate which they will not be able to maintain after the arrear collections (which add some lakhs to the present scale of revenue) are exhausted and the revenue falls back to its ordinary amount.

In anticipation of this surplus of 1898-99 and 1899-1900 it was stipulated that the benefit of these arrear collections was (*quoad* the Provincial share) to be considered as not applicable to current expenditure, but to be reserved (to the extent of 75 per cent of it) for building up the exhausted Provincial balance. The Government, North-Western Provinces, have fulfilled this pledge, and are now appropriating these arrears to a temporary increase of expenditure bearing in mind the impending diminution in the amount of their annual income as compared with the figures of 1898-99 and 1899-1900.

53. *Punjab.*—The Province has all along proceeded on fairly prosperous lines. The balances which were continually diminishing before the famine year are now on the rise, and the expenditure is within the amount of revenue available. The Province escaped any severe share in the calamities of 1896 and 1897, and the Imperial expenditure on famine was less than 3 lakhs (Rx. 30,000), the Province itself contributing about 12 lakhs (Rx. 120,000) or, including "Local," nearly 16.

54. *Madras.*—The expanding revenues of this Province have carried it through its period of disaster. It contributed moderately, that is, a total of a little over 20 lakhs (Rx. 200,000), towards its famine expenditure, the Government of India having undertaken all the rest (*viz.*, Rx. 732,995) so as to leave the Province with an opening balance of Rx. 71,800 in 1898-99. The Government of India further propose to make a grant to Madras of the amount of direct famine and plague expenditure incurred by it in 1898-99, namely, Rx. 20,700, and to estimate for next year a similar grant of Rx. 64,100. They also grant a further sum of Rx. 30,000 in 1898-99, placing the amount at the disposal of the Local Government for grants-in-aid to such Municipalities and Local Bodies as have been most affected by plague expenditure. With its famine and plague expenditure thus made up the Province shows a fair surplus on its transactions of 1898-99, and a small deficit in 1899-1900.

The detailed figures are:—

	1898-99. Rx.	1899-1900. Rx.
Revenue Accounts	2,655,700	2,632,400
Deduct—Railway and Irrigation Account	310,900	313,900
Net available Revenue	2,344,800	2,318,500
Proposed Expenditure, excluding Plague and Famine	2,266,300	2,331,200
Plague and Famine	20,700	64,100
TOTAL	2,287,000	2,395,300

55. *Bombay.*—The continuous advance of the expenditure of the Province while the advance of the revenue was entirely set back by the famine year, has brought a strain upon the finances, irrespective of the direct effect of famine and plague expenditure. The figures may be set out as follows :—

	Revenue Account as modified by Irrigation and Railway figures.	Ordinary Expenditure Account.	Excess of Expenditure.	
	Rx.	Rx.	Rx.	
1892 standard	2,409,500	2,409,500		
1892-93	2,410,100	2,434,000	6,200	
1893-94	2,475,200	2,455,700		
1894-95	2,480,000	2,526,500		
1895-96	2,604,900	2,560,200		
1896-97	2,403,200	2,588,900	185,700	
1897-98	2,483,600	2,605,400	121,800	
1898-99	2,560,800	2,534,600	26,200	(Excess of Revenue.)
1899-1900	2,578,400	2,604,700	26,300	(Excess of Expenditure.)

The above figures exclude all direct Famine and Plague expenditure, and shew that the revenue and expenditure were in equilibrium for the first four years of the period under review, but that in the next two (the years of calamity), by reason of the falling-off in revenue, without an intermission of the increase in expenditure, the Provincial balance had to bear a reduction of Rx. 307,500.

The actual condition of the account till the end of 1897-98 was as follows :—

		Rx.
Balance, March 31, 1892		407,000
Reduced by excess of ordinary expenditure—	Rx.	
1892-93 to 1895-96	6,200	
1896-97	185,700	
1897-98	121,800	
		313,700
		93,300
Further reduction by direct famine and plague expenditure not included in the above—		
1896-97	35,400	
1897-98	191,500	
		226,900
Net over-expenditure of balance till 31st March 1898		133,600
Cancelled by general grant-in-aid in 1897-98 of		183,600
Leaving credit balance on 31st March 1898 of		50,000

The Revised Estimates for Bombay for 1898-99 show:—

Revenues Account	2,554,900	Surplus on ordinary account Rx. 26,200.
Irrigation and Railway Account	+ 5,900	
Expenditure Account, excluding Plague and Famine	2,534,600	
Plague and Famine Expenditure	354,800	

56. Putting the figures of the various provinces together, the following shews the facts up to March 31, 1898:—

Statement in Rx.	Famine and Plague Expenditure (direct). From Imperial sources.	From Provincial and Local sources.	Grants-in-aid by Imperial to Provincial.
Central Provinces	1,640,245	8,820	256,700
Burma	54,975	63,336	...
Assam	...	...	80,000 (a)
Bengal	576,821	553,951	...
North-Western Provinces	2,064,025	...	263,600
Punjab	27,502	157,920	...
Madras	732,995	228,601	...
Bombay	1,242,760	27,887	183,600

(a) For earthquake.

57. The Government of Bombay, both in respect of its Provincial account and in respect of its Municipalities, have been very hardly pressed by plague expenditure. They have submitted to us an examination of the financial condition of their principal Municipalities, and we have agreed to their giving out of their general revenues relief to their Municipalities to the extent of Rx. 228,078, of which the greater part goes to the City Corporation. Including this grant from their revenues, the Government of Bombay will have spent in direct charges of famine and plague—

	Famine. Rx.	Plague. Rx.	Total. Rx.
1896-97	24,000	11,400	35,400
1897-98	...	191,500	191,500
1898-99	24,800	330,000	354,800
Total			581,700

Out of the expenditure of the first two years, aggregating Rx. 226,900, the Provincial Government have met out of their ordinary revenues Rx. 43,300, and the balance Rx. 183,600 has been made up by special contributions by Imperial; in the same way its balance of Rx. 50,000, and Rx. 26,200, its surplus of 1898-99, fall far short of the charges Rx. 354,800 of 1898-99, and it is necessary for the Imperial Government to make a further grant-in-aid of Rx. 278,600 leaving the province, on April 1899, with an opening balance of *nil*. The total direct expenditure on plague and famine which has been borne by the province comes to Rx. 43,300 in the first two years and Rx. 76,200 in the last, or Rx. 119,500 in all.

It is anticipated that Rx. 126,400 of Plague expenditure will be incurred in Bombay in 1899-1900, and an equal amount of grant-in-aid from Imperial to Provincial has been estimated for in that year.

58. The grants shewn in the above paragraphs may be regarded as grants in the ordinary way of business, that is, grants made on the principle that in any case of extreme calamity, when Local aid has been exhausted, the charge must fall, as far as possible, on Provincial resources, and when they are exhausted the Imperial Government must bear the burden; and I think a liberal interpretation has been given to this Imperial responsibility, for we have taken over the direct Provincial expenditure on famine and plague of the two Provinces most affected by plague, without insisting upon their first defraying any part of it out of their own balances, and it is our desire at present to go still farther. On one or two past occasions, when Imperial finances have been subjected to great stress, we have called upon the Provincial Governments to give us aid out of their resources,

and under present circumstances, when Imperial finance by the recovery of exchange and from other causes is prosperous, and Provincial finance has been sore smitten by the consequences of famine and plague, we consider that a portion of our surplus cannot be better employed than in restoring the financial condition of the various provinces and relieving them from the financial difficulties which accompany the emergence from a state of famine and plague, so as to enable them to carry on their ordinary administration and meet their ordinary administrative necessities.

59. In the case of Bombay, though, as above described, we have made large grants towards the direct expenditure on famine and plague, yet the effect of these two calamities is still shewn in the falling-off in revenue and in indirect expenditure (on police and the like) which accompanies plague measures. We propose on these considerations to make to Bombay a grant of Rx. 150,000.

60. Bengal has not been affected by plague expenditure to anything like the same extent as Bombay; but, on the other hand, its finances have suffered from the very large extent to which the famine expenditure was met from Provincial and Local resources. We propose to make to it a similar grant of Rx. 150,000. This is in addition to the assistance already undertaken to be given from Imperial sources towards the European General Hospital at Calcutta, and also in addition to Rx. 20,000 mentioned in paragraph 51.

61. In Assam the only immediate difficulties arise in connection with earthquake damages. Towards this we have already given Rx. 160,000, and the Chief Commissioner has asked for Rx. 67,500 more. We propose now to close this account by a grant of Rx. 100,000.

62. The accounts of the Central Provinces are weighted only in respect of the very small balance it at present possesses, and the Estimates of 1898-99, as already stated, produces a deficit of Rx. 11,200; we propose to make it a grant of Rx. 50,000.

63. The claim of Madras arises mainly in respect of the fact that, at the last revision of the Provincial contracts, a larger resumption of revenue was made from it than from any other province. We propose to make a grant to it of Rx. 100,000, besides the above mentioned grants for the Famine and Plague expenditure, namely, Rx. 50,700 in 1898-99 and Rx. 64,100 in 1899-1900.

64. Burma in our opinion requires no assistance, nor, if we make a strict reckoning, do the North-Western Provinces or the Punjab. But the expenditure in these two provinces has been limited by the consideration of their general financial position, and they have also had to bear some expenditure, both direct and indirect, upon plague. We propose to give to the former a grant of Rx. 100,000, and to the latter a grant of Rx. 50,000.

65. All these amounts will be granted in the accounts of the year 1898-99, and the same amount (less the excess expenditure in the Central Provinces, Assam, Bengal, Madras, and Bombay already provided for by the Provincial Governments in their estimates) will be entered in the Estimates of 1899-1900 as expenditure out of Provincial balances under the head of Civil Works,—not as an invitation to the several Local Governments to expend the amounts in that year, but as a permission to them to do so (by re-appropriation or otherwise), if on a consideration of their general financial position and of the necessity of keeping a balance in hand, they deem it advisable. The amounts thus entered include in the case of Bengal and Madras the payments they may make against the grants of Rx. 20,000 and Rx. 30,000 referred to in paragraphs 51 and 54. The Provincial Governments should, however, bear in mind that the grants now made are grants made once for all, and that it will be dangerous for them to take them as warranting any expenditure of a recurring character; also that the Government of India in making the grants admits against itself no liability to make

good to Provincial Governments the loss or expenditure incurred by them in respect of the kinds of expenditure to which it has had regard in assessing the distribution of the grants; but admits merely that as in times of Provincial financial prosperity it has called upon the provinces to come to the aid of the general exchequer, so in times of Imperial financial prosperity it is reasonable and expedient that it should depart from a strict interpretation of its financial relations to the Provincial Governments and aid them when at the same time they have had, and have, special financial misfortunes pressing on them. Perhaps I may refer in this connexion to paragraphs 127, 128 and 129 of Major Baring's (Lord Cromer's) financial statement of 1883.

66. These several free grants, as they may be called, are specially entered in the figures attached to the Financial Statement and are in addition to those entered at the end of the statement in paragraph 47. They are:—

	Rx.
Central Provinces	50,000
Assam	100,000
Bengal	150,000
North-Western Provinces	100,000
Punjab	50,000
Madras	100,000
Bombay	150,000
TOTAL	700,000

67. We have made fairly ample provision next year, namely, Rx. 126,400 in connection with the estimates of Bombay, Rx. 64,100 in Madras, and Rx. 209,500 not yet appropriated, for expenditure on combating the plague, which we may not unlikely have to meet in the future out of Imperial resources as we have done in the past. But we are not prepared, in a general way, to pay, out of Imperial resources, all the direct expenditure which the plague may cause, or to relieve Municipalities and other Local Bodies from the burden which necessarily falls upon them in respect of sanitary and medical expenditure caused by the approach or the advent of plague. Still less can we undertake to make up to Provincial Governments the excess expenditure which may have to be incurred under Police or in the other ordinary departments of Provincial Administration, or invite them to deal with ordinary administrative demands upon them with the same freedom which might be possible and even advisable, were we not all in the presence of a threatening calamity that necessitates our husbanding our resources as far as is possible.

TWENTY YEARS' FINANCE.

68. Following up a purpose which I set before myself in last year's Financial Statement, I published, contemporaneously with the Finance and Revenue Accounts of last year, a summary of these accounts for the twenty years ending March 31, 1898. The summary was necessarily a statement of figures only, with no attempt at criticism, and I desire here to give some continuous account of the results which the figures shew, and explain where our Revenue and Expenditure have during these twenty years increased or decreased. The plan I adopt is to take one set of figures as the standard of the Revenue and Expenditure at the beginning of the period (or rather, say, for the year 1879), and another set as representing the standard for 1896 (that is, before the famine burst on the land). These seventeen years may be taken as a period of practically continuous financial history.

69. For the first of these two standards I take the average of the figures of 1878-79 and 1879-80. If we eliminate the war figures of these two years, which

in a comparison such as the present ought to be excluded, we obtain the following figures:—

		1878-79.	1879-80.
		Rx.	Rx.
Surplus or Deficit . . .		+ 2,134,098	– 1,227,893
War Expenditure, India . .		600,109	4,591,644
" England . .	£	76,110	174,480
Surplus if war be excluded . .		2,810,317	3,538,231

But we have still further to modify these figures by reason of the fact that they did not provide for the full famine liability of Rx. 1,500,000, the Famine Insurance being at the time in suspense, owing to the heavy war expenditure. This consideration adds Rx. 1,187,177 and Rx. 1,396,353 to the expenditure and reduces the surpluses to Rx. 1,623,140 and Rx. 2,141,878; or an average of Rx. 1,882,509.

That is, if we exclude consideration of war expenditure, and if we take Rx. 1,500,000 as the proper annual measure of famine liabilities, we had in 1879 a surplus of revenue of Rx. 1,882,500.

70. To find the similar figure for 1896, I take the figures of the Budget of that year which may be taken as expressing the standard of Revenue and Expenditure at the time. They are as follows, namely:—

		Rx.
Revenue in India (Budget)		97,316,800
Expenditure, England, net (Budget)	£	15,735,300
Exchange (according to rate actually realized) .		10,222,300
India (Budget), less Rx. 20,000 war . .		69,368,500
Add—Amount wanting to make up Rx. 1,500,000 Famine Insurance . .		500,000
Total . . .		95,826,100
Surplus of Revenue		1,490,700

71. We have therefore, comparing the standard of 1879 with that of 1896, a slightly worse position in the latter of the two years. I have made a careful analysis both of the increase of Revenue and of the increase of Expenditure between the two years, and I find it to be as follows:—

Imperial Account.

	Rx.	Rx.	Rx.
Increase of Revenue under Salt, Customs, Tributes and Miscellaneous	...	3,810,000	
Imperial Share of Increase of Revenue under Revenues provincially administered	...	5,429,400	
Increase of net Revenues under Post Office, Telegraph, and Mint . .	...	457,400	
Improvements under Debt Services, Railways, and Irrigation (excluding consideration of exchange) . .	6,327,500		
Deduct—Loss by exchange charged against Railway Liabilities . .	2,608,300		
		3,719,200	
Famine Insurance reduced in account by transfer to the preceding head of charges for interest on Indian Midland and Bengal-Nagpur Railways .	...	401,500	
Cessation of Railway Construction out of Revenue	...	845,800	
Total available Improvement .	...	...	14,663,300

Absorbed as follows:—	Rx.	Rx.	Rx.
Deterioration of Opium Revenue .	...	3,679,800	
Addition to charges for exchange. (Rate diminished from 19·85 pence to 14·45 pence)	7,337,300		
Deduct—Amount taken to Railway Account	2,608,300		
		4,729,000	
Deficit on Civil Administration of Upper Burma	...	455,300	
Army Services: net Charges increased from Rx. 16,693,700 to Rx. 22,167,800 (irrespective of exchange)	...	5,474,100	
Charges under "Political" increased from Rx. 427,100 to Rx. 898,700 .	...	471,600	
Civil and Miscellaneous charges in India increased from Rx. 1,189,200 to Rx. 1,541,300	352,100		
Less—Savings by decrease under Assignments and Territorial Pensions and Stationery . . .	223,800		
		128,300	
Sterling Expenditure other than Army, Debt Services, and Railways increased (excluding exchange) from £2,486,400 to £2,920,200 . .	...	433,800	
Total .	...	...	15,371,900
Excess of demand over available means	...	...	708,600

Provincial Account.

Increase of Provincial share of Revenue under Revenues provincially administered (*a*)	...	4,102,700	
Increase in net charges for Provincial Civil Administration from Rx. 14,374,900 to Rx. 18,160,800	...	3,785,900	
Balance of increase of Revenue not absorbed	...	...	316,800

(*a*) That is, ¼ of Land Revenue and of Excise: ½ of Assessed Taxes, Forest, and Registration: ¾ of Stamps.

The deterioration on Imperial Account, Rx. 708,600, less the improvement on Provincial Account, Rx. 316,800, gives a net deterioration of Rx. 391,800, namely, a reduction in the surplus of Revenue from the standard of Rx. 1,882,500 in 1879 to that of Rx. 1,490,700 in 1896.

72. This list shews that the resources made available by increased revenue and careful administration have practically been absorbed by (1) Loss of Opium Revenue, (2) Increase of Exchange Charges, (3) Increase of Military Expenditure, (4) Increase of Political Expenditure, (5) Increase of Provincial Expenditure, *i.e.*, of charges of Civil Administration, (6) Net Charges on account of Upper Burma.

73. On the first two of these no remark need be made here; they are misfortunes we have had to accept. The last may also be passed over without remark; the occupation of Upper Burma was a measure forced upon us by

political necessity, apart from any question of finance. The Province will, we trust, shortly meet the expenses of its civil administration, but naturally it does not as yet fully pay its way. The other three heads call for special explanation.

74. The subject of Military Expenditure is too vast to be entered on in detail. A general explanation of its increase was given by Sir Henry Brackenbury in the Budget Debate of 26th March 1896 and by Sir Edwin Collen on the same date in 1897. In respect of their military charges the Government of India feel the same necessity which presses upon all other Military Powers, and which has imposed upon even the most pacific nations increased burdens. Both our military system in its details and our general military and defensive policy are closely linked with those of England; and we cannot escape the necessity of increasing our defensive expenditure in the same way, though not perhaps to the same extent, that England does.

75. In illustration of this point I present the following figures; the English ones are taken from the Statistical Abstract of the United Kingdom, 1882 to 1896, pages 10 and 11:—

	Defensive Expenditure, United Kingdom (a.)			Defensive Expenditure, India (b.)
	Army.	Navy.	Total.	Army and Military Works.
	£	£	£	Rx.
1882-83	15,133,451	10,259,853	25,393,304	16,928,587
1883-84	16,095,326	10,728,781	26,824,107	18,079,134
1884-85	18,600,338	11,427,064	30,027,402	16,955,165
1885-86	17,027,084	12,660,509	29,687,593	17,340,369
1886-87	18,429,272	13,265,401	31,694,673	19,413,293
1887-88	18,167,196	12,325,357	30,492,553	20,548,766
1888-89	15,919,738	12,999,895	28,919,633	20,305,140
1889-90	17,345,812	13,842,241	31,188,053	20,511,504
1890-91	17,550,023	14,125,358	31,675,381	20,821,160
1891-92	17,258,900	14,150,000	31,408,900	22,570,532
1892-93	17,541,700	14,302,000	31,843,700	23,705,932
1893-94	17,939,700	14,048,000	31,987,700	23,537,693
1894-95	17,899,800	17,545,000	35,444,800	23,966,973
1895-96	18,459,800	19,724,000	38,183,800	23,976,714
1896-97	18,269,800	22,170,000	40,439,800	24,384,447

(a) Excluding Expeditions and Naval Defence Fund.

(b) Excluding Special Defences and the following Expeditions: (1) Egypt, (2) Quetta, (3) Burma, (4) Chin-Lushai, (5) Chitral.

76. The result of these figures is to shew that while the Defence Expenditure in the United Kingdom has increased by 59 per cent, that in India has increased by only 44 per cent, even including the increase due to the fall of exchange, which affects Indian Military Expenditure in a special degree, owing to the large proportion of it that is measured by a sterling standard. The statement of expenditure in the United Kingdom is free from disturbance by this cause; while, on the other hand, the increase of Indian expenditure includes Rx. 2,526,000 directly due to this cause alone; and if this amount were excluded, the percentage of increase would be reduced to 29.

	£
Net English Expenditure	4,000,000
British Soldiers' pay	1,590,000
Total	5,590,000
	Rx.
Difference of exchange 19·85*d.* and 14·45*d.*	2,526,000

77. The two most recent measures causing considerable increase of Military Expenditure were the raising of the pay of native soldiers in 1895, and of that of British soldiers in 1898. The former of these concessions had been delayed on financial grounds for a length of time which all our military advisers considered to be open to objection. The second measure, the increase of British soldiers' pay, is the

result of the determination of Her Majesty's Government on a question of general imperial policy.

78. Under the head of Political Expenditure, the increase measured by percentage is even more considerable; in amount it is Rx. 471,600. A few remarks will shew that this increase has been caused solely by the necessities of external policy. Two-fifths of the whole amount arises from the one item of Rx. 180,000 for the subsidy of His Highness the Amir of Afghanistan; and the Afghan Refugees' cost at least Rx. 60,000 more. The period under consideration, moreover, has witnessed the rise and development of the Baluchistan Agency, which now accounts for Rx. 130,000 of the outlay charged under this head; the appointment of an Agent on the Perso-Afghan Frontier (Rx. 13,000); the occupation of the Gilgit and Chitral Frontier (Rx. 16,000); and considerable new expenditure, say, Rx. 40,000, in controlling the tribes and employing levies along the North-Western Frontier. The head "Political" contained also in 1896 Rx. 14,000 expended on the African Coast of the Gulf of Aden (the corresponding revenues are under Miscellaneous), and the scheme of Imperial Service Troops has caused a further increase of Rx. 22,000.

79. I pass to the figures shewn against Provincial (including Local) net expenditure, which has increased during the period under review from Rx. 14,374,900 to Rx. 18,160,800. These are the charges of Civil Administration generally, and under such heads increasing outlay is not only justifiable but inevitable, in every country in which civilization is not stationary or retrograding. The system of Provincial finance is based on the theory that the increase in the Provincial share of the Revenues can be set aside for increase of expenditure upon Civil Administration, and that, if the increase is kept within this limit, we have by this limitation, under ordinary circumstances, sufficiently taken into consideration the financial difficulties arising from falling exchange, from the necessities of Military and Political Expenditure, from wars and famines. We proceed, therefore, on the assumption that there is no objection to the Provincial share of the normal growth of Revenue being, as fast as it accrues, spent on administrative improvements. As has often been pointed out, a Provincial Government can do nothing with its money except spend it; it cannot, for example, utilize a surplus for remission of taxation.

Conclusion.

80. The statement which I have laid before the Council exhibits, I think, a very favourable condition of Indian Finance. Some of these favourable elements are, I admit, temporary only, and due in a large measure to a specially active trade, others however are permanent and betoken the return of the prosperity and progress which I noted in my statement of March 1896, and which were so rudely interrupted by the outbreak of famine. The plague, though it is a great anxiety to both Imperial and Provincial Administrations, is, financially speaking, well within our power to cope with, and as the first responsibility for the measures taken in connexion with it rests with the Provincial Administrations, I have been particular to examine the position of the Provincial Financial Accounts, and trust that the measures of relief and assistance sanctioned by the Government of India and set out in the statement will enable them to face the difficulties in which they are placed, though I take for granted they do not claim relief from their share in the anxieties which are inseparable from financial administration in India.

PART II.

DETAILS OF THE ACCOUNTS AND ESTIMATES.

Section I.—The Accounts of 1897-98.

Accounts of 1897-98.

81. The Revised Estimate of 1897-98 was framed for a deficit of Rx. 5,283,100; in the closed Accounts this figure rises to Rx. 5,359,211, or Rx. 76,111 worse than was anticipated when the Revised Estimate was framed.

The variations between the figures finally entered in the Accounts of the year and those assumed for the purposes of the Budget and the Revised Estimate are explained in the Appropriation Report published in the *Gazette of India* of the 18th instant.

The following statement compares the Revised Estimates with the Accounts of the year :—

		Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
REVENUE.					
India	Rx.	96,262,000	96,139,287	...	122,713
England	£	192,000	193,662	1,662	...
Exchange	Rx.	107,500	109,055	1,555	
TOTAL .	Rx.	96,561,500	96,442,004	...	119,496
EXPENDITURE.					
India— Imperial, Provincial, and Local	Rx.	77,136,300	76,939,069	197,231	...
Adjustment of Provincial and Local Surplus or Deficit .	Rx.	—705,700	—457,678	...	248,022
NET . .	Rx.	76,430,600	76,481,391	...	50,791
England	£	16,201,000	16,198,263	92,737	...
Exchange	Rx.	9,123,000	9,121,501	1,499	...
TOTAL .	Rx.	101,844,600	101,801,215	43,385	...
DEFICIT .	Rx	—5,283,100	—5,359,211	...	76,111

1897-98. General Results.

82. The Revenue in India was less than the sum anticipated in the Revised Estimate by Rx. 122,713, and the Expenditure finally chargeable against that Revenue, after making allowance for the adjustment of the sums by which Provincial and Local Revenues were in surplus or deficit, exceeded the forecast by Rx. 50,791. In India, therefore, the Accounts as a whole turn out worse than the Estimate by Rx. 173,504. Against this must be set an improvement in Revenue in England of Rx. 3,217, and a decrease in Expenditure in England of Rx. 94,176—in all Rx. 97,393, including exchange. The sum of Rx. 76,111, being the difference between the results obtained in India and England, represents the total falling-off in the Accounts as compared with the Revised Estimate of the year.

1897-98. Revenue in India.

83. The Land Revenue actually realised fell short of the Revised Estimate by Rx. 248,658. In the North-Western Provinces the collections were over-estimated by Rx. 157,820, and in Bombay by Rx. 104,384; while in Burma a sum of Rx. 46,270 was collected in excess of the Estimate. Owing to the fact that the largest instalment of Land Revenue falls due towards the close of the financial year, there is at all times a difficulty in making a precise forecast of the March collections, and in the past year the Estimate was also indirectly affected by the

famine, which left it uncertain to the last moment to what extent it would be possible to enforce any given measure of compliance with the revenue demand of the year.

The Opium Revenue proved worse than the Estimate by Rx. 62,528, due to a decline in the exports of Malwa Opium to China. On the other hand, the realisations under Customs show an improvement of Rx. 63,895, and the Railway Revenue rose by Rx. 90,857 owing to a slight increase of traffic on some of the Railways towards the close of the year.

1897-98. Expenditure in India.

84. On the Expenditure side the outlay on Famine Relief during the last weeks of the year was less by Rx. 66,112 owing to the cessation of operations earlier than had been anticipated. In the Railway Revenue Account there was a saving of Rx. 125,704 on the Revised Estimate mainly under Working Expenses. Army Expenditure shows an excess of Rx. 62,239 due to increased payments to Native Troops on account of compensation for dearness of provisions and forage.

1897-98. Revenue and Expenditure in England.

85. The reduction in Expenditure in England of £92,737, or including Exchange Rx. 94,176, consists for the most part of a saving under Army Charges of £67,773. The increase in Revenue in England comes to the trifling sum of £1,662, or including Exchange Rx. 3,217, and consists mainly of recoveries on account of stores.

86. The Expenditure not charged to Revenue amounted to Rx. 4,328,541 as compared with Rx. 4,604,600 entered in the Revised Estimate.

Section II.—Revised Estimate of 1898-1899.

1898-99. Statement of the gross figures.

87. The following is a general comparison of the Budget Estimates with the Revised Estimates of 1898-99:—

		Budget.	Revised.	Revised, better.	Revised, worse.
REVENUE.					
India	Rx.	98,791,700	101,217,400	2,425,700	
England	£	188,300	232,500	44,200	
Exchange	Rx.	105,400	116,200	10,800	
TOTAL	Rx.	99,085,400	101,566,100	2,480,700	
EXPENDITURE.					
India—					
Imperial, Provincial, and Local	Rx.	72,610,100	71,603,300	1,006,800	
Adjustment of Provincial and Local Surplus or Deficit	Rx.	−116,800	+1,417,900	...	1,534,700
NET	Rx.	72,493,300	73,021,200	...	527,900
England	£	16,474,800	16,323,700	151,100	
Exchange	Rx.	9,225,900	8,161,800	1,064,100	
TOTAL	Rx.	98,194,000	97,506,700	687,300	
SURPLUS	Rx.	891,400	4,059,400	3,168,000	

1898-99. General features.

88. The leading characteristic of 1898-99 is the rapid recovery of the revenue from the effect of the unfavourable conditions prevailing in the two preceding years. Under all heads of Revenue, except Stamps and Registration, the sums actually realised are largely in excess of the forecast framed a year ago. The general prosperity of the people has added to the receipts under Salt and Customs; abundant harvests have increased the Railway Revenue; Opium has sold for higher prices and has cost less to produce; the burden of famine

relief has been removed; military expenditure has been reduced earlier and to a larger extent than was anticipated; and the charge for exchange has been less by a crore of rupees than that assumed in framing the Budget. The only adverse feature is the revival and extension of plague which has increased the medical expenditure in every Province and injuriously affected some branches of revenue.

1898-99. General Results.

89. The Revenue in India is expected to exceed the Budget Estimate by Rx. 2,425,700, and besides this there will be a reduction of expenditure of Rx. 1,006,800 made up of Rx. 518,600 under Army, Rx. 305,200 under Opium, and Rx. 208,500 under Public Works—Buildings and Roads. Of this total improvement in India of Rx. 3,432,500, Rx. 1,534,700 occurs under Provincial and Local, and Rx. 1,897,800 under Imperial. The Revenue in England shows an increase of £44,200, and the Expenditure a decline of £151,100. Adding to these a reduction of the net charge for exchange by Rx. 1,074,900, the final result is an increase of the surplus of the year by Rx. 3,168,000 from Rx. 891,400 to Rx. 4,059,400.

1898-99. Increase of Revenue in India.

90. The more important increases of Revenue in India occur under the following heads:—

	Rx.
Land Revenue	111,200
Opium	349,600
Salt	319,200
Provincial Rates	92,100
Customs	307,900
Forests	102,400
Miscellaneous	102,100
Railway Receipts	884,200
Irrigation Major Works	193,200

1898-99. Land Revenue.

91. The increase of Rx. 111,200 in the collections of Land Revenue includes the following amounts in excess of the Estimate:—

	Rx.
Burma	100,800
North-Western Provinces and Oudh	52,000
Bombay	33,600

In Burma the continuous expansion of cultivation induced by a fertile soil and light settlements and the revision of assessment-rates have added to the ordinary revenue, and the yield of the Capitation Tax has been raised by the natural increase of population. In the North-Western Provinces and Oudh large sums are expected to be realised on account both of ordinary arrears and of revenue suspended during the famine. The enhanced collections in Bombay include arrears due to plague in some districts and to bad seasons in others; while in Sind the revenue has been raised not only by these causes, but by a favourable inundation greatly extending the area under spring crops.

Account must also be taken of the following decreases:—

	Rx.
Madras	12,100
Central Provinces	35,000
India	10,900

The decrease in Madras is due to a fall in the sales of lands benefited by the Periyar Irrigation Scheme in Madura; the Central Provinces figures are affected by suspensions of revenue and smaller recoveries of arrears; and the decline under India General is caused by the failure of the rains and general scarcity in Ajmir, and by drought, locusts, and low prices in Baluchistan where the Land Revenue is collected in produce.

92. Although the collections of Land Revenue in 1898-99 are expected to exceed the Budget Estimate, the Imperial share of the total collections will be considerably less by reason of the special contributions given in aid of Provincial resources which involve a re-adjustment of the Imperial and Provincial shares of the revenue.

The following table compares the respective shares as they appear in the Budget and Revised Estimates :—

	Land Revenue, Budget of 1898-99.		Land Revenue, Revised Estimates of 1898-99.	
	Imperial share.	Provincial share.	Imperial share.	Provincial share.
	Rx.	Rx.	Rx.	Rx.
Distribution according to Provincial Settlement	16,237,900	11,330,300	16,264,300	11,415,100
Add or *Deduct*— Special contribution in aid of Plague and Famine expenditure and of General Resources of Provincial Governments	—150,000	+ 150,000	—1,129,300	+ 1,129,300
Distribution according to Estimates	16,087,900	11,480,300	15,135,000	12,544,400

The contribution of Rx. 150,000 entered in the Budget Estimate of 1898-99 includes Rx. 80,000 granted to Assam in aid of expenditure incurred on the repair of Earthquake damages, and Rx. 70,000 to Bombay in aid of Plague expenditure. The amount in the Revised, Rx. 1,129,300, is made up as follows :—

	Rx.
General contribution in aid of Provincial resources as stated in paragraph 66 of this Statement	700,000
Special contribution in aid of Earthquake expenditure in Assam	80,000
Special contribution in aid of Plague expenditure by Local Bodies in Bengal	20,000
Special contribution in aid of Famine and Plague expenditure in Madras (Provincial and Local)	50,700
Special contribution in aid of Famine and Plague expenditure in Bombay	278,600
TOTAL	1,129,300

1898-99. Opium Revenue.

93. The receipts from Opium in Bengal are likely to exceed the estimate by Rx. 264,500, the bulk of which represents the difference between R1,000 a chest, the price assumed in the Budget for Bengal Opium, and R1,055, the average actually realised. At the same time the quantity sold during the last three months of the year has risen by 450 chests, representing an increase in revenue of Rx. 51,600. More favourable conditions in the China market, aided by the reduction of the pass-duty on Malwa Opium from R600 to R500 per chest, which took place in October 1897, seem to have brought about a substantial recovery of the trade, though the exports have as yet hardly returned to the

level at which they stood before the great decline of 1896-97 and 1897-98. The result is an increase in the receipts over the estimate of Rx. 84,000.

94. Of the increase of Rx. 319,200 under Salt, the sum of Rx. 215,000, which has been realised in Madras, represents mainly the recovery of revenue deferred under the credit system from the previous year. The revenue brought to account during the year has probably also been to some extent enhanced by the fact that the rise in the price of Government paper during the last few months has tended to discourage resort to the credit system and to stimulate cash sales. *1898-99. Salt Revenue.*

The receipts of the Northern India Salt Department show an increase of Rx. 52,200 due partly to normal development, but mainly to the revival of trade in Kohat salt consequent on the pacification of the frontier.

95. An increase of Rx. 23,200 in Bengal is due to the receipts under Local having been under-estimated in the Budget. In the North-Western Provinces Rx. 17,100 and in Madras Rx. 22,900 have been added in the collection of arrears, and in Bombay the increase of Rx. 17,600 has followed the rise in Land Revenue. *1898-99. Provincial Rates.*

96. Of the rise of Rx. 307,900 under Customs, Rx. 199,100 occurs in Burma, —Rx. 66,200 under Imports, chiefly Manufactured Articles, Liquors, and Articles of Food and Drink, and Rx. 130,000 under Export Duty on Rice. Bengal accounts for Rx. 105,000 distributed over Articles of Food and Drink, Silver Bullion and Coin, Oils, and Liquors; and Bombay shows Rx. 37,000 comprising considerable increases under Oils, Liquors, Silver Bullion and Coin, Articles of Food and Drink, and Excise on Cotton Goods, and substantial decreases under Manufactured Articles and Import Duty on Cotton Goods. A decline of Rx. 34,200 in Madras occurs under Spirits and Liquors, Imported Cotton Goods, and Miscellaneous Exports. *1898-99. Customs Revenue.*

97. The increase of Rx. 102,400 under Forests is made up of a rise of Rx. 199,500 in Burma, mainly due to the large demand for, and high market value of teak timber, which has added Rx. 111,500 to the royalty paid by the Bombay-Burma Trading Corporation for the forests from which they derive their supplies. The increase also includes a sum of Rx. 12,000 paid by the same Company in connection with mal-practices committed by their employés. A reduction of Rx. 71,400 in Bombay is ascribed to the depression in trade caused by the continuance of plague, and to the smaller demand for locomotive fuel in Sind and for forest produce in general. *1898-99. Forest Revenue.*

98. The increase of Rx. 102,100 under Miscellaneous Revenue includes one sum of Rx. 57,400 recovered from the Burma Railway Company for the value of work done by famine labour on the Meiktila-Myingyan Railway, and another of Rx. 37,500 realised in Madras by the sale of cloth manufactured at Government expense during the recent famine in order to afford relief to weavers in distress. *1898-99. Miscellaneous.*

99. The great rise of Rx. 884,200 in Railway Revenue in India is mainly due to the general development of traffic of all kinds which results directly and indirectly from the opening of new sections of line, and to the large export of grain which was rendered possible by the harvesting of good winter crops. The more important increases occur on the following lines:— *1898-99. Railway Revenue.*

	Rx.
North-Western	310,000
Great Indian Peninsula (net)	416,000
Bombay, Baroda and Central India (net)	210,000
East Indian	200,000
Rajputana-Malwa	160,000

and the more important decreases on the following:—

	Rx.
Eastern Bengal	110,000
Southern Mahratta	115,000
South Indian	70,000
Mysore	55,000
East Coast, including Bezwada-Madras	60,000
Madras (net)	55,000

The reduction on the Eastern Bengal State Railway was due to a short jute crop, and that on the Railways in Southern India to the effect of plague on the passenger traffic. The falling-off on the East Coast Railway was caused by delay in opening the Bezwada-Madras Section.

1898-99. Irrigation Revenue.

100. The increase of Rx. 193,200 in Irrigation Revenue is distributed as follows:—

	Rx.
North-Western Provinces and Oudh	56,200
Punjab	120,800
Other Provinces	16,200

In the North-Western Provinces the area irrigated during the past *Kharif* season was larger than had been anticipated. A similar expansion of irrigation occurred on the Bari Doab, Sirhind, and Swat River Canals in the Punjab and on the Deccan and Guzarat Canals in Bombay, while in Sind a better supply of water produced an enhanced demand. The receipts were also raised by the recovery of outstanding balances on the Western Jumna Canal and in the Deccan and Guzarat.

1898-99. Telegraph Revenue.

101. The only decrease of any moment in the revenue of the current year occurs under the head of Telegraph Receipts, which show a falling-off of Rx. 154,800 made up as follows:—

	Rx.
Indian Telegraph	114,400
Indo-European Telegraph	40,400

The falling-off under the former head is due partly to the cessation of military operations on the North-West Frontier, but chiefly to the fact that, since the practice of delivering deferred telegrams by hand instead of sending them by post has been introduced, this class of message has gained greatly in popularity, and has to a considerable extent taken the place formerly occupied by ordinary and urgent messages. The decline in the Indo-European receipts occurs in the message traffic with the Indian Telegraph Department transferred at Karachi.

1898-99. Increases of Expenditure in India.

102. The more important increases of expenditure in India are:—

	Rx.
Medical	327,800
State Railways: Working Expenses	106,100
Guaranteed Companies: Surplus Profits, Land, and Supervision	106,100
Mint	49,000

1898-99. Medical Expenditure.

103. The large increase under Medical is due to the impossibility of making an accurate forecast of the expenditure required to guard against the spread of the plague in new directions, and to combat the disease where it has once become established. The cost of these operations continues to be far heavier in Bombay than elsewhere, and out of the total increase of Rx. 327,800 in the expenditure entered under Medical no less than Rx. 268,200 has been incurred in that province. The following statement gives an estimate of the cost in each province under Imperial, Provincial, and Local heads of the preventive and remedial

measures undertaken in 1896-97, 1897-98, 1898-99, and contemplated in 1899-1900:—

Statement of direct and indirect expenditure connected with the plague under the various heads of Accounts for the years 1896-97, 1897-98, 1898-99, and 1899-1900.

TOTAL .	227,600	17,800	13,800	25,800	5,500	147,700	179,400	617,600
GRAND TOTAL, FOUR YEARS	258,200	41,200	70,000	79,900	69,200	212,700	839,600	1,570,800

104. The Statement illustrates the gradual spread of plague since its first appearance in Bombay in 1896-97. In that year the measures undertaken to check the progress of the disease cost Rx. 23,700, of which Rx. 18,100 was spent in the area where it was actually prevalent, the balance representing outlay on railway inspection and similar measures designed to guard against its extension to provinces not then infected. In 1897-98 the total expenditure rose to Rx. 348,600, including Rx. 252,000 in Bombay and Sind. In addition to this, Bengal devoted Rx. 32,200 to the development of protective measures on lines of railway and to watching arrivals from infected areas; the North-Western Provinces and Oudh spent Rx. 25,900 in suppressing the outbreak of plague at Hardwar; and the Punjab spent Rx. 15,400 on preventive operations in the districts of Jullundur and Hoshiarpur. In 1898-99 there was a further increase of the total expenditure, as shown in the Revised Estimate, to Rx. 580,900, including Rx. 390,100 in Bombay, Rx. 58,300 in Madras where the plague has appeared in several districts, Rx. 48,100 in the Punjab, Rx. 27,400 in the North-Western Provinces, Rx. 19,600 in Bengal where protective arrangements were maintained and an outbreak occurred in Calcutta, and Rx. 20,200 under India General which includes the cost of combating the outbreak in Bangalore.

105. The estimate for next year amounts to Rx. 617,600, and provides for an increase of expenditure in Madras from Rx. 58,300 to Rx. 147,700; while the charges in Bombay are taken at Rx. 179,400, or Rx. 210,700 less than the Revised figures of the current year. A provision of Rx. 209,500 has been made under India General in order to meet requirements which cannot now be foreseen.

106. During the four years covered by the Statement the total expenditure by Government and District Funds in India amounts to Rx. 1,570,800, to which must be added £22,560 (including Exchange Rx. 34,862) spent in England on payments to doctors and nurses engaged for service in India. Even where plague itself has not appeared the necessity of maintaining inspection camps on the chief lines of communication imposes a severe burden on Provincial finances and strains the resources of the medical staff. The Statement takes no account of the heavy expenditure incurred by Native States and Municipalities except in so far as it includes grants made by the Bombay Government in aid of municipal outlay on plague.

The expenditure from the Home Treasury on account of pay, passage, etc., of medical officers and lady nurses in each of the four years has been or will be as follows:—

	Sterling. £	Exchange. Rx.	Total. Rx.
1896-97	1,013	669	1,682
1897-98	11,247	6,333	17,580
1898-99 (Revised)	5,300	2,700	8,000
1899-1900 (Budget)	5,000	2,600	7,600
TOTAL	22,560	12,302	34,862

1898-99. State Railways: Working Expenses.

107. The rise in the Working Expenses of State Railways represents for the most part the cost of earning the increased revenue mentioned in paragraph 99 above. It is due chiefly to the heavier traffic worked, the greater lengths of mileage open, and to more extensive renewals of stock and permanent-way. Some lines have also had to provide for special repairs of the damage caused by the earthquake of 12th June 1897 and by floods. The more important increases occur on the following Railways:—

	Rx.
East Indian	190,000
Rajputana-Malwa	90,000
Assam-Bengal	36,000

These are, however, to some extent counterbalanced by a decrease in the Working Expenses of the other lines noted below:—

	Rx.
North-Western	100,000
East Coast, including Bezwada-Madras	40,000
Southern Mahratta	35,000
Mysore	23,000
Oudh and Rohilkhand	20,000

108. The increase of expenditure under Surplus Profits, Land, and Supervision is made up of an increase under Surplus Profits of Rx. 197,200 and a decrease under Land and Supervision of Rx. 91,100. Under the former head no provision was made in the Budget Estimate for the payment of surplus profits to the Madras Railway Company, and the goods earnings of the Bombay, Baroda and Central India and the Great Indian Peninsula were under-estimated. The charges under Land and Supervision are reduced owing to less land being taken up for the Calicut-Cannanore Branch in Madras and certain minor lines in Bombay than had been originally expected. *1898-99. Guaranteed Companies: Surplus Profits, Land, and Supervision.*

109. The increase in Mint expenditure occurs partly under temporary establishment and overtime allowances for the recoinage of Bhopal and Kashmir rupees—an outlay more than counterbalanced by an increase in the Mint receipts. But the major portion of the increase is due to a loss of Rx. 40,000 on copper coinage in 1898-99. The gain or loss on copper coinage represents the difference between the face value of the coins actually put into circulation and the cost of making and distributing them. Of the enormous quantity of copper coin issued in the famine years for relief payments, a large proportion is now returning from circulation because it is in excess of the normal requirements of the people. The Estimate provides for the resulting loss on the coins so returned. *1898-99. Mint Expenditure.*

110. The more important decreases of expenditure occur under the following heads:— *1898-99. Decreases of Expenditure in India.*

	Rx.
Land Revenue	59,600
Opium	305,200
Salt	53,400
Education	60,300
Political	83,000
Subsidised Railway Companies: Land and Subsidy	81,200
Civil Works	208,500
Army	518,600

111. The decrease of Rx. 59,600 under Land Revenue occurs for the most part under the heads of Salaries, Exchange Compensation Allowance, Establishments, and Savings under Survey and Settlement in the North-Western Provinces, the Punjab, and Burma. The decrease of Rx. 15,400 in Madras is mainly under Local, and arises from delay in giving effect to a scheme for raising the pay of village accountants. *1898-99. Land Revenue Expenditure.*

112. Under Opium the reduction of Rx. 305,200 in the estimated expenditure is almost wholly under Payments to Cultivators, which vary from year to year with the yield of the crop. The greater part of it occurs in Behar, where the sums likely to be required seem to have been greatly over-estimated. *1898-99. Opium Expenditure.*

113. Of the decline of Rx. 53,400 under Salt, Madras accounts for Rx. 25,100, more than half of which is under the Purchase and Freight of Salt. A decrease of Rx. 12,500 in Bengal is due to the whole of the Preventive Staff sanctioned for Orissa not having been appointed during the year. A similar decline in the expenditure of the Northern India Salt Department is due to smaller payments of salaries, reduction of charges for manufacture, and to the abolition of the Indus Preventive Line. *1898-99. Salt Expenditure.*

1898-99. Education Expenditure.

114. The decline of expenditure on Education is, largest in Bengal (Rx. 17,200), owing to the charges on account of salaries being over-estimated, and in Bombay (Rx. 12,700) where the outlay was affected by the prevalence of plague.

1898-99. Political Expenditure.

115. Of the reduction of Rx. 83,000 under Political Expenditure, more than half is due to the subsidy to the Amir of Kabul not having been drawn in full. An apparent saving is also caused by the charges for the escort of the Burma-China Boundary Delimitation Commission being adjusted in the Military Accounts.

1898-99. Subsidised Railway Companies: Land and Subsidy.

116. The decrease in the payments to Subsidised Railway Companies occurs wholly in the item of land, and is due to the programme of the year not having been worked up to in the case of the Bengal and North-Western, Bhagalpur-Baidyanath, Mymensingh-Jamalpur, Amritsar-Sarhali, Jullundur-Hoshiarpur, and several other Railways.

1898-99. Civil Works.

117. Of the entire saving of Rx. 208,500 anticipated under the head of Civil Works, Rx. 118,800 occurs in the Local Section of the Estimates, and is due partly to the failure of District Boards to work up to their estimates, and partly to the estimates themselves having been revised in Bombay and Madras in order to provide funds for plague purposes. The former cause accounts for differences of Rx. 35,000 in Bengal, Rx. 21,400 in the North-Western Provinces and Oudh, and Rx. 12,400 in Burma; and the latter for decreases of Rx. 26,100 in Bombay, and Rx. 22,000 in Madras.

In the Provincial Section the savings amount to Rx. 69,600, of which the North-Western Provinces and Oudh contribute Rx. 9,000, Bombay Rx. 13,500, and Madras Rx. 18,400. In the North-Western Provinces the decrease is due partly to expenditure proceeding at a slower rate than was expected, and partly to the transfer of the Ghazipur Steam Ferry to the Bengal and North-Western Railway. In Bombay grants were reduced on general financial grounds after the Budget was passed, and in Madras savings were caused by a transfer to the Educational Department and by the non-payment of grants to Municipalities for water-supply projects.

1898-99. Army Expenditure.

118. The large decrease of Rx. 518,600 in Army Expenditure in India comprises the following important reductions:—

	Rx.
Military operations and special services due to the demobilisation of the Tirah Expeditionary Force in April 1898, and the substitution of the Khyber Brigade with moveable column for the Khyber Force as originally constituted	291,100
Saving on Exchange Compensation Allowance owing to the rise in exchange	41,200
Reduced expenditure under Army and Garrison Staff and Regimental Pay and Allowances with reference to recent actuals	24,500
Saving arising from the short strength of the Army . .	55,700
Saving on account of Troops serving in East Africa and Mauritius and charged to the Imperial Government . .	33,400
Transfer to the Civil Estimates of charges for the pay of officers on plague duty	24,100
Lapse of provision for increase of Commissariat-Transport Officers	20,000
Reduced price of food and forage	65,000

119. One cause of saving which affects not only Army Expenditure, but most of the important heads of Expenditure in India, is the rise in the rate of exchange, on the basis of which the Exchange Compensation Allowances have been calculated. The average rate assumed in the Budget Estimate of 1898-99 for this calculation was $15\frac{1}{2}d.$; but the four quarterly rates with reference to which the allowances have been actually paid are $15\frac{29}{32}d.$, $15\frac{31}{32}d.$, $15\frac{27}{32}d.$, and $15\frac{31}{32}d.$, yielding an average for the whole year of $15\frac{59}{64}d.$ The consequent saving amounts to Rx. 119,000. *1898-99. Exchange Compensation Allowances.*

120. The Sterling receipts are expected to exceed the Budget Estimate by £44,200. The three important items composing this increase are: £18,000 under Interest on temporary investments of Cash Balance, the rates of interest realised being higher; £9,000 representing larger miscellaneous receipts connected with the supply of stores to India; and £10,400 under Army receipts, mainly in connection with the Indian Troop Service and other effective services. *1898-99. Revenue in England*

121. The Sterling expenditure is expected to be less than the Budget Estimate by £151,100. The important variations comprising this difference are (1) a reduction of £83,300 in the charge for interest on loans; (2) a saving of £145,200 in the Army effective and non-effective charges; and (3) increases of £36,300 and £24,400, respectively, under Civil Furlough Allowances and Military Works. *1898-99. Expenditure in England.*

The Interest charges are less by £83,300, of which £35,400 represents a decrease in interest on India $2\frac{1}{2}$ per cent Stock owing to the loan this year not having been issued so early as was expected; £44,900 comes under reduction in interest on India Bills, due to a smaller amount of Bills being issued; while in addition to these savings, £10,000 provided to meet interest on temporary loans from the Bank of England was not required. On the other hand, the discount on the loan of £6,000,000 India $2\frac{1}{2}$ per cent Stock issued in July 1898 amounted to £702,300. As this sum is exceptionally large, it has been decided to depart from the usual practice of entering the whole of it as a charge on the Revenue of the year, and to reduce the amount of debt incurred in excess of the money actually raised by means of a Discount Sinking Fund spread over 50 years, the rate of interest adopted in the calculation for the Sinking Fund being $2\frac{1}{2}$ per cent. A sum of £7,000 has accordingly been entered in the Revised Estimate as the first investment towards this Sinking Fund.

As regards Army charges, the reduction in the demands for stores—mainly Ordnance stores—amounted to £105,000, and the payments for pay and pensions of non-effective and retired officers of the Indian Service and for furlough allowances of officers of that service are expected to be less than the Estimate by £88,000. On the other hand, arrear payments of £34,500 due to the War Office for effective and non-effective Army charges of the year 1897-98 have been made in the current year; there has also been an excess charge of £17,000 under the head of Troop Service.

The payments for Civil Furlough and Absentee Allowances have exceeded the Estimates owing to the exceptionally large number of officers on furlough, and the demands for stores required for the Bangalore Water-works have swelled the expenditure on account of Military Works.

122. The net charge for Exchange on Sterling expenditure is less than in the Budget Estimate by Rx. 1,074,900. The net Sterling expenditure is less by £195,300, and the Exchange on this difference at the rate of £1 = R 15·6, the rate of the Budget Estimate, is Rx. 109,400, which is the saving in Exchange due to the decrease in Sterling payments. The direct saving from the rise in the rate of Exchange from £1 = R 15·6 to £1 = R 15 is, therefore, Rx. 965,500. *1898-99. Exchange.*

Section III.—Budget Estimate of 1899-1900.

1899-1900. Statement of the gross figures.

123. The following is a general comparison of the Budget Estimate of 1899-1900 with that of 1898-99:—

		1898-99.	1899-1900.	1899-1900, better.	1899-1900, worse.
REVENUE.					
India	Rx.	98,791,700	101,645,900	2,854,200	
England	£	188,300	207,100	18,800	
Exchange	Rx.	105,400	108,500	3,100	
TOTAL .	Rx.	99,085,400	101,961,500	2,876,100	
EXPENDITURE.

Adjustment of Provincial and Local Surplus or Deficit .	Rx.	—116,800	—924,700	807,900	
NET .	Rx	72,493,300	72,837,900		344,600
England	£	16,474,800	16,531,600		56,800
Exchange	Rx	9,225,900	8,659,400	566,500	
TOTAL .	Rx.	98,194,000	98,028,900	165,100	
SURPLUS	Rx.	891,400	3,932,600	3,041,200	

1899-1900. Main features.

124. The year opens with fair promise. Except in limited areas in the Central Provinces and the Punjab the agricultural prospects are good, and the bulk of the population have returned to the standard of living which prevailed before the scarcity compelled them to reduce their consumption of all but absolute necessaries. An expansion is accordingly looked for under all the principal heads of Revenues, except Registration fees, which are really payments for services rendered; and Railway receipts, which are a good test of general prosperity, are expected to show a corresponding increase. The only serious rise of expenditure is in the medical charges connected with the plague: the other increases represent improvements of administration, or outlay required to earn increased revenue.

1899-1900. General Results.

125. The Revenue in India is expected to exceed the estimated receipts of 1898-99 by Rx. 2,854,200, while the Expenditure, after allowing for the adjustment of Provincial and Local surpluses or deficits, will be increased by Rx. 344,600. In England an improvement of £18,800 in Revenue is anticipated against a rise in Expenditure of £56,800. At the same time the net charge for exchange will be reduced by Rx. 569,600, so that the combined account works out to a surplus of Rx. 3,932,600, being Rx. 3,041,200 in excess of the estimated surplus of 1898-99.

1899-1900. Increases of Revenue in India.

126. The following are the most important increases of Revenue in India:—

Land Revenue	73,700
Opium	673,900
Excise	60,900
Provincial Rates	91,500
Customs	58,200
Assessed Taxes	55,900
Forest	55,100

Railways—	
State, Gross Receipts	854,500
Guaranteed, Net Traffic Receipts	768,500
Irrigation—	
Major Works—Direct Receipts	139,800
Land Revenue due to Irrigation	71,100

127. The growth of Land Revenue is most marked in Burma, where Rx. 107,900 is expected to accrue from revision of assessments and increase in cultivation. In the North-Western Provinces and Oudh Rx. 110,300 will be gained by enhancements of revenue resulting from the regular revision of settlements. An increase of Rx. 34,300 in the Central Provinces is due to provision having been made for the recovery of famine arrears. Decreases of Rx. 113,500 in Madras and of Rx. 25,400 in Bombay are caused by the reduction of the arrear balances which swelled the receipts in the current year added in the latter case to a less favourable inundation in Sind. *1899-1900. Land Revenue.*

128. The Estimate anticipates an increase of Rx. 587,300 in the Opium Revenue in Bengal. Prices show an almost unbroken rise throughout the past year; the average per chest has gone up from R1,023 in 1897-98 to R1,055 in the current year and the price realised at the sale of March 1899 is R1,149 against R948 at the same time a year ago. R1,100 has accordingly been taken as the average price for the ensuing year. In Bombay it is assumed that the revival of the trade in Malwa Opium, which has followed on the reduction of duty, will continue unabated, and that the number of chests exported will be the same as in the current year. On this basis an increase in revenue of Rx. 84,000 is looked for. *1899-1900. Opium Revenue.*

129. The Excise Revenue has been slow to recover from the depression caused by the famine, and the Estimate anticipates only the moderate increase of Rx. 60,900. To this the North-Western Provinces and Oudh contributes Rx. 67,500 due to the normal growth of revenue and to the introduction of administrative reforms, while Burma, Bengal, and Bombay look forward to increases of about Rx. 25,000 apiece. On the other hand, the actuals of the current year in Madras point to a decline in revenue which is estimated at Rx. 110,000. *1899-1900. Excise Revenue.*

130. Of the increase of Rx. 91,500 under Provincial Rates, Bengal contributes Rx. 38,700 arising from the completion of revaluations in the Districts of Dinajpur and Backerganj. In Madras an increase of Rx. 21,600 is looked for from Village Service Funds. *1899-1900. Provincial Rates.*

131. In Bengal an increase of Customs Revenue, amounting to Rx. 55,000, is anticipated, mainly under Liquors, Articles of Food and Drink, and Silver Bullion and Coin. In Burma an aggregate improvement of Rx. 51,200 is expected under Export Duty on Rice and various heads of Import Duty, specially Liquors, Articles of Food and Drink, and Manufactured Articles. The Estimate for Madras shows a decline of Rx. 34,200, chiefly under Liquors, Imported Cotton Goods, and Exports. *1899-1900. Customs Revenue.*

132. The increase under the head of Assessed Taxes is largest in Bengal (Rx. 25,000) and in Madras (Rx. 15,000), and is due to progressive revision of the assessments and to general improvement in the administration of this head of revenue. *1899-1900. Assessed Taxes.*

133. An increase of Rx. 69,700 under Forest Revenue anticipated in Burma really represents a decline from the abnormal receipts for which credit has been taken in the Revised Estimates. The demand for teak at the present high prices is expected to fall off; the Bombay-Burma Trading Corporation will reduce their exports of timber from the Pyinmana forests, and the revenue obtained in the form of royalty will be diminished in proportion. *1899-1900. Forest Revenue.*

1899-1900. Railway Revenue.

134. The Railway Revenue of the coming year is estimated at Rx. 1,623,000 in excess of the amount taken in the Budget of 1898-99. The forecast is justified by the excellent promise of the spring crops and by the additional mileage likely to be opened for traffic during the year.

1899-1900. Irrigation Revenue.

135. The Estimate of Irrigation Direct Receipts for 1899-1900 is based upon the normal expectations of Revenue, and anticipates a falling-off from the exceptionally high returns indicated by the Revised Estimate of the current year. As compared with the Budget of 1898-99, it provides for an increased Revenue of Rx. 139,800, which includes an increase of Rx. 80,200 in the Revenue from the Canals in the Punjab, and Rx. 54,100 from Canals in the North-Western Provinces and Oudh, due in each case to the growth of the demand for canal irrigation.

1899-1900. Decrease of Revenue.

136. The only important decrease of Revenue in India occurs under Telegraph Receipts, which show a falling off of Rx. 130,400 as compared with the Budget of 1898-99. This, however, represents an advance of Rx. 24,400 on the Revised Estimate of the current year, and indicates that the growth of operations in India is overtaking the decrease of Revenue brought about for the time being by the cessation of military operations, the extended use of deferred messages, and the falling-off in the Indo-European message traffic transferred at Karachi.

1899-1900. Decreases of Expenditure.

137. The chief reductions in Expenditure in India occur under the following heads:—

	Rx.
Army Services	1,171,500
Interest on Ordinary Debt	202,000
Famine Relief	79,400
Construction of Protective Railway	178,300

1899-1900. Army Expenditure.

138. The following are the principal causes which have contributed to bring about the important decrease of Rx. 1,171,500 in Army charges:—

	Rx.
Reduction of Military Operations and Special Services .	1,176,500
Saving under pay of British troops due to exchange being taken at 1*s*. 4*d*. instead of 1*s*. 3¼*d*. the rupee . .	120,000
Saving in Exchange Compensation	20,800
Saving under Regimental Pay and Allowances . . .	45,000
Fall in the prices of food-supplies	60,000
Saving due to the cost of the 1st Bengal Infantry stationed at Mauritius being debited to Her Majesty's Government	21,200
	1,443,500

Against the above important decreases in expenditure the following increases are provided for:—

Provision of messing allowance made for the whole year instead of for part only as in 1898-99	114,600
Smaller deduction in India on account of excess provision in the Home Estimates	48,300
Mobilisation Equipment of the additional corps included among the extra units of the field Army	39,500
Reserve of compressed fodder to facilitate mobilisation operations	37,600
Re-establishment of Cantonment Hospitals . . .	20,700
	260,700

139. As was explained in last year's Financial Statement, the decrease of Interest charges represents for the most part the interest on the difference between the Capital Expenditure on Railways and Protective Works and ordinary loans contracted in India. *1899-1900. Interest on Debt.*

140. Except in a small portion of the Central Provinces where the people have not yet recovered from the famine of 1897-98, and in the South eastern districts of the Punjab where both the *kharif* and the *rabi* have suffered from want of rain and the area protected by irrigation is small, the prospects of the coming year are excellent, and it has not been found necessary to make any substantial provision for the relief of scarcity. Out of Rx. 85,000 provided last year to meet the probable wants of certain districts in Madras where the cold weather rains had partially failed, only Rx. 1,700 was spent and the small sum of Rx. 5,700 now entered is almost entirely intended to meet the possible requirements of Hissar and the neighbouring districts of the Punjab. *1899-1900. Famine Relief.*

141. The Budget Estimate of 1898-99 provided Rx. 668,300 for outlay on the construction of Protective Railways, and this was raised during the year to Rx. 695,400 distributed as follows:— *1899-1900. Construction of Protective Railways.*

	Rx.
East Coast Railway	60,000
Bezwada-Madras	669,400
Godavari Bridge	166,400
Guntakul-Mysore	— 400
South Indian	— 200,000
	695,400

For the coming year the Expenditure has been placed at Rx. 490,000 allotted to—

	Rx.
East Coast Railway	40,000
Bezwada-Madras	30,000
Godavari Bridge	200,000
South Indian	50,000
Madura-Paumben	100,000
Tinnevelly-Quilon	70,000
	490,000

If to this latter sum be added Rx. 370,400, being the net charge for the Indian Midland and Bengal-Nagpur, two Protective Railways constructed by Companies; Rx. 603,900 set apart for Reduction of Debt; Rx. 30,000 allotted for Protective Irrigation Works; and Rx. 5,700 for the relief of distress, the resulting total makes up the sum of Rx. 1,500,000 set apart for expenditure on Famine Insurance.

142. The rate of exchange assumed in the Budget Estimates for 1899-1900 for the purpose of calculating Exchange Compensation Allowances is 15⅜*d.* the rupee, and the total saving under the various heads of Expenditure affected by this item of charge, amounts to Rx. 56,400. *1899-1900. Exchange Compensation Allowances.*

1899-1900. Increases of Expenditure in India.

143. The chief increases of Expenditure in India anticipated in the Budget occur under the following heads :—

	Rx.
3.—Land Revenue	65,600
Police	102,600
Medical	463,000
Reduction of Debt	278,100
State Railways :	
Working Expenses	276,500
Interest on Debt	98,900
Guaranteed Companies :	
Surplus Profits, Land, and Supervision	250,700
Irrigation, Minor Works and Navigation	51,500
Military Works	163,800
Civil Buildings and Roads	648,700

1899-1900. Land Revenue Charges.

144. The Madras Estimate under 3.—Land Revenue includes an increase of Rx. 38,700 mainly intended to provide for a long standing scheme for the improvement of the position of Taluk Gomastahs, for the revision of Village Establishments, and the extension of Survey and Settlement. In Burma the charges of District Administration are being raised by Rx. 27,800 to meet the increased demands of a young Province with a growing Revenue.

1899-1900. Police Charges.

145. In Bengal an addition of Rx. 30,200 has been allotted under Police charges for improving the investigating staff of the District Police, and for strengthening the force in Calcutta. A provision of Rx. 27,200 has been made in the North-Western Provinces for adding to the number of Assistant District Superintendents and introducing reforms in the Rural Police System of Oudh. There are also smaller increases in the Punjab, Madras, Bombay, and Assam due partly to plague charges and partly to the reorganisation of the force and the cost of supplying improved arms and accoutrements.

1899-1900. Medical Charges.

146. Every Province, except the Punjab, anticipates a rise in Medical Expenditure, the largest increases being Rx. 131,500 in Madras and Rx. 79,200 in Bombay, both mainly on account of the plague expenditure shown in detail in paragraph 103 above. As the general resources of both these Governments have been seriously reduced by famine and plague, the Government of India have as is explained above, come to their aid with contributions from Imperial Revenues. The specific contributions thus passed in the Estimates through the Land Revenue head are Rx. 64,100 in Madras, and Rx. 126,400 in Bombay. In addition to the increases shown under Provincial expenditure on plague a reserve of Rx. 209,500 has been provided under India General in order to meet any unforeseen necessities which may arise during the year.

1899-1900. Reduction of Debt.

147. As no necessity for the relief of Famine is anticipated and the expenditure on Protective Railways and Irrigation Works has been reduced, an additional sum of Rx. 278,100 required to make up the Famine Insurance grant to the full amount of Rx. 1,500,000 will be charged under Reduction of Debt.

1899-1900. State Railways.

148. The increase of Rx. 276,500 under the Working Expenses of State Railways is due to provision being made for heavier traffic, a greater length of open line, and extensive renewals of permanent-way and other works which have been left unfinished during the current year.

1899-1900. Railway Interest.

149. The increase in the Railway Interest represents the interest payable on the new capital outlay to be undertaken on Railways.

1899-1900. Guaranteed Companies.

150. The increase of Rx. 250,700 under Guaranteed Companies is accounted for by the fact that the moiety of surplus profits payable to the Bombay, Baroda and Central India Railway is estimated at Rx. 187,000 against Rx. 117,000 in

1898-99, while the amount due to the Great Indian Peninsula is expected to rise from Rx. 60,000 to Rx. 270,000. It is improbable that the Madras Railway will earn surplus profits during the coming year, but a small provision of Rx. 10,000 has been made to cover the contribution to the Provident Fund and any small amount of surplus profits that may be declared. *Surplus Profits, Land, and Supervision.*

151. The greater portion of the increase under Minor Works and Navigation occurs in Burma and Bombay, and is due to the gradual extension of the works classified under this head. *1899-1900. Minor Works and Navigation.*

152. The increase of Rx. 163,800 on account of Military Works includes a sum of Rx. 150,000 which has been added to the ordinary grant for Military Works in order to provide for defensive works beyond the administrative frontier of India. *1899-1900. Military Works.*

153. The increase under Civil Buildings and Roads is occasioned by the fact that the greater part of the free grants made to Provincial Governments in aid of their general resources have been entered under this head with the object of rendering them available for immediate expenditure if the financial position of the Governments concerned admits of it. *1899-1900. Civil Buildings and Roads.*

154. The increase of £18,800 in Sterling receipts in England occurs almost entirely under Army Receipts, and is due to larger receipts under the head of Indian Troop Service and larger recoveries on account of the value of clothing, accoutrements, etc., in the possession of Regiments on their transfer from the Indian to the British establishment. *1899-1900. Revenue in England.*

155. The Sterling expenditure in England is estimated at £16,531,600 as compared with £16,474,800, the forecast for the current year. *1899-1900. Expenditure in England.*

Of the variations which bring out this result, reduced interest payments account for £45,100. The charges on account of the Post Office are less by £17,400 owing to a more favourable adjustment of the cost of the Eastern Mail Service as between the English and Indian Post Offices.

The payments of interest on capital deposited by Railway Companies show an increase of £42,600 due to further deposits of capital made by the East Indian Railway, the Bengal-Nagpur Railway, and the Indian Midland Railway. A decline in the charges on account of the Assam-Bengal Railway is owing to the rate of interest guaranteed on the Company's share capital having been reduced from 3½ to 3 per cent.

The Civil Superannuation and Pension Charges show an increase of £43,300, owing to a gradual increase in the claims to pension.

Under Effective Army charges the total in 1899-1900 is about the same as in the Budget Estimate of 1898-99, but the cost of the Indian Troop Service and the Miscellaneous charges will be less by £8,000, while, on the other hand, the estimate of the payments to the War Office in respect of British Forces serving in India is higher by £9,000.

Under Non-Effective Army Charges there will be a total increase of £21,000 made up of an increase in the payments to the War Office of £37,000, of small increases under Miscellaneous Pensions and other charges aggregating £4,000, and a reduction of £20,000 in the charges for pay and pensions of non-effective and retired officers of the Indian Service.

156. The charge for Exchange on the net Sterling expenditure during the coming year is less by Rx. 569,600 than in the Budget Estimate of 1898-99. The net Sterling expenditure is more than in the Estimate of 1898-99 by £38,000, and the exchange on this difference at the rate of £1=R15·6, being the rate assumed in the Budget Estimate for 1898-99, is Rx. 21,300. The direct saving from the rise in the rate of exchange from £1=R15·6 to 15·75*d.* the rupee, the rate taken for the coming year, amounts, therefore, to Rx. 590,900. *1899-1900. Exchange.*

Section IV.—Statements comparing the figures of the Estimates under the more important heads of Revenue and Expenditure with those of past years.

LAND REVENUE.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99. Budget.	1898-99. Revised.	1899-1900, Budget.

TOTAL	4,097,117	4,109,603	4,187,601	4,143,900	4,085,000	4,209,400

157. Throughout the period covered by the statement the Land Revenue of the area included under India General, has been below the standard of Rx. 175,000 attained in 1893-94. It escaped the influence of the famine of 1896-97, but during the present year there has been a marked drop in the revenue owing to a failure of the rains and general scarcity in Ajmir. An improvement is looked for in the coming year.

158. In the Central Provinces the whole area was affected by famine which began earlier and lasted longer than anywhere else in India. The effect on the Land Revenue was marked and extended over 1896-97 and 1897-98. Since then there has been a return of prosperity and the Revised Estimate includes Rx. 56,000 and the Budget Rx. 36,000 on account of famine arrears. Recent information shows that there has been some failure of crops in the wheat-growing areas of Saugor and Damoh, and the Budget has been framed on more cautious lines than was proposed by the local officers.

159. The Land Revenue in Burma received only a slight check in 1896-97 and then resumed its normal course of steady progress due to extension of cultivation, revision of low assessments based on provisional data, and the enhanced yield of the capitation tax which follows the growth of population in a new Province with large areas of fresh land.

160. Assam was untouched by the famine, and the figures of 1896-97 show an increase in the Land Revenue. In the following year the revenue was affected by the earthquake which reduced for the time being the tax-paying capacity of the people, while in Kamrup and Nowgong large tracts of land have been rendered uncultivable by the sand that has been thrown up. The reduction of revenue from this cause is estimated by the Chief Commissioner at not less than a lakh of rupees. Allowance has been made for this in framing the Budget of 1899-1900.

161. In Bengal the Land Revenue being permanently settled at very low rates is to a great extent beyond the reach of famine, but the calamity of 1896-97, which extended to the whole of North Behar, to a large part of Chota Nagpur and Western Bengal and to isolated tracts in Central Bengal, directly affected the rental of Government Estates where the State is itself the landlord, and reduced the recoveries of survey charges in Behar.

162. Distress in the North-Western Provinces began early and was widely diffused but the recovery of the country has been rapid. The Revised Estimate includes Rx. 440,000 on account of suspensions of revenue, and the Budget anticipates recoveries of Rx. 417,300 on this account besides Rx. 77,800 due to revision of settlements.

163. In the Punjab the revenue rose directly the famine was over, and although during the current year the estimate has not been worked up to and suspensions of revenue have been necessary in Hissar and the neighbouring districts, it is hoped that this will be counteracted by extension of cultivation along the Chenab Canal and in the Montgomery district.

164. The Revenue in Madras is improving in the manner characteristic of the Province. The balance in arrear at the close of 1896-97 has been steadily reduced and the Budget anticipates an increase of Rx. 70,900 from the resettlement of the Kistna and Godavari districts and from extension of cultivation.

165. In spite of famine and plague in Bombay arrears of revenue amounting to Rx. 250,500 have been recovered in the current year and a favourable inundation in Sindh has swelled the revenue by expanding the cultivated area. In the coming year there will be smaller arrears to collect, and the conditions in Sindh are expected to be less favourable, but Rx. 51,000 will be added to the demand by revision of settlements.

OPIUM.

166. Throughout the period comprised in the table, the revenue derived from the sale of Bengal Opium follows the average price per chest offered at the Calcutta sales, which in its turn is determined mainly by the dollar and tael prices obtained in China. The growing competition of the Chinese drug has prevented the prices in China from rising in proportion to the increased value of the rupee due to the Currency legislation of 1893. The trade has also been handicapped by the uncertainties of exchange and the stringency of the Indian money market. These latter conditions have now improved and somewhat larger stocks are available for the China market. It is therefore hoped that the rise of Opium revenue in the current year, which was due largely to a scanty crop in China, may continue.

The decline in the exports of Malwa Opium which the table brings out, and its recent revival, are due to the same causes as those which affected Bengal Opium. The revival has been helped by the reduction of the pass-duty, which was found to be more than a declining trade could bear, to R500 per chest.

The receipts from Excise Opium are governed by the same causes as Excise Revenue generally, but as the consumers of opium are a comparatively well-to-do class, the returns are perhaps somewhat less sensitive to the influence of famine.

167. The main items of expenditure are payments to cultivators, the amount of which varies directly with the number of chests of Bengal Opium produced, and the quantity of Malwa Opium purchased for excise purposes which depends on the anticipated demand. The increase in charges is also due to the fact that the position of the officers of the Opium Department, which had long been admitted to be unsatisfactory, has of late years been bettered.

SALT.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99.		1899-1900, Budget.

Charges	521,044	523,352	473,747	519,600	466,100	537,300

(a) Chiefly excise on local manufacture. | (b) Chiefly duty on imported salt.

168. The fluctuations of the aggregate Salt Revenue correspond closely to the material condition of the mass of the people who consume salt. A sharp decline in the famine year 1896-97 has been followed by a gradual rise which in the Revised Estimate for the current year exceeded the standard of the revenue of 1895-96. The Bengal statistics, however, follow a somewhat different course. There the receipts rose in 1896-97 and fell in 1897-98 when the revenue of every other Province shows a rise. In explanation of this it may be observed, first, that large portions of the area supplied from Bengal escaped famine altogether, while the cultivating classes found their purchasing power greatly augmented by high prices; secondly, that the demand of 1897-98 was affected by the earthquake and cyclone of 1897; and thirdly, that imported salt is less sensitive to local influences than salt produced in the country.

The increase in the revenue in Northern India during the current year is mainly due to the revival of traffic in Kohat Salt since the cessation of the frontier disturbances. It is doubtful, however, whether the demand will continue on the same scale during the coming year; and reduced receipts are also expected from the salt produced at Sambhar, Didwana and Pachbudra. For Burma and

Bengal the estimate is normal; in Madras it assumes a consumption of about 70 lakhs of maunds. The Bombay estimate has been taken at a moderate figure in view of the uncertainty arising from the prevalence of plague.

STAMPS.

		Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99. Budget.	1898-99. Revised.	1899-1900, Budget.
REVENUE.							
Court Fees and Plain Paper		3,221,216	3,216,005	3,305,376	3,301,100	3,411,000	3,142,800
Commercial and other Stamps		1,418,875	1,476,870	1,456,034	1,478,900	1,396,300	1,425,800
Other Revenue		83,964	84,867	75,633	75,900	32,600	28,500
TOTAL	Rx.	4,727,055	4,777,742	4,837,043	4,855,900	4,839,900	4,897 100
Charges—							
India	Rx.	95,158	97,006	97,998	99,700	97,100	100,400
England (Stores)	£	43,492	40,808	35,844	37,800	36,500	39,300
Exchange	Rx.	33,044	26,967	20,185	21,100	18,200	20,600
TOTAL	Rx.	171,694	164,781	154,027	158,600	151,800	160,300

169. The Stamp Revenue depends on such a wide variety of transactions that fluctuations in its aggregate yield can hardly be ascribed to any single cause. Scarcity, for example, exercises a converse effect on the demand for the two main classes of Stamps. On the one hand it compels self-denial in the pursuit of litigation, on the other it promotes the execution of documents for the purpose of raising money. Both these tendencies are reflected in the revenue returns. The receipts from Court-fees drop sharply in the famine year, but they recover at once, and their progress is so rapid that its effect was greatly under-estimated in framing the Budget of the current year. In the case of Commercial Stamps the course of development is reversed. The revenue rises in the famine year and falls continuously from that time to a level below that of 1895-96. It was over-estimated in the Budget of the current year, and the figure taken for 1899-1900 represents only a moderate advance on the standard of 1895-96.

EXCISE.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99. Budget.	1898-99. Revised.	1899-1900, Budget.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
REVENUE.						
Bengal	1,337,850	1,339,931	1,274,775	1,325,000	1,335,000	1,350,000
North-Western Provinces	549,459	446,444	451,496	490,000	557,500	557,500
Madras	1,438,405	1,489,657	1,461,945	1,530,000	1,390,000	1,420,000
Bombay	1,164,147	1,099,650	1,094,996	1,120,000	1,146,000	1,146,000
Other Provinces	1,232,556	1,238,518	1,206,242	1,252,300	1,302,500	1,304,700
TOTAL	5,722,417	5,614,200	5,489,454	5,717,300	5,731,000	5,778,200
Charges	207,957	212,855	240,463	250,200	243,000	261,800

170. The progress of Excise Revenue, like the growth of the receipts from Court-fees, is a fair test of the ability of the people to spend money on luxuries. The years of scarcity show accordingly a marked decline, and in Bombay, owing probably to plague and the apprehension to which it gives rise, the

standard of 1895-96 has not yet been regained. In Madras, on the other hand, the effect of the famine and apprehended plague in reducing revenue was for a time neutralised by the extension of the tree-tax system of raising revenue from toddy. This system attained its present maximum application in 1897-98. The increase of charges is due to the adoption of more efficient methods of administration and prevention.

PROVINCIAL RATES.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99. Budget.	1898-99. Revised.	1899-1900, Budget.
REVENUE.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
District Local Funds	2,184,443	2,086,080	2,269,731	2,326,600	2,402,300	2,374,400
Provincial Cesses, including Famine Insurance	664,081	657,260	641,731	671,600	670,000	675,600
Village Service and Patwaris	734,443	667,487	678,399	726,400	737,100	748,600
Other Cesses	124,038	126,028	133,429	135,400	142,700	152,900
TOTAL	3,707,005	3,536,855	3,723,290	3,860,000	3,952,100	3,951,500
Charges	52,675	54,301	52,530	52,400	55,700	60,600

171. As was pointed out last year, the revenue from Provincial Rates is determined by the causes affecting Land Revenue, to which in most Provinces the rates bear a definite relation. The rise of revenue in the last three years corresponds therefore to the recovery of Land Revenue from famine influences. It should be added, however, that in tracts where the Land Revenue is permanently settled the revenue from Provincial Rates is increased independently of the Land Revenue by the periodical revaluation of the aggregate rental of a district for the purpose of levying these cesses.

Charges	202,948	203,386	211,379	215,400	215,300	232,300

172. The decline in the revenue from import duties in 1896-97 was due not merely to the effect of the famine in reducing the demand for manufactured articles and metals but also to the exemption of cotton yarns from duty and the reduction of the duty on cotton manufactures from 5 to 3½ per cent. The volume of the trade in cotton goods was not affected until the following year when the imports declined greatly. Since then business has revived, but it is still suffering from the effects of the plague in Bombay, a great producing and distributing centre, and from the overstocking of markets in China and Japan. The revenue from oils is derived chiefly from kerosene. The trade in this article fluctuates greatly and the cheaper oils from Russia and Sumatra are now beginning to compete successfully with the finer American oil. The increase under articles of food and drink is due to the imports of beet-sugar, principally from Germany and Austria, which has been poured into India in considerable quantities. The extraordinary rise in the imports of silver, especially in a year when the effects of the famine were still severely felt, is a phenomenon of which no satisfactory explanation has been found, but the trade is now diminishing and with a large demand springing up for gold, the decrease next year is expected to be considerable. The export duty shows a great contraction in 1896-97 and 1897-98 owing to great quantities of Burma rice, which would otherwise have been exported to foreign countries and have paid duty accordingly, being diverted to India to meet the famine demand. The large exports of 1898-99 followed on a bumper crop in Burma, the chief exporting province, but such a harvest is not expected to recur and the surplus available for export to foreign countries during 1899-1900 is likely to be considerably less than in the previous year.

ASSESSED TAXES.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99. Budget.	1898-99. Revised.	1899-1900, Budget.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Deduction by Government from Salaries, Pensions, and Interest payments	447,688	439,259	444,494	479,800	447,400	449,700
Other Collections	1,387,501	1,433,550	1,450,971	1,413,100	1,482,700	1,499,100
TOTAL	1,835,189	1,872,809	1,895,465	1,892,900	1,930,100	1,948,800
Charges	29,868	30,323	32,278	32,700	33,100	33,500

173. The progress of this branch of revenue depends upon the general prosperity of the classes from which it is collected and upon the improvements constantly being introduced in the methods of assessing and levying the tax. The people by whom it is paid are to a great extent either independent of adverse seasonal influences, or derive a profit from their direct or indirect results, and the revenue accordingly does not show any distinct variation in relation to scarcity.

FOREST.

	Accounts, 1895-96.	Accounts, 1896-97.	Accounts, 1897-98.	1898-99. Budget.	1898-99. Revised.	1899-1900, Budget.
	Rx	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue	1,660,504	1,733,869	1,739,514	1,735,600	1,838,000	1,790,700
Expenditure	911,161	993,955	1,001,689	1,050,500	1,010,200	1,067,700
NET	749,343	739,914	737,825	685,100	827,800	723,000

174. The revenue under Forest has recovered from the effects of the famine and has resumed its normal rate of progress. The great increase shown in the Revised Estimate of the current year is due to the exceptional demand for teak timber which is not expected to be maintained during 1899-1900.

176. The reduction in the Interest expenditure which has taken place during the period is due on the one hand to an increase in the amount of interest charged against Railways and Irrigation, and on the other to the reduction in the rate of exchange.

177. The Postal revenue displays unbroken progress throughout the period, and its advance in the coming year would have been more marked but for the introduction of the one-anna rate of postage to the United Kingdom and British Possessions and the concurrent reduction in the Inland rates of letter postage. At the same time a substantial addition has been made to the expenditure in order to provide for administrative improvements which have been needed for a long time.

178. The Telegraph receipts of 1897-98 were abnormally high owing to the great use of the telegraph in connection with frontier wars, famine, and plague. The decline experienced in the current year and anticipated in the next year is due partly to the cessation of military operations and partly to the increased popularity of deferred telegrams.

179. The increase in the Mint expenditure in 1898-99 is explained in paragraph 109 above.

(a) Includes Upper Burma charges up to 1896-97.

180. The progressive increase of total expenditure during the first three years of the period was partially arrested in 1898-99, but has been resumed in the Budget for the current year. This includes a large increase under Medical rendered necessary by the persistence of plague in Bombay and its spread to Madras, and likely to be further enhanced by the recent appearance of the disease in Calcutta. Provision has been made in Burma for the appointment of an additional Judicial Commissioner and for increasing the salaries of the Civil Administrative Staff, while in Bengal two Additional District and Sessions Judges and several temporary Subordinate Judges and Munsifs are to be appointed. The Police are to be strengthened in Bengal, the North-Western Provinces, Madras and Bombay.

183. The Revised Estimate of net receipts on State Railways is better than the Budget Estimate for 1898-99 by Rx. 207,100. The improvement is chiefly on the North-Western and Rajputana-Malwa Railways, due to a large traffic in grain, seeds and cotton.

184. The reduction in the Interest charges in India follows on the smaller outlay on Construction due to short shipments of stores from England. The rise in the rate of Exchange has caused a considerable saving on the Sterling charges, thus making the net result considerably better than in the original estimate.

185. The net receipts from State Railways in 1899-1900 are estimated at Rx. 370,900 higher than the Revised Estimate for 1898-99 in anticipation of a further improvement in traffic based on the excellent prospects of the spring crops and on the additional mileage which it is expected will be opened during the year. The increase in the Estimate of Working Expenses amounts to Rx. 170,400 and is due to heavier traffic, increased open mileage, and provision

for heavy renewals of way and works unfinished in 1898-99. There is also an increase in Interest charges, chiefly in India, due to the progress of Capital Outlay.

186. The Revised Estimate of net receipts from Guaranteed Railways exceeds the original Estimate by Rx. 571,000. This result is due to a marked improvement in goods traffic on the Great Indian Peninsula and Bombay, Baroda and Central India Railways following on an amelioration of the unfavourable conditions which obtained during the last two years, as well as to a reduction in the outlay on renewals on the Bombay, Baroda and Central India Railway.

The increase in Surplus Profits and other charges in India is more than covered by the saving in Exchange on Sterling Interest, leaving the net result, Rx. 606,600, better than the original Estimate.

A further improvement in traffic is expected in 1899-1900, but owing to the increase in Surplus Profits, etc., payable in India, and to the lower rate of Exchange adopted, the net result falls short of the Revised Estimate by Rx. 30,700 only.

187. The Revised Estimate of direct receipts from Major Works is better than the Budget Estimate for 1898-99 by Rx. 193,200. The increase occurs chiefly in the Punjab and the North-Western Provinces and Oudh, and is due to a larger area having been irrigated in the past *kharif* season than was anticipated. The small increase of Rx. 22,700 in the receipts from Minor Works is due partly to the same cause, and partly to the revenue in the Montgomery District which was hitherto shown as Indirect, having been treated as Direct receipts in accordance with the new Schedule of Water-rates. The Budget Estimate for 1899-1900 has been based on normal demands for water in the *kharif* season of 1899 and besides allowing for an increase of Rx. 30,800 in the revenue from the Chenab Canal due to development of irrigation, provides also for favourable *rabi* irrigation in the Punjab generally. The increase of irrigation in 1898-99 caused a small increase in Working Expenses. The increase of Rx. 27,100 in Working Expenses provided for in 1899-1900 is due to additional lengths of canals and distributaries being opened for irrigation.

188. The financial results obtained during 1896-97 and 1897-98 from Irrigation Works, for which Capital and Revenue Accounts are kept, are given below :—

	1896-97.	1897-98.

Provincial—						
Expenditure	2,063,159	2,131,781	2,258,018	2,531,000	2,461,400	3,251,400
Receipts	305,041	279,888	278,562	280,300	291,900	289,500
Local—						
Expenditure	1,777,057	1,685,125	1,564,010	1,745,600	1,626,800	1,713,500
Receipts	292,671	295,521	281,069	293,400	294,700	292,900

189. The expenditure on Provincial and Local Civil Works during 1898-99 is expected to fall short of the Budget Estimate by Rx. 69,600 and Rx. 118,800. This is due partly to the expenditure having been over-estimated in some Provinces, and partly to the restriction of outlay in Bombay and Madras in order to provide funds for expenditure in connection with plague.

190. The estimated expenditure on Military Works in 1899-1900 is higher than the Budget Estimate of the previous year by Rx. 137,200. This is chiefly due to provision to the extent of Rx. 150,000 having been made for defensive works beyond the administrative frontier.

191. Under Imperial Civil Works the expenditure in 1899-1900 is less than the Budget Estimate of the previous year by Rx. 40,600, owing for the most part to the completion of the Bangalore Water-works.

In the Provincial and Local Section of the Estimates, the provision for expenditure depends chiefly on the state of the Provincial and Local balances, and in 1899-1900 considerable additions have been made in the Provincial Section in connection with the free grants to Local Governments of Rx. 700,000, as explained in paragraph 65; the total increase over this year in the Provincial Section is Rx. 790,000, and in the Local Section Rx. 86,700.

192. The variations in the above figures have been explained in paragraphs 118, 120, 121, 138, 154, and 155 above.

Section V.—Capital Expenditure on Public Works not charged against Revenue.

193. In paragraph 177 of the Financial Statement for March 1898 the programme sanctioned by the Secretary of State for the construction of Railways in India during the three years 1896-97 and 1897-98 and 1898-99, which involved the expenditure of 29⅔ crores of rupees, was referred to and explained.

The year 1898-99 being the last of the three years to which the programme of 29⅔ crores applied, it was considered necessary to prepare a new programme of Railway Construction for the three years from 1899-1900 to 1901-2. The large Cash Balances in the Indian Treasuries, which justified the policy of extending Railway Construction which was adopted in 1895-96, have now been exhausted. The new estimate of expenditure has accordingly been framed at a moderate figure, and a programme for the next three years working up to Rx. 20,322,100 has been sanctioned by the Secretary of State. In consequence, however, of the heavy lapse on the grant for 1898-99, amounting to Rx. 2,401,400, much of which is due to short outlay in England consequent on the engineering strikes and the failure of contractors to complete orders placed with them for stores, it has been decided, with the concurrence of the Secretary of State, to add a sum of Rx. 1,060,000, representing a portion of this lapse, to the grant for 1899-1900. A further addition of Rx. 1,090,000 has since been provisionally sanctioned under certain conditions, subject to the Secretary of State's approval. This new programme includes all Railway Construction for which Government undertakes any responsibility or gives any guarantee, and includes therefore, in addition to the classes of outlay provided for in the earlier programme, (1) the Capital expenditure of the three old Guaranteed Companies, and (2) outlay on branch lines of Railway incurred by Private Companies on firm guarantee by Government. The details of the new programme may be compared as follows with the corresponding expenditure in the three years ending with 1898-99:—

	1896-97, Actuals	1897-98, Actuals.	1898-99, Revised.	Total.	1899-1900.	1900-1.	1901-2.	Total.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
I.—State Lines—								
(i) Managed by the State.	3,705,834	2,354,102	2,379,500	8,439,436	1,829,000	1,747,200	1,673,000	5,249,200
(ii) Managed by Companies.	1,973,841	2,258,587	2,771,900	7,004,328	2,876,000	2,552,000	2,755,500	7,183,500
II.—Lines of three old Guaranteed Companies.	285,348	437,819	851,600	1,574,767	1,107,800	550,000	471,400	2,129,200
III.—Lines of other Guaranteed or Assisted Companies.	2,979,194	3,526,515	2,937,300	9,443,009	2,841,900	1,820,000	1,921,100	6,583,000
IV.—Branch Lines on firm guarantee.	1,008	124,251	218,000	343,259	168,000	59,200	...	227,200
TOTAL .	8,945,225	8,701,274	9,158,300	26,804,799	8,822,700	6,728,400	6,821,000	21,372,100

194. The Budget Estimate of 1898-99 provided for an expenditure of Rx. 13,051,300 on Railways, Irrigation Works, and Miscellaneous Public Improvements, including Rx. 1,129,900 on account of expenditure under the head of Open Line Capital by the three old Guaranteed Companies and Rx. 334,500

for Branch Lines with a firm guarantee. The total sum was distributed as follows:—

	Rx.
34.—Construction of Protective Railways	668 300
48.—State Railways—Construction	4,951,300
49.—Irrigation	750,000
50.—Miscellaneous Public Improvements	48,000
Capital of Indian Railway Companies	3,475,000
Guaranteed Railways—Open Lines	1,129,900
„ „ Extensions	750,000
Branch Line Companies	334 500
East Indian Railway Company's Debentures	944,300
TOTAL	13,051,300

195. During the course of the year it became apparent that, owing to the late arrival of English stores consequent on the engineering strikes in England and other causes, it would be impossible to work up to the amount of the Budget Estimate. It was also decided that expenditure on the jetties at Chittagong should not be treated as Miscellaneous Public Improvements not charged to Revenue, but should form a part of the expenditure under "48.—State Railways—Construction," the necessary adjustment in regard to previous expenditure being duly carried out. The Revised Estimates for Capital expenditure on Railways and Irrigation Works during 1898-99 have accordingly been prepared as under:—

	Rx.
34.—Construction of Protective Railways	695,400
48.—State Railways—Construction	2,882,200
49.—Irrigation	692,200
Capital Account of Indian Railway Companies	2,937,300
Guaranteed Railways—Open Lines	552,800
„ „ Extensions	298,800
Branch Line Companies	218,000
East Indian Railway Company's Debentures	1,573,800
TOTAL	9,850,500

or for a sum less by Rx. 3,200,800 than the amount of the Budget Estimate.

In addition to the above sum, the Branch Line Companies not in receipt of a firm guarantee and the Companies whose accounts are outside the Government accounts are expected to spend during the year Rx. 1,470,100 as under:—

	Rx.
Branch Line Companies—	
Ahmedabad-Parantij	600
Mymensingh-Jamalpur	70,000
South Behar	204,000
Tapti Valley	650,000
	924,600
Outside the Government Accounts—	
Bengal and North-Western Railway Extensions	445,000
Segowlie-Raksaul	20,500
Nilgiri	40,000
Bengal Dooars Extensions	40,000
	545,500

Thus making a total of Rx. 11,320,600 for all Railways and Irrigation Works in India.

196. In Despatch No. 351 (Financial), dated 10th November 1898, from the Government of India, to the Secretary of State, it was proposed to incur expenditure to the extent of Rx. 20,322,100 on the construction of Railways during the three years 1899-1900 to 1901-2, distributed as under:—

	Rx.
1899-1900	6,772,700
1900-1	6,728,400
1901-2	6,821,000
TOTAL	20,322,100

The Secretary of State's approval to this forecast was conveyed in his telegram dated 10th January 1899.

197. The programme of proposed expenditure during 1899-1900 provides for a sum of Rx. 6,772,700. The reasons for the heavy lapse on the grant for 1898-99, amounting to Rx. 2,401,400, have already been stated in paragraph 193 above, and it has been explained that a sum of Rx. 2,150,000 has been added to the grant for 1899-1900. With this addition the total amount available for expenditure on construction of Railways will stand at Rx. 8,922,700. From this figure, however, it will be necessary to deduct a sum of Rx. 100,000 on account of the Capital cost of the Umaria Colliery which will be transferred to the Rewa Durbar with effect from 1st April 1899. The net amount entered in the Estimates for construction of Railways therefore stands at Rx. 8,822,700.

This sum has been distributed for expenditure on Railways as under:—

	Rx.
34.—Construction of Protective Railways	490,000
48.—State Railways—Construction	3,465,000
Capital of Indian Railway Companies	2,841,900
Branch Line Companies	168,000
Guaranteed Railways and Extensions	1,107,800
East Indian Railway Company's Debentures	750,000
Total amount available	8,822,700

In addition to the above, further Capital expenditure will also be incurred in 1899-1900 by Branch Line Companies not in receipt of a firm guarantee, and other Companies whose accounts are outside the Government accounts, to the extent of Rx. 950,300 as under:—

	Rx.
Branch Line Companies—	
Ahmedabad-Parantij	2,100
Mymensingh-Jamalpur	60,000
South Behar	77,500
Tapti Valley	230,000
TOTAL	369,600
Outside the Government Accounts—	
Bengal and North-Western Railway Extensions	365,000
Segowli-Raksaul	10,700
Nilgiri	5,000
Bengal Dooars Extensions	200,000
TOTAL	580,700

The provision for Irrigation Works amounts to Rx. 850,000.

The total Capital expenditure on Railways and Irrigation Works in 1899-1900 accordingly amounts to Rx. 10,623,000.

48.—State Railways—Construction.

198. The Budget grant for 1897-98 amounted to Rx. 5,838,600 as under:—

		Rx.
Total provision in Forecast		10,130,000
	Rx.	
Deduct—Capital of Indian Railway Companies (Rx. 3,710,000 *less* Rx. 1,200,000 for East Indian Railway)	2,510,000	
Provision for Burma Railways . .	1,000,000	
Additional provision for expenditure in England on the Assam-Bengal Railway (Rx. 199,300—Rx. 80,000)	119,300	
		3,629,300
		6,500,700
Deduct—Amount provided for East Indian Railway from debentures raised by Company . . .		662,100
Grant available .		5,838,600

The whole amount was shown under the head 48.—State Railways—Construction.

The Revised Estimate provided for a total expenditure of Rx. 3,903,400 under the same head, against which the actual expenditure incurred amounted to Rx. 3,632,005, thus falling short of the Revised Estimate by Rx. 271,395 and of the Budget provision by Rx. 2,206,595.

199. The amounts provided for Railway Construction this year and next are —Revised Estimate, 1898-99, Rx. 5,151,400, and Budget Estimate, 1899-1900, Rx. 4,705,000. These figures include provision to the extent of Rx. 695,400 and Rx. 490,000, respectively, under the head 34.—Construction of Protective Railways. The distribution of the above totals is given in paragraph 28 of this Statement.

200. The distribution of the total expenditure on Railway Construction through State and Companies' agency in each of the three years from 1897-98 to 1899-1900, as given in paragraph 193, is as follows :—

	1897-98, Accounts.	1898-99, Revised.	1899-1900, Budget.
Expenditure in England.			
1. State Lines	809,010	788,000	681,000
2. Old Guaranteed Railways	761,182	937,600	818,800
3. Extensions of ditto	763	86,300	130,900
4. Other Guaranteed or Assisted Railways .	748,921	756,800	996,000
TOTAL . £	2,319,876	2,568,700	2,626,700

	1897-98, Accounts.	1898-99, Revised.	1899-1900, Budget.
Exchange on Expenditure in England.			
1. State Lines	455,570	394,000	356,700
2. Old Guaranteed Railways at contract rate .	69,198	85,200	74,500
3. Extensions of ditto at average rates .	466	44,000	68,200
4. Other Guaranteed or Assisted Railways at contract rates	462,842	394,100	517,700
TOTAL . Rx.	988,076	917,300	1,017,100
Expenditure in India.			
1. State Lines . . . . . . Rx.	3,348,109	3,969,400	3,667,300
2. Old Guaranteed Railways (net repayments) . . . . . . Rx.	—398,838	— 470,000	—349,300
3. Extensions of ditto . . Rx.	5,048	168,500	364,700
4. Other Guaranteed or Assisted Railways . . . . Rx.	2,314,752	1,786,400	1,328,200
5. Branch Lines on firm guarantee . Rx.	124,251	218,000	168,000
TOTAL INDIA .	5,393,322	5,672,300	5,178,900
TOTAL OF PROGRAMME .	8,701,274	9,158,300	8,822,700
To the above should be added the following amounts on account of expenditure on other Companies' lines and expenditure on Railway Construction from Provincial Revenues :—			
Other Branch Lines . .	563,685	924,600	369,600
Railways outside of Government accounts	903,550	545,500	580,700
Provincial State Lines . ,	3,792	4,200	3,600
GRAND TOTAL .	10,172,301	10,632,600	9,776,600

49.—Irrigation—Construction.

201. The figures are:—

Accounts, 1897-98.	Budget, 1898-99.	Revised, 1898-99.	Budget, 1899-1900.
Rx.	Rx.	Rx.	Rx.
692,431	750,000	692,200	850,000

The expenditure during the current year is likely to fall short of the Budget Estimate by Rx. 57,800 owing chiefly to delay in starting work on the Jhelum Canal. In order to meet the heavy demands for expenditure on this and other projects, the Budget grant for 1899-1900 has been fixed at Rx. 850,000.

50.—Miscellaneous Public Improvements.

Accounts, 1897-98.	Budget, 1898-99.	Revised, 1898-99.
Rx.	Rx.	Rx.
4,105	48,000	—4,100

202. As was explained in paragraph 185 of the Financial Statement of March 1898, this head was opened in the Accounts of 1897-98 to record the expenditure on the construction of certain jetties and landing-sheds at Chittagong in connection with the Assam-Bengal Railway. It has now been decided to classify this expenditure under the head "48.—Railways—Construction," and the expenditure of Rx. 4,105 recorded in 1897-98 has accordingly been written back in 1898-99.

Section VI.—Ways and Means.

HOME TREASURY.

203. The following table sets out the transactions of the Home Treasury as they appear in the Budget and Revised Estimate for 1898-99 and in the Budget for the coming year :—

	Budget, 1898-99.	Revised, 1898-99.	Budget, 1899-1900.
RECEIPTS.	£	£	£

Issues to Railway Companies on Capital Account—			
for discharge of debt	1,491,600	805,500	1,248,600
" expenditure	2,316,500	1,823,900	1,948,700
Remittances from India, net—			
(*a*) Railway Companies' Remittances	302,500	—62,700	736,000
(*b*) Family and other Remittances	191,300	225,600	268,800
Add—Closing Balance	2,242,854	4,304,444	2,817,344
TOTAL	33,335,854	33,363,944	28,526,044

204. In the Budget Estimate of 1898-99 the net disbursements of the Home Treasury, excluding Loans and Council Bills, were taken at £18,540,700. The intention then was to provide £16,000,000 of this by the sale of Bills on India, and to meet the balance, £2,540,700, by raising Sterling loans in England. According to the Revised Estimates the net disbursements, apart from the discount on the loan raised during the year by means of 2½ per cent India Stock, will be £17,642,600, so that if the sales of Council Bills had been restricted to £16,000,000, loan funds would have had to meet only £1,642,600, instead of £2,540,700 as originally contemplated. But the new loan of the year was

raised at a heavy discount, amounting to £702,300, on a total debt of £6,000,000; while, on the other hand, the Secretary of State has taken advantage of the improvement in the cash balances in India and of the favourable prospects of the season to raise his drawings in 1898-99 to £19,000,000. The larger balances thus made available have enabled the Secretary of State to reduce temporary borrowing on India Bills from £6,000,000 to £4,500,000, and the cash balance of the Home Treasury at the end of the year is now expected to exceed the opening balance by £1,770,200. Although, for the reasons explained above, the sale of Bills on India to the extent of £18,000,000 only would have been more than sufficient to cover the net disbursements of the Home Treasury in 1898-99, the Secretary of State has drawn a million in excess of this sum with the object of fully meeting the large mercantile demand for remittance arising from the brisk trade of the year. The drawings of 1899-1900 will be reduced by a corresponding amount.

1898-99. Sterling Loans.

205. In accordance with the intention announced in paragraph 194 of the last Financial Statement, India Stock for £6,000,000 was issued in July 1898. The new stock was issued at 2½ per cent: but owing to the unfavourable state of the money market at the time, the loan was taken up at the heavy discount of £11 9*s.* 7*d.* per cent. The total amount tendered was £22,385,300, and the minimum rate of accepted tenders was £88 5*s.* 6*d.* It is usual, when the amount of discount on a new loan is moderate, to charge off the whole amount against the Revenues of the year in which the loan is raised; but as in the present case the discount comes to the large sum of £702,300, it has been decided, in accordance with an arrangement sanctioned in 1836, to create a Sinking Fund for its discharge by annual payments for 50 years at an interest of 2½ per cent per annum. Accordingly, the money actually raised by the loan, namely, £5,297,700, is shown in the table in paragraph 203 as a receipt on account of the loan, and the annual payment to the Sinking Fund, amounting to about £7,000, is, as already explained in paragraph 121, shown as expenditure.

In accordance with the programme settled at the beginning of the year, 384,700*l.* of Oudh and Rohilkhand Railway 4 per cent Debenture Stock was discharged on the 6th May 1898, and 3,000,000*l.* India Debentures bearing interest at 3½ per cent were also discharged on their expiry on 16th August 1898.

1898-99. Temporary Debt.

206. In March last it was intended to raise 6,000,000*l.* in 1898-99 by means of India Bills so as to replace an equivalent amount falling due in the year; but in consequence of the larger amount received for Bills of Exchange on India only 4,500,000*l.* of temporary debt had to be replaced, and the remainder was discharged by a reduction in the cash balances. Of the 4,500,000*l.* India Bills issued during the year, 2,500,000*l.* were issued in May 1898 and 2,000,000*l.* in September, both issues being for twelve months. The results of the loans were as follows:—

Month of Issue.	Amount tendered.	Amount accepted.	Average rate of interest per cent per annum.
	£	£	£ s. d.
May 1898	18,809,000	2,500,000	2 2 6
September 1898	7,175,000	2,000,000	2 12 0

Capital of Railway Companies.

207. The net issues to Railway Companies in England in 1898-99 are now estimated to be 597,600*l.* against 640,500*l.* entered in the Budget Estimate, showing a reduction of 42,900*l.* only. The following are the usual details:—

	Budget.	Revised.
	£	£
RECEIPTS.		
Subscribed Capital—		
(*a*) State Lines	1,335,100	1,151,800
(*b*) Guaranteed Lines	1,829,500	836,800
Miscellaneous	3,000	43,200
TOTAL .	3,167,600	2,031,800

ISSUES.	Budget. £	Revised. £
For discharge of Debentures—		
(a) State Railways	835,100	600,000
(b) Guaranteed Lines	656,500	205,500
For Stores, Establishment Charges, etc.—		
(a) State Railways	865,300	759,700
(b) Guaranteed Lines	1,451,200	1,064,200
TOTAL	3,808,100	2,629,400

Debentures of the Rohilkhand-Kumaon, Southern Mahratta, Madras, and Bombay, Baroda and Central India Railway Companies, aggregating £686,100, were renewed instead of being replaced by fresh Capital as was contemplated in the Budget programme. The Capital receipts from the Bombay, Baroda and Central India, the Great Indian Peninsula Railway, and the Madras Railway were less by 541,700*l.* than the original estimate. On the other hand, the Indian Midland and Bengal-Nagpur Railways raised 51,800*l.* more, making the net decrease in the amounts of new Capital 1,176,000*l.* as shown above. The item "Miscellaneous" includes 37,490*l.* received from the Bombay, Baroda and Central India Railway Company as contribution from the Fire Insurance Fund towards the cost of renewing Warren girders.

The estimates of the demands of the Companies for stores, establishment charges, etc., have proved too high except in the case of the Bengal Central, the Bengal-Nagpur, and the Burma Railways.

208. The following are the details of the remittance transactions of Railway Companies working State lines in India, to which advances of funds are made in England for the purchase of stores, etc., against adjustment in India by debit to the Railway Accounts :—

	Budget. £	Revised. £
Advances for purchase of Stores—		
East Indian Railway	700,000	714,400
Rajputana-Malwa	65,000	70,600
South Indian Railway	65,000	47,300
Bengal and North-Western Railway	75,000	107,000
	905,000	939,300
East Indian Railway Debentures	600,000	1,000,000
Transfer Fees, etc.	2,500	2,000
	602,500	1,002,000
Net Remittance from India	302,500	—62,700

The East Indian Railway has been authorised to raise 1,000,000*l.* instead of 600,000*l.* entered in the Budget Estimate, and the advances for purchase of stores are now expected to be largely in excess of the original estimates furnished by the several Companies.

Family and other Remittances.

209. The increase in the net payments on account of family and other remittances of £34,300 is the result of a number of large differences. The demands for Railway stores required by Native States have greatly exceeded the estimates sent from India, and the Revised Estimates also include 10,000*l.* estimated to be refunded to the Imperial Government in settlement of the expenses attending the employment of Native Indian Troops at Suakin. On the other hand, the repayments by Her Majesty's Government of expenses attending the employment of Indian Native Troops sent to Mombassa are expected to exceed the original estimate by 18,600*l.*

210. The net disbursements at the Home Treasury in 1899-1900, excluding Loans and Council Bills, are estimated at £18,487,100 against £18,540,700 in the Budget Estimate of 1898-99. As already stated in paragraph 204, the Secretary of State's present estimate of the drawings in 1898-99 will produce a large increase in his cash balances during the year, and this increase will be drawn upon to a considerable extent to meet the requirements of 1899-1900. It is therefore the present intention of the Secretary of State to draw during 1899-1900 £17,000,000 by Bills on India. *1899-1900. Home Treasury. Ways and Means.*

No increase in the Sterling debt in 1899-1900 is contemplated at present, nor is it proposed to issue any India Stock in the year; but India Bills falling due in 1899-1900 will be covered by fresh issues of a corresponding amount.

According to the programme now announced, the net disbursements of the Home Treasury will be met, in the year 1899-1900, by the sale of Bills on India to the amount of £17,000,000 and by a reduction in the cash balances of £1,487,100.

211. It should be understood that in stating the present intentions of the Secretary of State no sort of pledge is given that he will adhere to the programme.

INDIA.

212. The following is a summary of the Estimate of Ways and Means in India:—

	1898-99.		1899-1900.
	Budget.	Revised.	Budget.
RECEIPTS.	Rx.	Rx.	Rx.
1. Excess of Revenue over the Expenditure charged against it	26,298,400	28,196,200	28,808,000

TOTAL . .	47,019,652	46,960,843	48,204,543

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

1898-99. General Summary.

213. The excess of revenue in India over the expenditure charged against it was taken in the Budget Estimate of 1898-99 at Rx. 26,298,400, and it was assumed that it would be possible to pay Rx. 24,960,000 on account of Council Bills during the year with the help of a rupee loan of Rx. 3,000,000 and with a reduction in the cash balances of Rx. 513,400. The early cessation of warlike operations on the frontier, the partial failure of the opium crop which reduced the payments to cultivators, and a satisfactory improvement in Railway and other revenues so far improved the cash balances as to enable Government to reduce the rupee loan of the year to Rx. 1,200,000 without curtailing the drawings of the Secretary of State in the early part of the year. As the year advanced, a steady increase of the revenue and large lapses in the grants for Capital expenditure added constantly to the balances and rendered it possible to meet without difficulty payments for Council Bills considerably in excess of the Budget Estimate. It is now estimated that the revenue in excess of expenditure will amount to Rx. 28,196,200; that the balances of Provincial Governments and Local Funds will be increased by Rx. 1,417,900 instead of being reduced by Rx. 116,800 as anticipated in the Budget; and that the Capital expenditure of Government not charged to Revenue will be Rx. 1,618,600 less than the original estimate. The net result of these and other variations is that in spite of the proposed rupee loan having been reduced by Rx. 1,800,000, Rx. 28,067,000 will be paid on account of Council Bills, and the year will close with a cash balance of Rx. 17,072,043, being Rx. 1,089,600 in excess of the opening balance of the year.

Rupee Loan of 1898-99.

214. It was announced in paragraph 200 of the last Financial Statement that a new loan of Rx. 3,000,000 would be raised in India in 1898-99. But owing to the scarcity of loanable Capital, due partly to famine and plague and partly to the Exchange Banks having remitted their surplus balances to England, the prospects of raising such a large amount in the Indian market were unfavourable. As a review of the Ways and Means in June 1898 showed that owing to a general improvement in revenue prospects a loan of Rx. 1,200,000 might be sufficient, it was decided to borrow that amount only. The state of the market made it impossible to attempt a 3 per cent loan, and the loan was therefore raised at 3½ per cent as in 1897-98.

The loan of Rx. 1,200,000 was issued on 30th July 1898, and tenders for it were received on 24th August 1898. The unfavourable state of the money market affected the result, and the loan was raised at a discount of R5-3½ annas per cent.

1899-1900. Main features.

215. The Revenue Account for 1899-1900 as now made up closes with a surplus of Rx. 3,932,600. The Capital expenditure on Railways and Canals not charged to Revenue must of necessity be provided for either from the surplus revenue, or by reducing the cash balances, or by contracting a loan. In 1899-1900 the requirements for Capital expenditure are—

	Rx.
(1) Government expenditure in India . .	3,275,600
(2) Government expenditure in England (£ 682,100 converted at 15¾d. the rupee)	1,039,400
(3) Net disbursements to Railway Companies in India .	1,355,600
(4) Net disbursements to Railway Companies in England (£475,700 converted at 15¾d. the rupee) . . .	724,900
TOTAL .	6,395,500

Of the total sum of Rx. 6,395,500 thus required in England and in India for the purpose of Capital expenditure during 1899-1900, £1,487,100 or

Rx. 2,266,100 has already been rendered available in the manner explained in paragraph 210 above by the increase in the Secretary of State's balances resulting from the larger drawings of Council Bills during the current year, and the remainder Rx. 4,129,400 will be more than covered by the surplus revenue estimated at Rx. 3,932,600 and an estimated reduction in the cash balances in India of Rx. 392,600. Accordingly no new rupee loan will be required in India for the purpose of Capital expenditure in 1899-1900.

Apart from the revenue surplus mentioned above, there will be a net receipt on account of Unfunded Debt—chiefly Savings Bank deposits—of Rx. 521,900, and Rx. 603,900 (included in "Other items" in the table in paragraph 212) out of the Famine Insurance Grant of Rx. 1,500,000 will be available for appropriation in reduction of debt. Against these important receipts there will be taken the expenditure of Provincial Governments from accumulated balances (Rx. 924,700), the payments for rupee debt discharged (Rx. 190,000), and the loans by Government (Rx. 248,800). The payments of Council Bills in 1899-1900 as entered in the Estimates will be Rx. 26,104,700 including exchange, or Rx. 1,144,700 more than the corresponding figure in the Budget Estimates of 1898-99.

216. As above stated, no rupee loan in India will be required in 1899-1900, and it is not the present intention of the Government of India to raise any such loan in the year. Full liberty is, however, reserved as usual to alter the programme, as now announced, to any extent that may be considered desirable.

Savings Banks, etc.

217. The following table gives the details of the transactions of Savings Banks during the last few years and the estimated transactions for 1898-99 and 1899-1900:—

YEAR.	Net additions to deposits, cash.	Interest.	Total addition.
1890-91	250,700	279,700	530,400
1891-92	517,900	306,200	824,100
1892-93	548,900	339,400	888,300
1893-94	179,900	368,000	547,900
1894-95	—84,500	297,000	212,500
1895-96	247,700	338,500	586,200
1896-97	—581,100	346,600	—234,500
1897-98	—657,100	327,000	—330,100
1898-99, Budget	156,700	327,500	484,200
1898-99, Revised	—90,300	325,700	235,400
1899-1900, Budget	126,500	336,600	463,100

218. The Budget Estimate of 1898-99 anticipated a small addition of Rx. 156,700 to the net deposits, but according to the present estimates there will be a net withdrawal of Rx. 90,300 apart from interest. This result is attributed to the low price ruling for Government securities throughout the greater part of the year having encouraged small investors to withdraw their money from Savings Banks and buy Government paper. The price of 3½ per cent Government securities is now above par, and in preparing the Budget Estimates for 1899-1900 allowance has been made for a small addition to the net deposits of Rx. 126,500.

Loans by Government for local purposes.

219. The transactions during the year 1898-99 under the head of Loans by Government are now expected to result in a net receipt of Rx. 262,500 against Rx. 62,200 entered in the Budget Estimate, an increase in the receipts of Rx. 200,300. This increase is made up of an increase in the recoveries of Rx. 174,400 and a decrease in the advances of Rx. 25,900. As is usually the case, the allotments asked for by Provincial Governments on behalf of local

authorities could not be fully utilised by reason of delays in maturing the schemes of improvement for which the loans were required. The amounts so lapsing are largest in the North-Western Provinces and Oudh.

The recoveries were also larger than the original estimates, chiefly in the Central Provinces and the North-Western Provinces.

Provision has been made in the Budget Estimate of 1899-1900 for net issues on account of loans to the extent of Rx. 248,800 made up of allotments of advances aggregating Rx. 989,600 and recoveries of past loans, Rx. 740,800. The following are the figures of gross recoveries and issues for the six years ending 1899-1900:—

	Issues.	Recoveries.
1894-95	686,806	512,267
1895-96	744,789	506,246
1896-97	1,337,194	542,638
1897-98	1,466,739	958,153
1898-99, Revised	771,700	1,034,200
1899-1900, Budget	989,600	740,800

It will be observed that the large issues of the later years of the period have been to a great extent met by large recoveries which in their turn were rendered possible by the liberal scale on which certain classes of loans were given in years of scarcity. The estimates for next year include a large provision for loans to agriculturists and cultivators in the Punjab required partly for the relief of distress apprehended in the Hissar District, but chiefly in connection with the Chenab Canal Colonisation Project from which a substantial increase of revenue is expected. Allowance has been made for plague loans as far as they can be foreseen at present. A sum of Rx. 100,000 representing the Capital cost of the Umaria Colliery is also included in the figures as a loan to the Rewa Durbar. The Colliery will be transferred to the Durbar with effect from 1st April 1899, and pending recovery of the cost the amount is written off the Capital Account of Railways by transfer to the Loan Account.

Cash Balance.

220. The year 1899-1900 is estimated to close with a cash balance in the Indian Treasuries of Rx. 16,679,443, which is less than the opening balance of the year by Rx. 392,600.

Comptroller General.

H. H. RISLEY,
Offg. Secretary to the Government of In

FORT WILLIAM,
LAND COMMERCE DEPARTMENT:

Memorandum by the Honourable Major-General Sir Edwin Collen, K.C.I.E., on Military Expenditure.

The estimates with which the Military and Marine Department of the Government of India is concerned, are—

I—Indian Military Estimates.

II—Home (India) Military Estimates.

III—Military Works Estimates.

IV—Marine Estimates.

2. They will be dealt with in this memorandum in the order given above.

I.—Indian Military Estimates.

Revised Estimates, 1898-99.

3. The revised Indian Military Estimates for 1898-99, compared with the budget for the year, show a net saving of Rx. 520,800 caused by an increase in receipts of Rx. 2,200 and a decrease in expenditure of Rx. 518,600.

Comparison—Revised for 1898-99, and Budget for 1898-99.

4. The more important causes which have led to the decrease in expenditure are as under :—

(a) There is a decrease of Rx. 344,300 on account of military operations and an increase of Rx. 53,200 on account of special services, thus giving a net decrease of Rx. 291,100 on account of military operations and special services. The decrease on account of military operations is mainly due to the large expenditure on account of field operations on the North-West Frontier, which was anticipated when the budget was framed, not having been incurred, owing to the cessation of those operations earlier than was expected, and also to various changes in the strength and organisation of the forces which were mobilised. On the other hand, the increase on account of special services is chiefly caused by the augmented garrisons in the Malakand and Tochi Valley not having been reduced on as early a date as was anticipated.

(b) Another cause of decrease, amounting to Rx. 65,000, was the fall in the prices of food supplies for men and animals.

(c) There was also a decrease of Rx. 41,200 on account of exchange compensation allowance, owing to exchange having been favourable during the year.

(d) Again, savings accrued owing to the authorised strength of British infantry being short by one battalion for a part of the year (Rx. 36,700); to the employment of the 1st Bengal Infantry at Mauritius, and to the retention for service in East Africa of the 27th Bombay Infantry and the head-quarters wing of the 4th

Bombay Rifles for longer periods than were anticipated. The Military Estimates were relieved of expenditure on account of the two latter items to the extent of Rx. 18,000 and Rx. 15,400, respectively, the charges having been borne by Her Majesty's Imperial Government. The Military Estimates were further relieved of expenditure to the extent of Rx. 24,100 on account of the pay and allowances of officers whose services were placed at the disposal of the Civil Department for plague duty.

(*e*) A lapse of Rx. 20,000 has also occurred in the budget for 1898-99, as the orders of the Secretary of State on the question of increasing the establishment of Commissariat-Transport officers could not be given effect to in that year.

(*f*) In addition to the foregoing, the following are the chief causes which contributed towards reducing expenditure :—

(*i*) Under Grant 1 (*Army and Garrison Staff*) there are savings amounting to Rx. 14,500 owing chiefly to absence of officers on furlough.

(*ii*) Under Grant 3 (*Regimental Pay, Allowances and Charges*) there are savings to the extent of Rx. 29,000, owing to fluctuations in the strength of the troops.

(*iii*) Under Grant 4 (*Commissariat Establishments, Supplies and Services*) the savings aggregate Rx. 28,500, and are due to smaller purchases of malt-liquor owing to decreased consumption (Rx. 14,000); and to less expenditure on other accounts.

(*iv*) Under Grant 10 (*Ordnance Establishments, Stores and Camp Equipage*) the savings aggregate Rx. 20,000 owing chiefly to fluctuations in establishments and smaller purchases of camp equipage and other stores.

5. The total decrease in expenditure was, however, to some extent counterbalanced by certain increases, the more important of which are the following :—

(*a*) Special bounties and advances of deferred pay were paid to a limited number of men of certain British regiments serving in India, to induce them to extend their service with the colours. This causes an increase to the extent of Rx. 31,900.

(*b*) Judging from the experience of the first nine months there will be larger expenditure to the extent of Rx. 15,000 on account of the ordinary conveyance of troops and stores.

(*c*) Owing to the existence of plague in India, it has been found necessary to give additional grants-in-aid, to certain cantonments in the Bombay Command, to meet expenditure on plague operations.

(*d*) Under Grant 9 (*Medical Establishments, Supplies and Services*) there is larger expenditure to the extent of Rx. 10,000 chiefly in the purchase of medical supplies.

Estimates, 1899-1900.

Comparison—Budget for 1898-99, and Estimate for 1899-1900.

6. The estimates for 1899-1900, in the net, amount to Rx. 16,095,700, or Rx. 1,155,100 less than the budget for 1898-99. This is due to a decrease in receipts of Rx. 16,400 and in expenditure of Rx. 1,171,500.

7. In comparing the estimates of next year with the budget for the current year, it will be found that the decrease in *receipts* is mainly due to less issues on payment of commissariat supplies being anticipated than in the current year owing to the cessation of field operations.

8. The decrease in *expenditure* is accounted for as follows:—

(*a*) A saving of Rx. 1,176,500 occurs in the provision for military operations and special services.

(*b*) In consequence of the higher rates of exchange adopted for the estimates of 1899-1900, a saving of Rx. 120,000 is anticipated in the pay of British troops and of Rx. 20,800 in exchange compensation allowance.

(*c*) A saving, amounting to Rx. 60,000, is due to an anticipated fall in the prices of food supplies for men and animals as compared with the prices adopted for the current year's budget.

(*d*) Again, savings to the extent of Rx. 21,200 will accrue owing to the cost of the 1st Bengal Infantry while stationed at Mauritius being borne by Her Majesty's Government.

(*e*) Another cause of saving, resulting directly from the cessation of field operations, is that the provision for expenditure on account of non-effective services is reduced by Rx. 22,500 as regards extra pensionary allowances, and by Rx. 14,500 for war medals.

(*f*) In addition to the foregoing, the following reductions in expenditure are anticipated:—

(*i*) Under Grant 3 (*Regimental Pay, Allowances and Charges*) savings to the extent of Rx. 45,000 are anticipated owing to probable fluctuations in strength and other causes.

(*ii*) Under Grant 4 (*Commissariat Establishments, Supplies and Services*) savings, amounting to Rx. 32,800, are expected, owing to (1) smaller purchases of malt-liquor (Rx. 12,800); (2) to the special grant (Rx. 10,000) made in the preceding year for purchase of transport animals to complete the authorised complement of mobilisation animals not having been repeated; and (3) to smaller provision (Rx. 10,000) as against Rx. 20,000 in 1898-99 having been made for additional officers for the Commissariat-Transport Department.

(*iii*) Under Grant 6 (*Clothing Establishments, Supplies and Services*) reduced expenditure of about Rx. 17,400 is anticipated, owing to smaller purchases of certain articles being necessary.

(*iv*) Under Grant 10 (*Ordnance Establishments, Stores and Camp Equipage*) there will be savings, aggregating Rx. 10,300, due chiefly to anticipated variations in establishments, and also to a smaller provision having to be made for the conversion of the equipment of the batteries of the field army to that suitable for the 15-pounder projectiles.

9. The foregoing decreases in expenditure will, however, be partly counterbalanced by certain increases, of which the following are the more important:—

(i) Increased provision to the extent of Rx. 114,600 has been made for messing allowance to the British Army. In this connection it may be mentioned that, as explained in my memorandum of last year, the details connected with the measures to be adopted in India, in furtherance of the improvements made in the position of the non-commissioned officers and men of the British Army in all parts of Her Majesty's dominions, were not settled when the budget for 1898-99 was closed; provision, therefore, was made therein for only Rx. 200,000. During the currency of that year the matter was, however, finally settled, and with the sanction of the Secretary of State certain measures were adopted in India with effect from the 1st June 1898. These measures involve the abolition of deferred pay, and the grant of a gratuity on discharge or transfer to the Army Reserve; also the grant of messing allowance of 2¼ annas per diem in addition to usual pay and extra-duty pay, and the free issue of groceries, for which the soldier had up to that time been required to pay 9 pies per diem. I may mention that the soldiers who were in the service at the time these changes were introduced had the option of accepting them, or continuing under the arrangements they were intended to supersede. These considerations and the fact that expenditure for the whole, instead of a part, of a year has to be provided for, account for the increase in the provision for this allowance in the estimate of next year.

(ii) Provision to the extent of Rx. 39,500 has been made for providing the mobilisation equipment of the additional corps (line of communications) included among the extra units of the field army; and of Rx. 37,600 for maintaining a reserve of compressed fodder to facilitate mobilisation requirements. A sum of Rx. 18,400 has also been provided for the supply of camel saddles for the 3rd and 4th Divisions and extra units of the field army.

(iii) A sum of Rx. 20,700 has been provided for the re-establishment of Cantonment Hospitals.

(iv) There will also be increased expenditure to the extent of Rx. 17,200 due to the raising of an additional Native mountain battery.

(v) Increased provision, amounting to Rx. 16,800, has also been made on account of the ordinary movements of troops and stores, as it is anticipated that the reliefs next year will be heavier than they were this year.

(vi) Larger provision to the extent of Rx. 14,000 has been made for camps of exercise.

(vii) Another cause of increased expenditure, amounting to Rx. 13,800, is the return of the head-quarters wing of the 4th Bombay Rifles and the anticipated return from Mombassa early next year of the 27th Bombay Infantry, the cost of which during its absence from India has been borne by Her Majesty's Imperial Government.

(viii) There will also be larger expenditure to the extent of Rx. 10,000 on account of medical supplies and services.

(*ix*) The expenditure side of the budget estimate for next year is also increased by reason of a smaller deduction in India to adjust excess provision in the Home Estimate—Rx. 48,300.

10. A statement is appended showing the net amounts under each of the 20 Grants for effective and non-effective services, and for military operations:—

	Strength.	
	1899-1900.	1898-99.
British Army	72,495	72,516
Native Army	143,021	143,533

		Net decrease Rx. ...		1,155,100		

* The bulk of subscriptions of officers to Indian Military Service Family Pensions is received in India, while most of the expenditure is incurred at home. The receipts in India, therefore, exceed the expenditure in India, and hence, as the figures in the above statement are *net*, there must be a minus entry.

† In my memorandum on military expenditure last year the heading "*Military Operations*" did not appear, although it did appear in the Financial Statement, the charges being included in my memorandum under Grant 14. The figure adopted above differs from that in the Financial Statement for last year, by reason of a change in classification involving a redistribution between ordinary charges and warlike operations.

II.—Home (India) Military Estimates.

Revised Estimates, 1898-99.

Comparison—
Revised for 1898-99,
and
Budget for 1898-99.

11. The second of the estimates with which the Military Department is concerned is the Home estimate for army effective and non-effective charges. The Home Budget Estimates for 1898-99 provided for a gross expenditure of £4,469,300, while in the Revised Estimates provision has been made to the extent of £4,324,100.

12. The saving of £145,200 in the Revised, as compared with the Budget Estimate for 1898-99, is chiefly due to decrease in the payments for ordnance stores, owing, to a great extent, to the reduction of demands made by India. It is also due to reduced payments on account of the furlough allowances of officers of the Indian Service, and of the pay and pensions of non-effective and retired officers of the Indian Service. These decreases are, however, partly counterbalanced by larger payments having been made to the War Office in settlement of their claims for 1897-98 on account of the effective and non-effective service of the British forces serving in India, than were anticipated when the Budget Estimate was framed.

13. There is also an increase of £10,400 on account of receipts in the Revised, as compared with the Budget Estimates for 1898-99, due chiefly to larger receipts being anticipated on account of the Indian Troop Service, and in the value of articles in possession of regiments on their transfer from the Indian to the British establishment.

14. The net figures of the revised, therefore, show a saving of £155,600 on those of the Budget Estimate for 1898-99 due, as explained above, to a decrease in expenditure of £145,200 and an increase in receipts of £10,400.

Estimates, 1899-1900.

Comparison—
Budget for 1898-99,
and
Estimate for 1899-1900.

15. The receipts and expenditure for 1899-1900 are as follows :—

	Receipts.	Expenditure.	Net expenditure.
	£	£	£
Effective	51,900	1,996,300	1,944,400
Non-effective	15,500	2,496,800	2,481,300
Total ...	67,400	4,493,100	4,425,700

16. Compared with the budget for 1898-99, larger receipts to the extent of £18,100 are anticipated in 1899-1900, owing to the same causes as those which have led to the figures on account of receipts being increased in the Revised Estimate for 1898-99. The total gross expenditure for 1899-1900 is, however, higher by £23,800 than the amount provided in the budget for the preceding year, owing chiefly to larger amounts being provided for payment to the War Office on account of the effective and non-effective services of the British forces serving in India, as the amounts adopted on this account in the budget of the preceding year were too low. These increases in expenditure are partly counter-balanced by provision for one transport for trooping service less than in the preceding year having been made, and by reduced expenditure being anticipated on account of pay and pensions of non-effective and retired officers of the Indian Service.

17. The gross charges on account of effective services include payments to the War Office in respect of the British forces serving in India, amounting, as estimated in the coming year, to £730,000, as against £721,000 in the estimates for 1898-99. These charges are based on the capitation rate of £7-10 for each man borne on the establishments of the British forces in India, with the addition of the charge for deferred pay issued to British soldiers on discharge or transfer to the reserve. In connection with the deferred pay, it may be mentioned that during the current financial year it was decided to abolish this concession and to substitute for it a gratuity, the effect of which will be to ultimately reduce military expenditure at Home. The other items included in the gross effective charges are furlough allowances and pay during the voyage of British forces serving in India (£108,000); furlough allowances of officers of the Indian Service (£230,000); Indian Troop Service (£260,600); passage of officers and troops otherwise than in transport (£19,000); miscellaneous (£19,000); and stores for India (£629,700).

The gross charges on account of non-effective services are made up of the retired pay, etc., of the British forces for service in India (£554,000); pay of the non-effective Colonels of Royal Artillery (£24,800); while the pay and pensions of non-effective and retired officers of the Indian Service amount to £1,800,000, the miscellaneous pensions to £86,000, and the Indian Military Service Family Pensions to £32,000.

18. The net expenditure for 1899-1900 is more by £5,700 than that for the preceding year; and, as explained above, this is due to an increase of £18,100 in receipts and an increase of £23,800 in gross expenditure.

19. Subsequent to the estimate of 1899-1900 being closed, it was decided to defer the supply from England of certain stores to the value of £11,093 for which provision was included in those estimates. This over-provision in the Home Estimates has been adjusted by a corresponding deduction in the Indian Estimates with the result that, as compared with the net expenditure of 1898-99, there will be a saving in 1899-1900 of £5,393 in the Home Expenditure.

20. The figures of actual expenditure in 1897-98, of the *Budget* and *Revised Estimates* for 1898-99, and of the *Estimate* for 1899-1900, are given below in detail for convenience of comparison :—

	Accounts, 1897-98.	Budget Estimate. 1898-99.	Revised Estimate, 1898-99.	Estimate, 1899-1900.
EFFECTIVE.	£	£	£	£
Payments to War Office in respect of British Forces serving in India	729,719	721,000	744,400	730,000
Furlough Allowances and Pay during voyage of British Forces serving in India ...	98,390	108,000	112,000	108,000
Furlough Allowances of officers of the Indian Service	195,800	230,000	202,000	230,000
Indian Troop Service	228,944	267,600	284,600	260,600
Passage of officers and troops otherwise than in transports	17,737	19,000	12,000	19,000
Miscellaneous	31,651	20,000	19,500	19,000
Stores for India	527,141	627,900	522,900	629,700
Total ...	1,829,382	1,993,500	1,897,400	1,996,300
NON-EFFECTIVE.				
Payments to War Office for Retired Pay, etc., of British Forces for service in India ...	506,847	517,000	527,500	554,000
Pay of non-effective Colonels of Royal Artillery	24,518	24,800	24,200	24,800
Pay and pensions of non-effective and retired officers of the Indian Service ...	1,771,591	1,820,000	1,760,000	1,800,000
Miscellaneous pensions, etc.	84,443	84,000	84,500	86,000
Indian Military Service Family Pensions ...	27,446	30,000	30,500	32,000
Total ...	2,414,845	2,475,800	2,426,700	2,496,800
Total, Effective and Non-Effective ...	4,244,227	4,469,300	4,324,100	4,493,100

21. The following table shows, in detail, the expenditure for stores (including freight) from 1893-94 to 1899-1900 :—

	ACCOUNTS.					Revised Estimate, 1898-99.	Estimate, 1899-1900.
	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.		
	£	£	£	£	£	£	£
Clothing	200,699	210,107	210,613	158,825	177,184	169,500	193,400
Ordnance and Miscellaneous	547,202	323,141	235,850	290,835	269,377	289,700	352,200
Medical	26,494	22,075	19,942	26,446	22,512	21,600	30,200

North-West Frontier Field Operations ...	...	...	...	...	...	..	5,300
Total ...	805,259	578,043	495,157	523,811	527,141	522,900	629,700

III.—Military Works Estimates.

Excluding English expenditure and exchange, the budget estimate for 1898-99 amounted to Rx. 1,135,800; the revised estimate of expenditure amounted to Rx. 1,113,700. There has, therefore, been less expenditure in India of Rx. 22,100.

The budget estimate for 1899-1900, excluding English expenditure and exchange, amounts to Rx. 1,299,600, or Rx. 185,900 more than that of 1898-99. The difference is due to an extra grant of Rx. 14,500 for the Barrack Department duties in the Madras Command, now taken over by the Military Works Department, and to a provision of Rx. 150,000 for defence works on the North-West Frontier.

The heads of the Military Works estimate are in round figures:—

	Rx.
For original works, including works in progress and those to be commenced	400,800
,, repairs	349,000
,, establishment	298,000
,, Barrack Department establishment, supplies, and tools and plant	86,000

The new works, 168 in number, including 63 in progress and 105 not commenced, comprise fourteen water-supply works on which Rx. 47,300 is to be spent, and Rx. 22,100 for coast and inland fortifications, the balance being made up of drainage works, hospitals, barracks, and Ordnance, Commissariat, Marine, and Remount requirements. Many of these new works are of a minor character, or are renewals. The demands are very large, and no fewer than 354 works cannot be provided for. If they had been provided for it would have meant an addition of Rx. 940,000 to the budget.

The laborious task of re-constructing the organization for the performance of the military works services has been completed, and I hope that the new arrangements will come into force at an early date.

IV.—Marine Estimates.

Revised Estimates, 1898-99.

Comparison—Revised for 1898-99, and Budget for 1898-99.

The net figures of the Budget Estimate of the Royal Indian Marine for 1898-99 were Rx. 142,500, the Revised Estimate stands at Rx. 123,200, showing a decrease of Rx. 19,300. This decrease in the net expenditure is caused by excess receipts amounting to Rx. 17,500, and a reduction in expenditure to the extent of Rx. 1,800.

The excess under receipts is chiefly due to large recoveries from the Home Government in connection with the employment of Royal Indian Marine vessels on Imperial Service.

The increases in expenditure (aggregating Rx. 8,400) are chiefly due to smaller recoveries for stores issued to, and works executed for, other departments

The decreases in expenditure (aggregating Rx. 10,200), are principally due to savings in matters of establishments and up-keep; reduced expenditure on repairs to Her Majesty's ships in Indian seas and Royal Indian Marine vessels at outstations; smaller payments of exchange compensation allowance; temporary vacancies and other items.

Taking the increase against the decrease, there is a net decrease of Rx. 1,800, and adding these figures to the increased receipts, Rx. 17,500, the result is a decrease of Rx. 19,300 in the Revised as compared with the Budget Estimate.

Estimates, 1899-1900.

Comparison— Budget for 1898-99, and Estimate for 1899-1900.

The net figures of the Marine Estimate for 1899-1900 are Rx. 136,950 against Rx. 142,500, the figures of the budget for 1898-99 showing a decrease of Rx. 5,550. This decrease is caused by an increase in receipts, amounting to Rx. 7,900, due to anticipated recoveries in connection with the employment of the *Clive* on Imperial Service, counterbalanced by increased expenditure to the extent of Rx. 2,350.

General Remarks.

Having reviewed the estimates with which the Military and Marine Department of the Government of India is concerned, I would now offer the following remarks in connection with the work of the Army Departments under the administrative control of the Military Department.

The past year has happily been one during which the army of India has enjoyed a much-needed rest, but the experiences of the year 1897-98 have shown certain weak points in the military system, and every department has been engaged in considering what remedies shall be applied, while the whole question of the military position on the North-West Frontier has been examined.

The deficiencies in the transport service have also been engaging attention, and a strong Committee under the presidency of Lieutenant-General G. E. L. Sanford, was formed to consider the organisation of that important service. The Committee has submitted a valuable and elaborate report and their recommendations are now under our immediate consideration. The question of improving the ambulance transport has been taken up, and the proposals of a Committee have been submitted. Another weakness that made itself conspicuous during the late campaigns was the deficiency in mountain artillery. We have received the Secretary of State's permission to raise an additional battery.

A decision has been arrived at regarding the gauge of frontier railways; the Nowshera-Dargai line will be pushed on the 2-foot 6-inch gauge; and we have formulated proposals for providing a stock of the plant required for field service tramways and railways.

Another subject to which we have given our attention is that of house accommodation in cantonments. As is well known, difficulties have frequently occurred in obtaining house accommodation in cantonments for officers of the army, and the existing rules on the subject having been found inadequate, it has been considered expedient to make better provision for that purpose by means of legislation. A bill was introduced on the 4th November 1898, The memorials

from house-owners and the opinions of local Governments and Administrations are being carefully considered.

I have already alluded to the proposed re-organisation of the transport. Last year I mentioned that the insufficiency of the existing complement of commissariat-transport officers had been brought specially to notice in the late campaigns. After very full consideration a large increase to the establishment was recommended. The Secretary of State for India has sanctioned an immediate increase of twelve officers and has called for further information to enable him to decide what further addition is necessary.

With a view to supply the hospitals and British troops with pure milk, steps are being taken to improve the management of dairies generally, and to work dairy and grass farms in conjunction. The supply of grass to the mounted branches has been, in recent years, a matter for anxious consideration, but I hope that we are now in a fair way to attain something like success. An experimental training class for British non-commissioned officers and men in scientific grass farming has been opened at Allahabad, and other measures are being taken to generally improve the supervision of grass farms, and to make them paying concerns. The rules for the provision of grass lands for the horses of Native cavalry in the Bengal and Punjab Commands have been extended to the Native cavalry in the Bombay Command.

Considerable progress has been made in various matters connected with the manufacture and supply of munitions of war. Proposals have been made for the establishment of a factory for the manufacture of cordite on a large scale. This will enable us to be independent of England for our cordite supply and will effect a considerable economy. A site has been decided upon at Jubbulpore for the establishment of a Central Gun-Carriage Factory for all India. The three existing factories at Madras, Bombay, and Fatehgarh cannot be kept up to date economically, and the establishment of a central factory will effect a saving in the cost of establishments. The Harness and Saddlery Workshops in the Bombay Arsenal have been closed, and the work transferred to Madras. In dealing with the working of the Ordnance Department during 1897-98 in my last year's memorandum, I referred to the fact that in order to provide a central authority for the expeditious and economical supply of stores to the arsenals and depots in India, the whole of the ordnance factories in this country had been placed under the direct control of the Director-General of Ordnance in India. I would now add that as a necessary sequel to this arrangement a central office for dealing with the audit and accounts of these factories has been ordered to be formed with effect from the 1st April 1899. Pole draught is being substituted for shaft draught in batteries of horse and field artillery in India. Horse artillery batteries are also being equipped to take cordite cartridges with 12-pr. projectiles, while the field batteries are being altered to carry 15-pr. projectiles with cordite cartridges. It has been decided to carry out the re-armament of British cavalry in India with the Lee-Enfield Magazine carbine, and the artillery with the Martini-Enfield carbine as funds become available.

The equipment of additional corps of the field army for duty on the lines of communication under the plan of mobilisation will be proceeded with in 1899-1900.

The provision of remounts for the army is always a matter of the greatest importance. Various improvements and economies have been effected, and on the whole it may be claimed that satisfactory Australian and country-bred remounts are issued to the army. With a view to developing mule-breeding in India, the purchase of additional donkey stallions from Cyprus was sanctioned, and we have engaged to take a certain number of stallions annually. The increasing difficulty of obtaining donkey stallions from the continent renders it imperative that other sources of supply should be opened up.

There is no more important question than that of the sanitary condition of the army. A great deal remains to be done, but year by year we are making improvements, endeavouring to find out defects and how to remedy them. More troops are stationed in the hills during the hot weather, barracks rebuilt or renewed, and a supply of good water provided at an increasing number of stations. Investigations have been specially made into the sources of the water-supply at various places, and the most stringent precautions have been taken locally to protect the men, as far as possible, from impure water. In the Native Army a considerable progress has been made in re-building the lines; but there are still many lines which ought to be renewed. Valuable sanitary work has been done by the officers appointed for the purpose, and special investigations have been made at those stations which have been particularly afflicted by enteric disease; and water-supply and drainage schemes have been pushed on. It is hoped that the establishment of cantonment hospitals will do much to mitigate the severity of a certain class of diseases. Owing to the conservancy arrangements in cantonments in the Bombay Command being of an unsatisfactory nature, measures are being taken for gradually introducing into that Command the system which has proved successful in the Bengal and Punjab Commands. Funds have been specially provided for the improvement of the sanitary condition of the important military station of Quetta.

Marine Department.

During the past year the work in the dockyards at Bombay and Kidderpore (Calcutta) has been normal, notwithstanding the difficulties which the occurrence of plague in the former place gave rise to. The vessels of the Royal Indian Marine have been employed in the usual trooping service, which has extended to Mauritius and Durban. Experiments have been made, with some success, in sending convalescents for a sea trip during the trooping voyages. Two vessels of the Indian Marine have been many years in the service, and, although at present efficient, arrangements will have to be made to replace them before many years elapse.

EDWIN H. H. COLLEN,

The 20th March 1899. *Major-General.*

Memorandum by the Honourable Sir Arthur Trevor, K.C.S.I., on the conclusions of the Conference of 1898 on Railway extensions in India.

PRESIDENT:
His Excellency the Viceroy. (The Earl of Elgin).

MEMBERS:
The Honourable Sir James Westland, K.C.S.I.
The Honourable Major-General Sir E. H. H. Collen, K.C.I.E.
The Honourable Sir Arthur Trevor, K.C.S I.
Mr. F. R. Upcott, Secy. to the Govt. of India, P. W. Dept.
Mr. A. R. Becher, Accountant General, P. W. Dept.

SECRETARY:
Captain W. J. McElhinny, R E., Offg. Under-Secy. to the Govt. of India, P. W. Dept. (Railway Branch).

The Railway Conference of 1898 met at Viceregal Lodge, Simla, on the 15th and 16th August 1898, and was constituted as noted in the margin. A representative of the Revenue and Agricultural Department was not included on the Committee this year, as with the exception of a group of light lines in the Madras Presidency, which are not urgent and the projects for which are incomplete, there were no famine lines brought forward that had not already been discussed in former years.

2. Twenty-three new projects were considered, of which five were set aside, one was recommended for construction by a Native State, and the remaining seventeen were held over as not yet ripe for a decision.

The line recommended for construction is the Tonk Branch, 10 miles in length and estimated to cost Rx. 40,000. It will connect Tonk with the Jeypore-Chambal Railway.

3. Of lines held over or set aside at the Conference of 1897, and neither hitherto included in the programme nor brought under negotiation outside the programme, two have now been recommended for construction by, or on the responsibility, direct or indirect, of, Government, one by a Branch Line Company, and two for construction without assistance by Native States and private enterprise.

The lines in question are shown below :—

No.	Name.	Approximate length.	Approximate cost.	Locality and agency.
	(a) By or on the responsibility, direct or indirect, of Government.	Miles.	Rx.	
1	Nowshera-Mardan . . .	40	117,600	Punjab. As part of the North Western railway.
2	Midnapur-Jherria . . .	122	1,221,200	Southern Bengal. As part of the Bengal Nagpur railway.
	(b) Open to Branch Line Companies.			
1	Chandipur-Taki . . .	39	172,000	Bengal. Branch of Bengal Central railway.
	(c) Reserved for Native States.			
1	Shoranur-Cochin . . .	64	917,700	Madras. Branch of Madras railway.
	(d) By private enterprise.			
1	Ammáyanayakanur-Kuruvanath .	75	500,000	Madras. Branch of South Indian railway.

4. Of the two lines recommended for construction by, or on the responsibility of, Government, No. 1, the Nowshera-Mardan, has been estimated for, and provision has also been made in the ensuing programme of railway construction for its commencement.

No. 2, the Midnapore-Jherria, has been accepted for early commencement of construction for the reason that it will open out all the coal-fields at present demanding railway facilities, and at the same time provide a valuable connection for the traffic between Upper India and the east and south coasts of India. The line, which will also have a famine protective value, has been provided for within the programme.

The Chandipur-Taki Railway has been accepted for construction without any Government guarantee, and arrangements are being made by the Promoters for carrying out the survey and preparation of the detailed project by the agency of the Bengal Central Railway Company. The Shoranur-Cochin railway has also been accepted for construction by the Native State of Cochin without any Government guarantee, while the formation of an independent Company to construct the Ammáyanayakanur-Kuruvanath as a tramway without a guarantee under the provisions of the Indian Tramways Act, XI of 1886, has been agreed to, subject to certain conditions.

5. As has been explained on former occasions, the extent to which it is possible to give effect to the recommendations of the Conference in regard to Capital Expenditure on railways other than such as are made by Branch Line Companies under the terms of Government of India Resolution No. 514 R. C., dated 17th April 1893, or by Native States or private Promoters without financial assistance, has been governed up to the end of the year now closing by the limitations of a programme covering the three years, 1896-97 to 1898-99. This programme provided for a total expenditure of Rx. 29,660,000, against which we expect to spend the following amounts:—

	Rx.
In 1896-97 (Actuals)	8,658,800
„ 1897-98 („)	8,145,500
„ 1898-99 (Revised Estimate)	8,387,500
TOTAL .	25,191,800

The Budget Estimate for 1898-99 was prepared for Rx 10,788,900, but owing to the late arrival of English stores consequent on the engineering strikes in England and other causes, the impossibility of working to the original programme was recognized some time ago, and the Revised Estimate has been reduced accordingly to the sum of Rx. 8,387,500 above shown.

For the three years, 1899-1900 to 1901-1902, on which we are about to enter, it has been thought advisable that we should work on a somewhat less ambitious programme, providing about 6 crores a year for new lines and extensions as against nearly 8½ crores under the previous programme. The chief object of this reduction is to give time for the earnings to overtake the expenditure. The forecast which has been prepared and approved by the Secretary of State works out accordingly to Rx. 20,322,100, distributed as under:—

	Rx.
1899-1900	6,772,700
1900-1901	6,728,400
1901-1902	6,821,000
TOTAL .	20,322,100

The additional amount, approximately Rx. 750,000 in each year, which it will be observed has been provided, is due to the inclusion in programme limits from this year of the open line Capital expenditure of the three guaranteed companies and the anticipated expenditure by branch line companies financed on the basis of a firm guarantee instead of a rebate, which items have hitherto been dealt with outside the programme.

The sum set down for expenditure during 1899-1900 is Rx. 6,772,700. In consequence, however, of the heavy lapse, amounting to Rx. 2,401,400, on the grant for 1898-99, to which reference has already been made and which was in a great measure due to short outlay in England consequent on the failure of contractors to complete orders placed with them for stores, it has been agreed, with the concurrence of the Secretary of State, to add a sum of Rx. 1,060,000, representing a portion of this lapse to the grant for 1899-1900, and a further sum of Rx. 1,090,000 subsequently reduced to Rx. 990,000 has been provisionally added under certain conditions with the concurrence of Finance Department, subject to Secretary of State's approval. With this addition the total amount available for expenditure on construction of Railways during 1899-1900 will stand at Rx. 8,822,700.

This sum has been distributed for expenditure on Railways as under :—

	Rx.
34.—Construction of Protective Railways	400,000
48.—State Railways - Construction	3,465,000
Capital of Indian Railway Companies	2,841,900
Branch Line Companies	168,000
Guaranteed Railways and Extensions	1,107,800
East Indian Railway Company's debentures . . .	750,000
Total amount available .	8,822,700

6. Statement A appended to this memorandum gives the programme as modified up to date, and shows also the progress made with such of the lines accepted by Government on the recommendation of the Conference for early construction as have been brought within the programme. The distribution of the amount it shows as available for expenditure during 1899-1900 and subsequent years will, of course, be liable to modification according to circumstances.

7. Statements B and C show how matters stand in regard to lines recommended for early construction at the cost of Branch Line Companies, Native States, etc., outside the programme, and either actually taken in hand or under consideration and negotiation with a view to construction; and statement D summarises the actual and anticipated progress of railway construction generally for the two years, 1898-99 and 1899-1900.

A. C. TREVOR.

APPENDIX A.

Statement showing the expenditure actually incurred and the estimated further expenditure to be incurred on railways to end of 1901-1902.

APPENDIX B.

Statement showing Railways recommended since 1895-96 for early construction outside the programme by the agency of—

(i) Branch Line Companies,

(ii) Native States,

(iii) Railway Companies to which free land and minor concessions are given, which have actually been commenced or arranged for, omitting those shown in last year's Appendix B as completed.

Railway.	Length.	Estimated or approximate cost.	Remarks.
	Miles.	Rx.	
(I) BY BRANCH LINE COMPANIES.			
(a) Lines shown as under construction in 1897-98.			
Segowlie-Ruksaul	18	99,800	Completed and opened to traffic.
Open	18	99,800	
South Behar	79	1,129,407	Under construction by the agency of the East Indian Railway Company. More than ¾ths finished.
Tapti Valley (Surat-Nandurbar-Amalner)	156	1,400,139	Under construction by the agency of the Bombay, Baroda and Central India Railway Company. More than ¾ths finished. First section to Vyara opened to traffic.
*Hurdwar-Dehra	32	300,000	Under construction by the State for the Branch Line Company. Tunnels completed and nearly half of line finished.
*Brahmaputra-Sultanpur	60	342,700	Under construction by the agency of the Eastern Bengal Railway. Nearly half finished.
Mymensingh-Jamalpur Jamalpur-Jagganathganj	54	205,500	Ditto More than ¾ths finished. First section to Jamalpur opened to traffic.
Under Construction	381	3,377,746	
(b) Recommended lines shown as under consideration or negotiation in 1897-98.			
Narwana-Kaithal Branch	23	100,000	Completed and opened to traffic.
Open	23	100,000	
Chandipur-Taki	39	172,000	Concession granted pending arrangements for financing the project and preparation of necessary survey and estimate of cost.
Amritsar-Tarn Taran-Sarhali	25	150,000	Concession granted. Commencement of work not yet authorised pending subscription of capital and submission of the detailed project.
	64	322,000	
(c) New projects since put forward.			
Nil.			
TOTAL (I)	486	3,899,546	
(II) BY NATIVE STATES.			
(a) Lines shown as under construction in 1897-98.			
Wadhwan-Dhrangadhra	21	66,200	Completed and opened to traffic.
Cooch Behar Town Extension	3	15,000	Opened to traffic.
Open	24	81,200	

* Under new arrangements these two lines will be included in programme from next year.

APPENDIX B—*concld.*

Railway.	Length.	Estimated or approximate cost.	REMARKS.
(a) Lines shown as under construction in 1897-98—contd.	Miles.	Rx.	
Birur Shimoga Branch	38	185,000	Under construction by the Mysore Durbar. Nearly $\frac{3}{5}$ths finished.
Hyderabad-Godavari Valley	390	2,988,200	Under construction by the Nizam's Guaranteed State Railways Company. More than half finished.
Guna-Bara Extension	74	602,500	Under construction by the Durbars concerned. About $\frac{3}{5}$ths finished.
Shadipali-Balotra (Jodhpore Section)	135	427,700	Under construction by the Jodhpore Durbar. About half finished.
Jeypore-Chambal (Jeypore-Sawai-Madhopur)	73	313,200	Under construction by the Jeypore Durbar. About half finished.
Cooch Behar-Alipore	11	25,000	More than half finished.
Bikaner-Suratgarh	114	247,330	Fifty miles opened for traffic, 64 under construction.
Pardi-Nandod	18	60,690	Under construction for the Rajpipla Durbar. Pardi-Umalla Section, 5 miles, opened to traffic. About $\frac{1}{3}$rd finished.
Under Construction	853	4,879,620	
(b) Recommended lines shown as under consideration or negotiation in 1897-98.			
Ludhiana-Dhuri-Jakhal	81	416,600	Construction sanctioned, but commencement as a railway project not yet authorised pending settlement of agreement with the Durbars concerned.
Gwalior-Bhind-Chambalghat	46*	86,300	Half finished. * Excluding 6·54 miles of the existing line, which will require slight alterations.
	127	502,900	
(c) New projects put forward since 1897-98 and commenced or arranged for.			
Tinnevelly-Quilon (Native State Section)	58	766,200	Accepted for construction without any Government guarantee.
TOTAL (II)	1,062	6,229,920	
(III) BY RAILWAY COMPANIES TO WHICH FREE LAND AND MINOR CONCESSIONS ARE GIVEN.			
(a) Lines shown as under construction or actually arranged for in 1897-98.			
Bengal and North-Western Railway Extension (Benares-Turtipur and Branches)	210	1,318,100	Under construction. More than half finished.
Barsi Road-Pandharpur Extension	33	133,925	Concession granted to the Barsi Light Railway Company. Work not yet commenced.
Nilgiri (Mettupalaiyam-Coonoor)	17	355,000	Completed, but damaged by heavy rain as it was about to be opened to traffic.
	260	1,807,025	
(b) Recommended line shown as under consideration or negotiation in 1897-98.			
Kalka-Simla	68	700,000	Contract executed and capital partly subscribed, but commencement of work not yet authorised, pending submission of, and sanction to, the detailed project.
Bengal Dooars Extensions	126	611,100	Contract executed, estimates sanctioned and work commenced.
	194	1,311,100	
(c) New projects put forward since 1897-98 and commenced or arranged for. *Nil.*			
TOTAL (III)	454	3,118,125	
GRAND TOTAL (I) TO (III)	2,002	13,247,591	

APPENDIX C.

Statement showing Railways recommended since 1895-96 for construction outside the programme by the agency of—

APPENDIX D.

Memorandum on the construction of railways.

1. At the commencement of 1898-99, *i.e.*, on the 1st April 1898, the total length of railways open for traffic was 21,198·08 miles, made up as follows :—

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies	3,791·74	
(ii) State lines worked by the State	4,491·40	
(iii) Guaranteed companies	2,588·13	
(iv) Assisted companies	584·27	
(v) Lines owned by native states and worked by companies	632·87	
(vi) Lines owned by native states and worked by State railway agency	123·86	
		12,212·27
Metre gauge—		
(vii) State lines worked by companies	6,630·28	
(viii) State lines worked by the State	643·99	
(ix) Assisted companies	237·20	
(x) Lines owned by native states and worked by companies	188·30	
(xi) Lines owned and worked by native states	858·36	
(xii) Foreign lines	78·25	
		8,631·88
Special gauges—		
(xiii) State lines worked by the State	36·25	
(xiv) Assisted companies	103·87	
(xv) Lines owned by native states and worked by companies	97·83	
(xvi) Lines owned by native states and worked by State railway agency	22·12	
(xvii) Lines owned and worked by native states	94·36	
		354·48

(xvi)	Cooch Behar (2' 6")		(t) 22·12
(xvii)	Morvi (2' 6")		94·36

(a) Although for convenience classed amongst State railways, this line is the property of the Bengal Central Railway Company.
(b) Worked by the Indian Midland Railway Company.
(c) Worked by the Bombay, Baroda and Central India Railway Company.
(d) Worked by the Great Indian Peninsula Railway Company.
(e) Although forming an integral part of the East Coast State railway, this line is shown separately as it is worked by the Nizam's Guaranteed State Railways Company.
(f) Worked by the Madras Railway Company.
(g) Including the Kotri-Rohri and Mushkaf-Bolán railways and 6·12 miles of military line not used for public traffic.
(h) Worked by the North Western State railway.
(i) Excluding the Bezwada extension, *vide* foot-note (e).
(j) Worked by the East Indian Railway Company.
(k) Including 2·17 miles, Trimulgherry troop siding, constructed but not used for ordinary public traffic.
(l) Although for convenience classed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.
(m) Worked by the Southern Mahratta Railway Company.
(n) Worked by the South Indian Railway Company.
(o) Excluding 3·66 miles of the Lucknow-Bareilly railway between Daliganj and Aishbagh.
(p) Including 4·60 miles of Bhávnagar Dock estates and Junágad quarry lines.
(q) Worked by the Bhavnagar-Gondal-Junágad-Porbandar railway.
(r) Including 3·99 miles of Bedi-Bandar Dock estate sidings.
(s) Constituted a railway from the 19th May 1896. Previously omitted.
(t) Worked by the Eastern Bengal State railway.
(u) Including the mileage of the Cherra-Companyganj railway, which is treated as a steam tramway for administrative purposes only. This line was damaged by floods and was open up to 30th April 1898 only. It was reopened for goods traffic from 23rd December 1898.
(v) Including 2·30 miles from Belgachhi to the Ganges constructed but not worked. This length was open for traffic from the 1st to the 8th October 1897.
(w) Includes the Gauhati-Jamuna Mukh section, 71·73 miles, temporarily closed to traffic from 13th June 1897 on account of damages done by earthquake.

2. And the mileage under construction or sanctioned for construction on the same date was 4,295·66 miles (e), as follows:—

		Miles.	Miles.
Standard gauge—			
(i)	State lines worked by companies	708·41	
(ii)	State lines worked by the State	672·38	
(iii)	Guaranteed companies	134·71	
(iv)	Assisted companies	293·20	
(v)	Lines owned by native states and worked by companies	76·00	
(vi)	Lines owned by native states and worked by State railway agency	80·32	
			1,965·02
Metre gauge—			
(vii)	State lines worked by companies	1,023·81	
(viii)	State lines worked by the State	76·13	
(ix)	Assisted companies	270·08	
(x)	Lines owned by native states and worked by companies	428·29	
(xi)	Lines owned and worked by native states	285·60	
			2,083·91
Special gauges—			
(xii)	State lines worked by companies	56·67	
(xiii)	State lines worked by the State	20·08	
(xiv)	Assisted companies	33·00	
(xv)	Lines owned by native states and worked by companies	48·80	
(xvi)	Lines owned by native states and worked by State railway agency	15·22	
(xvii)	Lines owned and worked by native states	72·96	
			246·73
	TOTAL		(e) 4,295·66

There was thus a grand total of railways completed and in hand, on the 1st April 1898, of miles 25,493·74 (f)

		Miles.	Miles.	Miles.

3. During 1898-99, *i.e.*, from 1st April 1898 to 31st March 1899, 540·62 miles of new railway were authorized as follows:

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies	129·16	129·16
Metre gauge—		
(ii) State lines worked by companies	136·87	
(iii) Lines owned and worked by native states	72·50	209·37
Special gauges—		
(iv) Assisted companies	156·30	
(v) Lines owned and worked by native states	45·79	202·09
TOTAL		540·62

And 1,451·60 miles were opened to public traffic as follows:

	Miles.	Miles.
Standard gauge—		
(vi) State lines worked by companies	398·28	
(vii) State lines worked by the state	463·98	
(viii) Guaranteed companies	4·35	
(ix) Assisted companies	58·25	924·86
Metre gauge—		
(x) State lines worked by companies	245·67	
(xi) Assisted companies	91·40	
(xii) Lines owned and worked by native state	62·50	
(xiii) Lines owned by native states and worked by companies	0·50	400·07
Special gauges—		
(xiv) Assisted companies	68·10	
(xv) Lines owned by native states and worked by companies	5·00	
(xvi) Lines owned by native states and worked by State railway agency	14·80	
(xvii) Lines owned and worked by native states	38·77	126·67
TOTAL		(h) 1,451·60

(a) Commencement of work not yet authorized.
(b) Provisionally sanctioned.
(c) The mileage given is exclusive of 6·54 miles of the existing light railway.
(d) Correction of mileage.
(e) Converted to standard gauge and added to the mileage of the Bezwada-Madras railway.
(f) Constituted a railway from the 3rd May 1898.
(g) Constituted railways from the 7th October 1898.
(h) Excluding the Bhatinda-Ferozepore conversion (59·35 miles), which is likely to be opened in April 1899.
(i) Excluding Segowlie-Raksaul railway, which is shown separately.
(j) Constituted a railway from the 23rd February 1899.
(k) The Gauhati-Jamuna Mukh section (*vide* foot-note *n* on page 119) has also been reopened.

4. The total length of open line at the commencement of 1899-1900, *i.e.*, on the 1st April 1899, will, therefore, be 22,650·96 miles, comprising:

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies	4,190·02	
(ii) State lines worked by the State	4,954·77	
(iii) Guaranteed companies	2,592·47	
(iv) Assisted companies	642·51	
(v) Lines owned by native states and worked by companies	632·87	
(vi) Lines owned by native states and worked by State railway agency	123·86	
		13,136·50
Metre gauge—		
(vii) State lines worked by companies	6,877·86	
(viii) State lines worked by the State	643·99	
(ix) Assisted companies	328·60	
(x) Lines owned by native states and worked by companies	188·80	
(xi) Lines owned and worked by native states	920·86	
(xii) Foreign lines	73·25	
		9,033·36
Special gauges—		
(xiii) State lines worked by the State	36·25	
(xiv) Assisted companies	171·97	
(xv) Lines owned by native states and worked by companies	102·83	
(xvi) Lines owned by native states and worked by State railway agency	36·92	
(xvii) Lines owned and worked by native states	133·13	
		481·10

(*a*) Although for convenience classed amongst State railways, this line is the property of the Bengal Central Railway Company.
(*b*) Worked by the Indian Midland Railway Company.
(*c*) Worked by the Bombay, Baroda and Central India Railway Company.
(*d*) Worked by the Great Indian Peninsula Railway Company.
(*e*) Although forming an integral part of the East Coast State railway, this line is shown separately as it is worked by the Nizam's Guaranteed State Railways Company.
(*f*) Worked by the Madras Railway Company.
(*g*) Including 6·12 miles of military line not used for public traffic, the Mushkaf-Bolán railway and the Kotri-Rohri chord line.
(*h*) Worked by the North Western State railway.
(*i*) Excluding the Bezwada extension, *vide* foot-note (*e*).
(*j*) Worked by the East Indian Railway Company.
(*k*) Including 3·19 miles, Trimulgherry troop siding, constructed but not used for ordinary public traffic.
(*l*) Although for convenience classed amongst State railways, this line is the property of the Bengal and North-Western Railway Company.
(*m*) Worked by the Southern Mahratta Railway Company.
(*n*) Worked by the South Indian Railway Company.
(*o*) Worked by the Assam Railways and Trading Company.
(*p*) Including 4·50 miles of Bhávnagar Dock estates and Junágad quarry lines.
(*q*) Worked by the Bhavnagar-Gondal-Junágad-Porbandar railway.
(*r*) Treated as a steam tramway for administrative purposes only. Temporarily closed to traffic from 1st May 1893 on account of damages done by floods. Reopened for goods traffic on 23rd December 1898.
(*s*) Worked by the Eastern Bengal State railway.
(*t*) Excluding 3·05 miles of the Lucknow-Bareilly railway between Daliganj and Aishbagh.
(*u*) Worked by the Bengal and North-Western Railway Company.

* Correction of mileage.

	Gwalior to Bhind		(e)45·79	

5. And the mileage under construction or sanctioned for construction on the 31st March 1899 will be 3,430·15 miles, made up as follows:

		Miles.	Miles.
Standard gauge—			
(i)	State lines worked by companies	439·29	
(ii)	State lines worked by the State	239·60	
(iii)	Guaranteed companies	135·05	
(iv)	Assisted companies	233·14	
(v)	Lines owned by native states and worked by companies	74·12	
(vi)	Lines owned by native states and worked by State railway agency	80·32	
			1,201·52
Metre gauge—			
(vii)	State lines worked by companies	927·93	
(viii)	State lines worked by the State	76·13	
(ix)	Assisted companies	178·77	
(x)	Lines owned by native states and worked by companies	427·79	
(xi)	Lines owned and worked by native states	295·43	
			1,906·05
Special gauges—			
(xii)	State lines worked by companies	56·67	
(xiii)	State lines worked by the State	20·08	
(xiv)	Assisted companies	121·20	
(xv)	Lines owned by native states and worked by companies	43·80	
(xvi)	Lines owned and worked by native states	80·83	
			322·58
	TOTAL		3,430·15

Making a grand total of railways completed and in hand at the commencement of 1899-1900 of miles **26,081·11***

And showing, after allowing for corrections of mileage, an advance on the previous year, of miles . **586·09**

(a) Commencement of work not yet authorised.
(b) Correction of mileage.
(c) Provisionally sanctioned.
(d) Excluding 55·06 miles of the Hyderabad-Shadipalli standard gauge railway to be converted to the metre gauge.
(e) Excluding 6·54 miles of existing light railway.

* Made up as follows :—

			Miles.
Completed and in hand at the beginning of 1898-99			25,493·74
Sanctioned during 1898-99			540·62
			26,034·36
Deduct—			
Decrease due to realignment of the Assam-Bengal Railway	6·89		11·55
Net decrease due to minor correction of mileage	4·66		
			26,022·81
Add—			
Gogra bridge and approaches at Bahramghat, previously omitted		3·27	
Increase due to new alignment of the Mari-Attock Railway	6·75		58·30
Increase due to new alignment of the Calicut-Cannanore Railway	6·00	55·03	
Increase due to new alignment of the Mandalay-Kunlon Railway	42·28		
			26,081·11

6. It is expected that the following lengths of unfinished line will be opened for public traffic in 1899-1900:

	Miles.	Miles.
Standard gauge—		
(i) State lines worked by companies	169.63	
(ii) State lines worked by the State	142.75	
(iii) Guaranteed companies .	36.00	
(iv) Assisted companies . .	233.14	
(v) Lines owned by native states and worked by companies . . .	74.12	
		655.64
Metre gauge—		
(vi) State lines worked by companies . . .	171.67	
(vii) Assisted companies . .	57.01	
(viii) Lines owned by native states and worked by companies . . .	347.98	
(ix) Lines owned and worked by native states . .	147.87	
		724.53
Special gauges—		
(x) State lines worked by companies . . .	56.67	
(xi) State lines worked by the State	20.08	
(xii) Assisted companies . .	20.20	
(xiii) Lines owned by native states and worked by companies . . .	12.80	
(xiv) Lines owned and worked by native states . .	80.83	
		190.58
TOTAL .		1,570.75

Leaving the undermentioned lines for completion in 1900-1901 or later:

	Miles.	Miles.
Standard gauge—		
(xv) State lines worked by companies . . .	269.66	
(xvi) State lines worked by the State . .	96.85	
(xvii) Guaranteed companies .	99.05	
(xviii) Lines owned by native states and worked by State railway agency .	80.32	
		545.88
Metre gauge—		
(xix) State lines worked by companies . . .	756.26	
(xx) State lines worked by the State . . .	76.13	
(xxi) Assisted companies .	121.76	
(xxii) Lines owned by native states and worked by companies . .	79.81	
(xxiii) Lines owned and worked by native states .	147.56	
		1,181.52
Special gauges—		
(xxiv) Assisted companies .	101.00	
(xxv) Lines owned by native states and worked by companies . .	31.00	
		132.00
TOTAL .		1,859.40

		Miles.	Miles.	Miles.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 11th, 1899.

Although no storm, during the week under review, has been comparable with that which crossed India during the previous week, yet the weather over Northern India has been feebly disturbed and unsettled and two or three shallow storms have crossed the country from West to East. As a result thunderstorms with light rain and hail have been experienced over North-West and North-East India, and dust-storms and gales of wind over the Gangetic Plain. On the first day of the week the showers were received over Assam, Upper Burma and East Bengal, but on the next day, the 6th, they were reported only from North-West India, where they were fairly general; on the 7th the showers were few and were experienced about equally in the North-West and North-East; similar weather prevailed on the 8th, but on the 9th the rainfall area extended both in the North-West and North-East, while the rainfall amounts were heavier in the North-East. On the 10th, rain almost ceased, but on the 11th, it recommenced in the North-West though it remained very light and scattered in the North-East. While this feebly unsettled and showery weather prevailed over Northern India, conditions in Central and Southern India were very quiet, and fine, dry weather, with generally higher temperatures than usual, prevailed throughout the week. In Northern India temperature conditions were fairly steady, thus in North-East India the mean temperature was more or less below the normal throughout the week, while in North-West there was an equally steady excess. The amount and extent of the deficiency in the North-East, as of the excess in the North-West, varied from day to day, but, generally speaking, the temparature conditions were very constant during the week.

Daily Summary.—*Sunday, March 5th.*—The barometer was falling briskly to rapidly over North-West India and a shallow storm was shown over the Western desert. Pressure was also relatively less over Bengal, while it was relatively high over the central parts of the country and the Assam Valley. The winds were Southerly and South-Westerly on the Bay coast, Easterly in North Bengal and Bihar and more or less variable elsewhere. The sky was cloudy in parts of North-West and North-East India and rain had fallen at Lashio, Mymensingh, Silchar, Sibsagar and Darjeeling, and a light snow-storm was reported from Minimarg (Kashmir). The mean temperature was low for the season over Bengal, Assam and Burma and across the head of the Peninsula; elsewhere it was excessive.

Monday, March 6th.—Pressure had changed little except over the east of the Punjab, Rajputana, the west of the North-Western Provinces, and the adjoining parts of Central India and the Central Provinces. In these regions the barometer had fallen briskly to rapidly, due to the advance of the depression which, on the previous day, was shown over the Western desert. A well marked Easterly current of wind blew across Bengal and up the Gangetic Plain, but elsewhere the winds were more or less variable. The sky remained cloudy in parts of North-West and North-East India. Light snow had fallen at Minimarg and light rain over the North-West Himalayas as well as at Sialkot, Rawalpindi, and Bhamo. The weather was very cool over North-East India and very hot for the time of year over North-West India, but elsewhere the mean temperature was about normal.

Tuesday, March 7th.—The depression noticed on the two preceding days had reached the east of the North-Western Provinces and the west of Bengal. Otherwise, there had been no great change. Easterly winds continued in North Bengal and up the Gangetic Plain, while North-Westerly winds were reported over Rajputana and North Bombay and variable breezes elsewhere. The sky was slightly cloudy in the extreme North-East and extreme North-West, while a thunderstorm had given 1·32 inches of rain and hail to Chittagong, and showers had been received at Silchar, Darjeeling, Mussooree, Simla and Murree. The heat was less than usual in Assam, Burma and the south of the Peninsula, but was excessive elsewhere, more particularly within a region extending from Jhansi through Rajputana to Upper Sind.

Wednesday, March 8th.—The barometer had risen briskly over the North-Western Provinces, and the depression which was shown there on the 7th had travelled east-south-eastward to Lower and South-West Bengal. At the same time a fresh depression had appeared over the Western desert. Strongish

South-Westerly winds were blowing at the head of the Bay and Easterly breezes continued to be reported from North Bengal, but elsewhere the wind directions were very variable. The sky was cloudy in parts of North-East and North-West India and showers had been received at Narayanganj, Silchar, Sibsagar, Mussooree and Chakrata. The heat remained low for the time of year in Assam Burma and the south of the Peninsula, and high in all other places.

Thursday, March 9th.—The Bengal depression had practically filled up, while on the contrary that noticed over the Western desert had travelled to the South Punjab and become deeper. The weather had continued cloudy and showery in parts of North-East India and had become more cloudy and unsettled in the North-West under the influence of the new storms. The temperature conditions were unchanged.

Friday, March 10th.—The barometer had risen everywhere. The depression noticed over the South Punjab had passed on down the Gangetic Plain and was shown over the North-Western Provinces where it was filling up. The winds were variable throughout the country. There had been no change in the general weather. Cloudy skies continued to be reported in the North-West and North-East, and showers had been received at a few stations. The Assam Valley, Central Burma and part of Madras reported lower temperatures than usual, but elsewhere the heat was excessive.

Saturday, March 11th.—Pressure had continued to increase. Readings were high along the foot of the hills and relatively high and very uniform over the Peninsula and the central parts of the country, while a band of low pressure extended from Upper Sind to the head of the Bay. Northerly to Easterly winds with showery and cloudy weather prevailed to the north of the band, while fine quiet weather prevailed to the south with light variable winds. The heat was excessive, except in Central Burma and in Madras.

Temperature.—The weather had been hotter than usual over by far the greater part of the country during the week under review. In North-West India the showers, which fell on and near the hills on most days of the week, had comparatively little influence on the temperature and never reduced the mean temperature to below the normal, but in the North-East, on the contrary, the showers exercised a considerable effect, and for several days Bengal, Assam and Burma reported temperatures below the normal average. Over the Peninsula the temperature conditions were more nearly normal, but towards the close of the week an area of low temperature appeared in the extreme South and subsequently extended northward over a considerable part of Madras.

The following table gives mean temperature variation data for the week :—

Province.	March 1899.							Mean variation of week.
	5th.	6th.	7th.	8th.	9th.	10th.	11th.

Mean for whole of India	+1·4	+2·0	+2·6	+2·2	+2·1	+2·4	+2·0	+2·1

The general temperature of the whole country was higher than usual on each day of the week, the excess ranging from 1°·4 on the 5th to 2°·6 on the 7th. The provincial variations show that the mean temperature was lower than usual on all days in Burma, on every day but one in Assam and on every day but two in South India, but that elsewhere with one or two trifling and unimportant exceptions the heat was steadily excessive throughout the week. The excess averaged over 6° in Rajputana, over 5° in Sind and over 4° in Chota Nagpur, the North-Western Provinces, the Punjab and Central India. The following were the highest maxima recorded on each day:—

March 5th, Cuddapah	102°·2
" 6th "	101°·2
" 7th, Cuttack	101°·9
" 8th, Cuddapah	102°·7
" 9th "	102°·7
" 10th "	102°·7
" 11th "	103°·2

Rainfall.—As shown in the earlier portions of this summary the whole of Burma, the Peninsula and the central parts of India have experienced fine quiet weather during the week under review and no rain whatever has fallen during that period over these regions. On the contrary, over Northern India the weather has been feebly disturbed, the unsettledness being caused by a series of slight depressions or storms which drifted from west to east across the country. The effect of these storms or depressions on the weather was everywhere slight, but this was particularly the case while they were traversing the North-West Provinces and West Bengal where their presence was mainly manifested in dust-storms and strong winds and where they hardly occasioned any rainfall. In Baluchistan and North-West India the depressions gave fair showers, more particularly on the hills, and the weather was squally and gusty, but it was mainly in North-East India that the influence of the depressions was felt, and in some parts of this area the falls of rain were moderately heavy.

The rainfall table at the close of the summary shows that during the week under review, rain averaging one-tenth of an inch or more was received in eleven of the rainfall divisions, *viz.*, East Bengal, the three Assam divisions, North Bengal, the Bengal hills, the hills of the North-Western Provinces, the Central Punjab, the Punjab hills, Sind and Baluchistan, the heaviest average actual fall being 2·47" in the Surma division of Assam and the lightest 0·10" in the Punjab hills. In all other parts of the country the rainfall of the week has been actually or practically *nil*. The average actual rainfall was heavier than the average normal rainfall by small or moderate amounts in East Bengal, the Assam hills, the Brahmaputra Valley, North Bengal and the Bengal hills, and by a considerable amount in the Surma district, but in all other places the fall was lighter than usual. The principal cases of deficiency were shown in the North Punjab and the North-West Himalayas.

The following are the principal large totals recorded at individual stations during the week:—

East Bengal—Munshiganj, Dacca	2·11 inches.
Assam—Sylhet	3·50 "
Mandakata, Gauhati	2·14 "

The three concluding columns of the table show that for the two weeks ending 11th March the rainfall has been heavier than usual in East Bengal, the Assam divisions and Bengal hills, but that in all the remaining divisions it has been less than the normal, and that over a considerable part of the country no rain whatever has been received.

Province.	Division.	Rainfall data for week ending 11th March 1899.			Rainfall data from 26th February to 11th March 1899.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, 26th February to 11th March.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 16th March 1899.*

T. W. HOLDERNESS,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 18th March.*—No rain fell during the week. Water supplies are adequate generally. Some small sowings are proceeding. The standing crops are generally good. The harvest continues to yield an almost normal outturn. Pasture is scanty but fodder is sufficient. The condition of cattle is generally good. Prices are almost stationary, but are slightly dearer in the Deccan and southern districts.

Bombay.—*For week ending 22nd March.*—Slight rain fell in parts of Sind during the week. The standing crops have been injured by high winds and rain in one taluka of Hyderabad and by rats in two talukas of Bijapur. American cotton has been blighted in two talukas of Dharwar. The opium crop has been damaged in parts of Baroda territory. The reaping of the late crops is progressing in sixteen and preparations for next season are being made in twelve districts. Cotton-picking continues in parts of Gujarat and the Karnatak. Fodder is sufficient. Prices have fallen in ten and risen in two districts; elsewhere they are stationary.

Bengal.—*For week ending 20th March.*—There was no rain during the week. Fine dry weather is reported throughout the Province. The harvesting of the spring crops, pressing of sugarcane, and lancing of opium continue. Spring rice and other crops in the ground are doing well. Ploughing for autumn rice and jute is in progress, and sowing has commenced in parts. Rain is wanted in some districts. There is plenty of fodder everywhere, except in parts of Midnapore. The price of rice is reported to have risen in some places, but prices are on the whole stationary.

North-Western Provinces and Oudh.—*For week ending 22nd March.*—With the exception of showers in the hill districts and in two of the western submontane districts, the weather has been clear during the week. The harvesting of the spring crops is progressing and threshing has begun in parts. Sugarcane planting continues and extra crops are being sown and irrigated. The extraction of opium is proceeding. Prospects are good. Supplies and fodder are sufficient. Prices are stationary or falling.

Punjab.—*For week ending 22nd March.*—Rain fell during the week in the Sialkot, Rawalpindi, Peshawar and Dera Ismail Khan districts. Ploughings for the autumn crops and cultivation of extra spring crops are in progress. Crops on irrigated lands are generally fair, but those on unirrigated areas are mostly suffering from the long drought; they have failed in Delhi and are withering in Lahore. Rain is badly wanted throughout the province. The yield of the spring crops is generally expected to be decidedly below the average. The standing crops have been damaged by rats in parts of Umballa, by caterpillars in parts of Ferozepore and Lahore and by hail in parts of Sialkot. Cattle are generally in good condition; their condition is reported poor in Delhi only. Fodder is said to be sufficient in all districts, except in Delhi, Umballa, Lahore, Shahpur and Dera Ismail Khan. Prices, especially of wheat, are rising in Shahpur, falling in Delhi, Umballa, Amritsar, Rawalpindi and Peshawar, and are unchanged elsewhere. Wheat is selling from $15\frac{15}{16}$ to 20, gram 20 to 22, barley 28, bulrush millet 18 to $22\frac{3}{4}$, maize 26 to 32, great millet 23 and rice 13 to 14 seers per rupee.

Central Provinces.—*For week ending 21st March.*—The weather is clear; the nights and mornings are cool but the day temperatures are high for the

season. The reaping of the spring crops is approaching completion in most districts and threshing has commenced. The planting of sugarcane is in progress in Chanda, Bhandara and Sambalpur. Some signs of distress are appearing in the open part of Damoh owing to want of employment. Water is getting scarce in parts of Mandla and Betul. Fodder is scarce in Sambalpur and in the Warora tahsil of Chanda. The price of wheat, gram and juar has fallen in 6, 3 and 5 districts respectively. The price of rice is on the whole steady, but there is a rise in the rate in Saugor and Seoni. The cheapest prices are:—wheat 21, gram 32, rice 22 and juar 28¾ seers per rupee. The dearest prices are:—wheat 12, gram 16, rice 11 and juar 21 seers per rupee.

Burma.—*For week ending 18th March.*—In Upper Burma the transplanting of dry weather paddy has been completed in several districts. The reaping of island and other miscellaneous crops is becoming more general. The standing crops continue to promise well everywhere. The price of paddy has risen slightly in Thaton and Pakokku and fallen to some extent in Prome and Thongwa; elsewhere it is stationary.

Assam.—*For week ending 21st March.*—Slight rain fell in Upper Assam and in the Naga Hills during the week. Ploughing for early and late broadcast rice in the Assam Valley districts is in progress. Sowing of early rice in the Assam Valley and of lowland winter rice in Sylhet has commenced. The gathering of mustard has been almost completed. The gathering of pulses, hoeing and plucking of tea and pressing of sugarcane continue. The prospects of sugarcane and tea are good. Land is being prepared for jute in Goalpara and for sugarcane in Darrang. Fodder is scarce in the Naga Hills. Water is insufficient in Nowgong and in parts of Sylhet. Prices—common rice, Sylhet 13, Silchar, Dhubri, Gauhati, Tezpur and Nowgong 16, Sibsagar 13 and Dibrugarah 14 seers per rupee.

Mysore and Coorg.—*For week ending 22nd March.*—MYSORE: The standing crops are in good condition. Paddy has been harvested in parts of Tumkur and ragi (*eleusine coracana*) in Mysore. Prices have risen slightly in Hassan and Kadur and have fallen in Bangalore, Kolar, Chitaldroog and Shimoga.

COORG: No crop standing. Water and fodder for cattle are sufficient. Prices of food grains are stationary.

Berar and Hyderabad.—*For week ending 22nd March.*—BERAR: The days are hot, but the nights and mornings are cool. The harvesting of the winter crops has almost been completed. Land is being prepared for the ensuing rain crop. Fodder and water are insufficient in parts of four districts. Prices are fluctuating.

HYDERABAD: No rain fell during the week. The spring harvest is still proceeding. The standing winter rice crop is in fairly good condition. Prices of grain continue to fall in parts. Prices—wheat 9½, coarse rice 10¾ and *jowari* 23½ seers per current sicca rupee.

Central India.—*For week ending 22nd March.*—No rain fell in Central India during the week. Agricultural operations are in progress throughout the Agency. The standing crops are in fairly good condition. The condition of opium is good. Prices are above the normal in Bundelkhand, but are normal elsewhere.

Rajputana.—*For week ending 22nd March.*—Slight rain fell in Bikanir during the week. Agricultural operations are satisfactory except in Merwara. The condition of the crops is generally good, except in Ajmere-Merwara. Crops are being harvested; the average estimated spring outturn in Ajmere is 11½ annas and in Merwara 6 annas. Fodder is scarce in 9 states. Prices are rising in 2 states, falling in 2, fluctuating in 1 and steady elsewhere. Emigration from the distressed Ajmere villages and from Merwara continues: 63 persons

emigrated during the week. The total emigration from Merwara up to date numbers 4,329 persons. The numbers employed on relief works were 401 in Ajmere, 4,225 in Merwara and 965 in Marwar. The price of gram in Marwar is 15, in Ajmere 18 and in Beawar 22 seers per rupee.

Kashmir.—*For week ending 21st March.*— The weather is fine. Prices continue below the normal. The price of rice is 27 seers per rupee.

JAMMU PROVINCE: *For week ending 22nd March.*—No rain fell during the week. The condition of the standing crops is fair. Fodder is sufficient. Prices are generally stationary, wheat selling at 18 and maize at 24 seers per rupee.

Nepal.—*For week ending 18th March.*—No rain fell during the week. The weather is seasonable with high winds. The price of rice is 8¾ seers per rupee.
